**10% off on any two**

**15% off on three or four**

**or 20% off on five or more!!**

## DISTO PRODUCTS-

Great savings on the full **DISTO** line of disk controllers, memory upgrades, and expansion devices, such as:

**SUPER CONTROLLER 2** -- only **\$105!!**

**FOUR-IN-ONE BOARD** ---- only **\$100!!**

or both of the above for only **\$195!!**

**ONE-MEG UPGRADE** ----- only **\$139!!**

## And, a CoCoFEST EXCLUSIVE!!

CoCoPRO! is proud to announce the introduction of a **new game** from the illustrious **Steve Bjork**, that will be an instant hit with CoCo fans everywhere:

## MARTY'S NIGHTMARE- the Search for the Lost Seminar

In this humorous arcade tribute to Marty Goodman, you can learn just how Marty must feel having ALL that CoCo knowledge!! This 512k arcade game features hardware scrolling, over 100k of digitized sound, GREAT graphics in the Bjork tradition, and LOTS of laughs for anyone who loves the CoCo community, whether or not they usually play games on their CoCo. This game will be sold **ONLY** to those at the show, and is sure to become an instant CoCo collectible! Stop by- you **WON'T** want to miss this one!

*Welcome to the 1st annual*

# ATLANTA COCOFEST

**October 6-7, 1990**

**BROUGHT TO YOU BY: CoCoPRO! Products**  
**HOST CLUB: The Atlanta Computer Society**

# A revolutionary new computer, conceived by you. The MM/1.

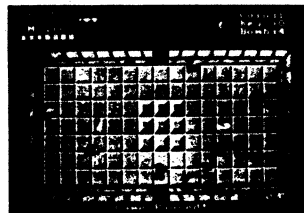

Network Capable. 16.7 Million Color Palette. Up to 5 Serial Ports. 2-Channel Digital Sound. From IMS, the company that brings you more.

Stop by our booth to see the MM/1 and register for free prizes.

**NEW FOR 91**

## SUNDOG SYSTEMS

### The Quest for THELDA

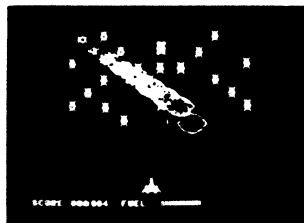

Better men than you have failed the quest, but the hand of the good princess Thelda is too much to resist! Stolen by the evil necromancer Divinax, she has been sacrificed far from prying eyes and it is now up to you to regain the pieces of the mystical Life Force and save the fair lady. The Quest for Thelda is an outstanding arcade program that combines action and adventure to bring you an incredible video game playing experience. Travel throughout over 500 different screens searching for magical objects and spells, fighting horrible creatures, and gathering the various parts of the Life Force guarded by ever-increasing terrors. You'll enjoy the highest quality 320x200 resolution 16 color graphics and digital sound effects that you've come to expect from Sundog Systems. The game play is fast and furious, and only you can rescue the princess and complete the LEBEND OF THELDA! Req. 128K CoCo 3, disk drive, and joystick (2-button joystick supported).

**\$34.95**

Hint book now available for Thelda! Contains clues, maps, and even a BASIC program to modify your own characters! \$4.95

### ZENIX

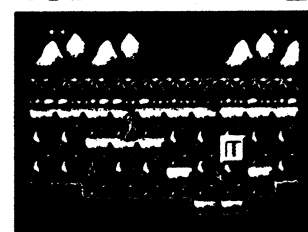

You have been chosen to pilot the spacecraft wielding the plutonium plasma laser against the nefarious insectoids, the Zenians. These bugs have been ripping off the space trade lines for years; now they're about to find a victim who can fight back! Beat back the swarms of pests to their home planet, Zenix, and use the laser to end the menace once and for all. Zenix is a lightning fast arcade game for the 128K CoCo 3. The 320x225 16 color graphics are amazing, as are the digital background music score and effects, all on a 128K computer! The fast action and game play will astound you in this GALAGA of interdimensional. Plug in your joystick and strap in for the ride of your life! Call to order a demo disk to see the action before you buy! Req. 128K CoCo 3, disk drive, and joystick.

**\$29.95**

Visa, Mastercard, Check, Money Order, and COD (USA only, please) accepted. All foreign orders must be sent in US currency. Money Orders include \$2.50 for shipping in USA and Canada. \$5.00 Foreign, \$3.00 extra for COD orders. PA residents add 6% sales tax. Dealer inquiries welcome. Authors: we're looking for new software!

