EXTENSIVE SOFTWARE BUNDLE MAKES THE MM/1 AN UNBEATABLE VALUE
Software for PC, Mac, Amiga and other computers cost you more money

The popular MM/1 computer system includes dozens of software packages at no extra charge that cost you hundreds or even thousands of dollars on other computers.

The MM/1 Software Bundle Helps You Fully Master MM/1 Capabilities

* SAVE HUNDREDS OF DOLLARS -- On a PC, a professional 'C' language can cost from $100 to $500; get yours at no extra charge on the MM/1

* SAVE MONEY ON A FAST BASIC -- Modern BASICs cost $100 or more on PC, and even more on a Mac; write fast, clean, re-entrant, ROMable code with the MM/1's Microware BASIC -- no extra charge!

* KEEP UP WITH UNIX POWER USERS -- The MM/1's ODDJOB language combines features of UNIX's awk language with Berkely UNIX-style socket interfaces; multiprocess, pass messages, co-ordinate multiple programs in realtime; ODDJOB has sold for hundreds of dollars to CD-I multimedia program developers

* TRANSFER FILES FROM PC-DOS COMPUTERS -- the MM/1 includes PCF, designed expressly to ease transfer of data between the MM/1 and a PC clone; the MM/1 quickly integrates into your office!

* ORGANIZE -- homes and small offices can benefit from E-mail and print spooling -- for the small office or programming team, e-mail and print spooling are a dream; save hundreds or thousands of dollars over PC and UNIX solutions; all you need is included with the MM/1; share printers to avoid buying more printers than you need; improve communication with E-mail

* EASE HARD DISK BACKUPS -- with the MM/1's tape drive file manager; your MM/1 easily supports a SCSI tape drive because it includes two powerful software packages at no extra charge: SCSI drivers created with SCSIPak (tm), and SBF to manage tape-oriented input/output; save money, installation time, and hassles

* GET STARTED NOW -- with MicroEmacs 3.9, a standard text editor for programmers, writers, students; print with Proff, a formatter that supports special printer features, headers, footers, and more; similar products in the PC world cost a hundred dollars or more; EMACS on UNIX can cost over $500; MicroEmacs is included with the MM/1 and is configurable

* DON'T WAIT TO COMMUNICATE -- via modem with the MM/1 telecom software. The MM/1 comes with Sterm, supporting ASCII, XMODEM, and CompuServe B protocols, for accurate, flexible telecommunicating; the MM/1 also includes Kermit and CKermit; comparable to UNIX Kermits; for batch file transfers

* PROGRAMMERS CREATE PROFESSIONAL SOFTWARE -- with the bundled C Graphics Library, create sophisticated programs with menuing, dialogue boxes, mouse control, and more, with the included C graphics libraries; tested in the field, this graphics library has already created commercial databases, time management software, font editors, paint programs, and more; similar libraries for PC compatibles will cost PC owners extra dollars

* KEEP PRODUCTIVE -- the MM/1 ships with SCSI drivers that transfer data on your hard disk drive at between 1.2 Megabytes/sec and 1.8 Megabytes/sec; as fast as many workstations; with DMA, ideal for multimedia applications involving large sound files, graphics files, and animations

* SPEED UP floppy access with disk caching -- secure write-through caching can speed up disk reads dramatically

* SPECIAL! -- Fast OS-9 utilities from TechnoTeacher, Inc. were licensed especially for the MM/1, and included at no extra charge, from a company that leads the nation in OS-9 tools, teaching, and training

* USE MULTIMEDIA TOOLS TODAY -- Sound and graphics tools included; view your GIF files, unstuff Mac files, play sound directly from your hard disk drive, sector-by-sector, show PC AutoDesk Animator(tm) animations on your MM/1; access Amiga, Mac, and PC files now to prepare interesting multimeda presentations

* ENJOY demos and a game -- Test the drawing speed of your MM/1 with lines, circles, boxes, and filled boxes, drawn in random colors; watch colorful animations created on PCs and MM/1s; and play Tetrix, a challenging game for hours of enjoyment

Put your name in for an MM/1 today! Ask for current configurations and shipping times. Due to high demand, expect some delays.

IMS, Inc. hopes to be at immediate availability of MM/1 Super Personal systems (CPU, 9 Meg upgradability) by June 1, and MM/1 Super Personal Plus systems (adds 68340 accelerator CPU) by June 15.
