

From the President's Platen

by Tony Podraza

Time surely flies when you're having fun! Seems that I just completed this column for the January newsletter only two weeks ago. Actually, that's probably the truth. The necessity of moving the February meeting to the FIRST Thursday night of February has pushed the newsletter deadline ahead by a week. So, here we go!

As you will read later on, there have been some saddening events in the CoCo community. And at the same time, a little good news. It is with fond memories that Glenside says "Good-Bye" to Howard Medical Computers. HMC, as of the press release dated Jan. 3, 1992, has been sold to CoCoPRO!. It was from HMC that I bought my first floppy drive controller in '83 or '84. It was a J&M and was the neatest thing since sliced bread. I only blew it up once (by removing it from the computer with the power turned on), socketed all the chips, replaced the bad ones, and it is still in use today. A tribute to the quality of the products that HMC handled. I have had the privilege of working with HMC in three 'fests. All three experiences have been enjoyable. I guess I also have the distinction of being the last CoCo user to officially purchase from HMC. I don't think that that's something to be proud of, being the last, that is, but I'm glad that they were there to fill the need when it arose.

Because of Ross and Bernie Litton, Chicagoland CoCo users have had an invaluable local source of peripherals and modification supplies, and the rest of the CoCo Community has had that same benefit through the avenue of phone and mail-order. The Community will surely miss them in the future.

Ross; Bernie; Glenside would like to extend our collective appreciation to you for your past service to the CoCo Community. We wish you well in all your future endeavors. Thank You.

If you haven't heard by now, you will by the time you've read the next section. **There are no plans for a Falsoft-sponsored Rainbowfest '92 in Chicago.** There! I've reported what I've heard. That's from a microphone hidden within the walls at Falsoft. That microphone also has this to repeat.

...The Rainbow is supposed to be undergoing a face-changing. Starting with

the March 1992 issue, The Rainbow is reportedly going to be a tabloid-sized publication. There will be 32 pages, printed on non-glossy heavy grade paper, slightly larger than the 'Enquirer' or 'Star' size. This will enable them to print approximately 64 current-size pages of editorial and advertising material and enable Falsoft to continue publication for quite awhile.

The cost of publishing our long-time, beloved magazine over the past year in it's current form has not been a profitable venture for Falsoft, rumor has it, and this change will at least keep it coming to us, as opposed to going the way of many other CoCo-dedicated publications. (Personal Note To Falsoft ...Thanks for your past support; Thanks for your present support; And thanks for your decision to continue your support by taking this step to enable you to remain in publication.)

Okay, now I have a question for every reader of this newsletter, and I would appreciate your personal response. Yes, I know, it means that you'd have to take a stamp, an envelope, a sheet of paper, and a writing instrument in order to do this, but I'd like to know what kind of interest there is in having a gathering of CoCo users and vendors in the Chicagoland area in late spring/early summer in '92. Ask around. Take it to your club members. How many would like to attend? More important; how many would definitely attend?

Glenside Color Computer Club

CoCo-1,2,3 Information

The Glenside Color Computer Club of Illinois is a not-for-profit organization whose members share an interest in the Tandy Color Computer®. The CoCo-1,2,3 is the official newsletter of the Glenside Color Computer Club. The Glenside Color Computer Club of Illinois has no affiliation with Radio Shack® and/or the Tandy Corporation®. The opinions expressed by the authors of articles contained within this newsletter do not necessarily reflect the opinions of the Editor, the Executive Officers or the actual Club membership.

We are committed to publishing a minimum of four issues and a maximum of twelve issues per calendar year. For an annual fee of \$12.00 you can become a GCCC member with full membership privileges. Persons wishing to receive the CoCo-1,2,3 newsletter without full membership privileges may receive this newsletter for an annual fee of \$14.00. Send your dues to:

GEORGE SCHNEEWEISS
2801 S KILBOURN AVE
CHICAGO IL 60623-4213

Here is the list of 1992 Executive Officers and how to contact them. The club has four strong SIGS, Tandy Color Computer 1, 2, 3 and OS-9. If you have questions concerning these computers or OS-9 call one of the officers. Area code C=312, S=708.

