

Glenside presents
the
2nd Annual "Last"

SYSTEM IV

The perfect, low cost, high-quality and high performance OS-9 computer serving customers world-wide. Designed for and accepted by industry. Ideal low-cost work-station, development platform or just plain fun machine. Powerful, flexible and expandable inexpensively.

G-WINDOWS

G-WINDOWS is now available for SYSTEM V (and computers using the CD68XX20 board from Computer Design Services). Everyday more vendors are offering G-WINDOWS with their hardware and more users are demanding it. A proven winner!

OS-9/68000 SOFTWARE

NEW - DataDex, a free form data management program designed to keep records like a card file system. No programming language to learn. Variable record sizes permitted.

QUICK ED - Screen Editor and Text Formatter
VBD ENHANCED - Text Editor
SCULPTOR - Development and Run-Time Systems
FILEXELINT V4.00 - The C Source Code Checker
WINDOWS - C Source Code Windowing Library
IMP - Intelligent Make Program

CALC-9 - Spreadsheets;
VPPRINT - Print Formatter
PAN UTILITIES
DISASM_OS9 OS-9 Disassembler
PROFILE - Program Profiler
M6809 - OS-9 6809
 Emulator/Interpreter

For even higher OS-9 performance, the
ALL NEW

SYSTEM V

68020 running at 25 MHz, up to 128 MBytes of 0 wait state memory, SCSI and IDE interface, 4 serial and 2 parallel ports, 5 16-bit and 2 8-bit PC/AT slots and more. Continuing the design concepts proven in the SYSTEM IV by providing maximum flexibility and inexpensive expandability.

An OS-9 first - the Microprocessor is mounted on a daughter board which plugs onto the motherboard. Will permit inexpensive upgrades in the future when even greater performance is required.

G-WINDOWS benchmark performance index 0.15 seconds faster than 68030 running at 30 MHz with ACRTC video (85.90 seconds vs 86.05 seconds) using a standard VGA board.

Call, write or fax for complete information and pricing. Available for immediate delivery.

Welcome to the Second Annual "Last" Chicago CoCoFEST! Why the word "last"? For no other reason than to impress on people that we don't really know if there will be another Chicago CoCoFEST! You see, 1991 was the year of the final sponsorship of a 'fest in Chicago by the people we were used to have "carry the ball" for us, as it were.

In 1992, a member of Glenside was so determined to have a 'fest in Chicago that he took it upon himself to start looking for a place to have it, and in the meantime, began a campaign to find a sponsor. From these actions, the First Chicago CoCoFEST! was spawned, and thanks to Dave and Nancy Myers for accepting the challenge to sponsor that event.

That event became known as the first "Last" etc. for the same reason that we adopted the word "last" this year. It takes a lot of behind-the-scenes support to put this together. We no longer have the manufacturer's support, we no longer have the publication's support, indeed we no longer have the publication, and there currently does not exist a vendor who can financially sponsor this type of event. The people like you and me, the owners and users of the Color Computer, are going to be the real movers and shakers in the community from here on out, as we have been from day one, actually, when we discovered that the salesperson from whom we bought our first CoCo couldn't really help us beyond "plug it in, turn it on".

That discovery was the cause of the birth of Color Computer user groups all over the world. It was, and IS, from these groups that we, as users, received the "real" support. Even the printed pages that we all subscribed to were ancillary to the user groups. Without YOU, the members of those local user groups, and those of you who have joined the GLENSIDE user group, this 'fest would not be possible.

These groups continue to be the nucleus of the sense of "family" that we all share; and the 'fests' will continue to be, I hope, the reunion of that 'family' no matter where they are held. The Chicagoland area was the home of the first 'fest ever, ten years ago, on April 22, 23, & 24, 1983. So with that in mind,

WELCOME HOME!

There will be, throughout the 'FEST, doorprizes given away. Be sure to listen for your name, you could be a winner. And be sure to stop by the booths of the doorprize donors and thank them for their participation. They contributed as much to this event as anyone. Feel free to ask questions about their products, that's what they are here for.

Above all else, remember why we are here, to have a good time. Every 'FEST! I've been to has been filled with discoveries, new friends, and good memories. May this, the Second Annual 'LAST' Chicago CoCoFEST!, be all of the above, and more, for you.

