Foreword

You'll have to forgive me if I am enthusiastic.

It's just that I am excited and somewhat amazed by this, our latest Adventure book — *The Third Rainbow Book of Adventures*. For one, I'm excited because I love to play Adventures and I can't wait to see what our programmers have come up with this time. And, too, because this is also the most recent entry into our Rainbow Bookshelf series, which has been growing at a quite satisfying rate.

I am very excited by the continuing interest in and devotion to the Color Computer. When we announce an Adventure contest in the *THE RAINBOW, The Color Computer Monthly Magazine*, we are *flooded* with entries from enthusiasts of all ages and backgrounds. It warms my heart to think that the CoCo Community is out there alive and well, willing to share ideas and make computing fun for all.

Our part is a small one — the real credit for this book goes to the authors who spent untold hours, days, or probably more accurately, months writing, refining and debugging their Adventures for all of us. And, credit those people who support that hard work by purchasing the Adventure books.

I want to thank those who brought this book together, too: our editors Jutta Kapfhammer and Philip Helm who judged the contest and wrote the stories; our art director Denise Webb; and our illustrator Wes Kendall.

And it makes me feel good to know that we have kept our promise to the Community — the promise to continue to provide support to all CoCo users. The Adventures in this book can be run on the Color Computer 1, 2 or 3! Now that's exciting!

I know you're eager to get started, so I won't keep you long. Just a few thoughts as I look over the programs again. I'm sure these Adventures are going to become classics, much as the ones from our first and second Adventure books. The inventiveness and clever programming displayed by our contest winners are just wonderful. They have given us Adventures to help us break new ground with our beloved machine. We thank them, and you, the Adventurer, for making the Community an exciting place to be. Good luck!

Lawrence C. Falk
Publisher

Introduction

When we accepted the challenge of judging THE RAINBOW's third annual Adventure contest, which led to the editing of this book containing the winning entries, we knew that just having the opportunity to view the programs first-hand would be rewarding. But in order to pick the very best, we first needed to learn and understand the many new command concepts and programming techniques that broke new ground in the 1986 programming competition. And that was an Adventure in itself.

The hours of trial and error, with the unfamiliar use of sophisticated parsers, icons, new dialogue allowing two-way communication, built-in graphics directional maps, and subgames within the various programs, was at first a frustrating experience. But by gradually learning the techniques associated with playing the Adventures, actually solving them boosted our egos, giving us a real feeling of accomplishment.

We intend to pass on our enjoyment of these Adventure games, not our frustrations. With this in mind, the games have been arranged in sequential order according to difficulty to greatly benefit the new or novice Adventurer. From the first through the entire series of Adventures, the variety and progression of the new techniques and creativity becomes increasingly gratifying. By working your way through the book from beginning to end, the different procedures and command concepts will be learned, enhancing your skill level.

This is not to insinuate, however, that if you are an experienced player you should skip right to the middle of the book to meet the serious competition.

All of the Adventures are quite challenging and can be played and thoroughly enjoyed by first-time or veteran players. If played in order, the games present an escalating challenge to the advanced. For the amateur, the Adventures serve as a guide to the mastery of Adventuring.

The games are initiated with an introductory story intended to set the mood by explaining your role in the Adventure. Since all the games include a variety of features and are played in a number of different ways, the documentation following each story specifically details the playing instructions and any special commands that must be entered before beginning play.

The BASIC program listings are formatted for a 32-character screen, so if you are typing in the programs, the printed listings will appear just as they do on the CoCo screen. Of course, *The Third Rainbow Adventures Tape or Disk* will save you a lot of time and unnecessary frustration. The individual program filenames from our tape and disk service are listed at the beginning of each program, along with the minimum system required to run them.

By allowing you to become the Adventurer, the book becomes your ticket to a journey that promises to fulfill any madcap schemes you may be suppressing. The fictitiously created situations and life-threatening predicaments will have you constantly devising escape tactics and out-of-this-world attempts to gain valuable treasures.

Of course, a lot of travel will be involved. You can't expect to achieve your objective without investigating every little nook and cranny. And there is a mountain of items to be found. Some may help you avoid the many puzzling obstacles, while others could help you obtain your fortune.

The computer will give you your location and a description of the area immediately surrounding, showing exactly where you are and where you may proceed. To move in a given direction, most of the programs respond to NORTH, SOUTH, EAST and WEST. In some of the Adventures you may need to type GO before typing the direction, and oftentimes, the first letter of the direction is sufficient.

One of the basic necessities to learn is the ability to command action. Most of the programs respond to two-word commands, which consist of a verb followed by a noun, such as OPEN DOOR. Each Adventure accepts different verbs and, in most cases, a complete list can be obtained by either typing VERB or VOCABULARY.

You will find LOOK and EXAMINE to be the most beneficial verbs in Adventuring. Of course, you'll have to enter the name of the object you want

more information about (e.g., EXAMINE PAPER). All sorts of things can be found this way. Some will be of personal value, while others may help achieve the objective or prove to be lifesaving. Also, a brief description of your current location can usually be observed by simply entering LOOK.

Of course, to use the objects found, you first have to obtain them. To pick up an object, most Adventures respond to GET followed by the item you want to pick up (e.g., GET ROPE). However, if you are in a hardware store, for instance, you may need to BUY ROPE in order to obtain it. And, of course, you will more than likely need money with which to make the purchase, and that may require going elsewhere to GET MONEY and returning later to make the buy.

Adventure games make heavy use of your ability to carry things around. For example, you might find batteries in one location, and need them to light a flashlight somewhere else. But, you'll probably find restrictions on the number of items you can carry at one time.

Type INVENTORY and the computer will list the items you are carrying and will tell you when you are carrying too much. So, if you encounter an object you think may be useful down the road, DROP the least valuable object and GET the most useful object. You can always come back to the one dropped later in the Adventure, if you realize it is important.

Use logic, be creative and try relating to the objects found in the Adventure. If the computer tells you that you are getting hungry or thirsty, it would probably be a good idea to find something to EAT or DRINK.

