SEE YOU THERE!

17th-18th NOVEMBER 1984 THE ROYAL HORTICULTURAL HALLS

WELCOME !

To the first ever Dragon and Tandy User Show. It's certainly not Our first show; Computer Marketplace (Exhibitions) Ltd. have organised various exhibitions before, some of which I'm sure you will have heard of..... The 1st and 2nd **OFFICIAL ACORN USER EXHIBITIONS..... THE SINCLAIR EDUCATION and THE ACORN EDUCATION EXHIBITIONS** and coming up in the **NEW YEAR** at the Barbican, **THE HIGH TECHNOLOGY AND COMPUTERS IN EDUCATION EXHIBITION.**

WE PLANNED the 6809 Show well over a year ago, and I must admit it was a blow to see Dragon Data go down, but a vast and loyal user Base dictates that the show must go on ! Incidentally the new producers of the Dragon, **EUROHARD**, have kindly donated a number of computers and software as **PRIZES**; visit the Club Stands for more details. In case you didn't know this is a **SECOND 1st** for Tandy, they brought out the very first Personal Computer way back in October 1978 at a cost of **£908** including V.A.T. See how that price has changed by visiting the Tandy Stand !

Thanks to :

TANDY CORPORATION, MICRODEAL & MICROCARE for distributing leaflets, posters and vouchers.

DRAGON USER, RADIO WEST and L.B.C. NEWS RADIO for media coverage.

Have a good show and see you all at the Northern 6809 Show at Manchester University 2nd & 3rd March, 1985.

Richard Bergin

THE DRAGON IS ALIVE AND WELL !

EUROHARD will continue to produce and support the Dragon.

DUCKWORTH HOME COMPUTING

All books written by Peter Gerrard, former editor of *Commodore Computing International*, author of two top-selling adventure games for the Commodore 64, or by Kevin Bergin. Both are regular contributors to *Personal Computer News*, *Which Micro?* and *Software Review* and *Popular Computing Weekly*.

EXPLORING ADVENTURES ON THE DRAGON

by Peter Gerrard £6.95

This is a complete look at the fabulous world of Adventure Games for the Dragon Computer. Starting with an introduction to adventures, and their early history, it takes you gently through the basic programming necessary on the Dragon before you can start writing your own games.

Inputting information, room mapping, movement, vocabulary – everything required to write an adventure game is explored in detail. There follow a number of adventure scenarios, just to get you started, and finally three complete listings written specially for the Dragon, which will send you off into wonderful worlds where almost anything can happen.

The three games listed in this book are available on one cassette.

Other titles in the series include *Sprites & Sound on the 64*, *12 Simple Electronic Projects for the VIC*, *Will You Still Love Me When I'm 64*, *Advanced Basic & Machine Code Programming on the VIC*, *Advanced Basic & Machine Code Programming on the 64*, as well as *Pocket Handbooks for the VIC, 64, Dragon, Spectrum and BBC Model B*.