CoCo-1,2,3 CONTRIBUTIONS

If you would like to contribute an article to the newsletter, upload a file to the Glenside CoCoRama BBS with an extension of '.NEWS'. If you have an AD for the newsletter UPLOAD a file with the extension of '.ADS'. If you have NEWS to POST about your group, please use the message base. These files are gathered by the BBS computer and downloaded to the Editor. If you need help contact the SYSOP by E-MAIL, mail, in person, or by phone:

DAVE BARNES
37218 N. FAIRVIEW LANE
LAKE VILLA, IL. 60046

It is preferred that you call: VOICE 708/587-9820 or BBS 708/587-9837
On DELPHI - DAVIDBARNES On CIS - 73357,1324

Articles for the CoCo-1,2,3 will also be accepted on diskette in ASCII form and UNFORMATTED only in the following formats:

RS-DOS 5 1/4"-35 SSDD/DSDD 5 1/4"-40 SSDD/DSDD
OS-9 5 1/4"-35 SSDD/DSDD 5 1/4"-40 SSDD/DSDD 3.5"-SSDD/DSDD
MS-DOS 5 1/4"-40 SSDD/DSDD 3.5"-SSDD/DSDD 5 1/4"-1.2 Meg

Submission deadlines for the CoCo-1,2,3 are two weeks prior to each monthly meeting. Articles submitted after the deadline will appear in the next issue.

CoCo-1,2,3 NEWSLETTER EXCHANGE

The Glenside Color Computer Club of Illinois is pleased to exchange newsletters with other Color Computer user groups at no charge. Send your newsletter to:

DENNIS DEVITT
21 W 144 CANARY ROAD
LOMBARD, IL. 60148

If you desire to reprint any articles that appear here, please provide credit to the author and this newsletter.

We encourage your user group to copy this newsletter and distribute it at your regular meetings to your members free of any charge as we believe that this will encourage better meeting attendance. If you are a user group that feels as we do, please let us know in your newsletter so that we might do this for our members and keep our attendance up.

GLENSIDE CLUB MEETINGS

The Glenside Color Computer Club meets on the second Thursday of each month, from 7:30 - 9:30 PM, at the Glendale Heights Public Library. Further info can be obtained from Tony Podraza at home 708-428-3576.

FUTURE MEETING DATES:

February 6
March 12

A social get-together always occurs afterward at the Springdale Restaurant.

Continued From Page 1

Please let us know as soon as possible. Depending on the interest... well, let me know, and keep watching to see what happens. But, let me know, okay?

Oh, I did say "some good news", didn't I? Well, first let me tell you that you've seen part of it, already. CoCoPRO! will be handling the items formerly handled by Howard Medical. So, while we've lost a local Chicagoland location of support, we still have that support. The goods and services haven't vanished from sight, as has happened in the past, elsewhere. And secondly, I'm not going to get on a soapbox, this month. Just sit back, enjoy the rest of the newsletter and have a quiet and restful day. Peace.

January Meeting Review

By Howard Luckey

Ah, another fine meeting with a very fine turnout, and we even started close to 7:30 PM!

Tony, our pres, asked if anyone was a first time visitor and no one was. Later in the meeting we did a round of introductions because one of our old time members, Jim Pelecke, was present. Bob Swoger wanted us to meet him and wanted Jim to tell about some fine programming that he had done. Back in 1986 Jim wrote a program under RS-DOS which he used to keep track of 1300 members of a club he belonged to. He used a process called streaming and the program could be used to generate treasurer's reports, mailing labels, etc. (Maybe Jim could do a demo sometime.) I don't know what streaming is and I think that would be a real nice topic for someone to write for the newsletter. Streaming sounds like it might be a very useful technique to learn and use. How about it Jim (or someone else)?

Now, back to the beginning of the meeting. Tony passed out an updated roster. As of December 31, 1991 the club has 108 paid members. Let's keep this up.

Next Tony reported about progress being made on the Glenside Plan. This is a plan where we print ads from vendors in our newsletter and in return, the vendors will offer a discount on products they offer. For example, there is a tentative offer from COCOPRO! for a 10% discount on any two products. Speaking of discounts Tony talked about progress being made with Tony Hamilton the Inmac (a computer supply company) representative who is working on providing a 15% discount on most products, the exceptions would be ten line items. What those items would be is still being worked on.