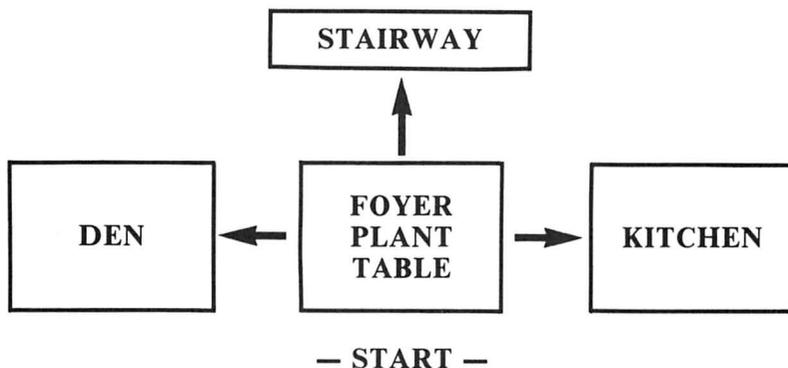

If one verb doesn't work, try another. For instance, to open a door you may need to KICK DOOR or PUSH DOOR. However, if the door is locked, you may need to first GET KEY before you can UNLOCK DOOR. And in some cases, there may not be a key, so you may need a special tool to get the door open, like a gun to SHOOT LOCK or a crowbar to PRY LOCK. Or, to further complicate matters, you may even have to find a secret combination.

However, don't expect logic to always prevail. Programmers make it a real point to find creative uses for certain objects. You must use your imagination to match their creativity in finding the intended use of the object. You will find some of the Adventures more logical than others, and each should be approached with that in mind.

The most important facet of Adventure solving is the fundamental art of map drawing. It will undoubtedly save you a lot of time and endless wandering. To start, on a very large piece of paper, draw a box to represent your starting point. Then, as you move in the available directions, draw boxes for each new location

and use connecting lines to indicate the directions of the movement made and the optional movements available.

Be sure to label each location and include any items found there. For example, if your location is described as: YOU ARE IN THE FOYER OF A SMALL RESIDENTIAL HOME. THERE IS A PLANT ON THE TABLE HERE. A STAIRWAY LEADS NORTH. THE KITCHEN IS TO THE EAST. THE DEN IS TO THE WEST. Your map should look something like this:

A technique you will find particularly useful is one that allows you to save a game where you are, and then pick up again at the same point later. This feature should be used whenever available, to avoid the frustration of restarting a game when you are forced to stop playing and haven't completed it. Or, if you feel you are about to attempt something which may get you killed, SAVE the game before doing it. Since some games take days, and sometimes, weeks to solve, you will really appreciate not having to track your way through what has already been accomplished.

So, if you are constantly in search of fun, excitement, mystery, challenge and danger, then this fantastic collection of cleverly designed Adventure games will meet your insatiable demands. Or if life has become a little stale lately, and boredom seems to be more the norm than the unusual, this vast assortment of enterprising encounters will undoubtedly have a dramatic effect on your current lifestyle.

Congratulations are in order to the authors of these fine programs. All of them should take great pride in their dedication in creating these quality programs that exhibit such sophistication, professionalism and creativity.

— Jutta Kapfhammer and Philip Helm

ESCAPE

Program by Matt Hazard

W

elcome to Ludlow Manor, the entrance to a world of Adventure and mind-twisting fantasy. If you have come in search of excitement, the request will indeed be granted. But before committing yourself and entering what is designed to be a harmless diversion, one important question needs to be addressed. Are you certain you can escape?

Before answering haphazardly though, some additional information about the challenge could help ensure that the meaning of the inquiry is fully comprehended.

Four seemingly simple rooms have been selected as your official starting point. However, once you enter the first, and the door closes behind, the claustrophobic situation may temporarily confuse you, as exiting appears to be all but impossible.

But don't despair, patience is a virtue. A cool head and some creative investigation will eventually be rewarded, and the secret to

escaping Ludlow Manor will undoubtedly be discovered.

However, in doing so, you may trigger a craving for more excitement and danger; resistance will be out of the question because the seed of Adventure addiction will be planted the very moment you conquer the first of the many unequivocal opportunities presented to you.

Escape is a joystick-controlled graphics Adventure. Movement is performed using the right joystick and your location is designated by a cursor. By positioning the cursor over a desired area, activity is initiated by pressing the firebutton. The gun, if obtained, is fired by pressing the spacebar.

Matt Hazard is a sophomore at Midview High School and is currently participating in Air Force Junior R.O.T.C. Drill Team. His interests include skiing, cross country running, role-playing games and baseball. Questions or comments may be addressed to Matt at 1360 East Capel Rd., Columbia Station, OH 44028. Please enclose an SASE when requesting a reply.

The Amulet

Program by Don Sheerin

Y

our great aunt, Mathilda, recently passed away at the astonishing old age of 143 and you and the other family members are gathered for the reading of her will. Everyone is aware of the fact that her assets will be liquidated and the money, as well as her cadaver, donated to medical research. Nevertheless, the one item that everyone would love to own, her rare, golden amulet containing five precious gems (diamond, ruby, sapphire, emerald and pearl), will be left to someone in the room.

Who will be awarded her most illustrious possession, you wonder? You and she were pretty close. Could you possibly have a chance? The room becomes silent as the attorney begins the reading

“For years I have been recognized for my phenomenal health and extended life. I have shattered the record as the longest-living human being and everyone has been mystified by my secret of longevity. Well, the time has come to share that secret and pass the good

fortune on to one of you.

“The exquisite amulet, which you have all admired, is much more valuable than its monetary worth. You see, the radiant charm was left to me by my great grandmother when she died at the age of 115. For reasons which surpass scientific explanation, when all of the mystical stones are placed in the amulet’s golden setting, the bearer is protected from evil, danger and disease and is granted an additional 100 years of existence.

“Since it is hardly possible for me to decide which of you is most deserving of the good luck charm, I have devised a scheme to let one of you earn it.