Until our next 'reunion', I bid you Peace.

Tony Podraza,
President Glenside Color Computer Club

— Show Hours —

Saturday, May 1

Exhibition Area 10 AM-6 PM

Seminar Area 10 AM-3 PM

Intern'l OS-9 UG Co-Op Discussion 7 PM-?

Sunday, May 2

Exhibition Area 10 AM-5:30 PM

Seminar Area 10 AM-3 PM

DOOR PRIZE DRAWINGS

Drawings for door prizes will be held every hour that the exhibition area is open, on the half hour. You need not be present at the time of the drawing to win, but you **MUST** be present at the following hour's drawing in order to claim your prize if you were not present when your name was called. If the winner from the previous drawing does not claim their prize by the time of the second drawing following the drawing of their name, then the aforementioned prize will be re-entered into the pool of prizes and another winner sought. At the final drawing, at 4:30PM Sunday, names will be drawn until a winner for that drawing can be found.

SOUVENIR T-SHIRTS

T-shirts commemorating the Second Annual 'Last' Chicago CoCoFEST! are available at the Cook County CoCo Club booth. Quantities are extremely limited!

JWT Enterprises

Optimize Utility Set 1:

- Optimize your floppies and hard drives quickly and easily! → Includes utility to check file and directory fragmentation.
 - Works alone or with Burke & Burke repack utility. → One stop optimization for any Level 2 OS-9 system.
- \$29.95; Foreign Postage, add \$3.00**

Optimize Utility Set 2:

- Check and correct any disk's file and directory structures without any technical mumbo-jumbo.
 - Run periodically to maintain the integrity of your disks as well as the reliability of your data.
 - Especially useful before optimizing your disks.
- \$19.95; Foreign Postage, add \$3.00**

Optimize Utility Set Pac:

- Get both packages together and save!
- \$39.95; Foreign Postage, add \$4.00**

UpTime: A monthly magazine for CoCo's and OSK machines.
In each issue:

- Find out about new products and upgrades for your favorite computers.
- Learn about what new technical breakthroughs are on the horizon.
- Discover what programs really can do and what they cannot.
- Published monthly in newsletter format.

*One Year Subscription, two installments of \$7.50;
 Canadian Orders, two installments of \$9.00; Foreign Orders, 2 X \$11.00
 Can also be paid in one installment*

Back-Issues: From September 1992. Limited supplies.
*\$1.50 each; Foreign Orders, add \$1.25 each
 Bulk orders of six or more, \$1.25 each; Foreign Orders add \$1.00 each*

Nine-Times: The bi-monthly disk magazine for OS-9 Level 2.
In each issue:

- Helpful and useful programs
- C and Basic09 programming examples
- Hints, Help columns, and informative articles
- All graphic/joystick interface
- Can be used with a hard disk or ram disk

*One Year Subscription, \$34.95;
 Canadian Orders, add \$1.00; Foreign Orders, add \$8.00*

Back-Issues: From May 1989. Write for back issue contents.
*\$7.00 each; Foreign Orders, add \$2.00 each
 Bulk orders of six or more, \$5.00 each; Foreign Orders, add \$1.50 each*

Magazine Source: Full Basic09 code and documentation for the presentation shell used with Nine-Times.
\$25.95; Foreign Orders, add \$5.00

Independent program submissions welcome!

Welcome to CF83 FORTH

The OTHER Operating System

If you are one of the first 300 attendees here at the Second Annual Last Chicago CoCoFest, then you have received a free copy of the CF83 Forth Disk with the 1983 Standard Forth Required Words Set.

To find out how to use your new operating system, just put the disk in your default drive (usually Drive 0) and enter: RUN"READER". Then just follow the instructions at the bottom of the screen. READER displays the CF83 Forth Manual 1/3 page at a time. The information at the bottom of the screen tells you which page you are on and which third of that page you are viewing. You can move up and down through the manual one third of a page at a time by using the up and down arrow keys. You can advance to the next full page by pressing the right arrow key, and you can move back to the top of the previous page by pressing the left arrow key. The G key allows you to GO directly to a page number you specify (after a slight delay). The P key sends the page you are currently viewing to your printer. It sends the whole page, regardless of which third of the page you are viewing. The R key lets you send a range of pages to the printer, and the D key lets you send the entire manual. The S key switches you to the Print Parameters Menu where you can toggle through the various parameters in each category by repeatedly pressing the key for that category. If you do something wrong, READER may jam up or do a diagnostic dump to the screen. If this happens, just turn your CoCo off and start over.

