## How to submit articles

The quality of the material we can publish in  
*Dragon User* each month will, to a very great  
extent depend on the quality of the  
discoveries that you can make with your  
Dragon. The Dragon computer was launched  
on to the market with a powerful version of  
Basic, but with very poor documentation.

Articles which are submitted to *Dragon  
User* for publication should not be more than  
3000 words long. All submissions should be  
typed. Please leave wide margins and a  
double space between each line. Programs  
should, whenever possible, be computer  
printed on plain white paper and be accom-  
panied by a tape of the program.

We cannot guarantee to return every  
submitted article or program, so please keep  
a copy. If you want to have your program  
returned you must include a stamped,  
addressed envelope.

# Contents

**Letters** 5  
I/O errors, Moneybox, Coventry club  
query, Manic Miner correspondence,  
pokes, King of the Hill, reader's poll and  
a slapped wrist

**News** 7  
Websters drop Dragon software,  
Cumana 3" disks, Scott Adams, games  
users' group, Dragon MSX, and more

**Arcade addiction** 9  
Jason Orbaum takes a look at some of  
the classic arcade games available for  
your Dragon

**The Numbers Game** 15  
Pam d'Arcy with a version of an  
assembler written just for the machine  
code beginner

**Moon Miner** 21  
Another game from Steve Gathercole  
— this time you have to rescue your  
lunch in caverns deep under the  
moon's surface

**Software Review** 27  
New games and utility packages for  
your micro

**Adventure Trail** 29  
Mike Gerrard with his monthly dose of  
adventurer's medicine

**Dragon Answers** 31  
The invaluable Brian Cadge with a  
selection of readers' problems and  
queries

**Competition Corner** 34  
Quizmaster Gordon Lee sets another  
brain teaser for your Dragon — and  
there are 40 adventures from Adven-  
ture International to be won

# Editorial

**DRAGON SOFTWARE** will become increasingly more difficult to find in  
the high street in the near future.

Webster's Software, one of the country's leading distribution com-  
panies, has just taken the decision to pull out of the Dragon software  
market.

As more and more new micros appear in the shops, there will be less  
and less space to provide software for those machines that have been  
discontinued — even if, like the Dragon, they come back to life again.

Obviously Websters — and other companies — no longer believe that  
there is sufficient demand for Dragon software to make it worth their while  
carrying it.

Similarly, it is becoming increasingly more difficult for people to find  
other forms of support for their Dragons — the main one being, of course,  
repair facilities.

A great many otherwise loyal Dragon owners will be forced to desert the  
machine of their choice if a new service network is not organised soon.

However reliable the Dragon and the 6809 chip is, machines do break —  
and if there is nobody who can mend them, they will stay broken.

Eurohard has announced plans for the future which include the promise  
of wonderful new machines. The Dragon MSX machine at least has  
actually appeared. But surely one major priority should be to make sure  
that the existing Dragon user base in the UK can survive by organising a  
chain of repair agents?

There are still many people out there with Dragons. The circulation of  
this magazine alone should be proof of that.

There are still plenty of very impressive products being put out as well.  
It would be a shame — more, a tragedy — if the Dragon collapsed again  
because there was no one to put them back together again.

# "JUST IMAGINE ..."

Paying only **44p\*** for each of these 9 games

In the latest review ...April edition Cuthbert Chronicle

"...I reckon, this one alone is worth the full £3.95..."  
 "...If all the other six programs are as good as the first three  
 I'd say this is indeed outstanding value..."  
 "...Some are actually better than software I've been selling  
 for £8.00. GREAT VALUE!!..."

An all action shot of INTERPLANETARY TRADER. Face the perils of real time space adventure. Battle with awesome Space Pirates who are after your precious cargo, navigate meteor and magnetic storms in your quest to become a GALACTIC MEGABILLIONAIRE. This game uses the full 32K!

An all action shot of WUMPUS MANSION. Only a crazy person would go near WUMPUS MANSION. You have decided to go in!! Tempted by riches beyond imagination you raid the WUMPUS of their treasures. But it's harder than you thought! You never knew about the TIME BOMB, or the KAMIKAZIE WUMPUS, or the dreaded MAZE. Will you succeed? This game uses the full 32K!

The other games are HILO: an exciting gambling game, EXECUTION: a unique version of a popular word game, EMPIRE: an excellent strategy game, AIR ASSAULT: an arcade game, SNAIL PACE: a very entertaining racing simulation, WIPEOUT: a fast reaction snake game, ATOM HUNT: a brain straining game of logic.

\* All games incorporate hi-res colour graphics and sound/music. The average length of each game is 27K - a total of 236K on one tape. The price of 44p is the average cost per game and refers only to the games on the 9 game cassette. These games are not available separately.

## £3.95

inc VAT

# Letters

This is the chance to air your views — send your tips, compliments and complaints to Letters Page, *Dragon User*, 12-13 Little Newport Street, London WC2H 7PP.

## Stopping I/O errors

I AM writing about the article "Eradicating I/O Errors" in your August issue. I recently tried to alter my cassette recorder as shown, as I also have a Dixon TR12. As I couldn't understand it, I took it along to my friendly TV repair man, as suggested.

He couldn't figure it out either, until he worked out that the point the writer called A was actually point B in his photograph, and point B was point A. The 'white' lead coming from the negative end of the motor was actually black on our recorder. Although the photograph shows a point E, you don't need to alter that at all.

The instructions given in the article are correct as long as you take note of the changes above. I have now had my recorder changed and it works perfectly.

S N Jones  
Eye  
Suffolk

## Moneybox corrected

THANK YOU for your excellent review of our *Moneybox*-disk program. May I make two small points? Your reviewer feels that the keyboard delay time is too short. For some time now, copies of *Moneybox* have incorporated a routine to allow users to alter the keyboard response rate to suit themselves. This has been added to the section allowing users to change the screen background colour, and to have the drive(s) on continuous run.

Secondly, I cannot agree that spreadsheet programs are more useful for this sort of work. While spreadsheets are more versatile, especially where "what if" exercises are concerned, they do not provide any sort of transaction listing. This can be essential for checking statements, income tax, VAT and so on. I doubt if your reviewer would appreciate a bank statement that only gave a final balance,

without showing how this total was arrived at!

Bob Harris  
Harris Micro Software

## Coventry club?

WOULD ANY of your readers in the Coventry district be interested in forming a loose association of Dragon Users? I have searched all sources but no such group exists in this area.

I do not envisage a club, with club fees and so on, just a central address where interested people with Dragons or CoCos could obtain other people's addresses and cross correspondence could take place. Perhaps if they indicated special interests and the initiator of correspondence enclosed an SAE, the costs to individuals would be kept to a bare minimum.

Wolf S Jagodic  
Binley Village  
Coventry

## Manic Miner

I RECENTLY discovered that to get infinite lives on *Manic Miner* you should type CLOADM"", 1298 and load *Manic Miner*, then type POKE &H38C4,&H8E. Then save the game by typing C S A V E M " M I N E R " , PEEK(487)\*256+Peek(488), PEEK(126)\*256+PEEK(127)-1, PEEK(157)\*256+PEEK(158).

Once the game has a saved re-load it by typing CLOADM"", 64238.

The game will then load starting from the colour codes.

After trying out this new copy you will find there are two extra screens — Dragon Users Bonus and the End.

The Fifty Quid Kid  
Birmingham

## Penguin

IT MAY interest readers who have bought the excellent *Manic Miner* by Software Projects that access to all the

screens is possible upon typing in the word. 'PENGUIN'.

The famous boot will appear bottom right of screen if successful (timing the entry of the 'P' is awkward — try not to pause the game).

Thereafter BREAK plus a letter from A-V will allow access to any screen.

William Sunderland  
Ambleside  
Cumbria

## Pokes!

I HAVE decided to put print head to paper and reply to two letters in the March issue. In answer to Mr J Harrington letter the location that controls the upper-lower case is &H149 or 329,255 gives upper case only.

Now the *Manic Miner* multi-lives I am unable to help with, but I thought that it would be a good idea to start a regular Hackers column, so here are a few to start with. *Donkey King* Poke 12914,n: *Invasion* Poke 7438,n: *Invaders Revenge* attack MK1 POKE 10739,n, attack MK1 Poke 10739,n where n can be up to 255 decimal.

One for all the readers who wish to slow listings: Poke 359,60 will enable you to read a listing and Poke 359,57 to return to normal. Try Poking 359,76 and you get unpredictable results, but the program still works.

T O'Brien  
Banbury

## Charts

YOU ASKED for other readers' views in reply to the letter by W Miles (*Dragon User*, April, 1985) regarding the validity of Popularity Charts for Dragon games. I fully agree with the ideas put forward and endorse the view that a readers' poll would more accurately indicate the situation. The present system of assessment whilst even taking into account the direct sales of several leading software houses plus shop sales fails to indicate the views of those amongst your 35,000 readers who acquire their games by means other than those outlined.

Anthony J Boddy  
Bolton

## Right on

THANK YOU for publishing my program, *King of the Hill*, in January's issue of your magazine.

Since publication I have received a few letters and telephone calls from your readers concerning a huge array of error calls.

I would like to assure your readers that the published listing is perfect and fully operational. I have personally typed in the game from the published listing and have found it to be correct.

Philip Thompson  
Sentinel Software

## Slapped wrist

I AM writing, in part, to agree with the slapped wrist you suffered at the hand of Compusense. I have had a Dragon for over 2.5 years (a 32 when it was first hatched and more recently a 64) I also have a single drive and a printer, but then so do many other Dragon owners.

How could we possibly conduct a comparison of our own when so many of us know so little of Flex or OS-9?

Yes Compusense was right, your article was inadequate and not impartial, but Compusense sell both operating systems and are very familiar with them. Instead of giving *Dragon User* slapped wrists why did they not offer an article explaining the features and differences of both OSs?

Dragon owners know they have an extremely powerful computer but it must be up to those with more knowledge to help the rest of us. If articles were donated from interested parties (they would probably sell more to a more enlightened user) then the pages of *Dragon User* would probably grow in number and make some attempt to justify the high price of 95p. As about half the contents of the magazine is devoted to advertisements, the price should be less.

Anthony H North  
Shipley  
West Yorkshire

## HOW DO WE DO IT?

It's very simple. We buy stock in bulk from computer software dealers and take the risk that we will be able to sell it to the public. All our stock has already been sold by the software houses so they have already received their royalties. We currently have over 20,000 items of software in stock which enables us to offer these great prices. This is our full price list so keep it, and refer to it before you buy any software.

## HOW TO ORDER

Write to us quoting the title, medium and price for the programs you want. Please include 50 pence for postage/packaging on single orders, and 75 pence for two or more titles ordered. Postage to rest of Europe is £1.50, and £3.00 to North America. If possible, please give your telephone number as well as your full address. Cheque/postal orders made payable to John Penn Discount Software. All the software listed is subject to availability.

**TRADE ENQUIRIES** We welcome trade enquiries and each order will be individually negotiated.

Tel: Bordon (04203) 5970

# Websters drops Dragon software

WEBSTERS' Software, one of the biggest distribution companies in the country, has stopped handling Dragon software.

This means that games for the 32 and 64 will become even more difficult to find in high street stores.

The situation from the high street stores point of view was summed up by Peter Frost, Boots' Assistant Merchandise Controller, who said that his company would continue to sell software for the Dragon computer for as long as there

was sufficient demand to justify it.

"There is of course less room to carry software for discontinued machines, but we still have a limited range in our full specialist stores, which are the top 150 stores in the Boots group," he said.

Websters has sold its stocks of Dragon software to John Penn Software, which is offering it at reduced prices by post.

John Penn Software is at Dean Farm Cottage, Kingsley, Bordon, Hants GU35 9NG.

## Games group

THE DRAGON Games Users Group is a new organisation designed to appeal to Dragon owners who enjoy playing games, according to founders Oron Software.

The new club will offer substantial discounts on games from a number of well-known software houses. There will also be a bi-monthly news letter which will feature reviews, playing tips, and an adventure helpline.

Although Oron Software is a commercial company producing various products for the Dragon, Mark Blease, the company's founder, promises that the DGUG will be kept totally separate.

"We are not using DGUG as another commercial venture," he said. "We aim to spend every penny of the membership fee on our members."

Membership of the DGUG costs £5.00 per year, and further information can be got from Oron Software, 64 Prince Street, Rochdale, Lancs OL16 5LJ.

## Printer Control

MACGOWAN Consultants is a newly formed software house with a word processing package for the Dragon 32 and 64.