“The individual pieces of the fabulous heirloom have been extremely well-hidden in different locations around the estate.” The attorney continues reading. “To win the cherished prize, you must search the old home and surrounding grounds to find the amulet and each of its jewels. Of course, all of you may not receive the opportunity, since the order in which you may individually pursue the hunt will be determined by drawing numbers. If you do get a chance, however, be forewarned — the task will not be easy.

“If, and when, your turn arrives, you must be prepared to make great sacrifices, for all of your time must be devoted to the expedition. If you leave the property for any reason, or if you fail to totally complete the mission, all rights to the inheritance will be forfeited and the family member next in line will receive the same opportunity.

“During your adventure, be sure to carefully examine each clue, look at everything and avoid catastrophe. If you are lucky enough to locate all of the stones and place them back into the amulet, you will earn the treasure as your inheritance.

“To the rest of my family, I leave my best wishes and hope you will never forget that things are not always as they seem.

“Goodbye, Aunt Mathilda.”

The lawyer folds the will and passes around a small wooden box containing sealed envelopes. As you immediately tear open your selection, you are flabbergasted to see the number ‘1’ on the paper contained inside. You graciously accept the key to the house and dash from the office laughing with joy. Disregarding speeding laws, you race to the old mansion on the hill.

The estate looks monstrous, with its acres of grounds and many surrounding buildings. Weeds have overgrown the place, paint is peeling badly from the exterior walls, and with darkness setting in, a kind of eerie feeling comes over

you. But, once at the front door, pleasant thoughts of the amulet return. You insert the key into the decrepit lock and turn the doorknob. Voila! The door slowly creaks open . . . and the Adventure begins.

Before loading the program, type PCLEAR1 to allow for memory requirements, else an OM Error will occur.

You begin the game with a sack in your possession and are only allowed to carry three items in your hand and seven in your sack, so travel light. To travel through the estate, use the following single-key directional commands: N (North), S (South), E (East), W (West), U (Up) and D (Down). The commands LOOK (examines the room for objects), INVENTORY (lists the items you are carrying) and VERB (displays a verb list) may also be abbreviated by typing only the first letter of the command. The standard two-word commands (a verb followed by a noun) may also be entered in abbreviated form by first typing the verb and only the first three letters of the noun. For example: Type, LOOK SHE instead of LOOK SHELF. And, to speed game play, the commands GET ALL, DROP ALL or EMPTY SACK may be used.

The Amulet consists of 21 different locations and can be solved in as few as 40 moves. Points are displayed at any time by typing SCORE and a maximum of 3,000 points are possible.

A game save feature is also incorporated into the program. To save a game, type the command SAVE when you reach a desired starting point in the Adventure and simply follow the prompts. To load a saved game, type the command LOAD after running the program, follow the prompts and you will start the game in the room that you previously left off in the Adventure.

Be sure to ask for HELP if you need it!

Don Sheerin, a building inspector with years of construction background, claims that learning to use the Color Computer was an adventure in itself. Writing an Adventure seemed to be the easiest way for him to learn the computer, and the most fun. Questions or comments may be addressed to Don at 2535 W. Pershing Avenue, Phoenix, AZ 85027. Please enclose an SASE when requesting a reply.

AMULET 32K ECB

Caution — Packed Lines!

Some of the lines in this program are "packed" and may be too long to enter in a normal fashion. If the CoCo stops accepting characters, press ENTER, go into the EDIT mode (type EDIT followed by the line number), press 'X' (the EDIT command for extending the line), and then type in the few remaining characters. (We do not recommend using this technique in your own programs as serious problems could result.)

SPYMASTER

Program by Scott McCleary

R

Reports have been confirmed that a U.S. Army shipment of short range nuclear missiles has mysteriously disappeared. Although the responsible party has not been identified, a group of corrupt international agents is highly suspected. It is believed that through a tightknit underground organization they were remarkably able to divert and receive the transfer of missiles. However, there is still no known motive that could account for the potentially terroristic activity.

Using satellitic infrared radar detection, the U.S. Air Force has located the stolen weaponry in an abandoned nuclear storage facility in Death Valley, Arizona. However, government officials are extremely apprehensive about staging an attempt to forcefully overthrow the operation. That's why they call on you — Agent 27, of the U.S. Department of Secret Affairs.

In order to reduce the risk of an international catastrophe, you have been assigned to enter the storage base alone and collect any pertinent

information for headquarters.

Following orders to procede with the mission immediately, you leave for the abandoned test sight. Utilizing the four-hour flight time, you are able to formulate a sophisticated, step-by-step plan of entry onto the base that looks pretty good on paper. But when you actually see the mysterious surroundings you are reminded that things don't always go according to plan.

From 100 yards away, it looks deserted, run-down and nearly camouflaged by the overgrown vegetation surrounding it. Looking through binoculars, it appears as though not a soul is in sight. The only sound heard is the distant roar of a jet, thousands of feet overhead. However, your experience warns you that the entire area is indubitably well-guarded by sharpshooters expertly trained in remaining unseen.

Employing just about every spying technique available, your apparent undetected intrusion into the building reenforces your confidence. Following a blueprint image and cunning intuition alone, you manage to dodge enemy obstacles and make your way into the unmanned computer control room.

You make a desperate attempt to gather enough information from the main computer to make the mission beneficial to headquarters. But when you discover that the missiles are strategically aimed and programmed to be launched, you realize there is no alternative but to stay and demolish the diabolical scheme. However, before being able to react, you are knocked unconscious You slowly come to. Dazed and disoriented, you stagger to your feet and focus your sight on the surroundings:

YOU ARE IN A SMALL EMPTY ROOM.

Upon running *Spymaster*, you will see either a red or a blue screen; if it is red, press the reset button and run the program again until the screen is blue. Then, press the CLEAR key to begin the Adventure.

The upper half of the Hi-Res graphics screen displays your surroundings. The lower half contains the text information. At the bottom of the screen is a hand pointing to 14 empty boxes. Each of these boxes corresponds with an object to be found within the building. As you pick up an object, it will be graphically displayed in the appropriate box.