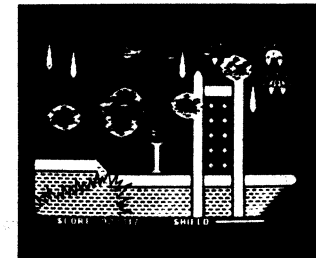

### ★ THE ★ CONTRAS

In the year 2071, a mysterious object landed on Earth, heralding the alien invasion of the Red Falcon. Only two courageous soldiers have a hope of stemming this alien infestation. Armed with your military training and the latest weapon technology, you and a friend must fight back the horde. Sundog Systems presents our second 512K game, The Contras. You'll see why we decided to use 512K on this project! Amazing graphics with 320x225 resolution, 16 color full screen animation and horizontal smooth scrolling! Background digital sound effects and real-time music! One or two player action AT THE SAME TIME! You'll agree that this is one of the best arcade games yet for your 512K CoCo 3. Needless to say, playing here won't be easy. Playing The Contras will be tougher! Req. 512K CoCo 3, disk drive, and 2-button joystick.

**\$34.95**

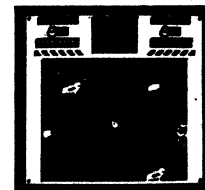

### Crystal City

The superior technology of the evil Overlords has endangered yet another innocent planet; however, this one contains the Crystal City, bastion of democracy and independence. Earth has had enough! Break through level upon level of their virtually invulnerable defenses, defeat the end guardians, and make your way ever closer to freeing the slaves of the Crystal City! This amazing arcade game is an achievement in its own right. Full 128K/512K utilization! Super fast horizontal hardware scrolling on the 128K computer! Wild digital sound effects and background music score! 30 minutes, or over 30 megabytes, of non-repeating 320x200 resolution, 16 color graphics! This game has it all; order a demo disk to see it first! Can you save the Crystal City from unspeakable...?

**\$34.95**

### Sinistaar

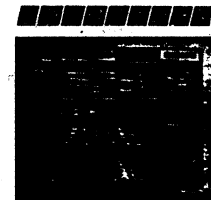

You've raved about this 512K arcade game! The graphics and animation are amazing! You've got to hear the digital sounds! 512K (three disks) packaged with excitement. 512K CoCo 3 only. \$34.95

### KYUUN-SAI TO BE NINJA

This martial arts arcade game remains a CoCo 3 phenomenon. One of our best sellers to date! Play the incredible combat experience that you've been missing, and call for the availability of the OS-9 version. 128K CoCo 3 action. \$29.95.

This 128K/512K sound sequencing system has become an immensely popular program. Create musical scores using polyphonic digitized sounds and a user-friendly point and click editor. Call to order the SoundTrax demo program, and get 10% off your purchase with receipt. \$34.95

New Available: SoundTrax instrument sample disks! Guitars, strings, woodwinds, and just plain word instruments for your composing pleasure. Completely compatible with the SoundTrax system. 3 floppy (2 sides) disks full of sounds: \$12.95 each or \$29.95 for all three.

### ALSO AVAILABLE:

## What Customers Say About ADOS Products:

I can hardly believe that my CoCo 3 is capable of doing what it now does! The features you have incorporated are fantastic, and I find it a pleasure instead of drudgery to do such things as edit programs. --C.F. Hiltz, Ontario

I received my Extended ADOS-3 and must say I am thoroughly delighted. What a pleasure to use! --Richard R. Green, Quebec

ADOS-3 is about the best software investment I have ever made! It is a marvel to me how you squeezed in so many extra features in the memory available. --Robert L. Briener, Pennsylvania

What you have done makes running the CoCo a new ballgame...love the Randisk! --James H. DeStafeno, Delaware

I got ADOS-3 for my computer system and I loved every time I turned it on...one of the best programs for our computer. --Richard L. Hoover, Virginia

Very good support of a very good product...I wish all programs were this good! --Ron Potter, Ohio

You've replaced any number of copy, backup, wildcard utilities...absolutely tremendous, more than advertised, adds more to the CoCo than could be asked for. --John Burke, California

Extended ADOS-3 is worth much more than the asking price! --Tom Vogt, Wisconsin

Thanks, Folks!!