Then Tony mentioned that Howard Medical announced in a press release that it has sold its CoCo business to COCOPRO!.

Both Ed Stroh and Greg Cramsey earned a set of disks for articles printed in the last newsletter. Nice going guys. I invite and encourage others to make a contribution to the newsletter. Send contributions to Dave Barnes, the Editor, in ASCII format via the Glenside CoCoRama BBS (708) 587-9837.

Tony mentioned the OS-9 Community Network (the group working to build a OS-9 support community) is building a data base of interested people. He had some sign-up forms which were passed around, and he even had a copy of the bylaws which were quite a few pages longer than our own club's set of bylaws. One

reason for the Network is to replace the extinct OS-9 Users Group.

According to Tony there will not be a Chicago RainbowFest in 1992, and starting in March The Rainbow Magazine will have a different format. It will be in a 32 page tabloid form. The magazine has been losing money for about a year and this new format is a cost cutting one. Considering the present size of the magazine, the new format will allow for more content. I hope it can begin to grow and prosper soon.

The Rainbow is also making a change in its advertising procedures. A business or person can buy a one page spread and sell parts of it to other businesses. I hope this will help!

We then held a discussion about the possibility of Glenside hosting some kind of fest. Some of us wondered if COCOPRO! would hold a fest such as the one that has been held in Atlanta for the last two years. There have been rumors to that effect from time to time. According to Tony the 'Meyers' are about fifty-fifty as to sponsoring one, although they are willing to attend a fest if it is sponsored by someone else. Sponsoring a fest means that COCOPRO! would do most of the work such as advertising, ticket processing, and so forth and right now they are not sure they want to do that, especially after losing money on the last Atlanta fest (but not on their booth). If COCOPRO! were to sponsor a fest they would want the help of a CoCo club, and I don't know what clubs exist around Ypsilanti, Michigan. Of course if they did decide to hold a fest in the Chicago area our club and other clubs such as the Cook County CoCo Club and the Chicago OS-9 Users Group would have to pitch in and do a lot of work.

Suppose, however, COCOPRO! decides not to sponsor a fest. What should our club do? This was the next topic of discussion. For us to sponsor a fest even with the help of the other clubs would require a heck of a lot of work. Do we want to do it? There was some discussion about what the club would have to do such as finding a place where the fest could be held that was reasonable for vendors and for attendees and close to where they are staying, preferably in the same building, etc. Then Bob Swoger made a motion that the club, through the newsletter, survey the members about our desire to make the effort to hold a fest. The motion stressed that this is only a survey and in no way does the club commit to holding a fest. The motion passed.

Tony announced the club has a complete modem to loan out. 'Complete' means a 300 baud modem, the cables, the software, etc. This is a way for the club to help any member who wants to get started communicating with their CoCo but can't, at the moment, afford to buy what is needed.

The club passed out a set of door prizes. Each person was given a piece of paper with a number on it. Earlier in the meeting Joel Hegberg had written a program which listed the numbers one through the number of people present, one at a time until a key was hit. When a key was hit the person who had the number shown on the screen won a prize. There were some very nice prizes.

By now it was time for demos. The first demo was by Carl Boll and Joel Hegberg who demoed the Point Of Sale (POS) set using the CoCo3 hooked up to a cash drawer which the club had used in its booth at the Atlanta CoCoFest. Joel had written the software and Carl provided the hardware. Joel worked on the program almost all night before going to the fest and at the fest Carl asked him if it had certain features and Joel said that he didn't know, but when things were set up the features were there. The software kept track

January Meeting Review

Continued From Page 3

of prices which could be changed, sales, numbers of items sold, new membership addresses, dues paid, etc. After items were entered all one had to do was hit a key and the cash drawer would open. Joel showed all of this including some of the names of new members who had signed up at the fest. At the fest the set up proved to be very stable because several times there was a power failure at our end of the showroom and we never lost any of the data.

This demo was much better than the one last month where Carl had the same set up but it was just a part of a lot of other stuff going on. This time Joel and Carl had center stage and all the members present could see and hear the demo. Thank you Carl and Joel.