Travel is executed by typing G0, followed by the first letter of the direction of your choice: N, S, E or W. The Adventure accepts the standard two-word

GHOST TOWN

Program by Michael Shay

I

It was during the great gold rush of 1849 that thousands deserted their homes and families to venture out West with the greedy intention of striking it rich. Only a handful made the dream reality. But most ultimately drifted away, poorer than the day they heard the rumor of “gold in them thar hills.” Yeah, and my great grandfather, Dawson P. Dillard, just happened to be one of them. Fortunately, he survived the journey, but he sure as heck didn’t bring back any gold. The only thing he did bring back was a darn good story. It’s supposed to be a family secret, but since I’m not the Adventuring type, I’m going to let you in on it.

Great Grandpappy, known as Alleycat to most, grew up in Nashville, Tennessee. He spent the biggest part of his younger days bunking in the saloons on Printers Alley. Since gambling was his primary source of income, he often went days without a decent meal. Just when Great Grandpappy was about to surrender his precarious ways and take a job with the rail-

road, the news of gold discoveries in the mountains out West made it back to Nashville.

Well, Grandpappy figured he wasn't going to get rich working for the railroad, and since he had made up his mind to swing a pick and a hammer anyway, he thought he might as well do it searching for gold. So one night, after a drunken barhouse brawl, Great Grandpappy found himself a partner, and the two of them got on their horses, left Nashville and headed for California.

It took the prospectors-to-be nearly six months to cross the vast prairies of the Midwest. When they reached the Amargosa Valley of Nevada, the two weary travelers boarded a room in the little town that had sprung up near the foot of the mining hills. Amargosa Valley certainly wasn't the friendliest place they had ever visited. But what could be expected in a town full of thievish, cut-throat gold seekers. In fact, there were so many killings occurring over gold claims that the digger getting the richest was the undertaker, who kept busy burying the greedy stiff.

Regardless, the two Tennessee whippersnappers stuck it out and spent months mining those hills. And, just as frustration was about to get the best of them, they hit a pocket of gold that was certain to bring a couple of good-sized ingots. You can bet they knew that keeping their discovery to themselves was essential if they expected to get their fortune out of town.

Nevertheless, that night, while celebrating at the poker table, some good old Kentucky straight whiskey got the best of them and they let the cat out of the bag. The minute the three gold-thieving thugs at the bar got wind of it, the two Tennessee wisenheimers were given an ultimatum to sacrifice their gold or their lives. If there was one thing Great Grandpappy loved more than gold, it was living. So he gave up his find. His partner, however, was a little more stubborn and a lot less cooperative. He claimed to have hidden his gold where it could never be found and vowed to never tell them or anyone where it was, no matter what they did to him.

His bullheadedness didn't pay off. The poor guy was buried in the cemetery of what is now nothing but a deserted ghost town. But he did keep his promise, and no one ever found his gold.

Of course there's nothing stopping you from trying, my friend — if you think you're game enough. You'll have to travel through the desert to reach Amargosa Valley, but I know how you like a good Adventure. I wouldn't get your hopes up though. Sure, you will probably be able to find the ghost town easy enough, but finding the gold and staying alive . . . there's the rub.

As in most Adventures, if you LOOK at everything, you will gather various clues and treasures en route to the gold. You must drink occasionally or you will die of thirst. And, the more inventory you carry, the quicker you will need water, so travel light.

To travel through *Ghost Town*, use the single-key directional commands of N (North), S (South), E (East), W (West), U (Up) and D (Down). Two-word commands are also accepted and may be abbreviated by using only the first three letters of the verb and noun. For example, either OPEN DOOR or OPE DOO may be used. And, to free your mind for solving the Adventure, a verb list will be displayed each time an incorrect verb is entered.

Ghost Town can be solved in as few as 31 moves or you can wander for hundreds of moves and find all sorts of fun things. The number of moves made is displayed on the screen at all times. There are many ways to die, however, so try to keep your sense of humor.

Note: 16K users must type POKE25,6:NEW before loading the Adventure.

Hints

Read the instruction again, a clue lurks within.

The skeleton can help in two ways; make no bones about it.

There's lots of good reading in the cemetery, but a bad place to end up.

Mike Shay is a factory worker who is learning BASIC with his three children by creating game programs. Questions or comments may be directed to Mike at 337 South Sixth Street, Lebanon, PA 17042. Please enclose an SASE when requesting a reply.

AANDARK

Program by Fred D. Provoncha

T

he year is 2155. And, to a ghost from the past, it would appear as though the quality of life has been greatly improved. There has not been a war of any kind for over a century. Scientific technology is responsible for the discovery of food supplements, putting an end to starvation. Medical advances have extended the average life expectancy to 100 years or more.

It all seems fantastic, except for one major problem. There are far too many people living on Earth. Extreme overpopulation threatens the existence of the entire human race. For years, intense space exploration has been dedicated to one major objective — locating naturally inhabitable planets.

Finally, the scientific study and investigation of one planet is officially conclusive. Aandark, the latest and most promising planet discovered, is capable of sustaining the life of earthlings. A moonstar that continuously revolves around it provides 14 hours of daylight and 14 hours of darkness at any point on the sphere.

The climate remains consistent, with daytime temperatures peaking around 90 degrees Fahrenheit, while nighttime lows approach 40 degrees Fahrenheit.

Dense plant life exists in the large mountainous forests which make up at least 65 percent of the planet. The land regions are divided by a number of rivers, which constitute the remainder of the planet. Aquatic life is also known to exist and the water has been approved for human consumption.

As part of the exploratory mission, you are one of eight American astronauts on the spacecraft, *ISOUP*. The crew's objective is to survey and map areas of the new world for potential colonization. Completion of the task is essential.