*Printer Control* gives the user access to a wide range of commands, including the ability to design character sets, write over graphics, mix text and graphics printing in the same line and much more.

William MacGowan, who set up the company with help from the Enterprise Allowance Scheme, has written software for various machines. He believes that the major selling price of *Printer Control* will be its price.

"At £15," he says, "it has all the commands of much more expensive word processing packages, and more besides."

MacGowan Consultants can be contacted at 6 Arnhem Drive, Caythorpe, Nr Grantham, Lincs NG32 3DQ.

## Diamond's return

SALAMANDER Software has two new releases for the Dragon — both text only adventures.

*Franklin in Wonderland* is the fourth in the Dan Diamond trilogy, according to Salamander spokesperson, Lucinda Parker.

*The White Cliffs of Dover* is a sequel to the Second World War adventure *Wings of War*.

Both games have apparently around 120 locations, and will cost around £5 from Salamander Software, 17 Norfolk Road, Brighton, East Sussex BN1 3AA.

## Dragon MSX

THE DRAGON MSX machine has finally made an appearance.

The machine, manufactured by Hong Kong based Radofin for Eurohard, the Spanish company which now makes the Dragon, conforms to the usual MSX standards.

It will be marketed in Europe by Eurohard, who took over the MSX licence originally granted to Dragon Data and GEC. No details on price have been released yet.

As a standard MSX machine, it will of course use the Z80 processor and will be totally incompatible with existing Dragon machines.

## Dream

READERS who have been interested by the Dream editor assembler mentioned in some of Pam d'Arcy's articles in past *Dragon Users*, might like to know that it is now available as *Alldream*, from Grosvenor software.

Alldream includes a monitor and disassembler, and is available on tape or cartridge for the Dragon 32/64. It can also be bought on disk for Dragon Dos.

## Dragon 3" drives

CUMANA has announced the launch of a new range of 3½" disk drives for the Dragon.

The disk drives range from a single-sided 40-track drive to a dual-drive with two 80-track drives. Storage capacity ranges from 125 kilobytes at the bottom end of the range to two megabytes at the top end.

## Scott Adams

FOR ADVENTURE lovers, the name of Scott Adams ranks amongst the greats — so if you read Mike Gerrard's adventure trail first every month, you will be delighted to hear the news that all of Scott Adams' adventures are now available for the Dragon from Adventure International in Birmingham.

The Classic Adventure series from 1 to 13, plus *Spiderman* and *THE HULK*, the first two games in the Questprobe series, based on Marvel Comic characters, cost £7.95 and are text only.

In addition, adventure International is selling the entire Mysterious Adventure range, originally released by Channel 8. Adventure International UK is at 85 New Summer Street, Birmingham B19 3TE.

## Disk error

WE MADE an error in last months Dragon DOS article by Phil Brooks. The first patch should read

Patch: +00BF 97  
The 97 was unfortunately missed out.

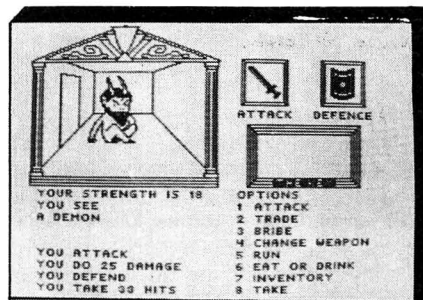

# NEW GAMES FROM BLABY COMPUTERS

## TANDY & DRAGON

DRAGON £3.99  
TANDY £3.99

**GIS A JOB** — Yobbo is desperately trying to find a job as a top games programmer. Not an easy thing to do, especially when everyone is out to stop you. Head-butt your way through 12 screens of fun. 12 screens. J/S.

DRAGON 32 £3.99

**STAR SWOOP** — Eliminate the Zargon fleet, wave after wave of them, they never stop you will give in before they will, they are invincible. Fantastic sounds and graphics. KB.

DRAGON 32 £1.99  
TANDY EX £3.99

**STAR DEFENCE** — A defender type game, smart bombs and advance radar scan. This game is only for the quick fingered player. 3 screens. One or two players. KB.

£1.99

**COPTA SNATCH** — A scramble type game in which you must steal the enemy's secret plans, on the way you must cause as much damage to their installation as possible. Scrolling screens, fantastic sounds and graphics. KB JS.

DRAGON 32 £1.99  
TANDY EXT £3.99

**DESPERADO DAN** — Desperado Dan was a guest of Her Majesty's Prison, that was until his timely escape. Help him get back to where he hid his loot, but no one had told him a supermarket had been built over it. JS.

£1.99

**RUBY ROBBA** — There is a complex defence system guarding the precious ruby. Snakes, guards and mines. You have only one minute to carry out the operation but you can do it. I know you can. JS and KB

DRAGON £1.99  
TANDY £3.99

**DARTS** — Open a couple of cans of beer, sit back, and get all the excitement of an evening in the local. JS.

£1.99

**BORIS THE BOLD** — Urgent telegram for Boris. Stop. Please come home. Stop. Beware of the patrollers, lasers and bombs. Stop. Please grab a few diamonds on your way. Stop. JS.

DRAGON £1.99  
TANDY £3.99

**MUTANT WARS** — Fifteen screens of constant zapping for all your arcade freaks. Spinning wheels, rotating robots, spaggly birds and the dreaded Yum Yum monsters. Superb Hi-Res graphics. JS.

£1.99

# Arcade addiction!

In a special review section Jason Orbaum looks at some classic arcade games for the Dragon

## The King of the arcade

**Program:** *The King*  
**Supplier:** *Microdeal*

ANY SERIES of reviews of classic Dragon arcade games has to start with this, possibly the best Dragon game in the world.

The arcade game is *Donkey Kong*, a game in which you play Mario, the carpenter, who is trying to capture King-Kong himself by running along a series of walkways, climbing a series of ladders, and avoiding barrels, fireballs and the mega-monkey himself.

*The King*, released long ago in the mists of time has still never been graphically surpassed, and is quite simply the best version of *Donkey Kong* available for ANY micro-computer.

There is the usual choice of screen colour, along with options for normal or slow speed, one or two player games, and three lives or twelve (with twelve lives the player's score is not eligible for the high score table, which, incidentally, is done in true arcade style).

The game looks great, and handles better than any other on the market. But then, I feel that I'm preaching to the converted as, judging by the number of months the game held the top of the software charts, every Dragon owner in Britain probably owns a copy!

## Manic Miner

**Program:** *Manic Miner*  
**Supplier:** *Software Projects*

THIS GAME never made an appearance in the arcades. The original (written for the, spit, Spectrum) was written by Matthew Smith and has become one of the biggest sell-

ing games EVER released.

The recently released sequel, *Jet Set Willy*, is better than this game, and this game is of a very high standard indeed!!

The object of the game, for those who have been fortunate enough not to come into contact with a Spectrum for prolonged periods, is to help Miner Willy through 20 caverns (actually, the Dragon version is rumoured to have two extra screens, but I have never reached them!), collecting a variety of keys, dials, snow-shoes, and other silly objects whilst avoiding a set of equally silly creatures (the most famous of which are the man-eating toilets).

The game would be good value with four or five screens; with 20 (22?) screens it's ridiculously good value.

But those amongst you (myself included) who can go from start to end on the Spectrum version, will find a much more difficult task on the Dragon. The game, whilst undergoing translation, has been made faster and more responsive. This, coupled with the fact that old Spectrum timings and patterns do not always apply, makes it almost like playing a new game!

The game, like its excellent successor, is almost sure to become a classic, and its sales on the Dragon show that Roy Coates has taken Matthew Smith's formula and implemented it as well on the Dragon, as the latter did on the Spectrum.

## Scramble

**Program:** *Scramble*  
**Supplier:** *Microdeal*

ANOTHER Microdeal release, and although not one of their best games, this is still the best version of *Scramble* available for the Dragon 32 and plays almost as well as the arcade version.

The graphics are smooth if not complex, and the scrolling landscape goes by at the "correct" rate. The controls (bomb, fire, left, right, up and down) can be handled by joystick or keyboard, and the game, after the relatively short load, is gripping and addictive.

The only problem with this game is that some of the screens are disappointing copies, most notably wave three (the meteors) which I found the most difficult in the arcades.

In this version of the game however, instead of many fiery meteors hurtling across the screen we are "treated" to two meteors at a time, limping across the screen... gone is the need to stay low and forwards, you can actually navigate between these fireballs with surprising ease!!

All the waves are present though; the opening hills, the space-ships, the fireballs, the city and the maze to the final base. The trouble is that when you have mastered this game, it is no longer limitless, for, as difficulty increases and fuel disappears more rapidly, there is a run where it is IMPOSSIBLE to survive, even if all fuel bases are shot!!

All things considered though, it looks as though this is going to remain the best *Scramble* type game for the Dragon.

## Rommel's Revenge

**Program:** *Rommel's Revenge*  
**Supplier:** *Design Design*

YES FOLKS, this game was NOT written by Microdeal, and yet it is excellent. It is a version, a very well executed version, of *Battlezone*, the 3-D tank simulation that caused such a stir in the arcades a few years ago.

This version has everything that the battlezone fanatic could ever ask for... superb 3-D graphics, variable difficulty, a massive high score table (that you can save to show to your friends), selectable control (even down to a choice of pause key!), and joystick option.

The on-screen play is identical to the arcade version of the same game although this version is in black on green, rather than green on black.

The only things missing are the two control joysticks that adorned the console in the arcade but this is a loss that can be lived with and the new controls are just as easily mastered.

The game supports tanks, super-tanks, flying saucers, and missiles (bouncing bombs) but the background is only a straight line instead of a series of mountains.

All the usual polygons line the landscape, and it is just as easy to bump into them as it was in the arcade! The radar blips, you can hear the enemy fire and your own, and when you're hit the screen cracks beautifully.

This is quite simply a superb game, excellently programmed.

Dear Dragon Owner,

Compusense is proud to be your exclusive distributor for DRAGON.

The Dragon computer has had a chequered past, but we have always believed in DRAGON and its potential.

We also believe in the loyalty of Dragon owners, like yourself, who have made all this possible.

Who would have believed that DRAGON would be alive and kicking a year ago? We did because we know our customers.

There will be many new and exciting developments for the DRAGON computer this year. We will keep you informed with the latest news as it happens.

One of the many important developments for the DRAGON is the FLEX Operating System. If you own a DRAGON 64 computer and at least one disk drive then you can access this very powerful operating system. Those of you who may have encountered Compusense in the past will know that FLEX software has been one of our principle products since the day that Compusense was founded.

We are European distributors for FLEX and have sent copies as far away as Antarctica! What we can offer you with FLEX is total technical support for a friendly, useful operating system that will transform your computer into a powerful tool for all your requirements. You will see from the other information in this newsletter that we already offer you comprehensive software support for FLEX and the range is growing all the time.

Our aim is to be here for years to come, and we are not rushing to make a quick "kill" and be off. What we offer you is a steady base on which you can build your computer system secure in the knowledge that we will be here giving you the technical backup that you need, both for your software and your hardware.

If you want a forum for your ideas and opinions then write to us and we will try to answer you.

I look forward to many years of your company.

Yours sincerely,  
  
Ted Opyrchal.

Director: 1 0PVRCHAL MSC ARCS 5Z 0PVRCHAL BSC MBCS BA 0PVRCHAL

## GET MORE OUT OF YOUR FLEX SYSTEM

A bargain pack of utilities that you will find invaluable when using FLEX.

- backup entire disk using one or two drives
- 6809 disassembler
- improved file copy
- single sector copy (runs entirely in utility command space)
- graphics dumps for EPSON MX80 and SEIKOSHA GP100/250/550
- improved SAVE — saves several non-continuous segments
- offset binary file on disk
- map binary file (shows load addresses and transfer address)
- dump binary file in Motorola S1-S9 format
- extend sequential/random file
- PEEK/POKE to display/alter memory
- change name and serial number of disk
- put descriptive information onto disk
- list complete directory of disk including information
- prompting delete for a range of file names
- sent text to screen or printer
- send hexadecimal control characters to screen or printer
- change memory end (FLEX MEMEND pointer)
- fill memory with specified value
- automatically reply 'Y' or 'N' to any prompt

plus special routines for the DRAGON 64

- DEMON monitor — interactive display/change memory
- run FLEX using a terminal via RS-232 port
- Load Dragon format binary or text files from cassette tape
- save binary to cassette tape in Dragon format

COMPUSENSE FLEX UTILITIES

£35.00

# DRAGON/FLEX

**THE FLEX OPERATING SYSTEM**  
with editor and assembler **£86.25**  
special price with DBASIC **£99.99**

The ideal operating system for the DRAGON - especially when combined with the DBASIC package. Requires 64K and DRAGON/DELTA disk controller. Also available for the TANDY COLOUR 64.

