

Introducing The Best Choice In Bulletin
Board Systems For Users Of Basic...

CEBBS 2.1

By: Kevin Berner
From: KB Enterprises

Interested in running your own BBS? This is THE most complete bulletin board package ever put on the market for CoCo III Basic users. All in all, over FOUR years of programming have gone into the creation of this system.

Just some of the many features include: 5 individual programs for system execution * 7 full editors for system file maintenance * Over 30 files in all needed for operation * Built in M/L clock and calendar, terminal driver, and file transfer program * Up/downloading via Xmodem, Ymodem, and ASCII protocols * Full ANSI graphics both at host and user ends * Provision for external program execution * Sysop can control access to EVERY option on the entire system * All functions are menu controlled - you customize your system with your own word processor or the one included * Remote system maintenance capability for authorized persons *

Compatible with RS-DOS, Hyper-I/O, ADOS3, and Disto DOS. CEBBS runs on any CoCo III with at least 1 disk drive, RS-232 Pak, and modem. Entirely BASIC Windows compatible for those people with only one computer!

Price: \$49.95 (Regularly \$59.95)
