Remin's Ramblings

Well, here it is, the very first CoCo-Link magazine produced on my trusty CoCo and the first of what I hope will be many more over the years to come.

KUDOS:

Before I go any further let me take this opportunity to publicly thank Robbie Dalzell and Garry Holder for their tireless efforts over the last four years in keeping the CoCo users of Australia together. I have no doubt that a lot of us would have given the game away and gone to one of those (yuk) other machines if it had not been for their efforts. For your contribution to our community Robbie and Garry, I think I can speak for all of us, we most sincerely thank you.

NOW WHAT:

This magazine will continue to be a publication designed for the CoCo users, to keep us informed, to help us grow and to enhance our enjoyment of what I believe is the most versatile computer to ever hit the market. This the first issue, you may find a little lean in the program department, that is because you have not sent me any to date, (well in time to put them in the magazine anyway), but it is chocker full of information on all manner of subjects that I hope will be of interest to all of you.

The Soap Box:

Here is where I get to let you know what I need to keep this magazine going strong. The very

first thing I need is your programs. It does not matter that the creation you have designed, in your eyes, is not as good as some you have seen. Every program needs somewhere to start and by sending it to me it can be critically looked at by other users just like you and if everyone of them send in those little enhancements then it can grow to something that even you did not think it was capable of. To put this in perspective let me tell you about the very first program I submitted to a magazine, (it was called CoCo at the time), I thought it was simple and in the same league as some that had been submitted by kids young enough for me to be their grandfather. But, it was printed and it was enhanced, and it grew into a useful application program.

So send them in, I will print them in the magazine, and hopefully someone else will pay you the ultimate compliment by using your idea to produce something that we have all been waiting for.

What else do I need from you, well apart from the money for a subscription, anything to do with the CoCo. Letters to the editor, requests for help, reviews on that program that you think is great, that score on whatever game that you are proud of, information about the user group you have started, hints and tips for other users, bitches about the content of this magazine or it's layout and the list goes on.

THIS MAGAZINE WILL SURVIVE FOR
AS LONG AS YOU THE USERS
SUPPORT IT!!!

DEAR ED.

Link-Up

Dear Ed,
I would like to be amongst the first to congratulate you on your decision to carry on COCO-LINK where I left off. I, more than most, realise the workload you have taken on. There will be stress and times when you wish you had never taken it on in the first place but to counteract that there is the satisfaction and, as I found, the enjoyment of helping to keep the Coco alive and well. I think over the years we have all done well and I am sure your efforts will help to keep us all on track.

I hope all the previous subscribers to COCO-LINK will support your efforts wholeheartedly. To show our commitment and faith in your abilities, Garry and I, as previous publishers of COCO-LINK, would like to be the first of the many to subscribe to COCO-LINK 1993. I hereby enclose our cheque for \$36.00.

Thank you and good luck for the coming year.

Robbie Dalzell .

I thank you for your vote of confidence Robbie, I just hope I do as well as you have done. ED

Dear Mr Remin,

Here is my subscription to COCO-LINK. I am also enclosing a disk of some of my drawings. They are not perfect, as lot of drawings I have seen, but I am still trying. They were done

without a drawing program, just line commands. I am 50 years old and suffering stress related illness and agrophobia, I use my CoCo as a therapeutic tool. I used to be in the Army also, during Vietnam and worked at 2 Camp Hospital at Ingleburn, where I was for a number of years. Good luck with CoCo-Link.

Graham Elphick.

Good old Ingleburn, I remember it well back in 70 when I first joined. I am pleased to see that the coco can be used for something other than playing games, I hope it does help you. Your programs appear later in this magazine and I thank you for them. ED

Dear Fred,

Great news that you intend to keep the magazine going, and hope that it doesn't prove too much of a burden. Don't know how anyone can do it for the price and should that need to be increased it's still well worth it. I'm not doing a lot with my computer, but it's helpful to know the network still exists. Al Robbins.

I hope to be able to keep the price of CoCo-Link at \$18 per year for as long as possible Al, if I am forced to increase the price rest assured it will not be overnight and I will consult all subscribers before doing so. ED.