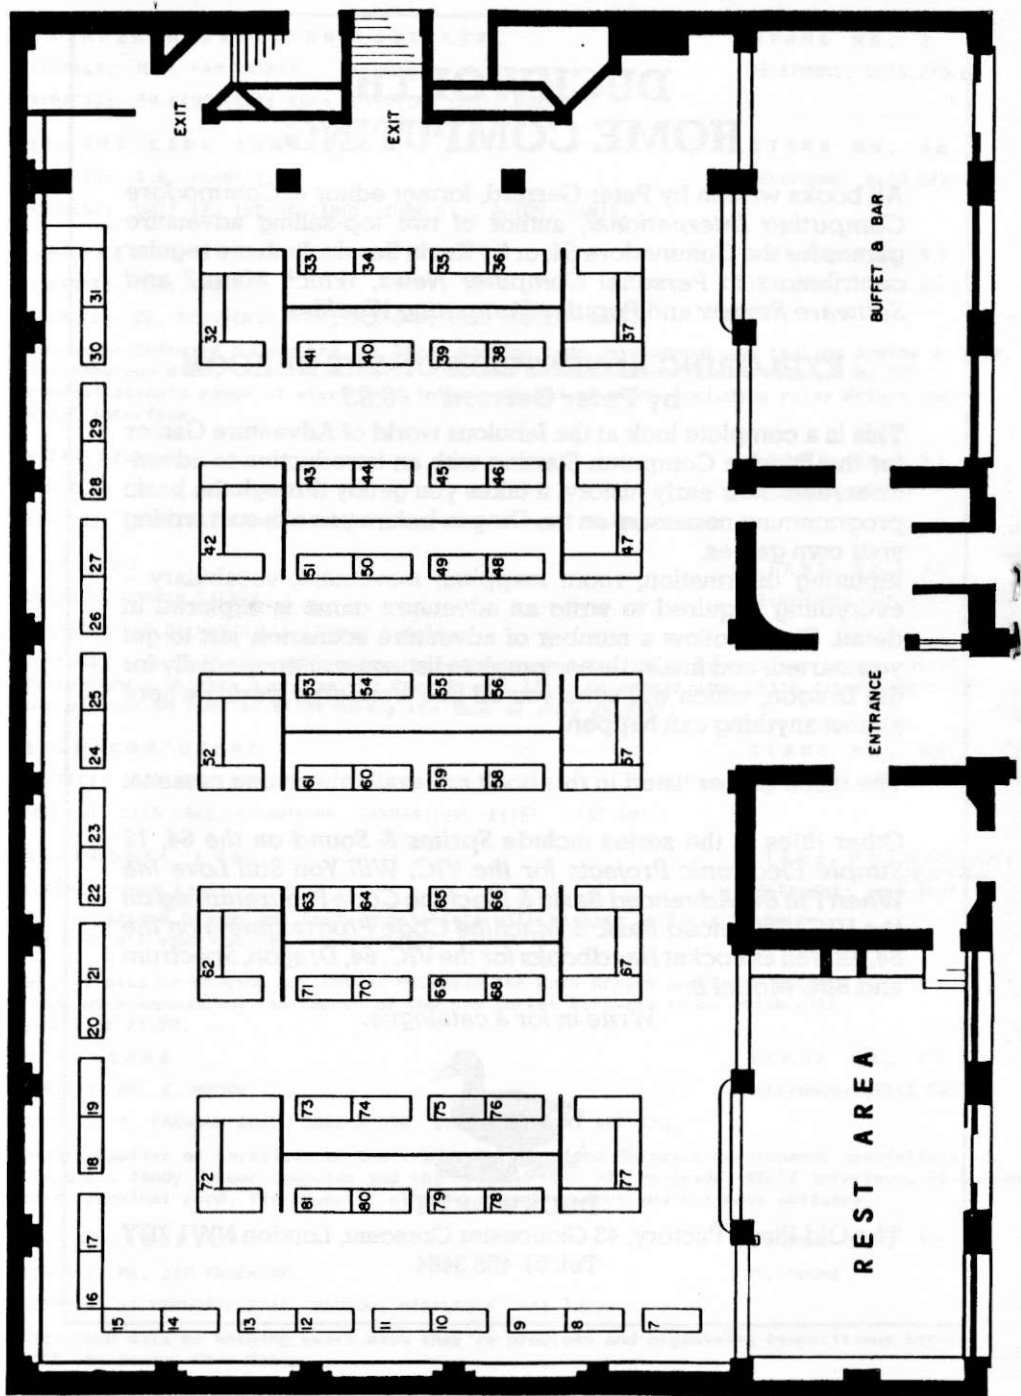

Write in for a catalogue.

NEW SKYJOUST

Fight for the supremacy of the sky from the back of your battle-ostrich, specially trained to joust. Armed with a laser lance defend yourself against snakes, torcupines and giant birds which, if you do not kill them before they land, lay eggs. These quickly hatch out more snakes. 3 different screens, joystick or keyboard control.

£3.95

J. MORRISON FOR DRAGON 32

MICROS Mission XXI

Penetrate the asteroid belt to land on the planet Zynphon and collect liquid Zynphonium fuel.

£3.95

NEW STARFIGHTER

Fly over the surface of a hostile planet to seek and destroy enemy craft. The landscape scrolls beneath you as you bob and weave under joystick control. Beware the aliens on the mountain tops: some of them will take off and home in on you. When darkness falls the enemy nightfighters warp into battle. Good luck commander!

£3.95

J. MORRISON FOR DRAGON 32

MICROS Bonka

BONKA. Climb the ladders and dig holes to trap the "Meames" before they kill you.

£3.95

NEW LASERGATES

You are trapped in a time warp maze on the derelict asteroid Cretos. Through the ancient passages wander at random the robot guardians left by the old ones, killing all intruders in their path. Because there is no gravity the space winds blow to and fro through the corridors, carrying you before them. Your only means of survival is the old limbock phaser which you found in the central hall and the portable switchpad which allows you to control the opening and closing of the doors in the passages.