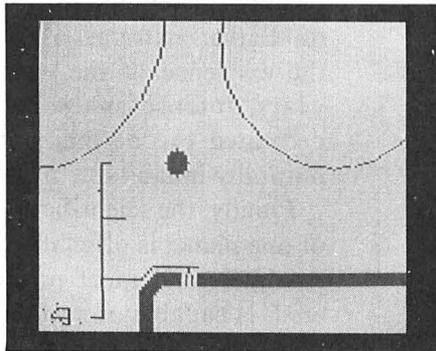

Scouting and construction squads have previously prepared areas of the planet for the mapping expedition and each area has been subdivided into quadrants. Bridges have been built for easy access across the rivers, and outposts have been erected every few miles.

All crew members will be shuttled in individual spacecrafts to their respectively assigned quadrants on the surface of the planet. Each will make a landing at the base that has been erected in the general vicinity of their quadrant. Once there, needed supplies and final briefings will be received.

You have been assigned to map Quadrant 23A. The journey through the vastness will not be easy. It is known that there are wild animals, large pits filled with quicksand and sludgy swamps that will hinder your travel. Other suspected decoys may also be encountered that could lead you off track.

Remember though, if you are capable of returning to the base, your success will be judged on how complete your map is.

Aandark is a text Adventure that includes a built-in graphics map. By typing LOOK MAP, you are able to view the entire region, showing where you have traveled and where you can proceed.

Pressing any key returns to game play.

The Adventure accepts the standard two-word commands (a verb followed by a noun) and the following verbs may be used:

CALL FOR HELP	GET	SHOOT
CLIMB	INV	THROW
DROP	LOOK	TURN ON
EAT		

and GO, which must be followed by an abbreviated direction of N, S, E or W (e.g., GO N).

Note: If your computer has a disk drive attached, you should unplug the disk controller in order to prevent an OM Error during game play. However, the Adventure will run from disk if the program is broken into three parts.

To do so, first load "AANDARK" and then enter the following commands and program lines:

```
SAVE "AAA/BAS"  
DEL 510-  
510 RUN"ADK1"  
SAVE "AANDARK"  
  
LOAD "AAA/BAS"  
DEL -510  
DEL 2780-3000  
2780 RUN"ADK2"  
SAVE "ADK1"  
  
LOAD "AAA/BAS"  
DEL -2770  
DEL 3010-  
SAVE "ADK2"
```

After doing so, your disk will contain the files AAA/BAS, AANDARK/BAS, ADK1/BAS and ADK2/BAS. To run the programs from disk, simply type RUN "AANDARK" and the programs will be executed one at a time.

The mysterious land of Aandark awaits you!

Fred Provoncha is a 15-year-old sophomore at Lynbrook High School in Lynbrook, New York. He is a self-taught programmer and his hobbies are computer programming, stamp and coin collecting, and reading. Questions or comments may be addressed to Fred at 259 Forest Avenue, Lynbrook, NY 11563. Please include an SASE when requesting a reply.

ROL
OM

THE ADVENTURES OF JOHNNY ZERO

Program by Mark and
Mike Anderson

I

It's the year 2091. Twelve months have elapsed since the man known to the world as The Button was elected International President. His plan for worldwide peace and equality among all nations won the overwhelming support of the majority of the voting populace around the globe. His implementation of a master computer-controlled crime prevention system, operated by a sophisticated robotic police force, has already reduced the crime rate to near zero percent in targeted countries. Political experts speculate that The Button's presidency could lead to the creation of a Utopia before the end of the decade. What a great way to begin the 22nd century!

You are Agent Johnny Zero, defender of international security. However, you far surpass anything in the field of robotics, as you are the world's first genetic computer, and the most human-like android ever created. Unlike traditional 'droids, which are locked into the binary logic of a conventional computer, your central

processing unit consists of bionic microchips, made up of genetically developed microorganisms. The organisms produce enzymes, necessary for the transmission of thought impulses. The enzymes are very similar to the ones found in the human brain. So similar, in fact, that you possess emotions, feelings and have a full range of human values.

Your job, as senior agent of The Button's special peacekeeping force, is to deal with the evil menaces still plaguing society. As you activate the CoCo to check in with headquarters, a flashing red light signals an emergency. The message:

The Button has been kidnapped!
Initial robotic rescue squad's whereabouts - unknown.
All are presumed to be deactivated, except Agent Eyeball.
You are being summoned to complete the rescue.
STANDBY FOR FURTHER INSTRUCTIONS . . .

Stunned, you ease back for a moment to ponder the alarming revelation. Although angered by the news of The Button's disappearance, you are enthusiastic about the assignment. Who could possibly be responsible for this dastardly crime? You have a hunch.

Suddenly, another transmission from headquarters conveys further information.

SEEK AND DESTROY THE FOLLOWING:

AGENT P.H. ORANGE - Suspected kingpin of all enemy activity. He recently escaped from prison and may possibly possess the secret code to international security. Last transmission from Agent Eyeball indicates Orange organized the kidnapping and is personally holding The Button. TERMINATION IS ESSENTIAL!

THE PENCIL - A highly dangerous schizoid. He has frequently been linked to enemy activity and is believed to have assisted in Agent Orange's escape.

THE HAMMER - Association with Agent Orange is uncertain, but he has been involved with similar kidnappings of political nature.

AGENT SPADE - The suspected right-hand man of Agent Orange. Most files on him have been stolen, but he is believed to have

held the organization together during Orange's imprisonment.

STANDBY FOR FINAL INSTRUCTIONS . . .

Just as you had suspected. Agent Orange is responsible for The Button's kidnapping. You recall that Orange was a highly successful government agent from 2088 to 2090. However, during the third month of The Button's presidency, he became greedy and stole the secret code to the master computer. Fortunately, he was arrested before the code could be utilized.

Although, while in prison, Orange underwent a complete memory erasure process, the technique was found to have serious defects and total retention of the code is a definite possibility.

Your thoughts are interrupted by the final message from headquarters:

We have just received an anonymous notice. The Button will be executed tomorrow and the captors plan to intercept the IPT (International Public Television) Network's transmission to telecast the execution worldwide. Johnny Zero, you must rescue The Button and destroy the criminals involved. They may possess the power to take over the world. Good luck - over and out.

The Adventures of Johnny Zero is a random Adventure featuring scrolling text and high resolution graphics.