Up Yonder by Frank Swygert

News From "Up Yonder".....
(If Australia is "down under", the
USA must be "up yonder"!)

Just a few months ago, just weeks
before the October '92 CoCofest in
Australia AND the Atlanta, Georgia
(USA) CoCofest here, Fred Remin
told me he would be taking over
publication of a CoCo magazine in
Australia. I told him I would be
willing to write a column
reporting on news items from the
US, an offer he graciously
accepted!

Now where do I start? Let Fred
know what you want to hear about
most, and he can forward that
information to me. I will post the
addresses for mentioned companies
at the end of the column. All
prices are in US dollars, not
Australian! (I will do the
conversion as required. Fred)

Once The Rainbow was reprinted in
Australia. It may be entering its
last few years here. The publisher
went to a tabloid format back in
March '92. It started out with 32
pages, then dropped to 28, 24 and
is now at 20. The size is about
that of "Globe". The subscription
rate has been maintained at
\$31/year, and the advertising
rates have also remained high. The
last ad I ran (October '92) was
1/4 page and cost me \$285. The

circulation has dropped from
around 8,000 to little over 4,000
in the last year. One reason is the
outrageous ad rates. It appears
that Lonnie Falk at Falsoft intends
to let The Rainbow die of neglect.
Those who take Rainbow keep
supporting it! It won't die as long
as support continues. And write
Mr. Falk a letter about those high
ad rates (they are running small
companies away from Rainbow!).
There is no reason such a small
newspaper could not be published
for the subscription rate alone!

A high note... there are TWO NEW
CoCo publications! The first is
UpTime, an 8 1/2"x11" newsletter
printed by JWT Enterprises. The
last one (Dec '92) is 12 pages, and
looks great! This is mainly an
advertising newsletter, not a full
magazine. It is obviously printed
with a laser printer and good desk
top publishing software. There are
eight advertisers in this issue.
Yearly subscription is \$15+\$7
airmail. JWT also publishes
Nine-Times, and OS-9 magazine on
disk. It is \$34.95+\$8 airmail. The
second is OS-9 Underground. This
is a nice little 5 1/2"x8 1/2" 54
page magazine. It covers both OS-9
and OSK (OS-9 for 68xxx based
machines). There were 17
advertisers in the August issue.
Price is \$27 surface, \$48 air. Ads
in these publications range from

Up Yonder by Frank Swygert

\$25-\$55 for a FULL PAGE. Rainbow should be more, maybe \$200 for a full page would be acceptable...

There has been much interest in some of the 68xxx based machines. Will get info of them to you later if desired. There has also been much ado about the Hitachi 6309. Two companies, Gale Force and Burke&Burke, have OS-9 patches for it. These software enhancements add at least 20% to the speed of OS-9 under ALL software. Gale Force is Canadian and sells NITROS9 kits for \$49.50, software for \$34.50. B&B sells PowerBoost kits for \$29.95 (kits include a 40 pin socket and HD63B09E chip). No info on overseas shipping was available. Adding another \$15 should cover air mail (I'm a dealer myself!).

Oh yes, remember the Dragon.. a CoCo 1 clone? They are still available, new in the box! Price is \$39 plus shipping from California Digital. They bought out the remaining stock when Tano (US distributor) folded back in '83 or '84. Have been selling them since! They only have the computers and docs, joysticks, and a few program packs.

Next time I'll tell a bit about my company and what I have in the works. Until then, let Fred know

what you want to hear about! I've also sent Fred some additional info on the Hitachi 6309. Expect something from him soon!

the Desert Fox

(Any questions you may have for Frank can be sent to me by mail or on disk, disk being preferable for ease of mailing to the States and compilation of questions.
ED.)

Edgeings by Dr Val Stephen

The following few shorties are submitted by Dr Val Stephen. They are very simple and easy to use but at the same time show off some of the capabilities of the CoCo in Basic. They could be a challenge to some of you would be programmers to enhance them, maybe in machine language or even DS9. If you do take up the challenge, then send me the results so that we can all benefit from them.

