**LETTERS TO THE EDITOR**

**WHAT THEY'RE SAYING ABOUT  
THE COCO REGISTRY!**

In my mail today was a package from Rick's. Opening it, I discovered a bright colored flippie. "The CoCo Registry", First Issue. I popped it in the drive and typed RUN "CR". It comes on screen and says "one moment please". It should say "several moments please", because it loads the entire data file for: Two Hundred and Sixty-Two CoCoists....Gosh Rick. Do you do all this in 128K? May I first off say, "my hats off Rick. That's quite a piece of programming!"

- Terry Simons, Editor Mid Iowa & Country CoCo

---

For a long time I have wondered how many people were out there who used their CoCo's regularly, as I do, and you have provided the perfect way to make contact. Your CoCo Registry is the best idea anyone in the community came up with in a long time, and your minimal cost makes it doubly attractive.....I have already been in contact with some of the people in the Registry and have made purchases from two of the ads on the flip side....I'm looking forward to the updates in the future. Thanks again!

- Paul Wolf, PA

---

As for the CoCo Registry, it has been fun running through it.

- William Fleck, NY

---

I enjoyed the Registry with my very own record number, 0162. Very impressive. I have decided to make use of it, especially the ads.

- Dale Heglin, Canada

---

Received my "CoCo Registry" disk a couple of days ago. Really good and useful program. Very easy to use. (Don't you feel a little lonely being the only listee from KY? <g>

- Mel Machesney, MI

---

The COCO REGISTRY disk arrived yesterday, Aug. 14th and I've had a few minutes to try it out....I found that we have 26 FRIENDS who have digitizers....I was very interested in seeing how many run at 40 track versus 35 track - more than half! (146 out of 262!)...My next interest was as to those that have hard drives - WOW! - 51.

- Godfrey Moll, MO

---

Thanks for returning your CoCo Registry form in time for inclusion in this first issue. THE RESPONSE TO THIS PROJECT HAS BEEN ALMOST UNBELIEVABLE! As promised, a copy of The CoCo Registry is now being made available to you at a very reasonable price. You'll receive the initial issue by mid-August, a follow-up issue in early December 1994, and a second updated issue in early April 1995 for a price of only \$12. I think you'll be more than delighted with this program. (Please read the description below and see the "Rendering of the 128 column CoCo Registry screen" on the back of this page.)

You'll also be delighted to know that many CoCo companies have taken advantage of our FREE ADVERTISING offer and you can take advantage of their various discounts and bonus offers. The collection of ads is on the back of The CoCo Registry disk.

Please send your check, cash, or money order now so I can send your CoCo Registry disk real soon (scheduled for mailing before August 15th).

Here's the address:

## FEATURES OF THE COCO REGISTRY

The first thing you'll notice in the drawing is the length of the screen. This drawing is just a little out of proportion...but the display screen of The CoCo Registry is actually 128 columns wide. That's 48 more characters than the screen we usually use. Now the CoCo cannot really display all those extra characters at one time, so you will press the left arrow or the right arrow to choose which part of the screen is in the viewing window. I've tried to place the items on the screen so that all relevant data can be viewed together.

Various areas of the display give you bits of information that you may want to know. Such as: you can

find out how many records are in the database, which record number is currently displayed, and the source of the data.

The options of The CoCo Registry are found in the area marked "MAIN MENU". You can choose to display specific classes of records by using the "MAKE A SEARCH TEMPLATE". Say you want to find everyone interested in GRAPHICS, just press #1, mark GRAPHICS, and then press #2 to "SEARCH AND SHOW". Only records with an interest in graphics will be displayed. The neat thing is you can use multiple search items. For example, you may want to know how many people in California are interested in FESTS and have a CoCo2. Just set the SEARCH TEMPLATE (#1), mark these three items, then SEARCH AND SHOW.

Now suppose you want to print out labels for the letters you might wish to send those folks. First you should SET PRINTER BAUD RATE (#5) correctly. Then press #3 to print out single labels or press #4 to print out 3 across labels.

You'll find The CoCo Registry useful, easy to use, and a lot of fun.

If you'll notice the enclosed drawing you'll see what happens as you move the highlighted bar thru the NAME SCROLL BOX. In my drawing William Rosenfeld's name is highlighted. The records for William will be very quickly displayed in the following boxes: THIS RECORD, INTERESTS, SUPPORT, and SYSTEM. The display is so fast I had to put a substantial time delay in the scrolling routine.

The CoCo Registry is designed to hold over 500 records in one "book". One side of the disk can hold two "books". My goal is to fill it up!

So this brief description should peak your interest and I believe you'll be most pleased when you receive your first issue of The CoCo Registry!