- 48K free user RAM
- 51 by 24 Hi-Res Screen with true lowercase, auto repeat redefinable character sets, windows, etc.
- Supports single and double density disk formats
- Includes over 30 standard utilities
- Powerful Macro Assembler
- Versatile Text Editor

**DBASIC £30.00**

Get all the benefits of FLEX without having to throw away your existing DRAGON BASIC programs. Most BASIC and machine code programs can be run with little or no changes.

- Standard 32K DRAGON BASIC
- 32 by 16 screen and 51 by 24 Hi-Res screen
- send commands to FLEX from DBASIC
- use up to 8 sequential/random access files simultaneously
- ERROR GOTO statement to intercept errors
- ERROR command shows exactly where BASIC detected an error
- Load/Save programs on FLEX disk
- includes 5 working sample programs

**FLEX DIAGNOSTICS PACKAGE £86.25**

Will pay for itself many times over by recovering lost data and files.

Contains six memory test programs and ten disk diagnostic programs. The disk diagnostics do not test the hardware, but rather the structure of the files, the directory and free space. Inconsistencies in this structure may result from a problem such as a power failure or "runaway" program. Includes a detailed description of the FLEX disk structure and a guide to disk and memory trouble shooting with case studies. Shows you how to repair a disk, rebuilds "crashed" disks, recovers accidentally deleted files, removes bad sectors from free space.

**6809 DEBUG PACKAGE £86.25**

Cuts down assembly language debugging time - A Valuable Learning Tool

A powerful and complete debugging package which simulates all the functions of the 6809 microprocessor giving complete control over the execution of the program under test.

- interactive assembler
- disassembler
- multiple conditional breakpoints
- breakpoints can be set in ROM code
- step by step trace
- traps illegal codes and other conditions
- display/change registers
- display/change/search memory
- review last 256 instructions
- simulation of interrupts
- protection of memory segments
- counts machine cycles

**TSC EXTENDED BASIC £115.00**

A fast interpreted BASIC by the authors of FLEX with 16 digit precision and a dynamic range of 10E38. Supports sequential, random and record format FLEX files. Programs may be developed in an interactive mode. Developed programs may be "compiled" to save loading time and disk/memory space. Includes all the standard BASIC statements and mathematical functions.

**EXTENDED BASIC PRECOMPILER £57.50**

An essential tool for the professional BASIC programmer. Allows you to write your BASIC programs without worrying about line numbers using meaningful alphanumeric labels and variable names. Helps you to write programs that are easier to read, understand and maintain.

**TSC SORT/MERGE £86.25**

This package is an important tool for the serious computer user. It sorts files, of any type or size, using up to 20 key fields in ascending or descending order. The final output can be sent to disk or printer. It is an essential component for business systems but is just as useful for technical, scientific and statistical work whenever data must be sorted and analysed.

**TSC TEXT PROCESSOR £86.25**

One of the most powerful text processors available. Handles anything from a letter to a complex manual.

The Text Processor is an ideal way of producing formatted text for use in mailing lists, personalised letters and large documents. It is NOT an interactive word processor but a batch program allowing very large documents to be processed. The input to the text processor is a standard text file which may include library calls to other text files. Data (eg. names and addresses for form letters) may also be read from disk or typed in by the operator.

- similar to BELL Laboratories' NROFF
- definable line and page lengths, margins and titles
- over 50 formatting commands
- macros simplify complex processing
- left/right/center justification, centering and underlining
- footnote processing
- text diversion for later use

**LANGUAGE COMPILERS FOR FLEX**

**CRUNCH COBOL £115.00**  
standard business language with most level 1 and some level 2 features

**LUCIDATA PASCAL £103.50**  
a comprehensive P-Code implementation

**WINDRUSH PL9 £122.70**  
powerful language similar to PL1, PLM and PL80. Produces position independent ROM-able machine code.

**WINDRUSH 'C' £189.75**  
near complete K & R implementation. Requires TSC relocating assembler if user libraries are to be created.

**INTRNL 'C' £431.25**  
comprehensive implementation with assembler/linker/loader and library manager. Requires 1/2 MByte minimum disk storage.

**CMS FORTH £86.25**  
A Fig-Forth implementation with 79-Standard Extensions. Double-Number extensions. Assembler and Editor.

**WINDRUSH 'C' for DRAGON FLEX £86.25**

**WINDRUSH PL9 for DRAGON FLEX £86.25**

**ASSEMBLERS AND CROSS ASSEMBLERS FOR FLEX**

**TSC 6809 ASSEMBLER £40.00**  
"the standard by which other 6809 assemblers are judged"

two pass assembly, sorted symbol table, macros, conditional assembly, command line parameters, library files, formatted listing, produces binary or S1-S9 Format.

**XASM CROSS ASSEMBLERS for 6800/2/8 6801/3 6301 6805 6502 8080 Z80 £51.75 each £201.25 all**  
with all the facilities of the TSC 6809 assembler.

**TSC RELOCATING ASSEMBLER AND LINK/LOADER £172.50**  
The facilities of the standard assembler but allows modules to be assembled separately and linked together.

**TSC 68000 CROSS ASSEMBLER £287.50**

**DYNACALC £69.95**  
for COMPUSENSE DRAGON/TANDY FLEX

The Electronic Spreadsheet for the 6809

Fast full feature spreadsheets written in 6809 machine code. DYNACALC is an original program developed by CSC Inc. and is similar to VISICALC (trade mark of VISICORP Inc.). Any book describing applications and sample spreadsheets for VISICALC may be used with DYNACALC.

- Runs under DRAGON FLEX with 51 by 24 character screen
- 256 Rows by 256 Columns
- HELP facility
- 16 Digit arithmetic
- Mathematical, Scientific, Trigonometric, Statistical, Logical and Business Functions built in
- Windows
- Plot Graphs
- Print all or part of spreadsheet
- Save/Load Spreadsheet on disk
- Delete Move Replicate any Row/Column
- Execute FLEX commands
- Horizontal and Vertical Titles
- Sort in ascending/descending order

Data save to/loaded from disk by DYNACALC may be passed to/created by other FLEX programs eg. RMS, BASIC, PASCAL, COBOL text editor.

**R M S £69.95**  
for COMPUSENSE DRAGON/TANDY FLEX

A complete DATABASE MANAGEMENT SYSTEM

Versatile and very easy to learn to use. Ideal for accounting, business records, management information systems, customer records, customised data entry, stock control and much more. RMS can be readily configured to do many different jobs which require: data entry, online data retrieval/update and printing of reports without any programming knowledge.

- create a new data base
- design a new form for entering data
- store, retrieve and update records using key field
- produce reports
- create index files to display/modify selected records or print records in any desired order
- merge or copy records to another database

An RMS database is stored as a standard FLEX random file and is accessible to user written programs and packages such as Sort/Merge.

**R M S £69.95**  
for COMPUSENSE DRAGON/TANDY FLEX

A complete DATABASE MANAGEMENT SYSTEM

Versatile and very easy to learn to use. Ideal for accounting, business records, management information systems, customer records, customised data entry, stock control and much more. RMS can be readily configured to do many different jobs which require: data entry, online data retrieval/update and printing of reports without any programming knowledge.

- create a new data base
- design a new form for entering data
- store, retrieve and update records using key field
- produce reports
- create index files to display/modify selected records or print records in any desired order
- merge or copy records to another database

An RMS database is stored as a standard FLEX random file and is accessible to user written programs and packages such as Sort/Merge.

*The Classic Adventure Game*

**COLOSSAL CAVE ADVENTURE** New includes game save facility.

If you have never tried Colossal Cave Adventure then this is your chance to see just how captivating this program is. Be warned it's addictive and will burn a lot of midnight oil. Requires a DRAGON 64 with disk drive. **£9.95**

**OS9 SOFTWARE**

- OS9 Operating System £39.95
- OS9 Programmers Manual £19.95
- DYNACALC £59.95
- STYLOGRAPH £79.95
- RMS £54.95
- BASIC 09 £59.95
- EDITOR/ASSEMBLER/DEBUG £49.95
- 'C' COMPILER £79.95
- PASCAL £79.95
- STOCK RECORDING £49.95
- CASH AND VAT £49.95

**DASM/DEMON**

THE IDEAL ASSEMBLER AND MONITOR COMBINATION

**DASM** is a versatile two pass assembler designed for ease of use. Allows you to assemble machine code while retaining the full use of BASIC. Supports all 6809 mnemonics. Output may be listed on printer.

**DEMON** is a powerful machine code monitor which helps you to debug your machine code programs and allows you to delve into the internal workings of the DRAGON. Functions include: EXAMINE MEMORY, CHANGE MEMORY, DISPLAY REGISTERS, CHANGE REGISTERS, PRINT SCREEN, SET BREAKPOINTS, CLEAR BREAKPOINTS, TEST MEMORY.

Cartridge £30.45 DRAGON-DOS/RS-DOS £19.95

**DASM SOURCE TAPES £5.99 each**

Working Assembler Programs including Source Code for DASM

- Vol.1 Single Pass Disassembler
- Vol.2 The Game of Life
- Vol.3 Hi-Res Graphics Dump MX-80
- Vol.4 Hi-Res Graphics Dump SEIKOSHA

**DYNAFAST/DYNAMISER/DYNAXREF**

The Compiler/Optimiser/Cross Reference Package for BASIC

**DYNAFAST** speeds up your DRAGON/TANDY BASIC programs by converting the parts that can take advantage of the internal 16 bit arithmetic of the 6809 microprocessor into fast machine code.

**DYNAMISER** is a utility that squeezes out all the unnecessary spare space from your programs. Savings of 10% are typical.

**DYNAXREF** helps you analyse programs so that you can readily correct or change them.

Cartridge £30.45 DRAGON-DOS/RS-DOS £19.95 FLEX £19.95

**DECODE**

Convert DRAGON BASIC to TANDY COLOUR BASIC

Cartridge for DRAGON or TANDY COLOUR (min 32K and Extended BASIC) £18.95

**HI-RES**

51 by 24 Character Text Screen

Just plug in the Hi-Res cartridge, switch on and you will immediately see the improvement. The screen displays 24 lines of 51 characters with proper lower case. BASIC works as normal but with extra features:

- selectable/redefinable character sets (USA UK French German Danish Swedish Italian Spanish)
- sprite graphics
- improved keyboard action with autorepeat for faster typing
- Graphics and text may be mixed on the screen

Cartridge for the DRAGON or TANDY COLOUR (min 32k) £23.50

Hi-Res is included with EDIT+ on cartridge and disk (DRAGON/RS DOS)

**EDIT+**

FULL SCREEN EDITOR AND PROGRAMMER'S TOOL KIT

An excellent aid for writing BASIC programs for the beginner as well as the experienced computer user. You can view your program on a Hi-Res 51 by 24 character screen and change it by simply overtyping, inserting or deleting characters. Tool Box functions include: FIND STRING, CHANGE STRING, COPY TEXT, SCROLL UP, SCROLL DOWN, GOTO LINE, APPEND FROM TAPE, ENTER BASIC COMMAND.

Available for DRAGON 32/64 and the TANDY COLOUR COMPUTER (min 32K and Extended BASIC) and for DRAGON/TANDY FLEX (requires DBASIC)

Cartridge £30.45 DRAGON-DOS/RS-DOS £19.95 FLEX £19.95

**GRAPHDRAWER**

The ideal way of presenting technical/business results

Graphdrawer allows you to enter data, draw graphs or histograms on the high resolution screen and print on an EPSON MX80 or SEIKOSHA printer.

On Tape/DRAGON-DOS Disk/FLEX Disk £9.95

Requires a DRAGON 32/64 with Hi-Res/EDIT+ cartridge or DRAGON 64 with DRAGON-DOS disk and EDIT+ or DRAGON FLEX with DBASIC

**TECHNICAL DEVELOPMENT SOFTWARE (available for FLEX, OS9 enquire).**

- DYNAMITE+ 6800/09 Disassembler £103.50
- SLEUTH 6800/09/6502 Disassembler p.o.a.
- 6502 to 6809 Translator p.o.a.
- 6800 to 6809 Translator p.o.a.
- 6502 Simulator p.o.a.
- 6805 Simulator p.o.a.