PUBLIC DOMAIN SOFTWARE

The COCO-LINK PUBLIC DOMAIN LIBRARY will continue in conjunction with COCO-LINK magazine into the future. The only change to the format is that in future all cheques/money orders should be made payable to:
ROBERT DALZELL
31 Nedland Cres.
Pt. Noarlunga Sth.
SA 5167

As in former years I am still looking for material to put on these disks. It would be a great help if those contributing programmes to COCO-LINK magazine would continue to grant permission to include their work on PD disks. Anyone wanting their work to appear on these disks should send it on a disk to the above address including a text file of instructions if necessary.

Two new disks appear in the PD Library this month. One is for those people who like to get more from the Coco by using utility programmes to ease the way, and the other is for the modem users.

DISK No.025 UTILITIES 5
=====

Here we have a disk packed with useful utilities. These include

programmes to change MSDOS text files to RSDOS format and vice versa.

There are programmes to check, clean and catalogue your disks. Programmes to check your memory and set up a RAMdisk.

You will surely find something useful here to add to your utilities file.

DISK No.053 GETERM
=====

GETERM is another of the most used terminal programmes for Coco.

This disk includes the full programme plus a help file and full documentation.

The COCO-LINK PRINTDOC file has been included for ease of transfer of the document files to screen or printer.

These disks, and a full range of disks are available from the above address for \$5.00 each including postage. Send for the free catalogue.

CoCo III Tool Kit

Disk Commands

*Backup, Initialize,
Directory, Verify, Compare,
Search, Edit, Erase, Speed
Test, Step Rate Test, Gran
Table Analysis & Repair*

File Commands

*Arcive, Copy, Kill, Rename,
Erase, View, Edit, Print,
Compare, Salvage, Search,
Verify, Test Arcive, Un-
Arcive, Xmodem Send/Rec.*

Coco Tools is a comprehensive set of disk utilities, providing the most complete set of functions available for the standard R.S. DOS disk system. Comparable in scope and functionality to that of the famous utility available for MS-DOS computers "PC-TOOLS"!

Coco Tools provides fast and easy operation of standard commands like Copy, Rename, Kill, Disk Initialize and Directory thru a consistent and easy to use interface. It provides easy visual selection of files, so multiple file operations can be carried out with very few keystrokes.

Coco Tools is also the most Comprehensive Disk Repair program available, it Automatically diagnosis and repairs file allocation errors, locates corrupt directory information and cross linked files. It provides fast and easy recovery of deleted files without the drudgery normally associated with killed file recovery. It also does lightning fast disk I/O for fast Backup and Copying at speeds you thought only higher priced computers could perform. Coco Tools has multi-file Arciving, Un-Arciving and Test Arciving functions plus the ability to extract any selected group or individual files from a compressed file with easy visual file selection. And allows customizing of display colors, printer/Serial baud rate, Drive step rates and Directory sorting preference. Coco Tools requires a 128K CoCo III, 1 Disk drive and an 80 column display \$49.95

COCO FRIENDS DISK MAGAZINE

"The most exciting new product for the CoCo Since....?"

COCO FRIENDS DISK MAGAZINE (CFDM) is devoted exclusively to those who still enjoy running under RS Dos. The standard system needed to use CFDM is CoCo 3, RGB monitor, at least one disk drive, and the RS Dos which came with your CoCo 3.

CFDM is a monthly disk based publication which is produced on a "flippie" disk. When you "Run" the "magazine" side of CFDM, you'll be greeted with a beautiful cover picture by CoCo Friend James Gibbons. Pressing any key takes you to the magazine's colorful Main Menu. There you'll find 14 sections which are filled with entries. Sections included are: About CFDM; About this Issue; Active CoCo; Advertisements; CoCo Friends Art Gallery; Articles of the Month; Family Tree; Forum; From the Editor; Letters to the Editor; Potpourri; Programs of the Month; Reviews; and Question & Answers.

Next you will enter a Section and find a number of entries written by our CoCo Friends from all over the world. Each issue of CFDM contains from 60 to 80 entries. Some sections contain documentation about the many programs and graphics found on the "flip-side" of CFDM.

The "flip-side" or "program" side of CFDM is filled with contributions of wonderful programs and graphics from our many CoCo Friends! Each issue has from 2 to 4 hi-res pics and from 8 to 15 never-before-seen programs.