## SHOW HOURS

### Saturday, Oct. 6

Exhibition Area 11:00 AM to 6:00 PM  
Seminar Area 11:15 AM to 7:00 PM

### Sunday, Oct. 7

Exhibition Area 10:00 AM to 4:00 PM  
Seminar Area 11:00 AM to 3:00 PM

## ADMISSION FEES

Admission fees for the Atlanta CoCoFEST are \$11 for one day, or \$16 for both days. Admission includes access to the Exhibition area and all Seminars.

## ADMISSION BADGES

Badges must be worn at all times for admission to the Exhibition or Seminar areas. Show attendees are given their badges upon registration. Exhibitors and Booth workers may pick up their badges prior to 10:45 AM Saturday.

## DOOR PRIZES

Door Prize Drawing will be held Sunday at 2:00 PM. One entry is included with each admission ticket purchased. You need not be present to win. Entries for door prizes (part of admission ticket) MUST be fully completed and handed in at booth #25 (CoCoPRO!) just inside the entrance to the Exhibition area, in order to be eligible to win. Information and serial number on each ticket drawn MUST exactly match the information and serial number on the winner's Admission badge in order to win. Sponsor reserves the right to verify the validity of winning tickets before prizes are awarded.

**GRAND PRIZE:** an MM/1 Personal computer, courtesy of Interactive Media Systems, Inc. (Value: \$779)

**FIRST PRIZE:** A complete Lyra music software set, including Lyra, the entire Lyra Lybrary (17 disks), Lyra >>TRAX << (7 disks), and the Lyra Companion book, courtesy of the CoCo Corner (Value over \$200)

**SECOND PRIZE:** A gift certificate worth \$50, good toward anything in CoCoPRO!'s stock (over 200 different items)

## RAFFLE

The Atlanta Computer Society invites you to participate in their CoCo Raffle, with MANY fine prizes provided through the generosity of CoCo vendors. Drawings held hourly throughout show hours.

## SOUVENIRS AND MEMORABILIA

Atlanta CoCoFEST souvenir T-shirts are available at the Atlanta Computer Society booth. Also, the humorous game MARTY'S NIGHTMARE, written especially for CoCoFEST attendees by Steve Bjork, will be available at the CoCoPRO! booth. Stop by and visit with the author during special autograph sessions at 2:00 PM Saturday, and 12:30 Sunday.

## SYSTEM IV

### by DELMAR/PERIPHERAL TECHNOLOGY

Technology's 16MHZ System IV is a speed whiz - and when you add OS9 capability, high density drives, EGA/VGA options, and graphics at a cost-competitive price - the system can't be beat! A computer is a major investment. Put your confidence in a company that has been manufacturing 6809 and 68000 systems since 1978.

Consider ALL the options before you invest in a new computer system. Stop by the Delmar/Peripheral Technology Booth for a demonstration.

**PERFORMANCE** - you want the most for your money in a 68000 computer system. Peripheral

### SCULPTOR - A FOURTH GENERATION LANGUAGE By MPD International, Inc.

SCULPTOR's unique blend of fourth generation language, robust database, data dictionary and powerful utilities means that the software developer can produce a customized solution for little more than the price of a standard applications package. Writing a SCULPTOR program can be as simple as defining a data dictionary and executing two programs, 'sg' and 'rg'. The result is a screen input program and a report generator program.

**PORTABLE** - SCULPTOR runs on hundreds of different

platforms from the CoCo to mainframe computers and is 100% Object Code Compatible and 100% Data File Compatible across these platforms.

**EXPERIENCE** - SCULPTOR has been continuously enhanced since 1981 and is a proven mature and stable product with world-wide acceptance. An important factor in the evolution of SCULPTOR is the policy of constant upgrading, enhancing and modernizing of the product while maintaining compatibility with earlier versions.

up, and MANY other features. Also featured is the SmartWatch, a real-time clock for Extended ADOS-3 or OS-9 that piggybacks with the ROM in the disk controller.

#### SUB-ETHA SOFTWARE

A new entry into the CoCo marketplace, Sub-Etha Software makes its debut with a new utility that provides more memory for BASIC programmers, and also introduces an RS-DOS BBS that promises power, speed, and flair.

Also available at the Sub-Etha booth will be disk drives, blank floppy diskettes, and other items. Stop by and say hello!