Good Luck! Hope you enjoy CF83 Forth!

BDS Software

/) Sub-Etha Software (**OSK Product Division**

Write-Right! Word Processor

At last! A real word processor for K-Windows!

Includes mouseable cut-and-paste, WYSIWIG display of italics/bold/underline/color, easily defineable printer codes for any printer, on-screen text ruler, easy-to-use graphical interface, find/replace features, word-wrap, insert/delete modes, and much, much more!

Come over to our booth and find out what all the excitement is all about!

Etha-GUI

A must-have for all MM/1 owners!

This is an amazing Graphical User Interface for your MM/1 or K-Windows compatible computer system. Features include NotePad, PhoneBook (with auto-dialer), 2 icon editors, graphical screen savers, drag-and-drop file Copy and Delete, point-and-click attribute setting, and much more! Launch applications at varying priorities with desired font, colors, window size, etc.! Exciting look and feel will let you show your new computer off to your friends and allow the rest of your family to easily launch their desired applications. *Come and see a free demonstration!*

CheckBook-plus/OSK

Weren't computers designed for this?!

Are you still calculating your checkbook by hand?! **Stop torturing yourself!** *Sub-Etha Software* sells *CheckBook+* for your MM/1 or K-Windows compatible computer system. Fully keyboard OR mouse driven! Features like the pop-up calculator with running total, sorting by any field in ascending or descending order, selective printing, and account numbers make fast work of any checkbook balancing act! Visualize your account with Circle-, Line-, and Bar-graphs!

MiniBanners/OSK

Best banner program for K-Windows!

Print single or multiple line banners on ANY printer! Over 30 fonts to choose from! Supports graphics or non-graphics printers. Independently sized text on each line! The included *showfont* program lets you view the various fonts on screen before printing, and you can even view your banners on screen or send them to disk for later printing!

If you have a printer, you *need* this program!

MICROWARE

This late-breaking addition to the 'FEST! promises to surprise us all with a phenomenal price on OS9000. This '386 and '486 based operating system places the user in an OS-9-like operating environment while still allowing them to utilize the copious amount of software written for those CPU's. The attendance of Microware at a 'fest is a radical departure from previous marketing policy. It is a move that User Groups and users have long asked for, let's hope that the response from users will be favorable.

RADICAL ELECTRONICS

Entering the marketplace for the first time, Radical Electronics brings us a fresh look at a useful utility. Check out their Color Computer 3-specific Schematic Designer.

SBUG

Andre Lavelle of SBUG will be offering special prices on Tandy CoCo software, as well as on surplus computer accessories. Also available will be Van der Poel and CoCoPRO! software. Check out the bargains!

STG NET

Scott Gripenrog will be available to answer your questions about the STG-net BBS software. Look in over his shoulder as he hones some of the rough edges off of the Beta-test version 4.0.

STRONGWARE

StrongWare will be featuring products for the MM/1 and the Color Computer 3. Be sure to check out Soviet Blockand Gems which features stereo sound effects when used with the Orchestra 90 Pak.

SUB-ETHA SOFTWARE

Presenting the NEW full-featured word processor by Joel Hegberg, Sub-Etha returns, once again, to astound the populace. Also available will be MiniBanners and Checkbook+ for OS-9, OSK, and RS-DOS. Surprises always emanate from Sub-Etha. Don't miss out!

SUNDOG SYSTEMS

Even though other responsibilities may keep Glen Dahlgren from personal attendance, he has made arrangements to be represented. Special pricing has always accompanied Sundog to the 'fests, and this year is no different. Photon, Crystal City, War Monger, and a host of other selections are available to the action-loving gamers.

T & D Subscription Software

Bringing with them a myriad of public domain and a mountain of licensed software, T & D look forward to meeting many of you for the first time. No strangers to the CoCo Community, events around the time of last year's gathering prevented their attendance. They have, however, lots of quality programs for your inspection and should garner your interest.

