

Announcing The Most Revolutionary  
Program For Users Of Basic...

## **BASIC Windows 2.0**

By: Kevin Berner  
From: KB Enterprises

At last, a program that will allow you to run up to four Basic and/or Machine Language programs in memory simultaneously on the powerful 512k CoCo III! OS-9 is not needed! BBS Operators: Imagine the convenience of being able to run your bulletin board in one window while playing your favorite video game in another!

Programmers: Imagine being able to develop programs without constantly having to load and reload programs! BASIC Windows will do all this and much more! Some of the features include: Window Prioritizing \* Window Locking \* Ability to open files with read/write access to the same drive in multiple windows \* Full support of all graphics modes in all windows \* 2Mz (double speed) operation with no printer/disk problems \* Two or four window option \* Support for a ramdisk in the two window mode. BASIC Windows will run with SpectroSystems's ADOS3 and Burke & Burke's Hyper-I/O! Now you don't even have to abandon your favorite disk enhancement programs! With so many features and so much power, you'll never remember how you ever lived without BASIC Windows!

**Price: \$34.95 (Regularly \$39.95)**