**DRAGON ACCESSORIES**

- Dragon Dustcover (Grey material) £2.99
- Monitor/Sound Lead £3.99
- Printer Lead with Centronics Interface £14.99
- WABASH diskettes box of 10 £22.00

\*\*\* One free WABASH disk included with every disk drive sold \*\*\*

**DRAGON CIRCUIT DIAGRAMS (DRAGON 32) £2.99**  
**DRAGON CIRCUIT DIAGRAMS (DRAGON 64) £2.99**

**Books**

- Introducing Dragon Machine Code Ian Sinclair £7.95 + £1.00 p&p
- Dragon Machine Code Jones & Cowhill £6.95 + £1.00 p&p
- 6809 Assembly Programming Leventhal £13.85 + £1.50 p&p
- Motorola 6809 Reference Card (free with books above) 0.50p

**Complete Systems**

These systems are complete with all cables and connectors. Complete operating system software supplied, sufficient for most applications. Specialist packages also available from our extensive software range.

Dragon 64 + Single Disk + FLEX operating system £499.99  
+ Editor (includes VAT & carriage)  
+ Assembler  
+ Disk Basic

Dragon 64 + Double Disk + FLEX Operating System £649.99  
+ Editor (includes VAT & carriage)  
+ Assembler  
+ Disk Basic

Also available with OS9 operating system, enquire for details.

- Prices are in Pounds Sterling
- Prices include VAT
- Prices and specifications subject to change without notice

# delta 14b handset.

## The complete Dragon joystick system

Voltmace, the UK's largest computer joystick manufacturer has done it again... The delta 14b handset and interface for the Dragon 32 or 64 microcomputers.

Voltmace's well known delta shaped joysticks can now be found with more buttons, 11 more buttons, individually programmable for more action, more control, more glory. These additions have not however let us lose sight of why we are the UK's largest manufacturer, our design.

Super sensitive fingertip control with fast, centre sprung return action, means you always know where you are.

Tough, solid steel shaft, encased in a smooth nylon sleeve, handles even the roughest treatment and ensures hours of easy, fatigue free use.

New analogue potentiometers give corner to corner control, and total compatibility with all software currently available on the market. Switch joysticks as the word suggests can either be 'on' or 'off' and therefore cannot be used with programs that require analogue control, like flight simulators and computer aided design programs (C.A.D. 32).

Connection of the delta 14b handset to your Dragon micro-computer is made via the delta 14d interface. This plugs into the cartridge port of the Dragon with an external lead running to one of the joystick ports. No soldering or special technical

knowledge is needed to install either the handset or interface as everything simply plugs in.

Utilise the full potential of your delta 14b, (14 button

handset), with our superb C.A.D. 32 program, using HiRes graphics draw: lines; circles; ellipses; boxes; fill in areas in four shades; scroll up and down (using joystick); get and put, to move or repeat shapes; plus two sizes of text graphics.

Unlike ordinary computer aided design programs C.A.D. 32 is really easy to use. The program is supplied on cassette with a printed overlay card for the 14b handset. Because the design functions are labelled and controlled from the handset, there is no

requirement for an on-screen menu which allows full use of the screen area for design work, you can now sit back and relax while your Dragon does the hard work. The screen dumps shown here were all produced with C.A.D. 32 using the delta 14b handset and interface. (Project X was designed and produced within 90 minutes). Finished or part finished designs can be saved to tape or disk and reloaded for printing or amendment. There is insufficient space here to describe fully everything C.A.D. 32 can do, so why not come along to the next 6809 show and see it for yourself.

**Voltmace Limited**

Park Drive, Baldock, Herts. SG7 6ED. Telephone (0462) 894410

Callers welcome at the factory—Monday to Friday

**Delta 14b handset & interface £29.95**

**C.A.D. 32 (on cassette)**

**£4.95**

**Program:** *Cuthbert in the Jungle.*

**Supplier:** *Microdeal.*

NO SELECTION of classic games could be complete without at least one mention of the freckle faced, glasses clad, hero of the Dragon... I refer of course to *Cuthbert*.

This is the Microdeal (sorry folks!) version of a game originally called *Pitfall Harry* and released by Activision for the Atari VCS. The game involves running a man around a jungle avoiding logs, snakes, scorpions, fires, and lots of other things in a quest for treasure.

During the game you are sure to jump across alligators mouths, swing across pulsating pits of quicksand, and use the "secret" tunnels under the jungle.

The game is a dream for Milk-Tray fanatics everywhere and, once again, there is no shooting!

The setting (PMODE 3) is beautifully drawn, so long as you have a colour television, and the man runs, jumps, climbs and swings naturally

(even if he does tend to look like a stick insect on the ladders).

The play is superb, but he prepared for your joysticks to take a hammering, especially on the buttons.

An elegant mix then of strategy and arcade, and as the game has a time limit (20 minutes, although my three lives have never lasted that long) once the game is finished, an attempt to beat your best time can be made — there is a rumour that it can be finished in 16 minutes 45 seconds, or thereabouts.

If you don't have this rather aged game, then it is well

worth adding to the collection.

## Frogger

**Program:** *The Official Frogger*

**Supplier:** *Microdeal*

YET ANOTHER Microdeal offering (I have a friend who believes that Microdeal are the only software house who produce games for the Dragon!), which is definitely the best *Frogger* available for the Dragon.

*Frogger* was a game that

never really caught on in the arcades. I don't understand why, I mean, it's such a nice game, no shooting, no violent aliens self destructing, no ghosts materialising anywhere — hmm, maybe that's the reason!

This version of *Frogger* in in PMODE 1 and uses the mode better than any other I have seen. It is colourful, whilst retaining clarity and plays excellently on keyboard (I would not advise the joystick option without self centering joysticks).

The object of the game is simply to hop a frog across a busy road, and then a busier river. To cross the road is simple, just avoid the cars, lorries, and so on. To cross the river isn't so simple... you must ride on the backs of turtles, and on logs, and then time the jump into one of your five homes at the top of the screen.

The game has progressive difficulty, a timer, five frogs per game, one or two player option, and can play more tunes than "Duran Duran" (but then three isn't really than many!).

**Datapen**

## A QUALITY LIGHTPEN for the DRAGON 32 microcomputer

**Datapen**

**£25**

inclusive of VAT, P&P. Two different drawing programs provided free with each lightpen. "SKETCH" and "SHAPE-CREATE". SKETCH is a superb high resolution colour drawing program allowing both precise drawing and freehand sketching, painting etc. SHAPE-CREATE is a high resolution library shape drawing program.

### SUPERIOR PROGRAMS

- \* Tape storage of your work
- \* Good documentation
- \* User routines provided on tape and on printout

Also available for:— VIC-20, CBM-64 or BBC B. Please state your micro when ordering.

Send cheque or P.O. for £25 to:—

D.U.3 Datapen Microtechnology Limited,  
Kingsclere Road, Overton, Hants. RG25 3JB

Or send S.A.E. for details. Now available from good computer shops.

### SUPERIOR PERFORMANCE

- \* Insensitive to ambient lighting
- \* Responds to different colours
- \* Program accessible LED lamp readout
- \* Switch for program control

"It differs from all other lightpens available for the Dragon in that it is a far more sophisticated beast... This program (Sketch)... clearly demonstrates the superiority of the Datapen"

# MICROMAIL

**SYZYGY**

**NEW**  
FROM  
**MICRODEAL**  
**DRAGON 32/64**

You are trapped aboard a section of the Deathstar!! You have already had one near fatal encounter with 'Vader' and another could prove disastrous. He's somewhere nearby guarding the central computer which just happens to hold some information essential to your survival. To have any chance at all you must find and retrieve your light sabre, presently being guarded by one of Vader's huge ugly aliens. Gosh . . . there is just so much to do . . . over 250 different graphic pictures and 300 locations make this our best ever graphics adventure. 1 Joystick required for light sabre fight  
64 different commands, 100% machine code . . . High Res graphics. **Post & Packing 50p £8.00**

**NEW**  
FROM  
**MICRODEAL**  
**DRAGON 32/64 & TANDY COLOUR**  
**32K**

Atari & Commodore 64 owners, eat your hearts . . . this has got to be the best Grand Prix game ever. Fast action, super smooth scrolling "crisp" graphics, and loads of extras, such as . . . 4 circuits to choose from, a tyre change if they burn their tyres out too quickly, plus a set number of cars to pass in order to qualify. Its fast and very very good. 1 Joystick required **TANDY COLOUR**

**VERSIONS ONLY AVAILABLE FROM TANDY STORES**

**Post & Packing 50p Tape £8.00**

**SMASH HIT**  
FROM  
**MICRODEAL**

## Mr. DIG

**DRAGON 32 ATARI 32K & COMMODORE 64 TANDY COLOUR 32K**

Everybody's favourite "MR DIG" must dig for the hidden food supplies in the "MEANIES" territory below the ground. As he digs he can eat cherries or crush the "MEANIES" with apples. Special treats earn MR DIG extra points and a magic power ORB can kill the "MEANIES"

Full colour Hi-Res graphics . . . **Tandy Colour**  
1 Joystick required

**version available from MICROMAIL Tape £8**

**NEW**  
FROM  
**POCKET MONEY Software**  
**DRAGON 32**

## PIT FIEND

You are stranded on the middle floor, of a five floor maze and your task is to find the pieces of a broken shield, which are strewn around the maze.

As if this wasn't enough there are pit fiends after you one touch from which is fatal and also there is a limited supply of oxygen. A terrific game.

Keyboard only. **Post & Packing 50p**

**GREAT VALUE AT £1.99**

**TO ORDER**

# The numbers game

*Pam d'Arcy shows you how to handle the problems of machine code with a disassembler program for beginners*

YOU KNOW how much you can learn from other people's BASIC programs. Many useful tips can be picked up. If a program doesn't work, you can work through the listing and hopefully correct it. What happens, however, when you come across machine code articles?

The ability to translate machine code values into meaningful instructions is invaluable; should a machine code article not appear to work, to be able to cross check the accuracy of the entered program data is a great asset; a plethora of new ideas and programming techniques can be discovered and routines be adapted to suit your own needs. The translation of machine code to meaningful instructions is usually referred to as DISASSEMBLY.

Almost every value that can be held in one byte of memory (0-255; hex \$00/&H00 - \$FF/&HFF), either alone or in conjunction with up to the next four bytes of memory, depending upon the value, represents a particular machine code instruction. Not being machines ourselves, meaningful words are easier to remember than numbers. Motorola (the manufacturers of the chip at the heart of the Dragon) publish a list of recommended MNEMONICS, or memory joggers, for association with each machine code instruction. For example, the mnemonic for \$3D (multiply) is MUL. Armed with such a list, you could assemble and disassemble manually — I

didn't possess assembler software when I wrote Tapescan (February 1984 issue).

However, the translation of mnemonic codes to machine code and vice versa is an area where the speed and accuracy of a computer really scores for us.

## A beginner's disassembler

With a DISASSEMBLER incorrect values, through misprints or mistypes, can be quickly established as the display should indicate invalid codes one way or another. If a program or routine does not work and an assembly listing is provided, cross-checking a disassembly of the machine code in memory against the original will show up discrepancies. If there still appears to be no alternative but to work through the program logic, a disassembler will quickly translate the mass of numbers to an equivalent assembly source listing.

I have used three different disassemblers, and there was an illustration of the output from a further type in August's issue. Some have very good points but each have facets that I believe are a disincentive, and are even at times misleading, for newer machine coders. I therefore offer you this one with the beginner specifically in mind.

(1) It is written in machine code so can co-reside with a BASIC program and be loaded anywhere in the machine so that you are not limited on the areas of memory that can be disassembled.

(2) Unlike some disassemblers (where it is obviously expected that the user has a printer), this disassembler does not lose the end of longer lines off the screen edge.

(3) True screen paging is used — no "accidental" scrolling of lines off the top of the screen because of unexpectedly long statement lines.

(4) A completely different approach is taken concerning disassembling some particular types of instruction to try and help rather than hinder newer machine coders.

## Inputting the disassembler code

The problem with any disassembler is its sheer minimum size. To combat this (both in terms of keeping the article reasonably short and assisting as much as possible with the accuracy of program entry) the DISASSEMBLER is supplied as a HEX DUMP with a CHECKSUM after every 10 bytes. A checksum has many derivations. This one is simply the sum (given and entered in decimal) of the ten preceding bytes. The BASIC HEX LOADER PROGRAM (listing 1) also contains an EDIT facility to save you having to re-enter a complete line of data for an odd slip. Any

amount of data may be entered in a session, allowing you to pick up and put down program entry as suits your mood or convenience. I have chosen a load address of 12001 on the basis that this allows space for BASIC at the lower end and is also well below the area normally used for machine code.