The last demo was a software package put out by Tandy called "Tandy Cookbook". Apparently this was put out many years ago but never really pushed by Tandy or never became a hot selling item. Tony put it through its paces and one of its nice features is that you can very easily multiply the amounts of the ingredients when you have to make more than the recipe is set up for. Thank you Tony.

That was the end of the formal meeting. During the close down period some people got into small group discussions and later we went to the restaurant for the meeting after the meeting.

The Glenside Plan

By Carl Boll

As many of our members know, joining the club has many benefits; one of which is the Glenside Plan. This is a plan by which vendors offer a discount on some or all of their merchandise to club members. At the present time we have verbal commitments from the following vendors: IMS, Frank Hogg Labs, Delmar, Eversoft, Sub Etha, Burke & Burke, N Johnson, CoCoPro!, Hawk Soft, The Rainbow Magazine and Nelson Software. I may have missed a few vendors but I don't think so.

As I said, these are the ones who we have agreements by word of mouth with as of the printing of this newsletter. I am making a 100+ piece mailing this week to vendors of CoCo software and hardware. I am certain we will be making the list much longer in the near future. There are many changes in store for the community and I hope that the Glenside Color Computer Club will be able to play a key role in shaping the direction of change. We are committed to keeping our computer a viable platform for many years to come.

Hardware Hacking

By Mark Farrell

Tandy RS-232 PAK

Parts required:

6551 ACIA 2.0 MHz version recommended for both	2
MC1488 RS232 level converter	1
MC1489 RS232 level converter	1
Crystal 1.8432MHz	1
9-pin or 25 pin "D" type female (your choice)	1

If I had to do it again, I'd use two 9-pin connectors and adopt the IBM AT interconnect as a standard...but that's just me.

Prepare the chips for mounting piggyback by bending these pins STRAIGHT out from the body of the chips:

6551 (Just ONE not both):

Pins: 2,5,6,7,8,9,10,11,12,16,17,26

1488 and 1499:

Pins: 2,3,4,5,6,8,9,10,11,12,13

Now you are ready to mount the chips. Please be sure to note the position of pin #1. There is usually a small dot next to pin #1 and there should ALWAYS be a "U" shaped notch or "dimple" at the end of the chip with pin #1.

Looking at the top it would be like this:

Now, piggyback the 1488 to the original on the board and do the same with the 1489. Solder only the pins you left pointing down at this time.

Do the same for the 6551 chip.

And I quote the following:

"Remove the plastic covering from the card edge side of the xtal. Place a piece of electrical tape on the board adjacent to the xtal and slightly larger. Now tack solder the new xtal to the original so they are side by side. (sounds like a song) Cut the leads so they do not interfere with the 6551(s).

Decide on the type, position, mounting and pinout of your new

New OS-9 Community Network

Your OS-9 Connection to the Future

LET YOUR IMAGINATION RUN WILD!

Imagine a database filled with freeware, shareware and public domain files, utilities and programs for OS-9/6809, OS-9/68000 and OS-9000. Imagine being able to download this software via modem or order it via mail.

Imagine a database filled with BBS systems, clubs and users groups from Canada, the United States and points across the sea.

Imagine a database filled with OS-9 retailers, manufacturers and distributors of both hardware and software for the OS-9 Operating System, offering support when you need it.

Imagine being able to search a database for hardware and software experts to help with your problems. Imagine this same database holding names of companies needing programming and hardware experts.

Imagine receiving a catalog of all the above for the price of a stamped self addressed envelope (SASE). Or, if you have a modem, being able to go to your regional library and download to your heart's content.

Along with all this, imagine receiving the OS-9 Community NetNews monthly, packed with articles and information on the OS-9 Operating Systems for the 6809, 680xx and OS-9000.

Imagine no more! As a member of the OS-9 Community Network, all this and more will soon be reality for you.