#### SUPERSOFT, INC.

SuperSoft, Inc. presents Sprite-BASIC, which allows the user to create and control graphic "sprites", and even write their own video games under BASIC. Watch a demo with animated graphics with sound by Supersound, the only multi-tasking/easy to use sound system for your CoCo.

While you're there, visit their gallery of \*MAX prints with everything from B&W to 4096 color mode printing & the only W-Y-S-I-W-Y-G color printing around. See the new RASCAN-2 video digitizer- and yes, WE DO have printer drivers. Also available: PRINTERS/ribbons, GAMES & our complete line of printer software.

#### T & D SUBSCRIPTION SOFTWARE

T & D is selling 630 of the latest public domain programs for the CoCo. Also on display will be 99 sets of back-issue disks and tapes, included in their library of 990 programs. These programs are also packaged separately to include the best selection of home management, education, adventures, business, games, utilities, and

electronics programs. Also offered are discounted subscription rates to their monthly disk/tape service. In addition, T & D offers over 30 graphics disks full of IBM-converted pictures, organized by subject.

#### THREE C'S PROJECTS

Three C's Projects is a small, family owned software company established in 1987. Their specialty is the Power Stones Of Ard series, which are text and graphics adventure games that transport the player to a land of monsters and magic. These games are written especially to take advantage of the Color Computer 3 capabilities.

Currently, there are two games in the series with two more in the planning stages. Power Stones of Ard II (The Five Towers of Trafa-Zar) has recently been released after two years of programming. Stop by for a demonstration.

#### ZEBRA SYSTEMS

Zebra Systems, Inc. publishes programs that produce signs, banners, greeting cards, and labels, incorporating both text and graphics. Their programs are powerful, yet very easy to use, and feature complete graphical user interfaces and well-written manuals - all at very reasonable prices.

At this show, Zebra introduces three new Picture Disks with the themes EDUCATION, HOBBIES, and UNITED STATES MAPS.

Zebra will also be offering Elite Xfer, a new program that runs on IBM PC's and transfers files between CoCo and PC formats.

program that will allow up to four BASIC or M/L programs to be running in a 512k CoCo 3 simultaneously. This includes all BASIC programs, operating systems such as Hyper-I/O and ADOS 3, and programs as varied as CEBBS and EDTASM.

They will also be exhibiting a new ANSI version of their CEBBS BBS program, which now comes complete with X m o d e m / Y m o d e m (Checksum/CRC), enhanced file descriptions, and more.

In addition, they will be displaying their support programs for Burke & Burke's Hyper-I/O package.

#### **MICROCOM SOFTWARE**

Microcom Software will have a large variety of hardware, software, books, cables, interfaces, and chips - as well as products that no other company can offer. Microcom will demonstrate and sell its most popular and versatile word processor - Word Power 3.3, and will also offer 512k upgrades (with premium Performance Peripherals boards), EPROM programmers/erasers, disk controllers, serial-to-parallel interfaces, OS9 products, printer/modem/monitor cables, games, books, and other utility software. Microcom Software will also be offering special CoCoFEST prices on all its products.

#### **ROBERT OFFERMAN**

Robert Offerman introduces the first in a series of 512k Graphic Adventures. "Slake Freeman and the Invasion of the Mutant Linoleum Miners" has been under development for over a year, and contains more than one megabyte of compressed graphics, with text descriptions of over 1000 locations, and many different objects and game characters.

He will also be selling "Revelation!", a 128k CoCo-3 enhancement allowing enhanced graphic and text screens, Macro keys, and more.

#### **SECOND CITY SOFTWARE**

Second City Software will be introducing four new software packages at the Atlanta CoCoFEST: Coloring Book (a hands-on children's educational program), KBCom, Shellmate, and a number of all-new UltiMusE III music diskettes.

Throughout the weekend, you can see and hear the all-NEW UltiMuse III, as demonstrated by its author, Mike Knudsen.

Also, be sure to stop by and register for a chance to win a Casio MIDI keyboard with extras, courtesy of Second City Software.

#### **SPECIALTY PROJECTS**

Specialty Projects, the home of the Art Deli, Art Deli II, and Holiday Edition, offers 950 different PMODE 4 pictures to suit any occasion. They also offer programs for printouts and banners incorporating graphics, and Deli Xpressions for iron-on graphics. All of the above programs can be used on CoCo 1, 2, or 3.