## Using HEXLOADR (listing 1)

Input the starting address for the code to be entered — 12001 or the restart point if continuing from a previous session. Input each line of the **hex dump** (listing 2) as a stream of 20 consecutive hex characters (0-9, A-F). The space character between each pair of hex characters (= 1 byte) is for easier reading and checking and is not to be typed in. After entering the last pair of characters in a line, the checksum is typed in and <ENTER> pressed. If the data entered agrees with the checksum, the values are POKEd into the designated memory locations and the screen prompts the next address. Pressing <CLEAR> at any time abandons any current line being entered and returns you to the 'START ADDRESS' screen. Enter an address of zero to terminate the program.

Should the checksum check fail, EDIT mode is entered, allowing you to use the left and right arrow keys to position the editor's up arrow marker below any offending characters and to overtype them with correct values. <S> instantly positions you at the checksum value should that be where the error lies. When editing is complete, press <ENTER> for the line to again be rechecked, and so on.

At any time that you wish to cease program data entry, mark listing 2 to indicate the restart point. Save the code (CSAVEM"DIS1etc",12001,15210,12001).

Strictly speaking, you only need to save the data entered so far, but to always use the final CSAVEM command avoids unwitting errors. When you wish to continue program data entry, CLOADM the last saved disassembler program data file, CLOAD the BASIC hex loader program, RUN and input the marked restart point as the start address.

Once the program data is fully entered, as a further precaution, check the overall checksum by exiting from the hex loader and type in RUN42<enter>. This will tot up the values in locations 12001-15210 inclusive and display the total (it takes about 20 seconds). The overall checksum is 226149. If it does not agree, RUN47 will proceed to tot up and display each line's checksum total. In this phase, once you spot a discrepancy, <R> will re-RUN the hex loader program (press any other key to continue the tot up process). ▶