The dynamic new OS-9 Community Network is now forming and would like to offer you a charter membership. To become a member, leave your name, address, phone number and which OS-9 Operating System you use. If you prefer, send your information via mail to:

A Review of Newspaper-09

By Br. Jeremy,CSJW

Over the years, I have owned almost every Word Processor released for the COCO 2 and 3. I began with Scribes. Then I moved on to TSEDIT/TSWORD. I produced the first draft of a 500 page Breviary (Prayer Book) with it. Next I tried TextPro IV. I have also used Simply Better and fooled around with VIP Writer. Finally I purchased MAX-10. It is in my opinion, the best RS-DOS program ever written. I had often hoped that one day some one would write an OS-9 version of it.

Earlier this year, I saw advertisements for Newspaper09. The ad spoke of it as "Desktop publishing for OS-9...a Newspaper design system..." and other glowing descriptions. A friend, lent me his copy for a few days, so that I could see if it was what I was looking for, before I bought my own copy.

Newspaper09 comes as a multi disk set. There is the main program disk, a font disk, and several graphics disks. (There were also several disks which attempted to correct a printer driver problem.)

Booting up is not too difficult. After booting up OS-9, you issue the commands:

```
CHD /D0/NEWSPAPER/DATA; CHX /D0/NEWSPAPER/CMDS[ENTER].
```

Before you can use Newspaper09, you must configure it to your system/hardware. The Configuration program asks questions such as, monitor type, Hi-Res adapter in use, Directory locations, Printer info, etc. After the Configuration program is completed, you are ready to use Newspaper09.

Enter the command:

```
CHD /D0/NEWSPAPER/DATA; CHX /D0/NEWSPAPER/CMDS[ENTER]. and then type:
```

Startnw.

After a glimpse of eternity, it is loaded and up and running. A main menu panel will be displayed. It includes, "Type-Up", "Layout", "Print", and "Utility".

TYPE-UP

Type-Up is described in the users manual as a Graphic Editor. It is NOT a text editor in any serious sense of the word. It simply allows you to type in text. There are no provisions for cutting and pasting of text. There are no provisions for inserting a letter, let alone a word. If you are familiar with the KissDraw series from Rainbow, it

is similar to the "text inserter" [my description for it.] I would consider it more of a picture "captioner". I do not see, how, for example, one would wish to use it to enter a document such as this one.

Type-up also includes a picture stamp command. This allows you to "stamp" a picture already in memory, anywhere on the work screen. It also includes a graphics editor of sorts. It allows you to draw lines, boxes, circles, triangles, etc. It is no CoCoMax 3, but I suppose it is adequate. There is no zoom control. In other words, you can not enlarge a picture for finer editing.

There is no way to load in text that has been prepared by another editor. At least none that I could find. The documentation does not mention it. I tried various things to try to load text, but to no avail. A MAJOR drawback, to say the least.

LAYOUT

Newspaper09 has allows for a two column layout format. You can have a "banner" which spans the page. You are limited to a maximum of eight blocks.

A Review of Newspaper-09

Continued From Page 5

For example:

Block 1 Block2 A banner would use Blocks 1 & 2
Block 3 Block4
Block 5 Block6
Block 7 Block8

There are some minor variations possible, such as two-column, side by side panels, and banners. When finished, the layout is saved. I suppose that these layouts could be considered as templates. Some word processors allow for a library of pre-configured "style-sheets". If you know that you want a headline or logo at the top, just use a pre-configured style sheet.

PRINT

The Next Option is Print. It requires you to load the page into memory before printing it. It allows a preview of the final page, before printing. There is a draft and a Near Letter Quality (NLQ) Mode. The speed, while adequate, is typical of any other screen dump type printer.

UTILITY

The Utility section includes the Configuration Program, a pattern editor and several RS-DOS to OS-9 Converters. They allow converting files, fonts, and pictures from RS-DOS to OS-9 format. Unfortunately this only works for files, etc., created under the RS-DOS version of Newspaper09, such as Newspaper Plus or Newspaper-Final Edition.

CONCLUSION

Eric Wolf, the author of Newspaper09, is a talented young man. I don't believe he has yet reached his twentieth birthday. He has created an interesting program. Yet, as I mentioned earlier, the ads said "Desktop publishing for OS-9...a Newspaper design system..." I think that in its current form, Newspaper09 doesn't truly live up to that description. I do not feel that you have enough control over the finished page. I did not see any way to resize graphics to fit the page. There was no way to import previously composed ASCII files. I found it difficult to compose anything more than a single page. It is simply too cumbersome. I had hoped to be able to at least use Newspaper09 to compose this review, but instead I am using TSEdit. To paraphrase a friend of mine, "It is difficult to praise a product, when you can't use it to write its review."