Additionally, they will be offering the Power Gauntlet, the glove that frees you from the "standard" joystick, and it also works with CoCo 1, 2, or 3.

#### **SPECTROSYSTEMS**

SpectroSystems is featuring Extended ADOS-3, a product designed to share space with ADOS-3 in a 16k EPROM. Included are a built-in RAMdisk; MENU command which permits using arrow keys to select files to execute, copy, kill, or scan; wildcard COPY and KILL; configurable auto-boot of a default file or OS-9 at power-

## **WELCOME TO THE FIRST ANNUAL ATLANTA COCOFEST!!**

And to think this whole thing began with a casual comment, from a North Carolina user's casual comment on the FIDO International CoCo Bulletin Board Echo...

"Wouldn't it be nice if we had a CoCo Fest in the South?"

More than a few folks on that Echo agreed. But Newton White, of the Atlanta Computer Society, did more than just agree... he decided to see if "wouldn't it be nice" could become "ISN'T it nice!", and began contacting vendors to solicit interest. THEN came the long-distance pairing of a "Yankee" CoCo entrepreneur, and a southern CoCo club...and the rest, as they say, is history (or at least, will be history Sunday)! With the belief that the CoCo Community would indeed enjoy and support such an event, we set out to make it a reality... and since you are now reading this, it appears that we have been successful in attaining that goal! We hope that you enjoy the Atlanta CoCoFEST as much as we have enjoyed making it happen. We also have had a LOT of help in making this event possible, and would like to give special thanks to Steve Bjork, Mark Sheffield and Paul Ward, the volunteers from the ACS, and the many others who gave support "above and beyond the call of duty", when we needed it most. Our thanks also go out to the many vendors and luminaries who have made the trek southward (or northward, in a few cases)...and, most importantly, our thanks go out to YOU for joining us!! We leave you with this last thought...no matter whether you continue with your faithful CoCo, or choose one of the fine and varied upgrade paths available to you...you will ALWAYS be a part of the Community - in your heart, and in (awww, shucks!). As long as EACH of us remembers that, the CoCo Community shall live and breathe anew. It has been a GREAT ten years...let's do it again, shall we?

**ENJOY THE SHOW!!**

Dave and Nancy Myers,  
CoCoPRO! Products  
(Sponsor)

Newton White, ACS  
(Host club Fest Liason)

Kent Pirkle, ACS  
(Host club President)

***Interactive Media Systems, Inc.***  
welcomes you to the Atlanta  
CoCoFest and extends our  
thanks to you and the  
CoCoFest vendors for your  
enthusiastic support.

**For a good time, call**

**ACS BBS**

*Home of the Atlanta Computer Society*

Featuring:

Extensive **OS-9** and **RSDOS** file sections  
**FIDO** international **COCO** and **OS-9** Echos  
and some of the **FRIENDLIEST** modemers  
you'll find **ANYWHERE!!**

**(404) 636-2991**

**8-N-1, 3-2400 baud**  
**PCPursuitable**

Oh, yeah...Tell 'em Newton sent ya!

Graphics Shell, WPSHel.

#### **DANOSOFT**

Danosoft will be demonstrating their line of software, which is specifically designed to extend the CoCo's usefulness. On display are Big BASIC, a system modification allowing access to extra memory in multiple windows; Super Big BASIC, which takes full advantage of the CRC/Disto 1-Meg memory upgrade; Memory Master, a dual-window editor and manipulator of computer or disk storage; Simply Better, Dale Rickert's feature-packed word processor; and their Utilities Package, containing several useful programs to increase disk and memory storage. Additionally, new programs are scheduled for release at the show.

#### **DELMAR/PERIPHERAL TECHNOLOGIES/SCULPTOR**

The exhibit of DELMAR CO, in association with Peripheral Technologies and MPD International, will focus on an advanced 68000-based computer system, and associated software products which provide a viable alternative for a variety of customers, ranging from individuals to commercial users. The exhibit will spotlight the powerful PT68K System IV, Microware's OS-9 operating system, and MPD's SCULPTOR. Demonstrations will include high-resolution graphics, Windows, and SCULPTOR.

#### **CARL ENGLAND**

Carl England will be offering several utility software packages designed to make full use of the CoCo's capabilities. At this show, he will be introducing a 512k Copy utility designed for totally "user-friendly" file transfers under DECB.

