CEBBS

[The <C>oCo <E>lectronic <B>ulletin <B>oard <S>ystem]

Interested in running your own BBS?   This is THE most complete bulletin board
package ever put on the market for CoCo III Basic users. All in all, over FOUR
years of programming have gone into the system.   CEBBS runs on any CoCo III
with at least 1 disk drive, RS-232 Pak, and modem. Some of the features
include:

1] 5 programs for system execution which handle logon, menu coordination,
   message base, file transfer, and logoff.
2] 7 full editor programs for the sysop to use in maintaining the system.
3] Over 30 files in all are needed for operation.
4] Built in M/L clock, calendar, terminal driver, and file transfer program.
5] Most complete file transfer system for uploading and downloading
   ever made! It supports Xmodem, Ymodem, ASCII file transfers, system
   filetypes, keyword searches, full file descriptions, and more!
6] ANSI graphics are fully supported! Just like the IBM boards, CEBBS also
   allows colorful, even animated text to be displayed at both the host
   and user ends. Have 8 colors and full screen control at your command!
7] An unlimited number of menus can be incorporated into your system.
8] External programs such as games can be added in a snap!
9] Sysop has FULL control over each individual user's access to every
   option on the entire system.
10] All functions are controlled by menus. No modifications to any programs
   are necessary. Simply create a text menu in your favorite word processor
   or the one included and let CEBBS do the rest!
11] System can be accessed remotely by authorized persons for maintenance.
12] Fast message accessing due to the unique indexing system employed by
   the message base!
13] M/L protect function which will lock the system if the computer crashes
   or for some reason breaks into BASIC. Your system is 100% secure!
14] Includes a comprehensive 50 page manual detailing operations.
15] Fully compatible with RS-DOS, Hyper-I/O, ADOS3, and Disto DOS.
16] Entirely BASIC Windows compatible for those people with only one computer!

Rainbow Reviewer, Michael Toepke, had this to say about CEBBS:

*"...the best BBS I have seen for the CoCo...easy to install and
use...powerful...programming in all areas of the BBS is very crisp and
clear...in that [one month period], not a single error occurred..."* [Rainbow
Nov '89 pp.94-98].

Price: $49.95 [Regularly $59.95]

Upgrades to new versions of CEBBS are available for $8.95 + S/H. Original disk must be returned for this offer to be valid.

CEBBS Online Programs Disk

Seven of the best online programs for use with CEBBS! This is a must have package for the serious system operator. Available programs include:

1] An interactive blackjack game with pictorial representation of the cards.
2] An interactive craps game with pictorial representation of the dice.
3] An interactive hangman game with pictorial representation of the hangman.
4] Personal profiles program which will allow users to leave information
   [such as hobbies, career, sports] about themselves for other users to read.
   [Greatly encourages interaction in the message base!]
5] Voting booth with everything you'll need to start your own polls.
6] The Wall! A place for people to leave anonymous messages.
7] A BBS listing program that will end the drudgery of constantly updating
   information of other local boards. Includes alphabetizing feature!

Also included is a full editor to maintain the data files for these programs. Extremely easy to incorporate into CEBBS. Order now!

(Not yet reviewed)

Price: $15.95   [Requires CEBBS to operate]

* Special Offer * First time buyers purchasing CEBBS can buy the CEBBS Online Programs Disk for only $12.95! You save $3.00! (Offer also open to users purchasing an upgraded version of CEBBS. See above upgrade contingencies).

BASIC Windows

Without a doubt the most amazing program ever developed for your 512k CoCo III! BASIC Windows will allow you to have up to four windows running simultaneously in memory, under Basic!   OS9 IS NOT NEEDED!   BASIC Windows will run all Basic programs and many machine language programs, such as Radio Shack's Edtasm Assembler package. Imagine the convenience of being able to run a number-crunching program in one window while still playing your favorite video game in another!   For programmers, BASIC Windows is a must. Gone are the days of constantly loading and reloading programs during development. Have them all online, in different windows!   For BBS operations, BASIC Windows is indispensable!   Run a bulletin board, such as CEBBS, in one window and do programming in another!   You will never again have to wait to use your computer! Some of the features include:

1] Window prioritizing and locking.
2] Open files with read/write access to the same drive in multiple windows.
3] Full support of all graphics modes in all windows.
4] 2Mz [double speed] mode with no disk/printer problems.
5] Two or four window option.
6] Support for a ramdisk in the two window mode.
7] Forward/Reverse movement through the windows.