Last April, I uploaded a file to CIS and Delphi called MVWORD.AR. It contained some of my thoughts on DTP/Word Processing for the COCO under OS9. I provided several resources for anyone contemplating developing an OS-9 based Desk Top Publishing Program. I won't repeat all of it here. I still think that there is a need for an OS-9 version of MAX-10. If there was a utility that one could ^{use} which would convert the RS-DOS Max-10 to an OS-9 version, I would gladly pay the \$79.95 I originally paid for MAX-10. It would be my most valuable utility. Since that doesn't seem too likely to ever happen, if you are ever visiting the monastery, and my COCO screen says, OK, then you'll know I'm in RS-DOS land, loading MAX-10.

Reminder

Due to a scheduling problem with the Glenside Public Library, we are rescheduling the February meeting to the **FIRST** Thursday of the month. This will take place only in the month of February. We hope that this notification is sufficiently early enough to enable you to make any adjustments to your schedules and regret any inconveniences that it causes.

Glenside membership dues are now due for 1992. Please contact George Schneeweiss at the meeting or by phone at (312) 376-0126.

Business-Bytes

By The Delphi Downloader

While keeping in the vein of the Alfa-Bytes series, I just couldn't resist printing this little ditty...

IMPORTANT BUSINESS TERMS

ACTIVATE: To make carbons and add more names to the memo.

ADVANCED: Beyond the comprehension of the ad agency's design copyrighters.

ALL NEW: Parts not interchangeable with existing models.

APPROVED (Subject to Comment): Redraw the damned thing.

AUTOMATIC: That which you can't repair yourself.

CHANNELS: The trail left by interoffice memos.

CLARIFY, TO: To fill in the background with so many details the foreground goes underground.

CONFERENCE: A place where conversation is substituted for the dreariness of labor and the loneliness of thought.

CONFIDENTIAL MEMORANDUM: No time to mimeograph/photocopy for the whole office.

CONSULTANT: Someone who borrows your watch to tell you what time it is - then walks away with the watch.

DEVELOPED AFTER YEARS OF INTENSIVE RESEARCH: Discovered by accident.

EXPEDITE: To confound confusion with commotion.

FORWARDED FOR YOUR CONSIDERATION: You hold the bag for a while.

Business-Bytes

Continued From Page 6

FYI: Found yesterday, interested?

GIVE SOMEONE THE PICTURE: To make a long, confused, and inaccurate statement to a newcomer.

GIVE US THE BENEFIT OF YOUR PRESENT THINKING: We'll listen to what you have to say, as long as it doesn't interfere with what we've already decided to do.

IN CONFERENCE: Nobody can find him/her.

IN DUE COURSE: Never.

INFRASTRUCTURE:

1. The structure within an infra.
2. The structure outside the infra.
3. A building with built-in infras.

IT IS IN PROCESS: It is so wrapped up in red tape the situation is almost hopeless.

LET'S GET TOGETHER ON THIS: I am assuming you're as confused as I am on this.

NOTE AND INITIAL: Let's spread the responsibility for this.

POLICY: We can hide behind this

PROGRAM, A: Any assignment that cannot be completed by one phone call.

SEE ME: Come down to my office, I'm lonely.

SOURCE, RELIABLE: The person you just met.

SOURCE, INFORMED: The person who told the person you just met.

SOURCE, UNIMPEACHABLE: The person who started the rumor originally.

TOP PRIORITY: It may be idiotic, but the boss wants it.

UNDER CONSIDERATION: Never heard of it.

UNDER ACTIVE CONSIDERATION: Never heard of it, but we're looking in the files for it.

WE ARE MAKING A SURVEY: We need more time to think of an answer.

WE WILL LOOK INTO IT: By the time the wheel makes a full turn, we assume you will have forgotten about it too.

WILL ADVISE IN DUE COURSE: If we figure it out, we'll let you know.