#### **GRANITE COMPUTER SYSTEMS**

Granite Computer Systems offers a wide range of modems from Zoom, with features such as MNP, error correction, data compression, and new V.42bis models. They also will be showing Zoom's SendFax modem, which allows you to send text files and most graphics from your computer to any Fax machine in the world.

GCS also offers their popular File Transfer Utility package for either OS-9 or OSK. This software provides a simple method to transfer text and binary files to and from a variety of floppy disk formats.

#### **FRANK HOGG LABORATORIES**

FHL will be showing TWO new computers, the TOMCAT TC9, and the TC70. We may also be showing some other new goodies if we have them ready by showtime.

Look for great buys on software for both 6809 and 68k OS9, as well as great deals on hardware for the CoCo. Also, don't forget to sign up for our free newsletter/catalog.

#### **INTERACTIVE MEDIA SYSTEMS**

Interactive Media Systems, Inc. (formerly Kenneth-Leigh Enterprises) shows production versions of the MM/1 multimedia computer. The MM/1 debuted last April in Chicago and generated a great deal of interest in the CoCo community. Stop by to see demos of just WHAT this machine can do! Sign up to win free prizes. Plenty of informative literature is also available. Be sure to ask about animation, networking, and windows -- just a few of the many features of the new MM/1.

#### **KB ENTERPRISES**

KB Enterprises makes their exhibition debut by introducing a

## ALPHA SOFTWARE TECHNOLOGIES

The Alpha Software Technologies booth will be featuring their full line of OS9 software, including their newest product, "Data-Windows", which is a complete and full-featured database system for the COCO III.

Also featured will be the OS9 Level II BBS (complete BBS system), Presto-Partner (personal management system), Disk Manager Tree (disk management system), Level II Tools (a set of 25 Utilities), Multi - Menu (MV menu system), Warp - One (terminal program), and The Zapper (disk zapper).

## ATLANTA COMPUTER SOCIETY

Your host club, the Southeast's oldest computer club of any kind, welcomes you! Stop by the ACS booth for chances to win great prizes (courtesy of many fine and gracious vendors), and to purchase your special Atlanta CoCoFEST souvenir-edition t-shirt.

Also, the ACS will be giving live updates on CoCoFEST happenings via DELPHI (for those unfortunates who couldn't be here to join in the fun!), and gladly offer local information to guests from out-of-town. Stop by and say "howdy"!

## BURKE & BURKE

At the Burke & Burke booth, you'll find the latest in OS9 and RS-DOS utility / application / operating system software. We also offer several intriguing Color Computer hardware products, including our CoCo XT hard disk interface and the QuarterMeg memory expansion board. Come by and see our new offerings, as well as our established products.

## THE COCO CORNER

After adding two all-new music disks to its line, the CoCo Corner is now offering seven disks in its LYRA <<TRAX>> library. They will be demonstrating and playing this ready-to run music through seven synthesizers at once, throughout the show. Also, the CoCo Corner will be offering the full music software line of Rulaford Research and Musicware, including such popular titles as Lyra and CoCo MIDI-3, and the MIDI hardware pak.

Additionally, the CoCo Corner will be carrying a full line of floppy disks, disk boxes, printer paper, and accessories.

## COCOPRO!

CoCoFEST Sponsor CoCoPRO!, best known for its wide variety of "gently used" CoCo soft- and hardware, expands its product line even farther for this show by offering the complete software lines of Sundog Systems, SRB Software, and Oblique Triad, as well as the fine Disto line of controllers, memory upgrades, and expansion devices. A total of 22 games will be available at special show prices, including a CoCoFEST exclusive written by Steve Bjork... "Marty's Nightmare (the Search for the Lost Seminar)", a humorous tribute to Marty Goodman.

## COLORSYSTEMS

ColorSystems will be presenting their latest in quality software for the Color Computer 3 and OS9 Level 2. Latest addition to the ColorSystems library is KnightsBridge, a new twist on an old theme, with an element of chance thrown in.