You will be guided through the Adventure with graphics displays and questions from the computer. One-letter responses of N (North), S (South), E (East), W (West), Y (Yes) and N (No) are all you need to proceed in rescuing The Button from the clutches of the enemy agents.

Mike Anderson, a recent electronics major graduate, enjoys playing guitar and weightlifting. His brother, Mark, is in the eighth grade. He enjoys Adventure programming and collecting vintage baseball cards. Questions or comments may be addressed to the Andersons at 8453 E. Rolling Ridge St., Tucson, AZ 85710. Please enclose an SASE when requesting a reply.

THE SWORD & THE SORCERER

Program by Chris McKernan

G

rowing up as an orphan is a difficult enough task for any child to endure. But an orphan in the village of Ling Shai faces an even more monumental challenge, for in Ling Shai is the castle of the evil and immortal Sorcerer. The Sorcerer and his countless spells endanger the freedom of everyone, especially vulnerable little children.

Fortunately, you were taken in at the age of 4, by the man known in the village as the Wizard. His great knowledge of spells and counterspells have preserved the people of Ling Shai from the enslavement of the Sorcerer, and the villagers maintained faith that through his invaluable powers, he would someday find a way to eliminate the abominable force.

For the next 20 years, the Wizard, with you as his protege, continued to scrutinize the secrets to defeating the Sorcerer. However, time was slipping away as the menacing madman had already enthralled many of the surrounding villages.

Meanwhile, the Wizard was growing very old and weak. A hard winter was approaching and you knew the time would eventually come when the Wizard could no longer deal with the Sorcerer and it would become your responsibility.

On the last night of the summer, just before daybreak, you are awakened by the Wizard. Speaking not a word, his trembling finger summons you as he walks out into the darkness. Following deep into the pitch black forest, the breeze is cool and a dense misty fog hangs overhead. The old man knows exactly where he is going and not a word is spoken until he reaches his destination.

Finally, at the foot of a huge stone, the Wizard mutters a request and has you pile a bed of leaves next to the stone. He then lowers himself onto them and motions you closer.

On your knees next to the great Wizard, you look into his eyes, illuminated by the rising sun. His entire face begins to glow as he clasps your hand tightly and begins to speak.

“Fear not the evil you face in your future. For you have been chosen to deliver the people from the evil Sorcerer. Eighty-three years ago, a spell was cast upon me and the Sorcerer seized a powerful ring brought forth to me on this same morning of the autumnal equinox. During this magical moment, as the sun crossed the equator, making night and day of equal lengths in all parts of the Earth, I received the ring and my mystical powers, transferred to me from my father. Unfortunately, I have failed in my lifetime to conquer the evil Sorcerer. Meanwhile, he continues to capture the souls of our people, one by one, enslaving them to worship his eternal power.

“The Sorcerer must be destroyed and that is now your task. You have learned well and have reached a period of maturity. It is the dawn of new beginnings and the time has come for you to obtain my powers.

“Remember the things I have taught you. You must go to the castle of the evil Sorcerer and find the powerful ring called Equinox. It holds many secrets and will be invaluable in your search for the Sorcerer. The sword named Excalabir will provide you with protection and the Shield from Darkness will give you faith in defeating the evil Sorcerer. Then, and only then, may the task be completed. However, you must keep in mind, the Sorcerer will always have the ability to . . .”

But before finishing, a brilliant, swirling cloud swoops down from the sky, engulfing the wizard as the sun begins to rise. Quickly backing away, you watch as the tornado-like winds whirl leaves around his body. Then in a puff of white smoke, the winds cease and the leaves come to rest in a pile. But the old man’s

body has disappeared. You rummage frantically through the pile to no avail. He is gone.

The Wizard's final words remain a mystery, but you know what must be done. His wisdom and power live on inside of you, and most of all, his determination to end the reign of the Sorcerer. It will be no easy task, but you must succeed.

The Sword and the Sorcerer is a four-part graphics Adventure. Each part is linked to the next, making it an Adventure of an Adventure.

Part I: In Search of the Ring

The Adventure begins in the castle of the Sorcerer and you must find the ring called Equinox.

Part II: The Quest for Excalibir

The second part begins where part one leaves off, in the Room of the Equinox. You will have the ring in your possession and your objective is to locate the sword, Excalibir.

Part III: Journey for the Shield of Darkness

This will be your final quest before meeting the powerful Sorcerer. You will begin in the Room of the Sword, and both the ring and the sword are in your possession. You must now find the shield.

Part IV: The Final Battle

The last Adventure takes place in one room. You must now defeat the Sorcerer by gaining energy points using the weapons gathered in the first three Adventures.

The fight against the Sorcerer will be a one-on-one battle. You must first enter a command such as `USE SWORD`. The Sorcerer will then enter a command such as `USE FORCE FIELD`. In this example, the Sorcerer protects himself against your attack with the sword. If you feel the Sorcerer is about to attack with a spell, use the sword.

Each command has a different effect, such as providing defense while attacking, and you will have to discover the best methods of destroying the evil Sorcerer. There are several commands available and many different ways to gain energy points from the Sorcerer's blow.

After defeating him you must escape the Sorcerer's castle by opening the

golden doors to safety. Be sure to save enough energy to escape the castle.

Playing Instructions

Due to memory limitations, the disk controller must be unplugged during game play to avoid getting an OM Error.

The Sword and the Sorcerer consists of four BASIC program listings: EQUINOX, EXCALABR, SHIELD and SORCERER, and the Adventures must be played and solved in order. After each program is run, a title screen will appear. Press ENTER and the playing instructions will follow. Press ENTER again and the Adventure will begin.

All four parts of *The Sword and the Sorcerer* are played in the same manner. Each Adventure accepts different verbs and a verb list is displayed by typing VOC. (The VOC command is not included in Part 4: SORCERER.) Note: The verbs SWIM and QUIT may also be used in Part One, but are not included in the printed list.

Directions must be entered in abbreviated form: N, S, E, W, U and D. NORTH or GO NORTH are not understood and will not be accepted.