Hardware Hacking

Continued From Page 4

connector before you proceed. This is important to wire length and routing. The BEST and EASIEST way (trust me) is to pre-cut and trim and tin one end of twelve wires for the LONGEST length you will need."

Now, ONE AT A TIME...run and trim to fit the following wires: (Hint: Tin all the pins you will be soldering on to first.)

FROM CHIP	PIN	TO CHIP	PIN	SIGNAL NAME
6551	2	U6	9	A2 from COCO
6551	6,7	xtal		Oscillator
6551	8	1488	10	RTS
6551	9	1489	8	CTS
6551	10	1488	13	TD
6551	11	1488	4	DTR
6551	12	1489	3	RD
6551	16	1489	11	DCD
6551	17	1489	6	DSR
6551	22	----	-	E2

FROM CHIP	PIN	TO CONNECTOR 9-PIN : 25-PIN	SIGNAL NAME
1488	6	4 20	DTR
1488	8	7 4	RTS
1488	11	3 2	TD
1489	1	2 3	RD
1489	4	6 6	DSR
1489	10	8 5	CTS
1489	13	1 8	DCD
		5 1,7	TP4 (GROUND)

Note: Check the 9-PIN for correct connections, I think it's right.

Again I quote:

"The 232 pak has CTS pulled high with a 10k resistor. So far I have had no problems without it. Some modems may require it if they use contact closure type of interface."

It is strongly suggested to get a copy of the rs232 pack service manual. TANDY part number 26-2226 for a cost of \$4.04 (in 1988).

The original author of this doc was Rix Seacord, CIS 72345.427.

Re-Doctored by Mark W. Farrell

Good luck!

Color Computer Software List

Continued From The January Issue

Software List for Tandy Color Computers 1,2,3 as of 12/20/91

Compiled by Edward Stroh from Thornton, Illinois
 This is a list of software that was obtained from three different sources.

1. Software Buyers Guides 1989 and 1991 which are Tandy Publications.
2. Supplemental Software Catalog circa 1987 which is also a Tandy Publication.
3. Rainbow Magazines December 1990, May 1991 and December 1991.

The format of this list is as follows:
 first column is the name of the program.
 second column is the catalog number if applicable.
 third column is the price of the program.
 fourth column is the source of the program.
 fifth column tells whether the program is on disk, tape, or Rom Pak.

In the first column, (Name Of Program), if there is a CC3 next to the program name, that denotes the program is for Color Computer 3 only. If there is no CC3 notation next to the program name then it should work on any Color Computer model. If there is OS9 or OS9/L2, that means that you need those operating systems to use that particular program.

In the second column a catalog number is only found on those programs that are listed in the Tandy publications. These programs can be purchased through the Tandy Express Order by calling 1-800-321-3133. I can not guarantee that all of these programs are still available.

CONTINUED IN NEXT MONTH'S ISSUE

From the Editor's Desk

As you have read in Tony's article, there will be no Rainbowfest 1992. It is really hard to believe I have managed to attend Rainbowfests for 6 years in a row. I even managed to attend one Rainbowfest as a 'helper' for Bob Rosen (remember that name?) from Spectrum Projects! Ed Hathaway and I presented a seminar on starting and maintaining a CoCo club during one fest. And of course, I also attended four fests representing my own company with my partner and good friend Ed.

Remember how disappointed we all were when we discovered there would no longer be a Princeton Rainbowfest? I suppose we all knew our number would be up... but alas, we were hoping it was not to be this soon.

I shall miss the hours of endless wandering in the fest hall; talking with vendors and friends. I shall miss the many seminars from some of the finest people within the CoCo community. There are many things I will miss about the Rainbowfests which we will no longer have... at least I can console myself with the notion of having The Rainbow Magazine supporting our CoCo for some time to come... Or can I ???

Dave

Location:

Glenside Public Library
25 W. Fullerton Avenue
Glendale Heights, IL. 60172

Directions:

Fullerton avenue is about 1 mile North of North Avenue (Route 64). The library is located West of Bloomingdale Road in Glendale Heights. Bloomingdale Road is approximately 2 miles West of Route 53 (or I-355).