51 K$=INKEY$:IF K$="" THEN51
52 IF K$="R" THEN RUN ELSE48
```

◀ Once a clean bill of health is confirmed, save the program, CSAVEM "DISASS"12001,15210,12001.

Adjust the hex loader CLEAR (Line 3) and checking routines addresses (Lines 42, 47) if you wish to set up the program data at a lower address (you can always adjust its final loading position by CLOADM with offset and CSAVEM from that point once input). HEXLOADR may be of use for other similarly set up hex dumps — but they may not be 10 bytes per checksum. Adjust B=10 (Line 3) as appropriate — the program will cope with a maximum of 13 bytes per line without needing further amendment. Should the checksum value be given in hex (this dump has a decimal value), it can be entered using the standard BASIC facility

(as can starting addresses presented in hex) of prefixing it with &H.

### Using the disassembler

Now the BIG test: try it out on itself! EXEC12001.

The 'DISASSEMBLE FROM' address should be entered, as the \$ prompt suggests, in hex (no &H prefix required). <Q> quits the program. Start with address \$2F08. It should present you with a screen commencing:

addr.	obj. code	source	code
\$2F08	8E0400	LDX	#\$0400
\$2F0B	9F88	STX	\$(dp) 88
\$2F0D	CC6060	LDD	#\$6060
\$2F10	ED81	STD	,X++
\$2F12	8C0600	CMPX	#\$0600
\$2F15	26F9	BNE	LABEL \$2F10

\$2F17	39	RTS	
\$2F18	CC0000	LDD	#\$0000
\$2F1B	ED8C67	STD	LABEL,PCR \$2F85

As you may recognise, this is a 'clear text screen to spaces' routine. You can now see why I described a disassembly as an assembly source "look-a-like" listing — gone are the helpful label names of a source listing; we are left with numbers alone.

### Paging facilities

Once a screen, or page, of disassembly is displayed, it remains on the screen pending keyboard input.

<Q> brings up the 'DISASSEMBLE FROM \$' prompt allowing a new address to be entered

«up arrow» returns you to the page starting from the last time an address was entered

«K» sets a 'Key marker' so that . . .

«left arrow» returns you to the page starting from the last time «K» was pressed any other (including the response to «K») displays the next page of disassembly.

Unless you need it specifically to mark an intermediate place, by using «K» when speedily paging forward, the previous page can be recalled when you realise that you have just passed the page you wanted to study!

### The disassembler display

The disassembly listing above demonstrates three of the special considerations for newer machine coders.

### Direct address (direct page) mode (Line \$2F0B)

One of the easiest slips to make when coding or entering Assembler source is to omit the # sign when loading fixed values into registers. If the # is omitted, the instruction is assembled as a DIRECTLY ADDRESSED instruction instead of the intended IMMEDIATE MODE type, meaning that (Line \$2F18) **LDD #0000** (load a value of zero into Register D) becomes **LDD 0000** (load the contents of memory location zero into Register D).

Some assemblers allow it to be overridden (when is life ever easy?) but generally, when the operand value is <256, it is actually tagged on to the DIRECT PAGE

REGISTER (abbreviated to DP or DPR) to form a 16-bit address, for example:

DP contains 0 operand and value 5 = memory address \$0005

DP contains 6 operand value 5 = memory address \$0605

If never touched by programs, the DP register remains at zero.

You can quite happily machine code for ever without using such powerful options as the direct page facility. However, when you use something in BASIC's workspace, such as the text screen pointer at location \$88, you use it without realising it. To attract your attention to potential program errors (accidentally omitted #'s) and the true constitution of the address in DIRECT ADDRESSING mode, the disassembler display precedes the operand value with the letters 'DP' in inverted screen within round brackets.

### Relative branch instructions (Line \$2F15)

The operand of branch instructions may take a number of different forms. The most usual form is simply a label name. The disassembler display tells you this by displaying the word **LABEL** then below it gives the address of the instruction branched to.

### Program counter relative addressing (PCR) (Line \$2F1B)

As with the RELATIVE BRANCH instructions, the disassembler display for such instructions is as you would actually write the source code, **LABEL,PCR**. The address of the

location referred to is displayed on the line below.

Other display considerations are:

**Extended addressing.** The DIRECT ADDRESSING item above mentioned the accidental omission of # signs from IMMEDIATE MODE instructions turning them into DIRECTLY ADDRESSED mode. As an aid to programmers, this disassembler appends **EA** in inverted screen to extended addressing operands to quickly alert you to cases of inadvertently omitted # signs on double byte operands. (Example: \$2F27, a JSR to an extended address location.)

**Indirect addressing.** Another area where you can quite happily machine code for ever without using such an option . . . The operands of such instructions (including calculated addresses for 'PCR' instructions) are enclosed within Motorola's square bracket notation. (Example: \$306C — some preset data — disassembles as an INDIRECT ADDRESS mode instruction.)

**Constant offset instructions.** Those with offsets 0 to +15/-16 are displayed in decimal (example \$2EE8); offsets outside this range are less common and are displayed as hex values, preceded by a \$ to remind you of this. The offset is a signed value (so is negative if the most significant bit is set). We need BASIC ROM for an

# What's your best source of information on color computing?

Now you can improve your color computing skills... and it's easy to do. **HOT CoCo** gives you more *practical* information on the Dragon\* than any other publication. Nearly 150 pages a month!

Every issue is packed with exciting new things for you to do. We won't waste your time with filler stories. You'll get instructive columns:

- **Elmer's Arcade**—enjoy old-fashioned arcade style games on *your* computer
- **The Basic Beat**—learn everything you need to program in Basic
- **The Educated Guest**—discover how to use your computer as a teaching tool
- **Doctor ASCII**—get answers to your technical questions
- **Graphically Speaking**—create eye-catching designs that add appeal to your programs

You also get a dozen easy-to-understand articles every month. Games... utilities... programming techniques... tutorials... graphics... education... hardware projects. They'll help you expand what you can do. And complete program listings show you how to use what you learn.

That's not all. **HOT CoCo** saves you money too:

- Candid reviews help you make every purchase a sound investment.
- Informative ads let you comparison-shop from home.
- New-product announcements tell you what's available *before* it reaches the stores.

With all this at your fingertips, your subscription could pay for itself with one wise purchase.

And **HOT CoCo** is risk-free. If you don't like your first issue, just write "cancel" across the invoice and return it to us. You won't owe a thing.

Subscribe to **HOT CoCo** today. Twelve big issues are only \$44.97 (US funds drawn on a US bank). Simply fill out the coupon below and return it right now to: **HOT CoCo Subscription Dept.**, PO Box 975, Farmingdale, NY 11737, USA.

\* Dragon is a registered trademark of Dragon Data Ltd.

**YES!** Help me improve my computing skills. Send me 12 issues of **HOT CoCo** for \$44.97 (US). I understand that with payment enclosed or credit card order I will receive a **FREE** issue, making a total of 13 issues for \$44.97 (US).

Get a 13th issue **FREE** when you enclose payment or charge it on your Mastercard, Visa, or American Express.

# Loony lunar lunchtime

*This month's star game is Moon Miner from Steve Gathercole — so get your jet pack on, lunch break is about to start*

THIS MONTH'S Star Game is a race against time. You are a hard-working miner, digging dusty diamonds deep beneath the lunar surface. As lunch-time approaches, you realise to your horror that you have left your lunchbox at the top of the mine — even worse, you have forgotten all your workmates' lunches as well and they are getting hungry.

You only have a short lunch break, so you must use your jetpack to manoeuvre your way to the top, and collect all the lunches, then jump down the lift shaft. lunches, then jump down the lift shaft back to the bottom.

Unfortunately each of the levels are connected by openings which keep on moving due to seismic activity deep within the Moon. You must be careful jumping through the openings, otherwise you will lose points by banging your head.

Full instructions for playing the game are included in the listing. Good luck!

## Program notes

### Arrays:

SL — Jet man flying left  
SR — Jet man flying right  
NO — Number 10  
CB — Lunch box  
BL — Blank

### Variables:

SC — Score  
HC — High score  
DX — X position of jet man  
DY — Y position of jet man  
BX — No of lunch boxes  
LD — Position for lunch boxes  
A\$ — Draw string for letters and numbers on high res screen  
Z\$, B\$, C\$, D\$, E\$, F\$, A1, A2, A3, A4, A5, A6

Are all string and score variables used in the hall of fame

### Program structure:

Lines 40- 170 Read and Poke machine code data and error check

Lines 170- 440 Instructions  
Lines 440- 540 Initialisation  
Lines 540- 620 More instructions  
Lines 620- 930 Set up and draw screen  
Lines 930-1030 Main loop

### Subroutines

1040 — Decrease score if bump head  
1070 — Time up (lunch break over)  
1210 — Bonus routine  
1390 — Go again routine  
1450 — Pick up lunch box  
1510 — Come down lift routine  
1610 — Move right  
1800 — Move left  
1860 — Move up and left  
2100 — Graphics poke routine  
2310 — Draw string routine and data  
2410 — Actual draw routine.

### Machine code routines

EXEC 30000 Screen invert  
EXEC 30100 Noise  
EXEC 30150 Scroll screen clear  
EXEC 30015 Platform scroll routines

## MONEYBOX

### Personal Accounts Program for Dragon 32/64

MONEYBOX program for personal accounts can analyse your income and expenses, control your bank account, credit card, building society, etc, forecast your bank balance, estimate your taxable income and much more.

**On Cassette Price £9.99**

DRAGONDOS DISK VERSION: prints 42 by 24 legible characters on Hi-Res screen, with true lower-case, £ sign, etc. Features direct access filing, large capacity, budgeting, optional VAT analysis.

**"presents itself as a powerful and versatile package"** — *"Home Computing Weekly"*

**"an easy to use program that builds in a range of powerful facilities"** — *"Which Micro"*  
**On DragonDOS Price £14.99**

## NEW! MAILBOX

### NAME AND ADDRESS DATABASE

Stores names, addresses and up to 10 user-defined fields. Fast retrieval by full/partial matching. Selects batches of records by name, town, region and powerful user-defined tests. Prints address labels, name and salutation, record cards and can print or display user-defined reports. Ideal for address books, membership or customer lists, mail shots etc.

**On DragonDOS (with Lower-case, etc.) Price £14.99**

Cheques/POs/Further details/Dealer enquiries to:

### HARRIS MICRO SOFTWARE

 Tel: (01) 570 8335

## DRAGON/32 BBC MODEL/B ATARI 400/800 TRS80 C/C 32K ELECTRON 747 FLIGHT SIMULATOR

Superbly realistic instrumentation and pilot's view in lifelike simulation which includes emergencies such as engine fires and systems failures. This program uses high resolution graphics to the full to produce the most realistic flight-deck display yet seen on a home computer. There are 21 real dials and 25 other indicators (see diagram). Your controls operate throttle, ailerons, elevators, flaps, slats, spoilers, landing gear, reverse thrust, brakes, etc. You see the runway in true perspective. Uses joysticks and includes options to start with take-off or random landing approach. "A real simulation, not just another game" (*Your Computer*, April 19 '83).

Cassette £9.95 (p&p and VAT included):

**DACC Ltd (Dept. DU)**

23 Waverley Road, Hindley,  
 Greater Manchester WN2 3BN.  
 (Despatch within 48 hours)

## STOP PRESS! STOCK CLEARANCE OFFER

After 2½ years of continued success (what a record) DACC are now setting the final stocks of 747 flight simulator to make way for new releases. The price of this exciting and realistic simulator is being slashed to £2.95. Offer only good while stocks last. Available to UK residents only. Price includes p&p (Please quote dept MD).

# GO SUB DRAGON USER

Don't lose out — make sure you receive the next twelve issues of your favourite microcomputer magazine by sending away for a year (or two years) subscription today.

Just complete this special subscription order form now, and send it with your cheque or postal order to our subscription department.

And if you subscribe for **two years**, you can claim a **free book**. Choose from any one of these superb Sunshine microcomputer books — *The Working Dragon 32*, *Dragon 32 Games Master*, *The Dragon Trainer*, *Advanced Sound and Graphics for the Dragon computer*, or *Artificial Intelligence on the Dragon computer*.

### FREE BOOK CLAIM FOR 2 YEAR SUBSCRIPTIONS

Subscription type:

- 1 year at £10 UK
- 2 years at £20 UK  
**plus free book**
- 1 year at US\$33.95 US/Canada airspeed
- 2 years at US\$67.90 US/Canada airspeed  
**plus free book**
- 1 year at £16 Rest of World surface
- 2 years at £32 Rest of World surface  
**plus free book**

Other overseas airmail rates available on request

Payment Method

- I enclose a cheque payable to Dragon User
- I enclose a postal order payable to Dragon User

I claim my free book (title)

# KONG of the hill!

*The RAINBOW is the biggest and best magazine available for the TRS-80® Color, TDP-100, MC-10 and Dragon-32 Computers.*

And no wonder! It's over 300 pages thick each month . . . pages brimming with programs, product reviews, tutorials, columns, hints and tips about *your* computer. Yes, it is considered "the" Color Computer magazine to buy.

Don't delay. For only \$28 you can get *the Rainbow* every month of the year. Then *your CoCo* will be Kong of the Hill too!

**U.K. Subscription rates**  
**U.S. \$65 surface rate**  
**U.S. \$100 air rate**

## TOP VALUE LIGHT PEN

### DRAGON 32/TANDY COLOUR 32K/SPECTRUM 48K

**THE NEW ADVANCED PROGRAM**  
 for the Trojan light pens include the following facilities-

- \* DRAW BOX
- \* DRAW CIRCLE
- \* DRAW LINE
- \* DRAW PICTURES FREEHAND
- \* COLOUR FILL DESIGNATED AREAS
- \* SAVE AND LOAD PICTURES TO AND FROM TAPE
- \* FULL ERASE FACILITIES

All in Hi-Res screen in any of 4 colours for the Dragon/Tandy, and 8 colours for the Spectrum.

- \* DATA ENTRY AND PROCESSING
- \* MENU SELECTION AND CONTROL
- \* GAMES PLAYING

This is a first class program which gives hints and tips on how to write programs for the pen. Ideal for many educational uses.

**A top quality pen plus a first-class program. The best value pen package available.**

## Jet Set Willy

**Program:** *Jet Set Willy*, Software Projects, Bearbrand Complex, Allerton Road, Woolton, Liverpool, 25 7SF. **Price:** £7.95

I HAVE never before felt the compulsive urge to rave about a game to everybody, but now...

*Jet Set Willy*, is simply the best thing since *The King*. In fact, it's better. The game is a work of art, and epic, and any other great praise that I can think of.

There are several reasons for buying this game. It is a better follow up the brilliant *Manic Miner* than anyone could have assumed possible. It is challenging, combining beautiful elements of adventure (strategy and planning) and arcade (simple controls, everything graphical). The graphics are the best I have ever seen in PMODE 4; there is one Demon who is simply brilliant. It gives a great chance to gloat at your Spectrum owning friends. Ring them up and invite them round to play the game. When they arrive have the game already loaded but leave the title page

going, allowing them to see the joystick option (STRIKE ONE). Start playing and soon they will pipe up with "But it's only in Black and White!! That's not up to much is it?"

At this point proceed to "The Guest Room", "The Games Room", and the rest of the fifteen extra rooms that the Dragon version has, being careful to point out that these rooms have all been fitted into 32K as opposed to the 48K it took to write their smaller version.

Take them to lie down somewhere — due to the small size of their brains, which have been numbed by the fact they haven't programmed anything since they

bought their Spectrum, they will almost definitely be frustrated and confused.

If we all buy this one, then Software Projects will write another one, and another one, and another one...

There's no point in trying to copy it, it contains the best set of anti-piracy devices I have ever seen (including a chart that would surely take months to copy out!!).

The game has one annoying bug — when the player dies the new life starts at the place that the old one finished, which can occasionally be directly under a creature (ie chainsaw, mad monk, giant, ice-cream, spinning razor, silicon chip, etc...), causing the loss of all eight lives (yes, you need them all!!).

If you don't have a copy of *Hunchback* then don't panic, you'll find four screens from it on the roof of the house, along with lovely screen names one of which sounds like an extract from *Jabberwocky*, but isn't!

What else can I say? Beg, steal, borrow, do anything but get enough money for this game... you will never regret it.

Jason Orbaum

## Szygy

**Program:** *Szygy*, Microdeal, 41 Truro Road, St Austell, Cornwall. **Price:** £8.00

IF NOTHING else, this qualifies as the software with the silliest title, though it does offer a little more than that — in fact 250 pictures which cover 300 locations in an attempt to produce a kind of graphics adventure. The setting is the Deathstar where you are trapped with one Dark Lord Vader, who sounds vaguely familiar. You don't want to get too familiar with him, though, as if you encounter him you can be sure he won't be offering you cups of tea and cucumber sandwiches. You need your Light Saber to see him off, and to do that you need to find something that will deal with the 'orrible alien that's guarding it.

As you can see, the adventure elements are here, and the graphics side comprises, for the most part, a 3-D maze of corridors and doors a little like Salamander's *Red Meanies* or Microdeal's own earlier *Phantom Slayer*. The pictures, which are simple but convincingly done, take up one quarter of the screen, leaving room for an inventory alongside with the bottom half of the screen given over to the text. You move along the corridors using the up arrow key, and turn with the left and right arrows, movement being instantaneous and very impressive. Doors open automatically when you come to them... which is not necessarily a good thing as some lead to instant death as you may step into a lift that's guarded by some kind of force field, or into another corridor where there's no air. The spacesuit I've found has holes

in it, and this didn't do me a great deal of good. Another door leads to a room with a pool in it, so I tried EXAMINE POOL to be given the helpful information "It's wet." I'd also apparently forgotten how to swim so that wasn't a great success either.

There are plenty of other rooms to explore, and objects to slowly amass, and despite the difficulty of mapping out the maze of corridors which all look so similar, I liked the blend of graphics and adventure — not the easiest thing to do on the Dragon, and by simplifying the graphics they can squeeze in a vocabulary of 62 words. Not bad, and as long as you don't expect a conventional adventure *Szygy* shouldn't disappoint.

Mike Gerrard

## Jigsaw

**Program:** *Jigsaw*, Vidipix, 125 Occupation Road, Corby, Northants. **Price:** £3.95

VIDIPIX is a name new to me amongst Dragon software companies. Even if they have been around for quite a long time, I do not see their chances of survival for much longer as being very high.

The fault with this piece of software is the same as that of so many that we reviewers receive; the programming quality may be of a very high standard, but the idea is simply unworkable.

The programming in this game is superb (excluding the bugs mentioned below) but the game suffers from the fact that there are very few people who want to use a computer to do a jigsaw, even one of their own design!

So, what do you receive for your money when you buy this 'game'? Basically (Pun intended — the program is mainly in BASIC), you get three routines, a jigsaw routine, a very simple drawing routine, and a screen dump routine for a fair selection of printers.

The jigsaw routine is the main part of the program. This takes the graphic screen and divides it up into squares (no, not jigsaw like pieces, just identical squares) and you have to get them into the right places to complete the jigsaw.

The drawing program has several bugs, not least of which is the program's seeming inability to allow you to move the cursor, despite following the clear instruction to the letter.

If you don't like jigsaws, or you don't like computer logic games, then steer clear of this game. If you like both, then steer clear of this game.

It is a shame that I have to write such a scathing review as the programming is really rather good at points, but I'm afraid Vidipix need a new designer, preferably one who knows something about market demand.

Jason Orbaum

# The Dragon Speaks Out!

"Speakeasy" Speech Synthesiser

**NEW**

Only  
**£24.95**

Only  
**£24.95**

- ★ Unlimited vocabulary through using allophones.
- ★ Easy to use in your Basic programs (and in machine code).
- ★ Clear, audible speech.
- ★ Complete with Dragon interface lead.

Action-packed  
100% machine code  
arcade software

**£3.95**

### COPTER PATROL

Fly your helicopter over hostile territory to rescue your stranded troops from the enemy. Your men will wave to you to attract your attention and then run to the helicopter when you land. Unfortunately, the enemy fighter planes and battleship guns home in on you to give you very little time for a safe pick-up.  
**£3.95**

### TASKSHIP

This game in the Scramble series has two great innovations. The first is that YOU can design your own scenario (with rockets, mountains, buildings and radar dishes where you want), or use the ready-designed format. The second is the black holes which pull you off course. If you are unfortunate enough to disappear into a black hole, you get time warped to another part of the landscape. Brilliant graphics.  
**£3.95**

### MAURICE MINOR

Out for a quiet drive in your Morris Minor you inadvertently wander on to a race track and find yourself in the middle of a Grand Prix!  
**£3.95**

### POGO-JÖ

Q-Bert type game with amazing sound and graphics, unlike anything seen before on the Dragon. The player can choose to start on any one of 15 completely different screens, and select one of the 4 skill levels. Features include Hall of Fame, return to last screen on which killed for next game, positive joystick control.  
**£3.95**

### RIVER OF FIRE

An adventure. Superb machine code animated graphical scenes make this probably the best adventure yet for the Dragon. The volcano erupts on your island. Can you save yourself and help the hospital patients to safety. You'll need cunning and perseverance.  
**£3.95**

### STARFIGHTER

The hostile landscape scrolls beneath your starfighter. You bob and weave under joystick control and you seek and destroy the enemy fighters and ground installations.  
**£3.95**

## EDITOR/ASSEMBLER + DISASSEMBLER + MONITOR

Two pass global type. Supports labels of six characters. Directives: ORG, RMB, FCB, FDB, FCC, REM. Hexadecimal Arithmetic. Powerful debug Monitor includes 14 commands plus set break points, selection of useful sub-routines and Disassembler. Altogether a powerful program package with information for the serious user or interested beginner. Supplied on cassette.

Computape THE ONLY SOFTWARE COMPANY TO MAKE YOUR DRAGON CHIPS FRY NOT CRY.

YET ANOTHER international postbag this month, headed by Moshe Reuveni of Gordon 40, Givataim 53227, Israel, who apologises for his poor English, though not so poor he hasn't been able to finish off *Black Sanctum*, on which he offers a few clues, including what to do with the door that's boarded up (clues being printed backwards): REM MAHWA LC HTIW LIAN LLUP. Thanks for that clue, Moshe, and I can assure you that your English is much better than my Hebrew.

Mind you, I think even my Hebrew is better than my Norwegian, so just as well reader Robert Bruvik of Skalevikneset in Norway speaks good English, too. Now Norway might be famous for fjords and parrots, but vampires are a little thin on the ground so Robert's having trouble getting out of Level One of *Transylvanian Tower* from Richard Shepherd. I've asked Robert to be a bit more specific as this 3-D graphics maze can be negotiated with a mixture of plotting and plodding . . . though only to the even harder second level. I made it to the top of the tower but the creepy Count saw me off with no bother. If all else fails I shall hand Robert over to the man with the garlic, Richard Shepherd himself.

A recent letter from Touchmaster confirmed that they'll soon be extending their range to take in the Adventure International "Mysterious Adventures" series, recently taken over by A I from Channel 8, with a welcome reduction in price at the same time to £7.95. Touchmaster will also be handling adventure titles from smaller software houses, such as Nemesis's *The Trial of Arnold Blackwood*, an adventure I do recommend, and if you've sampled the Arnold style of humour and liked it then you'll be pleased to hear that Nemesis is currently converting another from the Amstrad to the Dragon. More details when it's been done.

Ian High of 62 Littlemede, Eltham, London SE9, offers help to anyone with the Dan Diamond trilogy or *Ring of Darkness*, though he himself can't get out of the cabin in *Black Spectrum*. He says he's broken the mirror several times, to no effect, and can't think of any other possible exit. My advice is: DAETSNIR ORRI MOGO TYRT. Letters from Ian and others show that there's no such thing as an easy or difficult adventure, because what puzzles one

person seems to be a doddle to someone else, while another title might have the opposite effect.

A common problem is how to cross the water and the mountains in *Ring of Darkness*, which I'm asked this month by Wesley Curtis of 4 Kings Drive, Gravesend, Kent DA12 5BG. Wesley should obviously write to Ian High, while two lesser-known adventures are puzzling Quentin Watt: *Poseidon* and *Castle of Doom*. In the former Quentin's on a ledge with a rope but can't make use of it, while in the latter he's having trouble with the monster. Typical adventurer's troubles, so if you can help Quentin out write to him at Glen Esk, East Cowton, Northallerton, North Yorkshire.

Yes, the scrapes we adventurers get ourselves into. Gillian Brigham sounds like quite a straightforward person, living at the typically English address of "Ingleborough", Ash Tree Close, Southwell, Notts, and yet here she is chasing secret agents in her spare time, thanks to *Operation Safras* from Shards. Gillian has managed to rescue the agent in Manchester, and earned herself lots of money in Southampton (no, nothing to do with all those sailors there), but she's stuck on the following: Where to find the code for the Welsh computer in Dundee; where to find the antidote for the agent in Plymouth; where to find the one who is deaf, dumb and blind; where to find the son of the agent in a certain university town; and how to enter the shed near York Minster without being blown up. And you thought you had problems. If you can help Gillian with hers then contact her at the address above.

Philip Blazdell of Jail Lane in Biggin Hill, an appropriate address for an adventure player, thinks I ought to be writing four pages every month, including a full-page adventure helpline. Well I'm very flattered, but it might be hard to fill four pages every month on Dragon adventures, though I used Philip's letter to DROP HINT to the editor, who has agreed to extra space when possible. Philip also kindly sent me a copy of Dragon Data's help sheet on *Madness and the Minotaur*, which in fact is of limited help but I will happily pass a copy on to anyone who wants it *provided* they enclose s.a.e.

Having dealt with several old problems, on to an adventure that's sure to create

some new ones, and that's *Caverns of Doom* from Microdeal, a machine code text-only adventure of over 100 locations, being sold at the low price of £4.99, though that's no reflection at all on its quality. The story is that you are in a network of tunnels in a mine complex, and all you have to do is find your way out. You begin just inside the entrance, with the south tunnel behind you collapsed and your only safe route being to the north. A seasoned adventurer never goes anywhere without having a quick INVENTORY, and this reveals you to be carrying a flashlight. At least we won't have to waste time looking for our old friend, the torch. The screen is split into three sections, the top two-thirds being description, what you can see plus inventory, and at the bottom right is a mini-compass which displays your available exits — a neat idea. Alongside that is room for your inputs and the responses.

Venturing into the mine proved at least one of my assumptions wrong straight away, for in a small one-room prospector's shack is a tool chest, a jar, a broken lamp and an oil drum. Obviously the flashlight isn't going to last forever, so how do we fix the lamp? The tool chest is locked, so perhaps there's a key in the jar EXAMINE JAR. "It contains: pickles." So much for that, though I did try pickling the lock just in case. In a dead-end I found some beams, which cheered me up, and elsewhere a skeleton, which didn't . . . well, not at first. Further tramping around uncovered some other familiar objects, the good old rope and the good old matches for instance, along with signs that an earlier object was the good old red herring — no, not a pickled herring. By now I was running out of hands, and my flashlight was growing dim, then before you knew it: total darkness. We all know what happens if you move round in the dark, too, don't we? Wrong again! Here you can continue to move, so if your map is accurate survival might be possible, as indeed might a little more light.

For a fiver *Caverns of Doom* is definitely worth grabbing, with its quite extensive vocabulary, SAVE and LOAD routines, GET EVERYTHING and DROP EVERYTHING commands, SCORE (out of 80) and an inventory that actually takes account of the weights of different objects. Let's just hope I can get a good way into the caverns. ■

## THE No 1 DRAGON JOYSTICKS!

Our easy-action potentiometer joysticks have been an instant success!

The Dragon Pro-Stick is sturdy, sensitive, accurate and reliable.

Unlike switch-type sticks, they're **GUARANTEED AND RECOMMENDED FOR ALL DRAGON GAMES**, because they're purpose-made for the Dragon and Tandy computers.

And at just **£5.50 each** or **£9.95**, they have to be the bargain of the year!

Tim Love's

## CRICKET

"BETTER THAN THE REAL THING!" — Central TV

# Dragon Answers

## Oh Brother!

CAN I connect a Dragon 64 to a Brother EP-22 Typewriter printer via the RS232 ports (that is do they both have the same standard)?

*K S Hoskins  
Romford*

I CAN'T see any problems in connecting the RS232 ports together, providing you can obtain, or make a suitable lead. You will need to set up the baud rate of the Dragon's port to the correct value, given in the printers manual. Use the POKE given in the Dragon 64 supplement. To print out on the RS232 port, rather than the centronics port, type POKE 1023,1. You may also need to type POKE 330,2, if the printer does not linefeed correctly.

## SN error

I'VE GOT a Dragon 64 and recently I bought a game called *Tim Love's Cricket* by Peaksoft. After loading it I got an SN error line 9620. On this line there is a user statement. Could you please tell me how to correct this line?

*Kamran Hussain  
Bradford*

THIS HAS come up before, but again a number of letters have come in regarding this problem on various games running on the 64, written for the 32. The syntax error is caused by the line having an extra character in the user number — eg X=USR01(A). This was necessary on the 32 but on the 64 it should read X=USR1(A). You can simply edit the offending line and re-run the program in most cases.

Software programmers might like to use the following lines to test whether the program is running on a 64 or a 32.