BASIC Windows will even run with alternate operating systems such as SpectroSystem's ADOS3 and Burke & Burke's Hyper-I/O!   Now you don't even have to abandon your favorite disk enhancement programs!   With so many features and so much power, you'll never remember how you ever lived without BASIC Windows!

Rainbow Reviewer, Terry Parks, had this to say about BASIC Windows:

"...if you're looking for an easy-to-use, cost effective alternative to some of the other windowing environments [such as OS9], BASIC Windows may just be the answer to your needs..." [Rainbow Nov '89 pp.99-100].

Price: $34.95 [Regularly $39.95]

Hard Drive Utilities Program

Tired of moving files from one directory to another manually on your hard drive? Worried about head crashes and lost data, but currently have no means of backing up your hard drive? Exhausted from searching through endless directories looking for a particular file? Hard Drive Utilities Program is just what you need! Some of the features include:

1] Backup one MSA to another.
2] Copy/Kill/Rename specific files selected.
3] Backup hard drive section to 35 track floppy in compressed format.
4] Restore a hard drive section with the previous disks.
5] Get an in-depth directory listing of an MSA.
6] Wild-card search for a specified filename.
7] Wild-card search and Copy/Kill/Rename matched files.

Rainbow Reviewer, Brian Smith, had this to say about Hard Drive Utilities:

"...piece of cake...fabulous...super...offers hard drive users helpful utilities...Hyper-I/O users whose hard drives are stuffed full of files will really appreciate this software...Hard Drive Utilities is just what the doctor ordered..." [Rainbow Jun '89 pp.129-130].

Price: $21.95 [Requires Hyper-I/O]

Disk Doctor

This program will allow the user to check a specified MSA for bad sectors. If one is found, the user is given the option of blocking out the granule relating to that sector in the GAT. There is a provision for printing a hardcopy of trouble spots on the device.

Rainbow Reviewer, Jim Franklin, had this to say about Disk Doctor:

"Disk Doctor is a welcome utility, especially for hard drive users with Hyper-I/O. It does its job quickly and easily and is very reasonably priced..." [Rainbow Aug '89 p.94].

Price: $17.95 [Requires Hyper-I/O]

Hard Drive Zap Program

Forgot to purchase a copy of the Hard Drive Utilities Program and make backups of your hard drive sections? Have you accidentally erased needed files or even worse, crashed your directory? If so, Hard Drive Zap Program is just what you need to recover that lost data. Some of the features include:

1] Move to any section on the device via arrow keys.
2] Go to a specific track or sector directly.

3) Move around the current sector being accessed with a cursor and modify the data in it.
4) Write out a modified sector to the device.
5) Get a directory listing on the user's screen or printer of the device's directory. Filename, filetype, file format, number of bytes in last sector used, bytes total used, last sector in use, and a complete granule count and trace are shown.
5) Access the GAT and view the entire sector on the screen in a hex format.
6) Print the ASCII representation of the data in the current sector.
7) Switch to another device within the program.
8) Access an online help menu.

A comprehensive 7 page tutorial on all types of file recovery techniques is included in the package! This will take the novice user step by step through the file recovery process. It goes in depth with examples and descriptions.

Rainbow Reviewer, Brian Smith, had this to say about Hard Drive Zap:

"It's easy...The software package comes with excellent documentation...works great on my floppies also...Make lost file recovery a cinch with Hard Drive Zap..." [Rainbow Jul '89 pp.115-116].

Price: $21.95 [Requires Hyper-I/O]

Auto-Park Utility

Running a BBS? Do you keep your computer system on unattended? Worried about head crashes? If any of these concern you, Auto-Park Utility is just what you need. By loading this all machine language program, the computer will automatically park all devices when no activity has taken place for a preset amount of time. Simply select the number of minutes until the devices get parked with a new BASIC command, 'SET PARK TO' followed by the selected number of minutes. Best of all, it uses no user memory!

(Not yet reviewed)

Price: $12.95 [Requires Hyper-I/O]

Hyper-I/O Ramdisk Driver

Interested in faster access to data than even a hard drive can provide? If so, a ramdisk is just what you need! This device driver will incorporate a ramdisk with the size of your choosing into your Hyper-I/O system. Have anywhere between 35 and 80 tracks [68 to 158 granules] of additional file storage! All that is needed is a 512k CoCo III and a desire to reduce wear-and-tear on your drives! A must for the true computer hacker or CEBBS users with Hyper-I/O!

Price: $8.95 [Requires Hyper-I/O and 512k CoCo III]