The current inventory you are carrying will be displayed by typing INVENTORY, INVENT, INV or simply I. The LOOK command gives you a picture and a description of the room you are in, and may also be abbreviated by simply typing L. The ROOM or R command is used to examine the room for objects.

Note: If a typing mistake is made when entering commands, do not use the backspace or an SN Error will occur. To avoid this problem, simply press ENTER and input the command again.

Pay close attention to the hints given at the beginning of each Adventure. If understood, they may save your life.

Chris McKernan's interests include the CoCo, the RAINBOW and lasers, and he is currently working on a CoCo controlled lens for lasers, making computer imagery possible. Questions or comments may be addressed to Chris at 2369 Madison, Apt. 9, Montreal, Quebec H4B 2T5. Please enclose an SASE when requesting a reply.

An Actor's Nightmare

Program by Walt Thinnis

B

orn in Great Britain a quarter of a century ago, and given the name Nigel Wrath-Horn, you have worked hard trying to make it a name that would be well-known and respected by everyone. Touring the provinces as a stage actor with your original one-man play has not exactly been duck soup. Night after night, traveling from one place to another has you on the verge of mental burnout. Somehow, you manage to keep going, in search of the elusive dream . . . your big break.

One rainy Saturday night, in a rather small theater pub, you deliver what you feel is your finest performance. The small crowd's standing ovation is, in itself, quite rewarding. However, a favorable response from one half-drunken audience is hardly the fame and recognition you are seeking.

Pleased, but still somewhat depressed, you join your understudy backstage to help pack the stage props, when suddenly, the two of you are startled by a man who appears in the doorway.

He introduces himself as Bradley Scott Gordon, a talent scout for the Queen's royal theater. Much to your amazement, he wants to book your act to be performed for her majesty and a host of dignitaries.

The request renders you speechless, as you stare almost paralyzed by the invitation. Fortunately, your stand-in quickly speaks in your behalf and accepts. You just nod in agreement and finalize the deal with a friendly handshake.

On the highly anticipated day of the special command performance, your dream of fame appears to be shattered as you wake from an unscheduled nap and discover that there is very little time before the play is scheduled to begin. Your understudy, who has recently been unable to conceal his jealousy, must have put a sleeping pill in the cup of tea he so graciously prepared for you earlier this evening, and insisted you needed. His conspicuous scheme to make you oversleep worked, and he undoubtedly plans to steal all the glory by performing in your place. But not if you can make it to the stage on time.

You frantically look at your watch and are astonished to find that only 10 minutes remain before the 8:00 p.m. curtain call. Realizing that you know absolutely nothing about the large London theater, finding the stage in such a short period of time could be impossible. And to make matters worse, your personal identification and backstage pass are missing from your wallet. Without them, no one will ever believe you are Nigel Wrath-Horn.

An Actor's Nightmare begins in an alley outside the theater. Type TIME and a digital watch will display that it is 7:50 p.m. Remember, the curtain rises in 10 minutes and every move you make or each command entered consumes five seconds, which equates to 120 moves per game. Even incorrect requests, and commands of VERB and TIME are counted as moves, so plan them carefully.

To move around the theater, one-key directional commands of N (North), S (South), E (East), W (West), U (Up) and D (Down) are used. All other situations are handled by entering a single verb command, such as LOOK, or a standard two-word command such as GET KEY.

Due to memory limitations, the program will not run with the disk controller plugged in unless the graphics title and ending screens are deleted. To do so, delete Line 9 and lines 265 to the end of the listing (type DEL9 and DEL265-).

Break a leg!

Walt Thinnes has worked in all phases of the theater. He is presently Technical Director of Bailey Concert Hall in Fort Lauderdale, Florida. Besides working with his CoCo, Walt enjoys dabbling in prestidigitation. Questions or comments may be addressed to him at 7151 Harding St., Hollywood, FL 33024. Please enclose an SASE when requesting a reply.

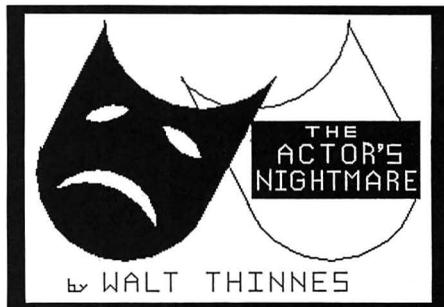

ACTOR 32K ECB

Caution — Packed Lines!

Some of the lines in this program are "packed" and may be too long to enter in a normal fashion. If the CoCo stops accepting characters, press ENTER, go into the EDIT mode (type EDIT followed by the line number), press 'X' (the EDIT command for extending the line), and then type in the few remaining characters. (We do not recommend using this technique in your own programs as serious problems could result.)

The Time Machine

Program by
Jason Hunter Dolinsky

A

As a scientist and inventor, your entire life has been dedicated to the constant implementation of creative dreams and ideas. However, that one, earth-shaking discovery continued to elude you, year after year, decade after decade. But that appears to be all in the past now, so to speak, with your newest and most miraculous invention: the time machine. How ironic, you were practically ready to admit defeat to the one element you now possess control of . . . time.

The machine is a surprisingly small apparatus, about the size of a wristwatch. It is designed to take its user into any point in time. Four color-coded buttons on the face of the mechanism can be preset to allow travel into any specific historical era, either past or future. You simply press the desired button to enter your destination. Of course, one button must be reserved to permit a safe return to the present.

To confirm the effectiveness of your inven-

tion, a trial expedition involved a short exploration into the age of the dinosaurs. However, upon returning, you discover that the time machine had a dramatic effect on three historical events. Due to a design flaw, the law of infinite entropy or time disorder will destroy the universe, both past and present, at midnight tonight.

It is now 10:00 p.m. You must use the time machine to journey into the three eras in which history has been altered and attempt to correct them. The buttons have been preset for each of the eras. The white button is set for return to the present. Of course, if your Adventures are less than completely successful within the two hours remaining, all time will be destroyed.