**8 to 15
never-before-seen
programs**

**The above software is available in
Australia through REMCOMS**

WARRIOR KING !!!!

A review by Val Stephen.
(* = Poor, **** = Top Excellence.)

Today I had the pleasure of reviewing "WARRIOR KING" by Sundog Systems.

This is a good example of a protected disk, you simply cannot back it up! Congratulations Sundog!! It is a well produced ML Arcade game with the game on one side of a "Flippy" and the graphics on the flip side. You can copy the game but it will not execute. You cannot copy the graphics at all. I was not able to complete all the adventures, which require quite a degree of skill and co-ordination. I had a lot of fun testing this progra which I can wholeheartedly reccommend to all. The adventures are those of a Martial Arts expert in the execution of his art. It is very well documented and is user friendly, it can be used on both 128 and 512K CoCo's. Graphics quality is excellent and I found no bugs in the product.

I give it a **** recommendation.
(Available through REMCOMS)

SUNDOG SYSTEMS

Energy is everything; your home world depends on it. However, someone or something is slowly siphoning it away. As your world's champion, you must climb into the experimental Power Tank to challenge this nemesis and his minions. Your key lies with the ability to teleport solid mass. Use this to manipulate and explore the endless stronghold of the enemy, and to exploit the free-floating DUPES (Dense Units of Photon Energy) to destroy the menacing Plasma Droids. Be cautious, though; those DUPES can be deadly, too! Photon, a fantastic new arcade game for your CoCo3, contains spectacular 320x200 resolution, 16 color graphics, ultra-smooth 60 Hz animation, and loads of real-time music and sound effects. It will send your mind racing over endless possibilities, requiring quick decisions and reactions. Quite simply, Photon is incredibly addictive; it will deliver hours of excitement. Will you become your world's greatest hero, or just another energy slave? Req. 128K CoCo 3 and disk drive.

\$34.95

GRAFX 2.0 EXPRESS

GrafExpress 2.0 is a complete graphics and music programming environment. From the beginner to the accomplished professional, you can use GrafExpress to create lightning fast arcade games, graphic applications and utilities, and windowing multimedia demonstrations! The GrafExpress package includes two incredible systems. GrafExpress 16 works on all monitor types and offers support in 12 graphic resolutions (from 128x192 to 320x225). GrafExpress 256 offers 6 resolutions (from 128x192 to 160x225 on a composite monitor) in an astounding 256 colors! Ever see a CoCo do that before? Both systems include standard graphics commands (CIRCLE, FILL, etc.) that blow away the competition. For example, the BOX command peaks out at over 2 MegaPixels/second; that's 300 times faster than BASIC! 255 separate sprites of up to 100x100 pixels each are supported with window clipping and high-res pixel level collision checking. The 8-octave/4-voice music synthesizer has independent envelope, waveform, and volume controls, a 7 + KHz sampling rate, and much more. Other features include text/graphics mixing, different font sizes, fast window copying and scrolling, picture save/load, easy implementation from both BASIC and assembly language, multiple screen animation, and support for 128K/512K, double speed, and the high-res joystick interface. The package also contains support programs that are worth the purchase price of GrafExpress alone! These include an introductory demo, a picture editor, a waveform editor, and an art program that supports 256 colors! GrafExpress also comes with a 50 page manual that fully explains all of its incredible features. If you do any graphics programming or simply want to see what your little CoCo is capable of, GrafExpress is a must! Req. 128K CoCo 3 and disk drive.

\$34.95

War Monger

The world is in unrest. Power-hungry villains and evil warlords are readying their forces. It falls to you to lead your people against these armies, and only your best strategic plans can save the day. Fight the good fight in any era or locale. Play a simple game of capture the flag armed with water balloons, or climb into the cockpit of a 100 foot high armored warrior. Explore the deepest dungeons, defend your galaxy, or create your own scenarios with this incredible war game construction set/simulator. Your imagination is your only limit. You will deploy your forces with total control over hostile terrain while you scroll a graphic bird's-eye window over an immense world. War Monger has terrific 320x200 resolution, 16 color graphics and includes a tile editor to create or edit your own. Play against the computer, battle with another player, or simply watch the computer plot against itself. The enemy is everywhere. Are you ready to take on the challenge as the War Monger? Req. 128K CoCo 3 and disk drive.

