

DYNAMIC COLOR NEWS

TANDY COLOR COMPUTER MAGAZINE

We are now in our fifth year. The purpose of DCN is to provide instruction on Basic and Machine Language Programming, Computer Theory, Operating Techniques, Computer Expansion, Product Reviews, New Products plus provide answers to questions from our subscribers. Included in each issue are Basic and Machine Language programs plus editorials on various computer subjects. Did you know that the joystick port can be used for many hardware applications such as digital voltmeters and thermometers? We showed how to build these in recent issues. We ran a series showing how EPROMS can be used for containing data and programs. Due to popular demand a Ham Radio section is included. DCN is written in a non technical style and is designed to be a learning tool.

Dynamic Color News Discontinued

Dynamic Color News was printed for 5 years. It started as a newsletter and expanded to a 40-50 page magazine. Our last issue was #59 March 1989. Back issues are available in printed form or on disk. These are excellent references for various color computer subjects such as Basic Programming, C, OS-9, Basic 09, Assembly Language, Ham Radio, and hardware. Also basic and machine language programs are included. All of our editorials were put on the disk as ASCII files which can be read with any word processor. One disk box can hold all of our disks. The last issue has our cumulative index of all the articles and programs. We printed 59 issues but do not have disks for 5 of the earlier issues. We are offering the complete 54 disk set in a box for \$150. You can not buy color computer programs for less than this.

Prices are as follows:

each	10 up	Complete Set
\$2.00	\$1.50	\$75. Magazines
\$4.95	\$4.50	\$150. Disks

Magazine sample \$2.00 ppd.
Disk sample \$4.95 ppd.