LEE VEAL

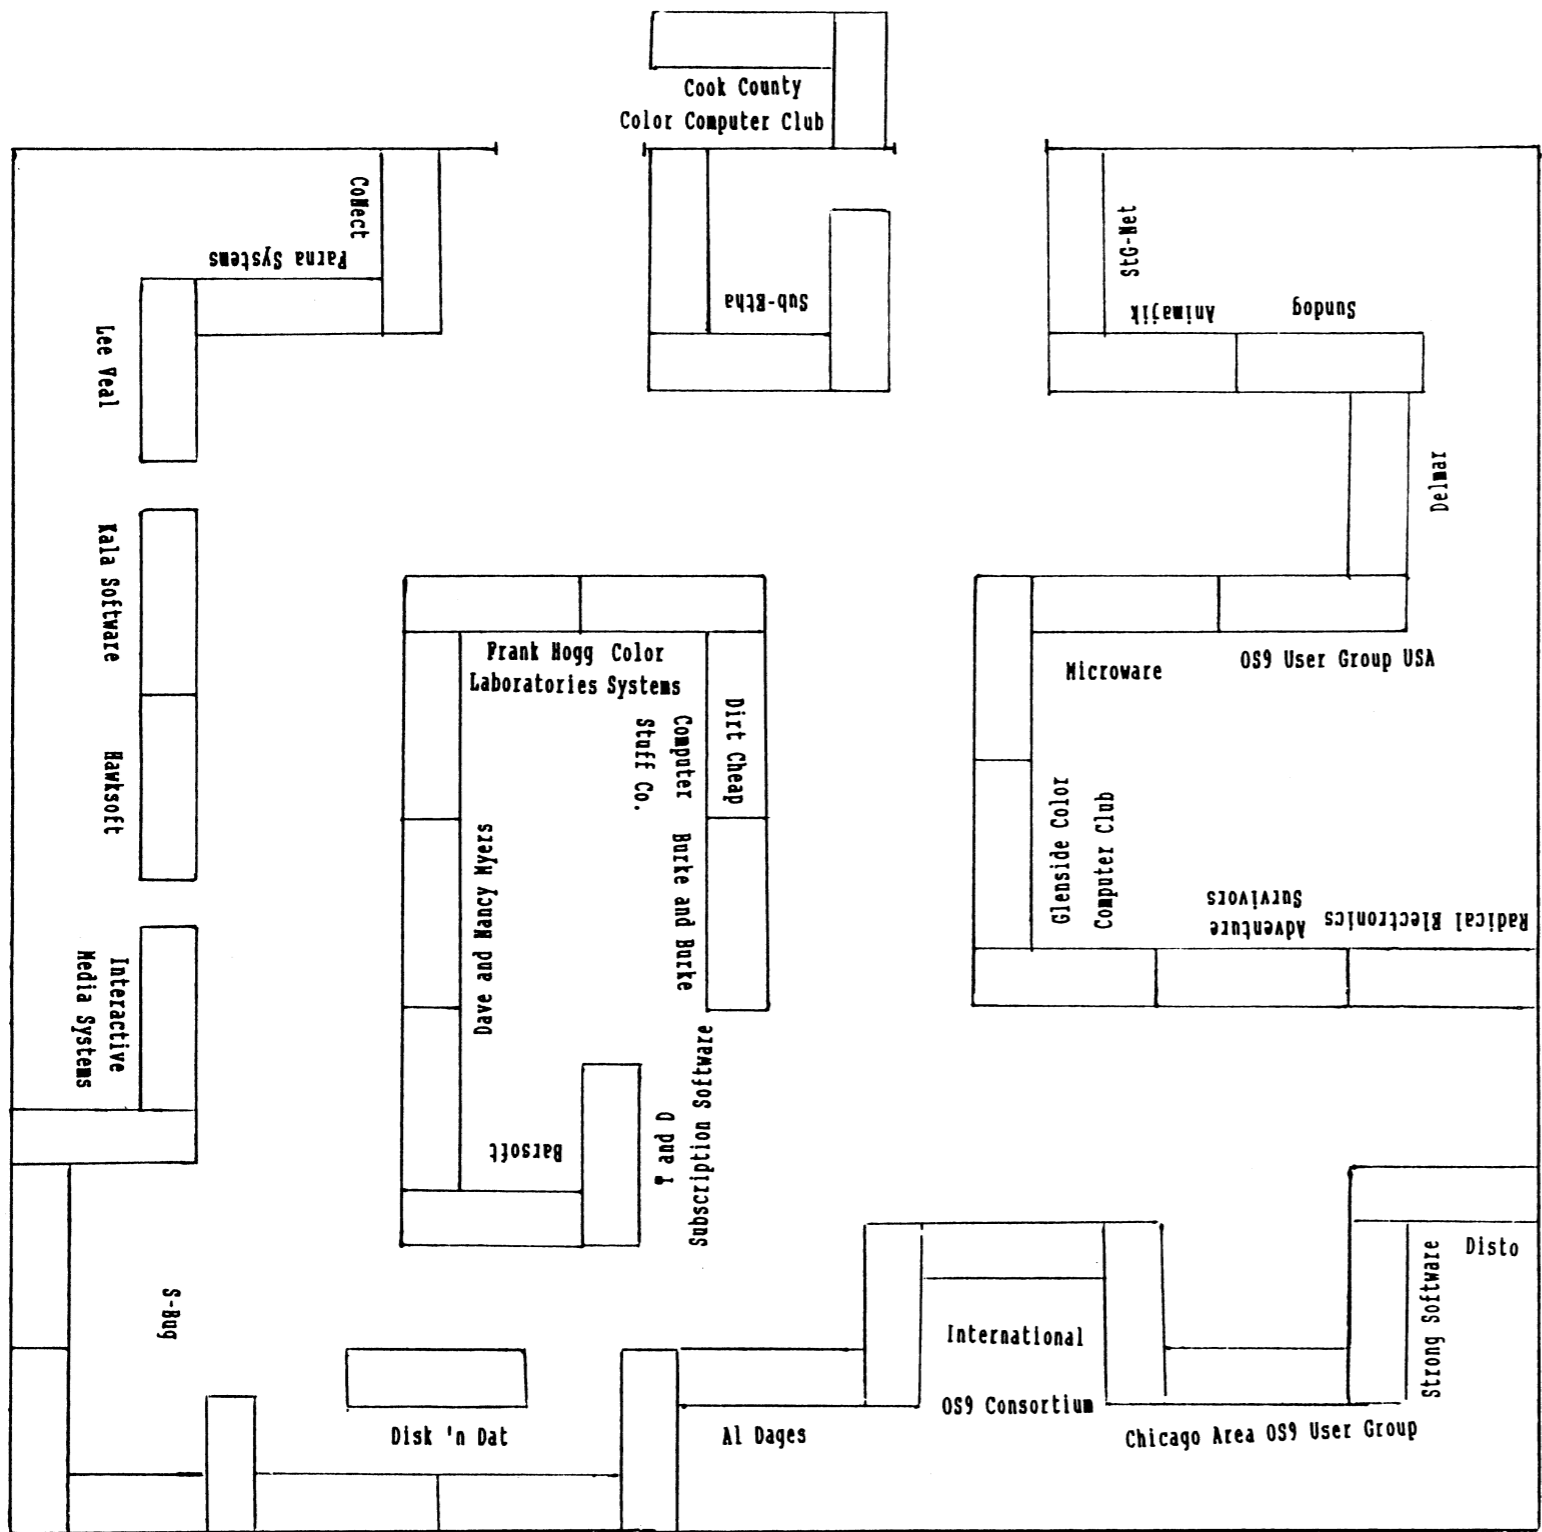

Coming to the Chicago-area FEST! for the first time as a vendor, Lee Veals presents to the public, Gravity Studio's "Planet Engine". This OS-9-based astronomy program will capture your attention. Also available will be, David Wordell's OS-9 Tutorial video tape and his 6809 removal/6309 installation video.

