

# NOT just another checkbook program for the CoCo... THE Checkbook program.

## Checkbook+.

NEW from Sub-Etha Software. Written by Joel Mathew Hegberg.

- EASY Point-and-Click graphical interface with pull-down menus!
- Full-color graphing of your account using line, bar, & circle-graphs!
- Cut-and-Paste editing capabilities for rapid manipulation of your account(s)!
- All features supported with 128k, with thousands more records possible with 512k!
- Multiple disk continues for 512k support!
- Sort alphabetically or numerically, ascending or descending order!
- Export graphs to other Desktop Publishing software!
- Pop-up calculator just a click away!
- Fully compatible with Extended ADOS 3!

**Your investment:**  
**\$24.95**

Requirements: CoCo 3 with at least 128k, Tandy hi-res mouse interface, mouse/joystick, 1 disk drive (or more).

Advanced features found only in the more advanced checkbook programs on other computer systems are **now** available on your CoCo 3!!!

Also from Sub-Etha...

- **Multi-Basic** *Get more memory for BASIC without learning new commands!*  
Why waste all that "extra" memory? MultiBasic lets you use it to create massive modular BASIC programs...or, have several programs loaded at once and "switch" between them, pass variables, share sub-routines, disk-chain, and more!

Special- \$24.95!!

- **Mini-Banners** *Multiple-line banners on ANY printer!*

If you have a printer, ANY printer, you need this program!! Print banners with up to 16 lines of adjustable text. Works on ANY printer, including daisy-wheels and non-graphic printers! Includes dozens of fonts.

Special- \$16.95!!