```
100 VERS=CHRS(PEEK(49052))
+CHRS(PEEK(49053))
110 IF VERS="64" THEN (Dragon
64) ELSE (Dragon 32)
```

## INKEY

I WOULD like to find out properly how to enter the keyboard arrow keys. I know that it has something to do with INKEY but would like to know if there are any standard lines for all programs.

*V Edwards  
Port Talbot*

THE FOLLOWING few lines can be inserted to check for the four arrow keys; the command following the THEN could either be a goto or a direct command(s) to handle the key press.

```
100 IF INKEYS=CHRS(8) THEN left
arrow pressed
110 IF INKEYS=CHRS(9) THEN right
arrow pressed
120 IF INKEYS=CHRS(10) THEN
down arrow pressed
130 IF INKEYS=CHRS(94) THEN up
arrow pressed
```

You can also check for the arrow keys plus shift being pressed by substituting these numbers in the above CHR\$ statements, 21, 93, 91, 95.

## Double up

I HAVE a Dragon Data Single disk drive and I would like to ask you if you could possibly suggest somewhere that I could have a second drive fitted to it.

Ideally I would like to have the upgrade done as soon as possible as I am constantly using the Disk for Word Processing and the like.

*Paul Grieves  
Deeside  
Clwyd*

COMPUSENSE, the new Dragon distributors can supply a second disk drive upgrade kit for £120. Fitting a second drive is a simple enough task for just about anyone at home with a screw-driver. It just involves removing the cover from the drive and putting two plugs into the second drive, it requires no soldering.

## ?FM error

I AM having trouble with a Basic program that was saved to tape

using EXEC46756. As it was a basic program, I tried to CLOAD it. This, and CLOADM, resulted in an ?FM ERROR. Trying to load it as a file also failed. Could you tell me how to load it as it is the only copy of the program I have?

*Robert Gooding  
Irvine  
Ayrshire*

I AM afraid the program has probably been saved incorrectly, as the correct address for the Basic save routine is 46757, not 46756. You could use the following assembly routine to load in the file as it was saved, and providing the Basic is not corrupted, you can then save the file using CSAVE. It is never a good idea to use ROM routines to do things like save programs when the CSAVE command is adequate.

```
JSR [SA004];READY FOR INPUT
LDX #474
STX 126
JSR [SA006];GET HEADER
LDX 25
LOOP STX 126
PSHS X
JSR [SA006];READ A BLOCK
PULS X
LDA 124
INCA
BEQ EOF
LEAX 255,X
BRA LOOP
EOF LDX 126
LEAX -1,X
STX 27
JSR 33823
JSR 33773
RTS
```

## Semigraphics

COULD you please inform me how to obtain the additional screen graphic modes not supported by Dragon Basic by pok-

ing, as I don't possess an assembler.

*Ian Lett  
16 Whalebone Avenue  
Romford RM6 6DA*

IT WOULD take up most of this page to describe all the additional graphic modes which the VDG is capable of, but which Basic does not support. However, a mode called Semi-Graphics 24 is generally regarded as the most useful and is described here. The mode allows all nine colours to be used, as well as text and 64 by 192 graphics. The simplest way to enter this mode from Basic is with the following lines:

```
10 PMODE 4,1:SCREEN 1,0 'Use
Basic to set up VDG start ads etc.
20 POKE &HFF22,5
30 POKE &HFFC0,0:POKE
&HFFC3,0:POKE &HFFC5,0
```

The pokes in line 30 are not actually necessary with the PMODE 4 statement, but are included for completeness. All access to this mode must be by poking to the screen (starting at 1536), Basic cannot print or plot on the screen in this mode. You might like to take a look at a program called Masterstroke II, which adds commands to the basic to control some of these extra modes, details from PikaDee Software, 35 Parker Street, Preston, Lancs PR2 2AH.

## SAVE""

I HAVE had my Dragon Dos since Christmas. When saving one of my best programs, I accidentally pressed enter when only typing SAVE. I have found a way to load it but not to kill it. Can you help?

*Simon Buxton  
75 Queens Road North  
Eastwood  
Nottingham NG16 3BJ*

IT IS an interesting point you have raised here. The only way to kill off a program saved with SAVE"" is to change its name by direct access to the directory track — track 20. If you do attempt this using SREAD and SWRITE I suggest you use a backup copy of the disk as one mistake could corrupt the directory and lose all your files. What you really need is a 'Disk Doctor' type program, but I have yet to see one for Dragondos.

It is worth noting that programs saved with SAVE"" can be loaded and run, but effectively not killed. This does have its uses.

# Classified

## DRAGON 32/64 SOFTWARE SPRING/SUMMER

**Educational Software** Multi-Maths (A Tables Test). Cassette £1.80 disk £n/a. Maths Pack One (Tests Subtraction, Addition, Division, Multiplication). Cassette £2.99 disk £3.99. English Test (age 7-15). Cassette £2.99 disk £3.99.

**Games Software** Games pack (Poker, Hangman). Cassette £4.99 disk £5.99.

**Junior Education Alphabet** (A super new program that teaches young children their Alphabet). Features 26 full colour pictures. Cassette £4.99 disk £5.99.

**WD/PROV 2** (An upgrade to V1, also features: Text format change, Epson screen dump) please note: Version one is not needed to run V2. Cassette £3.99 disk £4.99. Version one owners just send your copy of V1 and £1.00 and we will send V2).

### Physics O Level package

With exams round the corner, as last minute revision, our pack will test you to the limits. Cassette £7.99 disk £8.99.

All programs come complete with Full instruction, quality blank disks/cassettes. Disks are for Dragon DOS owners.

Send cheque/PDs to: P. Perris, 88 Poplar Crescent, Shipley, West Yorkshire.

All programs include p&p

## DRAGON JOYSTICKS

The best for games and C.A.P. Only £6.95 each or £12.95 for 2

Send now to: Peritron (DU)  
21 Woodhouse Road  
London N12 9EN

## OUTPUT PORT

Simply plugs into printer port and is easy to use from BASIC or M/C. Features Open-Collector outputs to drive relays, led's etc. Supplied with detailed information.

£14.95 inc. to:

NCJ Electronics  
13 Binfield Square  
Ella Street  
Hull HU5 3AP

**INFINITE LIVES** for Dragon, Manic Miner. send £1 plus SAE to R. Nield, 22 Queensway, Worlsey, Manchester M28 5TZ for listing.

**TANDY COLOUR** computer 64K disk flex extensive software £300. 0624 863311.

**SCIENTIFIC COMPUTER** aptitude test, take it at home, designed by Harvard Ph.D. Full instructions by mail. Dragon or Tandy (state which). Send £12 today. Professional Ed. Assoc., 6546 Hollywood Blvd, Suite 201-68, Hollywood, California, 90018, USA. Test your computer aptitude.

**PREMIER DELTA** disk operating cartridge for sale, £30. Tel: 0843 27825.

**SIX EDUCATIONAL PROGRAMS.** "O" level, prep, maths, business and more. Dragon or Tandy (state which). Send £15. Professional Ed. Assoc., Suite 102-68, 6546 Hollywood Blvd., Hollywood, California 90028 USA.

**THE TAPE DOCTOR.** Now also available for the Tandy Color 32K. Now else are you going to recover those damaged Basic programs? Star program (5 dragons) in Jan. 85 D.U. 'I give it a top rating . . . a very good package . . . Still only £4.99 inclusive from COMPUTIL, 22 Grove Park, Burbage, Hinckley LE10 2BJ (state whether Dragon or Tandy version).

## MEDIA CALC SPREADSHEET

AMAZING VALUE  
+ - ÷ × % Average  
Plus all Dragon functions supported 756 cells plus overlay feature.

Agents required in countries other than Sp., S.A. & U.K.

**DISC DRIVE** for Dragon 32 £180 or with OS9 for Dragon 64 £210. Phone Inverness (0463) 791827.

**DRAGON 64** 5 months old, boxed, £35 worth games £135 ono. Telephone 0283 702851.

**DIAMOND DASH** 20 screen platform and ladder game. Save, load or edit screens. Joysticks £3.00 to J. Cartwright, 23 Tintern Road, Cheadle, Hulme.

**DRAGON 64** in excellent condition £160. Upminster 50030.

**DRAGON 32 COMPUTER,** disk drive and cassette player, in original boxes, as new. Also games (40), software, manuals and books £320 or will split. Tel: 01-751 1087.

**JOIN THE SEASIDE SOFTWARE DRAGON USERS CLUB.** Monthly newsletters, discount software, special competitions, hints and tips plus lots more! Send cheque or PO, made payable to Seaside Software for £10.00. To: Seaside Software, 21 Sherwood Street, Scarborough, North Yorkshire, YO11 1SR. Free software for the first 200 received!

**DRAGON 32 Hitext.** Place text on the hi-res screen with this machine language utility. Features full upper/lower case, reverse field and double height characters, 51 × 24, 32 × 24 displays, 16 CLS colours, 6 display modes, £4.95. Super basic (all Dragons). A machine language utility adding 58 commands to basic. Features 4 channel sound, alarm clock, function keys, procedures, error trapping, 33 colours, autorun on loading, plus lots more! £4.95. To: R. Thompson, 7 Brindley Way, Southall, Middlesex, UB1 3JN. Tel: 01-571 3610.

**DRAGON 32 LEADS.** Power supply, book, 10 months utilities, tape, £50. Telephone 0727 25168 after 7 pm.

**AMERICAN COLOUR** Computer magazines, some back issues left. S.A.E. lists. Quickshot II Joysticks Tandy/Dragon, £14.95 plus £1.50 p+p. Dragon Cruncher — converts Dragon to Tandy and vice-versa (Basic only), £7.95. Dragon Eye mains indicator (LED), £3.95. Elkan Electronics, 11 Bury New Road, Prestwich, Manchester, M25 8JZ. Telephone 061-798 7613.

### NO MORE SPAGHETTI

Organise all those messy leads, recorder, transformer, joysticks and Dragon 32/64 in a COMPUTRAY.

Integral carrying handles, all wood quality construction, approximately 68 × 40 cm. Offer includes 2 free games to:

A. Samwell  
Flixton Cottage, 168 Flixton Road  
Manchester M31 3DA

### WORD PROCESSOR FOR DRAGON.

Screen editor with autowrap, help, search and cut/paste produces justified text. Adjustable line length; printer control codes; save, load and mere documents. Cassette £10. R. J. Shorter, 3 Trinity Road, Rayleigh, Essex.

"**ELECTRONIC AUTHOR**" is THE Dragon 32 word processor. Realise the true power of your Dragon using this superb program! Features include: Automatic page numbering, centring, paragraphing. Define your page size, all print types catered for, just include commands in your text. Also JUSTIFIED TEXT, making your letters, documents brilliantly neat. Full block copy, delete included. Repeat key, excellent phrase search, change or delete facility. Fast typing, no missing out characters. Loading/saving rewritten to abolish I/O errors and allowing filenames of up to 20 characters. Comes with full documentation and configure program to allow it to run with ANY printer. Send cheque for £19.95 to Smithson Computing, 24 Coal Hill Green, Leeds 13.

# Enter competition or Hulk smash!

Gordon Lee sets the competition, Adventure International provide the prizes

READERS who regularly attempt the competition in *Dragon User* will have found instances where the standard mathematical function of the Dragon is inadequate. For example, in the March competition it was necessary to compute the exact value of factorial 52, and the following month the solution relied on calculating successive powers of 2 and 5 accurately in order to determine which of these powers contained any zeros.

In the case of the powers of 5, to obtain the values up to  $5^{100}$  it is clearly not sufficient to write a program such as:

```
10 LET T=1
20 FOR N=1 TO 100
30 LET T=T*5
40 PRINT T
50 NEXT N
```

If this program were to be run it would work satisfactorily for a few steps and then two things would happen. Firstly, when N reached a value of 13 the computed value of T would be given as 1.22070313E+09. This is due to the computer switching to an exponential form of notation now that the value being handled has exceeded nine digits — in other words, is greater than 999999999.

The second thing that will happen if the program is left to run is that an OV (overflow) error will occur after step 54, due to the number being calculated being too large for the computer to handle. We also have the additional problem that the computer is also only able to hold a dozen or so significant digits in the calculation, and so although it keeps a record of the absolute *magnitude* of the number, the precise value of the minor digits is lost for ever. It is a sad fact that the mathematical capability of the *Dragon* (and other micros) is little better than that of a cheap pocket calculator!

However, rather than admit defeat, we can easily devise a method to overcome the difficulty. In the case of the problem mentioned, the full value of the powers of 5 up to  $5^{100}$  can be handled using the program listing given. A quick examination of this listing should make its mode of operation clear. Note how the powers of 5 are stored in *strings* rather than as numeric variables, which, as has been shown, are inadequate for numbers of this magnitude. Each *digit* is the extracted in turn from the string, a simple mathematical operation performed, and the resulting value returned to string form. Note the use

of the 'Carry' variable, where necessary. In this way the full value of  $5^{100}$  with its 70 digits is easily manageable, and there is no reason why even greater powers could not be calculated by modifying the prog-

## Prize

**THIS MONTH'S prize is something rather special — the person who sends in the best solution, in the opinion of our quiz expert Gordon Lee, will win not one but 15 games!**

Adventure International are donating one copy of each of the Scott Adams adventures as a prize for the most perspicacious participant — that's Classic Adventures 1 to 13 inclusive, plus *Spiderman* and *The Hulk*.

In addition, the 25 runners-up will be receiving a copy of Classic Adventure 13 — *Claymorgue Castle*.

That's a grand total of 40 games to be won!

## Rules

**ENTRIES for this competition should be clearly marked Competition Corner June on the envelope, and should include your**

name and address in block capitals.

ram to accommodate hundreds, or even thousands, of digits. One way would be to utilise a string array, each variable containing, say, 250 digits.

This month's competition is to devise a program along the lines of the one already mentioned, which will compute *square roots*. The program should allow an input of any number of up to nine digits, and should be able to calculate the square root of that number to a high degree of accuracy, the limitations only being the amount of memory available for storing the numbers generated. The length of time that the calculation takes will also, presumably, have a bearing on the extent to which the computation can be carried out.

The method of calculation chosen should be at the competitor's own choice, and should be outlined briefly. The program should be written in BASIC and a full listing enclosed, together with an attached list of program notes, where appropriate. Apart from accuracy, which will be tested for by calculating a known value, entries will be assessed for brevity, clarity, and speed of operation.

Good luck!

**name and address in block capitals.**

**Your entry must arrive at Dragon User by the last working day in June. The winners will be named in the September issue of the magazine.**

## March Winners

**THE WINNERS of our March competition were Zhiwei Chen of Bristol, Steve Worsley of Ilford, Raymond Woods of Barkingside, M. Leyland of Grantham, C. Jones of Llanerch, T. Potter of Chisleton, Robin Telkman of Sale, Ian Mitchell of Llanfairpwll (etc), P. Beaumont of Largs, M. Fecher of Maidenhead, Ned Skelton of Thornbury, Steve Hailes of Croftfoot, J. Hewitt of Hixon, P. Bennington of Strood, and H. van Gestel of the Netherlands. Each of them will be receiving a copy of Microdeal's *Worlds of Flight*.**

# OASIS SOFTWARE

present . . . TWO NEW RELEASES

## SPRINT BASIC COMPILER

**A rapid step forward in Home Programming.**

The newly released 1.1 upgraded compiler written by Dr. David Gray for Dragon 32 and 64 owners. By converting your own BASIC programs into intermediate code, Sprint accelerates them by up to 5 or even 10 times their normal running speed. Supporting virtually all the integer BASIC and cassette and printer commands, Sprint programs are not only compiled from tape but also run independently of the compiler.

## DRAGON CHESS

- Six levels of play.
- All legal chess moves including en-passant, castling and pawn to queen promotion.
- List of previous moves stored which can be displayed or printed.
- Loading and saving of games positions from tape.
- High resolution graphics which can be flipped round to make black or white play from either end.
- Simultaneous text and graphics.

- Sides can be exchanged at any stage.
  - Best move hint.
  - Set up from any position.
  - Opening move library.
  - Moves may be taken back and play resumed from any point.
- "... I thought this was an excellent version of the game. Well worth buying" (Home Computer Weekly)
- Change levels of play at any point in the game.
  - Will adjudicate games between humans.
  - Very high standard of play.
  - Professional packaging and lifetime guarantee.
- "Dragonchess is without doubt the best value chess on the market today" (Microdeal)

## MIND GAMES COMPENDIUM.

All five games for just **£19.95**

Oasis Products are available from and all good software suppliers. ## PETITE PASCAL

**Not just a language - an education in structured programming.**

This extended integer subset of the structured programming language is the ideal introduction, not only to a language widely used in schools and universities but also to programming itself. As an appreciation of PASCAL is generally accepted as the best way to increase your understanding of structured languages, this is a must for anyone who takes computing seriously.

# INCENTIVE

FOLLOWING THE EXEMPLARY BACKTRACK – INCENTIVE NOW PRESENTS FOR THE DRAGON

# THE KET TRILOGY

BY JOHN MARTIN AND RICHARD McCORMACK

## \* THE KET TRILOGY – THE CELEBRATED ADVENTURE CLASSIC \*

### THE STORY SO FAR...

The Lords of Ket rule a strife-torn land where magic and mayhem are common place. Raiders from the east sweep in and devastate the countryside, spurred by the villainous Priest-King Vran Verusbel, arch-mage of the cult of mad monks and by the beautiful, though utterly evil, Priestess Delphia.

Unjustly condemned for a murder you did not commit, you have been offered the chance of escaping the hangman's noose by undertaking a perilous quest. Naturally you accept, but to ensure your loyalty to the cause, the Lords have placed a magic assassin bug on your neck, ordered to sink his poisonous fangs into you at the slightest sign of cowardice.

Poised at the brink of the unknown village, you stand alone with the daunting mission before you. With just a handful of coins, your trusty sword and the will to succeed...

Your task is to travel beyond the mountains and then underground via Vran's Temple to the ultimate confrontation with Vran himself, penetrating his inner sanctum, beyond the Guardians of the Gates...

**THE THREE 30K ADVENTURES  
TOGETHER FORMING THE  
CLASSIC AND COLOSSAL  
KET TRILOGY**

**MOUNTAINS OF KET  
TEMPLE OF VRAN  
THE FINAL MISSION**

**THE KET TRILOGY** Series of adventures are available from selected Software Dealers nationwide. In case of difficulty, please use our fast and efficient mail order service.

**PLEASE NOTE** Each part of the Trilogy is a COMPLETE ADVENTURE IN ITSELF which can be played totally independently of the other two.

**REGISTERED OFFICE** 54 London Street, Reading RG1 4SQ.