SATURDAY

- 09:00 Future Support for the CoCo
- Frank Swygert and Allen Huffman will speak on the future of the CoCo and some of the it can be supported in the future. Stop by and learn how you can make a difference.
- 10:15 Telecommunications and Networks
- Eddie Kuns and Paul Jerkatis will speak on telecommunications and networks, their uses and various means of support that are available. Eddie will talk about Delphi and terminal programs while Paul will explain StG-Net and BBSing.
- 11:30 Hardware Hacking
- Mark Griffith and Rick Ulland will speak on hardware hacking and answer questions. If you wondered how to make a computer interface with the real world stop by and listen in. Learn what projects these two whizzes have in store for the future
- 12:45 Programming & Graphics
- John Strong and Joel Hegberg will speak on programming with a strong emphasis on Graphics and User Interfaces (GUI). Questions from the audience will be encouraged.
- 02:00 OS-9000
- Boisy Pitre and Mike Burgess will speak on and answer questions about OS-9000. This is an operating system that is designed much like OS-9 but runs on higher level platforms such as the Intel '386 or higher machines and the Motorola 68020 or higher machines.

SUNDAY

- 09:00 Glenside Meeting
- Tony Podraza and a cast of ??? will hold a meeting (alibiet a condensed version) of the Glenside CoCo Club complete with the official gavel. If you are a member who is not normally able to attend meetings or just plain interested in what goes on at these meetings, drop in. While you are at the meeting you can also join up if you are not a member already. You do not need to be a member to attend.
- 10:15 Network Communications
- Scott Griepentrog and Paul Jerkatis will speak on network communications and BBSes. If you have never heard of LAN or WAN then you must attend this seminar.
- 11:30 Programming
- Allen Huffman and Joel Hegberg will speak on programming techniques and answer questions from the audience. Joel is fluent in several languages such as Basic, Assembly and C.
- 12:45 User Groups and the Future
- Peter Tutelears and Carl Boll will speak about future support for both OS-9 and the CoCo. Learn about user groups and the role they will play in future by keeping users in contact with one another.
- 02:00 OS-9000
- Boisy and Mike will again speak on and answer questions about OS-9000. Drop in and ask them about it.

THE COOK COUNTY COLOR COMPUTER CLUB

Hi, we are the Cook County Color Computer Club. We are supported the Fest again this year by volunteering to man the Ticket Sales booth. We performed the same very function last year. Come stop by and talk with us. We are always ready to meet and help others whose interest is the same as ours. The Cook County Color Computer Club meets once a month on the fourth Wednesday of the month. If you live in the area and are interested in joining our club stop by and ask for details. Hey, what the HECK! Stop by and just say hi! Thanks for your support by attending this Fest.

THE CHICAGO AREA OS9 USER GROUP

Greetings from the Chicago Area OS9 User Group. We are happy you could attend this Fest. While support for the little CoCo seems to be shrinking the response to this Fest is nothing short of amazing. We hope that it bodes well for the future. Support in the future will be coming from user groups. Our group supports the effort to unite the OS9 community. We hope that the you the user will join us in supporting our computers in the future. Thank you for being here.

PIRACY

Piracy, it brings to mind Long John Silver and a parrot doesn't it. Well, modern day pirates are helping to kill our community too. Authors of programs that are sold on the market need as many sales as possible. An awful lot of work and time goes into creating a program that is marketable. When you make a copy of a program and distribute it without the authors permission you are pirating the program. If the author doesn't sell as many copies as he feels he should then it is almost a certainty that he will cease to create new programs. The same goes for shareware. If a program is released as shareware that means that you may make copies and distribute them but it doesn't mean that you can use the program indefinitely without sending the author the money he requests. Please help our community stamp out piracy so that we can continue to flourish. Thank you.

VENDORS

GLENSIDE COLOR COMPUTER CLUB OF ILLINOIS

Glenside has been intimately involved with Chicago-area 'fests since 1987. This year is no exception. As the 'FEST! sponsor, we sincerely hope that your visit with us is all and more that you expected. As usual, past issues of the club's newsletter, the CoCo~123 will be freely available, as long as supplies last. Membership packages for '93 and '94 are available, as are the ever popular 'fest buttons. A limited supply of commemorative mugs are to be had, and maybe a few surprises, too!

