# BlackJack Master™

Why not play to win?

BlackJack Master™ is an easy-to-use program that lets you build skills and have fun. It works with all IBM/Tandy or PC clones, PC/MS-DOS, and all displays. It has three program areas:

## The PLAY Mode

Improve your playing skills with realistic casino situations. Play for entertainment with friends, practice card counting, or try out new skills that you learned in other program areas. All casino rules are supported with a menu of 12 settable game options, and the number of decks can be varied from 1 to 99. You can have more than one player at the table, or add "computer players" that will use predetermined strategies from within the program. BlackJack Master™ keeps track of all bets, shows the height of cards in the discard shoe, and displays an optional card-count window. You also get instant feedback when your play does not match the strategy that you intended.

## The PRACTICE Mode

Sharpen your decision skills by practicing specific blackjack situations. Select "pairs" from the Practice Menu, and you are shown a randomly selected pair and a dealer up-card. Make your play: Hit, stand, double, split, etc.? You are instantly prompted if your play could have been better. In the Practice Mode, the hand is not played out. You will be shown another pair and dealer up-card situation. You can practice Pairs, Ace-hands, Majority hands, Difficult hands and much more. BlackJack Master™ will remember every hand where you made a mistake, and you can repeat those hands to improve your skills. The program keeps track of your decision accuracy, so you can see and measure your progress.

## Strategy SIMULATION & more...

Imagine being able to see the results of ten hours of casino play in less than two minutes. Enjoy mainframe computer analysis power, right inside your PC! BlackJack Master™ can simulate playing strategies at 37,000 hands per hour on any PC. Incredibly, over 1,800,000 hands per hour on 486/33 computers. Using your PC you can test, compare, and evaluate the long-term results of any playing strategy. There are Strategy Tables, plus optional Betting and Card-Count Tables. Change any table to quickly see its long-term effect on your playing strategy. After each strategy simulation there are complete reports that give you statistics by player hand totals and dealer up-card, deck distributions, betting results, and the estimated long term return for the playing strategy used. Find the strategy that's best, and easiest, for you.

**High Quality - Just \$29**

BlackJack Master's list price is \$69.95.
