Dear Al,

I appologize for the lateness of my reply to your request for information on the MM/1. Unfortunately, everything to do with the MM/1 seems to be plagued with delays. Before I wrote to you, I had hoped to get pricing and availability information from Paul Ward. However, that still hasn't happened so I'm writing to you anyway.

I talked with Paul a few days after I received your email at which time he was able to give me pricing. He needed to check his stock and call me back with shipping information. He didn't. I've called him several times since then, but haven't been able to speak with him. I'll let you know when I eventually find out.

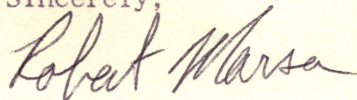

Current prices are as follows:

MM/1 Extended Kit: includes two boards, mini-bus with 2 sim slots,
high density floppy—\$975.00

MM/1 Extended Kit with no floppy: \$925.00

Case, hard drives, memory, and monitors are all extra.

Sincerely,

Robert Marsa