HAWKSOFT

Being one of the longest current CoCo vendors in business, Hawksoft continues to grace the 'fests with their attendance. Among the products they offer, you will find the ever popular switchable high-res joystick interface, IconBasicO9, Domination, MyDOS, and more!

INTERACTIVE MEDIA SYSTEMS

IMS will be showing off the newest goodies for the MM/1. Watch and listen to one of the 68XXX machines as it interacts with MIDI devices while displaying fantastic graphics.

KALA SOFTWARE

This year, Kala returns with scores of scores! No, I didn't stutter, Kala has scores for the UltiMuseIII and UltiMuseK programs written by Mike Knudsen. A better MIDI controlling program for the CoCo and the MM/1, you'll not find at the 'fest!

DIRT CHEAP COMPUTER STUFF COMPANY

In his first appearance as an independant exhibitor, Mark brings us various hardware and software for the MM/1 system. The selections you will find will provide numerous enhancements to your equipment.

OS-9 USER GROUP, USA

Revitalized a little over a year ago, the OS-9 User's Group of USA has started to flourish, again. Find out what they can do for you! All it takes is a few minutes of your time.

OVERSEAS OS-9 USER GROUP CONSORTIUM

• Australian National OS-9 User Group

Represented by Gordon Bentzen. Stop by and find out how they do it down under.

• EFO

Represented by Stephen Paschedag. Stop by and shake hands with your fellow OS-9ers. This User Group is based in Switzerland and is very respected in Europe.

• EUROS-9

Represented by Peter Tutelaers. Peter was the one who got the whole ball rolling for this overseas meeting. Stop by and meet the man with the vision. Thank him for his selfless dedication to OS-9. He has spent a lot of time and money making this all happen.

• OS-9 User Group of Japan

Represented by Chikara Ymaguchi. Stop by and see a dedicated 6309 based OS-9 machine. Find out how the 6309 was designed. Stop by this series of booths and find out what's new around the world. The book "The OS-9 Guru" will be for sale and you can see a Dragon running OS-9 Level 2!! There will be various OS-9 machines running all sorts of software. It will be very interesting for everybody.

Give your PC a "kick in the boot" with OS-9000!

Bring true multitasking, multi-user power to your 386 or 486 computer with OS-9000! Visit the Microware booth at the Chicago CoCoFest, May 1-2 in Elgin, Illinois, to order your copy of the OS-9000 PC/AT Development Pak v1.3 for only \$350!* That's over 60% off the regular retail price!

This offer is valid only for the duration of the Chicago CoCoFest, and you must be a member of a national OS-9 users group in order to participate in this promotion.

The OS-9000 PC/AT Development Pak v1.3 features:

- Bootable OS-9000 distribution diskettes with fast install utility
- OS-9000 Real-Time Kernel
- Virtual PC (VPC) DOS emulator
- I/O Manager and file managers:
 - Pipe File Manager (named and un-named pipes)
 - Sequential Character File Manager (serial, parallel, A/D, etc.)
 - Random Block File Manager (magnetic disk, RAM disk, SCSI)
 - Sequential Block File Manager (tape, SCSI)
 - PC File Manager (DOS disks)
- Math and CIO libraries
- 80387/80487 FPCP support
- Advanced Shell and utilities
- K&R C Compiler v1.3
- SrcDbg C source level debugger
- ROMbug symbolic debugger
- uMACS screen editor
- Professional OS-9000 manual set
- 90-Day "Hotline" Support

The following hardware is required:

- 386/486-based IBM PC/AT or compatible
- 2 Megabytes of RAM
- MFM, RLL, ESDI, IDE or SCSI disk controller
- VGA, EGA, CGA or Hercules video adapter or compatible
- 5 Megabytes of free hard disk space

Also make plans to attend the Microware OS-9000 seminar. We'll discuss the features of the OS-9000 operating system as well as software development and porting issues.

* 6.5% Illinois sales tax included in price. Limit 2 copies per customer, personal use only.

VENDORS

CONNECT

Rick Uland will be on hand to show off his true RS-232 Pak and his new Dual RS-232 High Speed RS-232 Pak. He will also announce future plans for development.