£3.95

MAURICE MINOR. Out for a quiet drive in your Morris Minor you inadvertently wander on to a race track and find yourself in the middle of a Grand Prix!

£3.95

DROID5: stop the Droids removing lead shields to release the bombs which will destroy the world.

£3.95

DRAGON 2: Snakes. Lander and invaders. 3 games for

£3.95

DRAGON 4: Pterodactyl, Torpedo Run and Hornets. 3 games for

£3.95

CHESS: 8 selectable levels of skill, cursor control of moves, supports Castling and En Passant.

£3.95

VULTURES: Galaxian-type game in which a flock of vultures guard their eggs. Just when you think you've killed them all, the eggs hatch!

£3.95

CRUSAIDER: In quest of the Holy Grail you, our intrepid hero, have to overcome seven increasingly difficult stages to reach your goal. No one has yet made it!

£3.95

EDITOR/ASSEMBLER + DISASSEMBLER + MONITOR

Two pass global type. Supports labels of six characters. Directives: ORG, RMB, FCB, FDB, FCC, REM. Hexadecimal Arithmetic. Powerful debug Monitor includes 14 commands plus set break points, selection of useful sub-routines and Disassembler. Altogether a powerful program package with information for the serious user or interested beginner. Supplied on cassette.

ANDTEK

***** FLEX THE TOTAL CONCEPT *****

32/64K Dragon or Tandy colour TRS80

Are you using Flex (tm) on a CoCo and fed up with the deficiencies of your system? Or are you thinking of entering the Flex world? Then PLUS... is for you!

Flex was never designed to be run on a computer that has: (1) Non standard 80 column screen. (2) no assist debug MONITOR. (3) lack of Serial Ports.

PLUS... was evolved to give the CoCo owner a full Flex working environment. The ability to skip between the DEBUG MONITOR and Flex (+++). Runs any standard Flex disk or program, in either single or double density.

Plus... can be expanded from the basic disk interface which includes a battery backed Real Time Clock and Debug Monitor price £129.00 To a fully populated interface with 2 added Serial Ports, (connect to any 80 column VDU), and 8K of RAM for Flex on 32K CoCo Price (for complete system) £195.00. Flex, Editor, and Assembler £75.00 (prices do not include VAT) Flex is a trade name for Technical Systems Consultants Inc.

ANDTEK DATA DESIGN 41 PEBWORTH ROAD HARROW. HA1 3UD.

Delta 14D interface to run a Delta 14B handset on a Dragon

- ▲ Nylon encased steel shafted joystick lever
- ▲ Ball and socket joint
- ▲ Fast sprung return to centre
- ▲ Smooth linear analogue control
- ▲ Twelve programmable buttons
- ▲ Buttons and joystick life-tested to millions of operations
- ▲ Simple to install - just plugs in
- ▲ Made in Britain
- ▲ 12 months' guarantee

Stand 53/54

The delta 14D interface plugs into the cartridge port of the Dragon computer. A cable runs from the interface to one of the joystick ports. A delta 14B handset which is a combined joystick and 14 button keypad, plugs into the 'D' socket on the interface. A program can now be written to the interface to read both the joystick and the keypad. This means that far more complex programs, like flight simulators or graphics design programs, can be controlled from this handset. This makes it far more comfortable to use as you can sit back from the keyboard and concentrate on the screen. Another possibility is that the keypad can be used as a numeric keypad. The keypad can be used remote from the keyboard, alongside a set of figures that you wish to read and enter into the computer.

Delta 14b £14.95
Delta 14d £14.95
C.A.D. 32. £4.95 (Cassette)

Special Introductory offer
Delta 14b, d & C.A.D. 32
£29.95

The delta 14B handset is a sprung return to centre analogue joystick developed over many years on a video game machine. The keypad version is in use by thousands of BBC users and the joystick part is already in use by thousands of Dragon users who own our delta 3D joystick.

C.A.D. 32.

A computer aided design program that uses the facility of the delta 14b handset to the full. The joystick controls the cursors and draws freehand as well as scrolling the page up and down. The keypad issues instructions and numbers to draw lines, boxes, triangles, circles or ellipses and also to fill in different shades, 'gel' shapes and place them elsewhere or reflect areas on the 'x' or 'y' axis. Finished or part finished drawings can be saved on tape and reloaded.

* CAD 32 is available separately on cassette *