\$29.95

The Quest for THELDA

An immensely popular 128K CoCo 3 arcade/adventure. Over 500 screens of fast fantasy action and puzzle solving. Great graphics and sound effects. \$34.95. Hint book only \$4.95.

THE CONTRAS

A 512K two player futuristic combat arcade game. Full screen 320x225 hardware scrolling and smooth animation. Back-ground music score and sound effects! 512K CoCo3 only. 34.95. Shipping soon!

Crystal City

This was THE game of '91! Ultra-fast space action with hardware scrolling on a 128K CoCo 3. Wild sound effects and over 30 MegaBytes of amazing graphics! 34.95.

ZENIX

Lightning fast arcade game for the 128K CoCo 3. Terrific 320x225 graphics, back-ground music score and sound effects, and out-of-sight game play. \$29.95.

ALSO AVAILABLE

Warrior King CoCo 3	\$29.95
In Quest of the Star Lord CoCo 3	\$34.95

Visa Mastercard Check Money Order and COD (USA only please) accepted. All foreign orders must be sent in US currency. Money Orders include \$2.50 for shipping in USA and Canada. \$5.00 Foreign. \$3.00 extra for COD orders. PA residents add 6% sales tax. Dealer inquiries welcome. Authors: we're looking for new software!

Sinistaar

Everyone loves this 512K arcade game. 3 disks packed with spectacular graphics and eerie background digital sound effects. 512K CoCo 3 only. \$34.95.

TO BE NINJA

The best selling 128K CoCo 3 martial arts arcade game. Now available in both RS-DOS and OS-9 versions. Play the incredible combat experience you've been missing under the operating system of your choice! \$29.95.

SONNENSTRAHL

A polyphonic digital sound sequencing system for your 128K/512K CoCo 3 with a user-friendly point-and-click graphic editor. Create music scores with your own sounds or from the many we provide. \$34.95. Sample instrument disks: 6 sides of sampled sounds/instruments. Only \$12.95 each or \$29.95 for all three.

SUNDOG SYSTEMS

P.O. Box 766 Manassas, VA 22111
703/330-8989

The above software is available in Australia through REMCOMS

COMING SOON

In this column it is my intention to keep the coco community informed of upcoming events. This will include software, hardware and what is happening with user groups and companies supporting the CoCo.

The first piece of news for those that were not at the CoCoFest or did not receive Robbies last CoCo-Link, is the support now available through the new company REMCOMS. This company can now obtain just about any software or hardware that you may require from both in the States and here in Australia. Apart from distributing the Australian produced software from Gungadin Software and David Hendrie's CROSS-ROAD program, REMCOMS is also handling the DIGITISER built by Nickolas Marentes. From the States REMCOMS is an agent for Sundog, MicroCom, Cercomp and Bourke & Bourke, the company is also producing under copyright, here in Australia, all the products available from Farna Systems and Rick's Enterprises, including subscriptions to Rick's Computer Friends Disk Magazine.

5 MEG OF RAM !!!

Yes, you read it correctly, 5 MEG of RAM, very shortly a plug in board to give us some real memory will be available. This product is currently undergoing final tests here in Australia and a review will be in this magazine probably in the next issue. I for one am looking forward to doing this particular review. When this product hits the streets the CoCo will most definitely be a computer system to reckon with,

most probably give those other users a bit of a fright. Stay in touch for further details as they come to hand.

A SCANNER !!!

Again, yes you read it correctly, along with the 5 Meg board the SCANNER is just about a reality. This as far as I know at this stage will allow you to use a readily available commercial scanner on the CoCo. With this product, all we lazy typist will be able to check out those programs from CoCo-Link and other publications that were just to time consuming before to type in. Hopefully a review of this product will be in the next issue of CoCo-Link.

NEW SOFTWARE !!!