COOK COUNTY COCO CLUB

Once again, the Cook County CoCo Club will be manning the ticket booth and selling the official 'fest T-shirt, designed by Nancy Myers. Quantities are limited, so be sure to pick one up early. Special thanks go to the members of this club who man the ticket booth freeing up Glenside members to do other things which will make the Fest run smoothly.

DAVE & NANCY MYERS

This dynamic duo are no strangers to the CoCo Community. Though they will not be in the forefront of the activity, rest assured that they will still be supporting "the family" though it be from a distance. In the meantime, they have found various bits and pieces hiding in obscure corners that they wish to pass on to the attendees.

DELMAR

Delmar is here to show us the System IV, a 68000 computer which is currently serving customers world-wide in industry. Delmar, will also be demoing the System V, a 68020 computer as well as an Intel based machine running OS-9000. Delmar will have something of interest for everybody.

DISK 'N DAT

A computer consumable goods vendor from the local area, Disk 'n Dat has a wide selection of supplies for printers, blank disks, etc., for your choosing. New to the CoCo-specific market, they have been providing quality product at a good value to computer users for years.

DISTO

Tony Distefano arrives with schematics to the various devices that he has designed over the years, as well as copies of his book, A TURN OF THE SCREW. Rumours have it that he will also have....well, it's only a rumour. Find out if it's true.

FARNA SYSTEMS

The talents of this vendor have already brought you the OS-9 Quick Reference Guide and Patch OS-9. Now see what he's cooked up for this year. Already the author of at least one CoCo program, he is also the author of the book, "Tandy's Little Wonder". Come see what other surprises he has for us.

FRANK HOGG LABORATORIES

As long as can be remembered, FHL has been a staunch supporter of the Community. Many innovative ideas have been found emanating from their tables. This year, see the new KIX30 system, and try to believe that it all started with a CoCo I!

VENDORS

A. R. DAGES / R. C. SMITH

The Dages and Smith team have been insuring the continued viability of the CoCo Community by keeping the hardware and software from passing out of existence. Their supply of "previously owned" items ranges from ROM-PAKS to power supplies and computers to drives. They even have some new equipment. If you're looking for that "spare", look here.

ADVENTURE SURVIVORS

A.S. is a family-run club for CoCo adventure game players. Annual memberships and back-issues of the Club Newsletters are available at the show for a modest fee. At least 23 of the best CoCo adventures are reviewed (with maps and solutions) in back issues. Stop by their booth to get a FREE introductory Newsletter. Also available at the A.S. booth will be 3 C's Projects products, the Powerstones of Ard series, and perhaps a few surprises, as well.

ANIMAJIK PRODUCTIONS

Boldly go where no mouse has gone before with Animajik's Star Trek mouse pad. Also available, the amazing DCom, a Basic09 Icode decompiler; Tshell; Cloud_09; and TakeNote, a music tutorial/game.

BARSOFT

BARSoft returns to CoCoFEST! bringing with them such fine programs as KB-COM and ADOS, as well as a veritable cornucopia of other hard to find and one-of-a-kind software and hardware items for sale. Glenside members will receive a hearty 15% discount on most software purchases.

BURKE & BURKE

Last year's blockbuster POWERBOOST is back, now in NATIVE mode. Hints at other new items from B&B include SCSI-512, a device driver for the Disto 3 and 4-in-1 adapters to allow the use of low-cost 512 sector SCSI hard drives on the OS-9 systems, an updated version of the book, INSIDE THE 6309, which describes the instruction set, internal registers and programming tricks of the Hitachi HD63B09E, and projects too numerous to mention are waiting in the wings.

CHICAGO AREA OS-9 USERS GROUP

Stop by and get information on the local OS-9 support group and see the ChiCoCo BBS in action. Log in and check out this CoCo and OS-9 support BBS. Other OS-9 platforms are also supported such as the MM1. Big plans for the future of this club are in the works.

COLORSYSTEMS

Colorsystems presents Variations of Solitaire for both the CoCo and the MM/1, WP-Shell for the CoCo3, as well as their much-vaunted games packages. Other items of interest will show up as well, such as bumper stickers and buttons.

Announcing **UpTime**

The new newsletter that gives you the latest scoop about the CoCo, OS-9, and OSK world!

- ☛ Find out about new products and upgrades for your favorite computers.