Also available will be Pyramid Solitaire (reviewed in the October '90 Rainbow), CoCothello, CoCoYahtzee, and their Word Processing Oriented

## Seminar Schedule

### Saturday

11:15	Phil Anzalone	Programming the 68070
12:00	Joe Walker	CoCo-3 Graphics & Color
1:00	Steve Bjork	10 Years of the CoCo
2:00	Art Flexser	Extending the Capabilities of BASIC
3:00	Cray Augsburg/Greg Law	What the Future Holds in the Pages of Rainbow
4:00	Chris Burke	Programming in C
5:00	Mike Knudsen	CoCo MIDI
6:00	Kevin Darling	OS-9/OSK

### Sunday

11:00	Ed Hathaway	Desktop Publishing and the CoCo
12:00	Dan Robins	Writing for Publication
1:00	SURPRISE!!!	
2:00	Steve Bjork	Games Programming on the CoCo

**SATURDAY SEMINARS:**

**Saturday 11:15 a.m. Phil Anzalone (Signetics)  
PROGRAMMING THE 68070**

Phil, whose company manufactures the 68070 chip which serves as the centerpiece of the MM/1, TC70, and other computers, will speak on the chip and its capabilities, as well as provide technical information of use to programmers.

**Saturday 12:00 p.m. Joe Walker (Supersoft)  
COCO-3 GRAPHICS & COLOR**

Joe, author of many fine programs such as RAS\*MAX, will demonstrate HOW color graphics get IN to your CoCo...and how to get them OUT!

**Saturday 1:00 p.m. Steve Bjork (SRB Software)  
10 YEARS OF THE COCO**

Steve, a veteran game programmer extraordinaire (author of several of Tandy's best-sellers, as well as such fine products as Bash! and Z-'89), will share interesting anecdotes of his years with the CoCo, as well as entertain your questions in an Open Forum.