A number of software products are in the wind at the moment, some of these include a new game from David Hendrie and one from Darren Stephen. These should be available for review in the next month or so. I have on the way from the States a game called DESERT STORM, I am unsure of what it is like at the moment but I will have a review in the next issue. If you are working on a program that you believe is marketable then drop me a line and I will let users know about it through this column.

REVIEWS

CROSS-ROAD II.

A game of Tic-Tac-To by David Hendrie:

I take particular pleasure in presenting this review because it is on an Australian produced program. CROSS-ROAD II is a program written entirely in basic using graphics drawn with CoCo Max III and digitised sound produced by a program written by David Hendrie. I hope to be able to present a review of the digitiser in the near future.

One of the things I particularly like about this program is the onscreen prompts which negate the need for a bulky, confusing instruction manual. The one page instructions are more than adequate to have the absolute novice load and play the game immediately. As we all know, no two computers are exactly the same, therefore included in the instructions are a number of helpful hints for those "in case" situations. I believe that every program should have this facility in the instructions somewhere.

Because the game is written in basic it is a little slow in loading, but not so slow as to detract from the game, (I believe David is working on a faster version). Once loaded you are presented with a choice of playing either the computer or another player. I found that at times the computer would make a totally illogical move which allowed me to win the game, I particularly liked this computer stuff up because there is nothing worse than playing a

game against a computer which is impossible to win, (thanks David).

The play against another player is quite enjoyable, enhanced more by the digitised sound effects, especially if you are the winner. Even the drawn game, which is a common occurrence with those who know the game well, does not leave you high and dry.

All things considered I believe Davis has done an excellent job with CROSS-ROAD II, I think it is a winner not only for the younger (and older) player but the programmer as well, a lot can be learned from the way David has utilised the various routines. CROSS-ROAD II is a program every cocoist should have in their library, it will keep the kids happy for hours and can be a great party game/competition.

CROSS-ROAD II is available through REMCOMS for \$20 and at this price is well worth it.

REVIEWS

MIND GAMES .

A collection of favourites from GUNGADIN SOFTWARE.

Mind Games is exactly as the name implies, a collection of your favourite mind games on one disk.

What Ted Beamish of Gungadin Software has done is incorporate a plethora of ideas from across the whole spectrum of the CoCo history to produce one useful, enjoyable set of programs on a single disk.

By incorporating a RAM DISK and 9 games, MIND GAMES gives you hours of enjoyment without the need to continuously delve into your disk box to search for another game, (one that you know is there somewhere but give up in disgust after an hour of searching).

Some of the games I particularly enjoyed were "Slideabout" and "Yahtzee". Slideabout reminded me of those little hand held games I used to play with when I was a kid, trying to slide the numbers into the correct sequence and Yahtzee has been a favourite of mine for some time. Colour Code, Follow Me, Solitaire, Line of 4, 5 Stacker, Poker Dots and Colour Disposer are the other games on the disk and all of them are oldies but goodies.

The instructions include the all important ON ERROR fix which I believe is a must for any program. The instructions are very clear and well written, my only objection being the spelling of the word

"colour", it has been spelled "color", not the spelling taught in English schools.

Apart from this small objection about Americanised spelling, the product is a good one and one which will give hours of enjoyment. It is available through REMCOMS and at \$20 is well worth the price.

Age by Bonnie Stephen

This little gem comes from Bonnie Stephen. Bonnie is the grand daughter of Dr Val Stephen and has obviously been influenced into the CoCo by her grandfather. Bonnie is only 13 years old and this program is all her own work. Well done Bonnie, I hope that this little effort is the fore runner of many more to come as you learn more about the CoCo.

----- "FLASH" -----

Have you heard about the BLUE STREAK
ULTIMA????

This little ripper will allow you to
connect a printer to the CoCo via the
parallel port. I am using it now to
produce this magazine on a DMP136
colour printer. With this connection
you can use any printer on the market
today, as long as you have a driver
for it. All the word processors I
have seen to date have drivers for
IBM, Epson and just about every Tandy
printer ever made, so that should not
be a problem. The Blue Streak Ultima
is available through REMCOMS, (see
the ad on the inside cover of this
issue).

These are still available see the ad
elsewhere in this magazine.
