## CIII PAGES V. 2.5

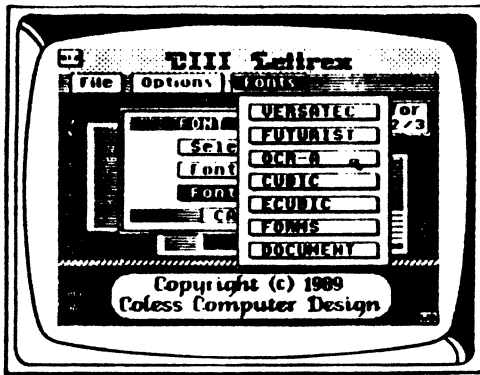

**\$29.95**

Desktop publishing for the CoCo3 on 640x192 Hi-Res screen or 640x384 Hi-Res page. CIII PagesE uses the process of interactive pagination whereby you work with the software interactively to place elements on the page. CIII PagesE features WYSIWIG, icons, pull-down menus, dialog boxes, smooth scrolling. Import any ASCII text and place text on any place on the page, type text from keyboard, create text columns, flow text around irregular shapes. Draw boxes, lines, polygons, rays, circles, ellipses, smooth draw, pattern fill and paint. Magnify, pixel edit, cut, copy, stamp or paste. In seconds rotate shapes, reduce, enlarge, stretch, flip horizontal or vertical. Import graphics or clipart from any CoCo graphics program, change CIII PagesE screens to MAX-10 graphics /CLP format. 512K CoCo system allows to work on 3 pages, full pages undo, copy to and from pages, batch option.

With CIII PagesE, the only limit is your imagination!

**System requirement:** 128K/512K CoCo3, Disk, Tandy Hi-Res Joystick interface, mouse/joystick, any DOS (not OS9).

**Printer support:** Epson or compatibles, Star Gemini, 10X/SG-10, Star NH1000 series, Panasonic (all), DMP105/106, CGP220 B/W, Imagewriter/Prowriter, C.Itoh 8510 Prowriter.

**CIII LETTRES \$14.95**

How often have you wished when using your dot-matrix printer that the printouts of your documents, letters, etc., looked like they were done with a typewriter, daisy-wheel printer or possibly even a laser printer?

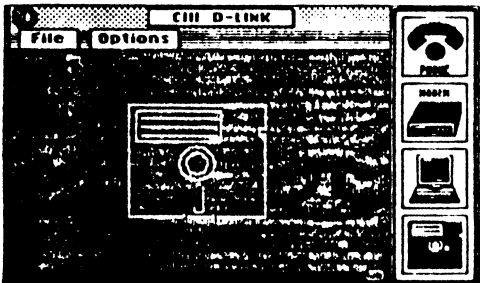

Now, there is CIII Lettrex to teach your dot-matrix printer some manners!

Although many of the newer dot-matrix printers have built in Near Letter Quality fonts, this program was developed to give all Epson and compatibles the capability of having additional NLO fonts. Now with CIII Lettrex you can have immediate access to 14 Letter Quality fonts such as Courier, Sans Serif, Orator, Peignot, etc.

Any ASCII text produced on a CoCo wordprocessor whether it is formatted, justified, columnized or unformatted can be printed to your printer using the new CIII Lettrex NLO fonts of your choice.

An additional feature lets you select printer baud rates, pitch and line spacing characteristics and the ability to print out a BASIC program listing, all from a single dialog box. The program will also allow you the capability to choose between PICA and ELITE on printers without built in NLO.

Requires: 64K CoCo 1, 2, 3, Disk, Mouse or Joystick, Epson or compatible printer (no 24pin or Tandy DMP's).

**CIII D-LINK \$14.95, 2/ \$19.95**

CIII D-Link is a Disk to Disk File Transfer program which allows you to copy files from one disk to another, and if you have a modem, you can copy files to or from a

remote computer disk drive. CIII D-Link uses a graphics point and click interface, pull-down menus and dialog boxes. The only typing required, is when you communicate with a remote person via the chat mode (modem required) or to rename a file. CIII D-Link also allows you to up and/or download files or messages from an unattended remote drive, if you have an Auto Answer Modem and it is properly set-up.

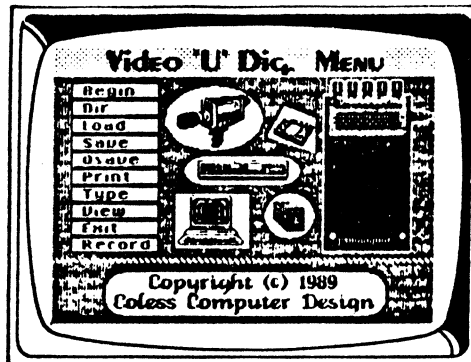

CIII D-Link features:  
Copy single files or all files on a disk, an entire disk including OS9 (35 Track) on the Host or Remote computers.  
View disk directories of the Host and Remote computers.  
Kill unwanted files from disk of the Host computer.

Rename any files on the disks of the Host computer.  
Enter the chat mode from within the program.  
Change the modem baud rate (300 - 4800).  
Look Up Calendar for the years 1989 to 2000.

Important: In order to establish a modem connection using CIII D-Link, both Host and Remote need to have a version of the CIII D-Link program.

Requires: CoCo3, RGB or composite monochrome monitor, Disk, mouse or joystick, optional modem.

DO NOT use Hi-Res Joystick interface, Tandy DCM (Direct Connect Modem) modem paks, RS-232 Modem Pak.

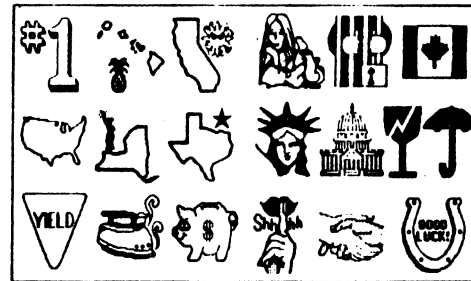

**VIDEO "U" DIG3 \$19.95**

Video "U" Dig3 is an all around PMODE4 creations and manipulation program especially designed for, but not only the COMPUTIZE VIDEO DIGITIZER. Capture images from VCR, Video Cameras, CoCoMAH I + II, or other PMODE4 graphic programs. Further manipulate these images by inverting, flipping, sliding, etc., then sending them to disk individually and/or sequentially.

A 512K CoCo3 allows you to save to memory 36 pictures and replay them, thus creating animation. All creations saved to memory can be saved to disk for later retrieval. Great for making titles, cartoons

or short film clips for your VCR.  
Requires: CoCo3, Disk, mouse/joystick, Optional: Computize Video Digitizer and Tandy Multi-pak, Epson or compatible printer.