**Saturday 2:00 p.m. Art Flexser (SpectroSystems)  
EXTENDING THE CAPABILITIES OF BASIC**

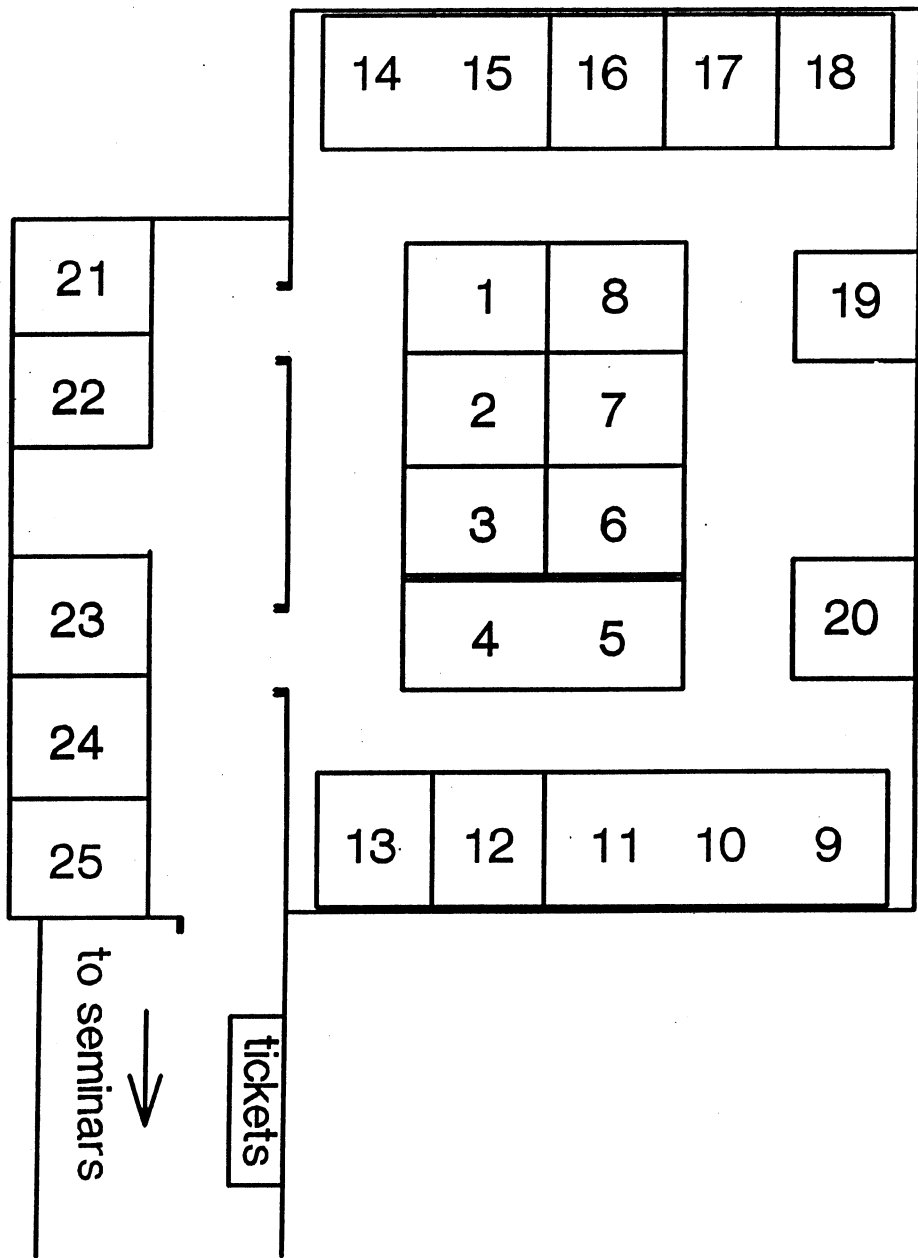

Art, best known for his work on the ADOS series, will offer insight on CoCo Disk Operating Systems, and ways in which the programmer can go BEYOND the "rules" in the ROM!

**Saturday 3:00 p.m. Cray Augsburg (Managing Editor)  
Greg Law (Technical Editor)  
WHAT THE FUTURE HOLDS IN THE PAGES OF RAINBOW**

Cray and Greg, two of the top members of Rainbow magazine's Editorial staff, offer insights into the recent changes in the magazine, projections into what the future holds, and the chance to become PART of that future with your comments and questions!

**Saturday 4:00 p.m. Chris Burke (Burke & Burke)  
PROGRAMMING IN C**

Chris, a professional software engineer who, along with his wife Trisha, offers the fine B & B line of hardware and OS-9 software, will share C programming techniques of interest to novice and expert alike.

**Saturday 5:00 p.m. Mike Knudsen (Independent)  
CoCo MIDI**

Dr. Knudsen, author of UltiMusE III, will demonstrate his approach to editing and playing music using the CoCo and MIDI-capable synthesizers. With his technical, programming, and musical backgrounds, Mike is ready, willing, and able to answer YOUR questions on this popular use for your CoCo!

**Saturday 6:00 p.m. Kevin Darling (Independent)  
OS-9 / OSK**

Kevin, whose name is practically SYNONYMOUS with OS-9, will conduct a question-and-answer Open Forum on OS-9 and OSK. Whether you are a novice or veteran user of these powerful operating systems, you will NOT want to miss this chance to gain knowledge from the "guru" (and possible surprise guests)!

**SUNDAY SEMINARS:**

**Sunday 11:00 a.m. Ed Hathaway (Second City Software)  
DESKTOP PUBLISHING AND THE COCO**

Ed, owner/operator of Second City Software AND a flourishing desktop publishing company, will demonstrate several leading Desktop Publishing (DTP) programs available for the CoCo (including SCS's own Newspaper Plus). This seminar, offered by an acknowledged expert in the field, will be an excellent introduction to DTP for those interested in getting into that field, and will also provide useful tips and techniques for experienced CoCo/DTP users.

**Sunday 12:00 p.m. Dan Robins (Independent)  
WRITING FOR PUBLICATION**

Dan, former author of the CoCo Column in the internationally acclaimed Computer Shopper magazine, will offer hints and techniques for aspiring authors...how to prepare your writings for submission, what publications look for when choosing articles to be published, and various other "tricks of the trade". Your questions will be entertained by Dan and other professionals in the field.

**Sunday 1:00 p.m.  
SURPRISE SEMINAR!!**

We're NOT telling...you'll just have to find out for yourself!

**Sunday 2:00 p.m. Steve Bjork (SRB Software)  
GAMES PROGRAMMING ON THE COCO**

Steve, author of over 25 games (marketed by Tandy and others), is perhaps the most prolific game author in the history of the CoCo. In this seminar, Steve will share knowledge of interest to novice and expert alike...showing how to incorporate digitized sound and hi-res graphics into your work, and offering answers to your questions and programming dilemmas. He will also offer insight into the special programming techniques used in creating his latest game, "Marty's Nightmare".

For quick reference, see the seminar schedule on page 5.