The Time Machine is a text Adventure. As long as you are in possession of the time machine, the date and a real-time clock will be displayed in the upper portion of the screen.

Single-key directional commands of N, S, E, W, U and D and the standard two-word commands are accepted. Commands may be abbreviated by typing only the first three letters of both the verb and noun to speed game play (e.g., SHO MAI may be used instead of SHOOT MAILMAN). The following verbs may be used:

BUY	GO	LOOK	SAVE
CHANGE	HIDE	PUSH	SAY
CLIMB	JUMP	PUT	SCORE
GET	LISTEN	READ	SHOOT
GIVE	LOAD	REMOVE	WEAR

Be sure to use the LISTEN command whenever anyone is talking to gather vital clues in solving the Adventure.

A game save feature may also be used, but the program is designed to SAVE and LOAD only from disk. If you do not have a disk drive attached, this option is not available.

Due to memory limitations, disk users must enter POKE25,14:POKE 35B4,0:NEW and tape users must type PCLEAR1 before loading the Adventure.

If the BREAK key is inadvertently pressed during game play, type CLS:PRINT:GOTO9 to continue playing the Adventure at the point you left off.

Jason Dolinsky is a senior and honor student at Herricks High School in Long Island, New York. He is a self-taught programmer and would enjoy receiving correspondence regarding his program. Questions or comments may be addressed to Jason at 115 Robby Lane, Manhasset Hills, NY 11040. Please enclose an SASE when writing for a reply.

TIMEMACH 32K ECB

Caution — Packed Lines!

Some of the lines in this program are "packed" and may be too long to enter in a normal fashion. If the CoCo stops accepting characters, press ENTER, go into the EDIT mode (type EDIT followed by the line number), press 'X' (the EDIT command for extending the line), and then type in the few remaining characters. (We do not recommend using this technique in your own programs as serious problems could result.)

BALM

Program by Joab C. Jackson

F

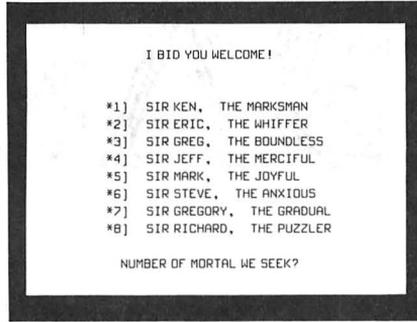

inally, after the numerous indecisive and struggling journeys through mind-boggling Adventures, a new perspective has been created. You now have a vehicle with which past outrages, perpetrated by overzealous game writers can be atoned. For once, you are not the Adventurer, trying to avoid the obstacles and preserve your life. But you are the obstacle, determined to terminate any Adventurer brave enough to travel your cavern. There is a magic disk hidden within, and eight invaders are willing to risk their lives to try and retrieve it. You must defeat them all, one at a time.

So, don your black hat. Practice skulking around, springing trap doors, living on a spider's web, releasing obnoxious beasts, and dropping boulders onto the unsuspecting. It could provide a little balm for your wounds as you feel the satisfaction of revenge.

Balm is a graphics pseudo-Adventure game. In essence, you, the player, become the Adventure game and must design the strategy to

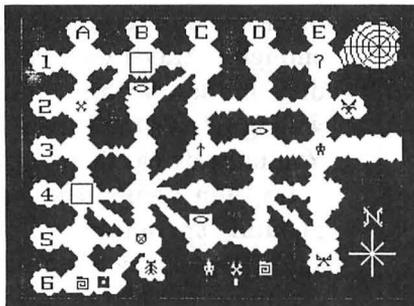

prevent eight invaders from winning.

Upon running the program, the opening sequence will begin, followed by a text screen containing the names of the eight invaders. An asterisk precedes each invader's name and disappears as each challenger is defeated. Enter a selection and you will be transferred to the playing screen.

The game is played on a graphics screen depicting a cavern containing 26 chambers. Each chamber's location is marked on the screen by coordinates, represented horizontally with the letters A through E and vertically with the numbers 1 through 6. These coordinates are used for the placement of your marker.

The game begins with your marker (X) located in the upper right-hand corner of the cavern, in the center of a web. The selected invader will enter on the right and pause in Chamber E3. The disk is located in Chamber A6 and is the quest of each invader. As the defender, you must defeat the invader before the invader reaches the disk.

The only way you can destroy an invader is to release one of the eight traps graphically displayed throughout the chambers. There are trap doors in chambers A4 and B1; boulders above chambers B2, C5 and D3; and deadly

beasts below chambers B5 and E5, and to the right of Chamber E2.

To release a trap, you must position your marker in the appropriate chamber at just the right moment to catch the invader. Of course, you must first be in a chamber from which you can release a specific trap when the invader enters the chamber containing the trap.

However, the invader can pick up defenses that will appear on the screen along the way: a sword, shield and staff, that will neutralize your traps. When in the invader's possession, the sword will protect him from the three beasts, the shield from the falling boulders and the staff from the trap doors. But you may destroy these defenses by moving your marker into the chamber before it's reached by the invader.

A serpent is located in Chamber A6 and makes a move every time the invader makes a move. If it enters a chamber containing the invader, the invader will be destroyed and you will be given credit. If it occupies a chamber containing a defense, the defense will be destroyed. But if the serpent or the invader occupies a chamber with your marker, you will be temporarily removed from play. The game will continue until either the invader reaches the disk or the serpent destroys the invader.

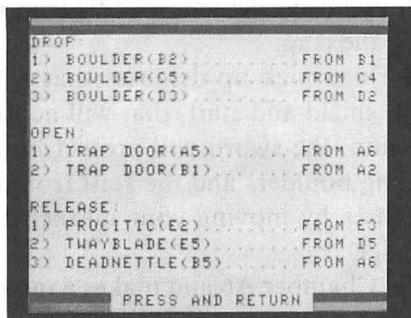

After surveying the geography of the cavern, press any key and a text screen will appear and instruct you in placing your marker. You may begin the game in your choice of any of the 26 chambers, except A6 and E3, which are occupied by the serpent and invader, respectively. Enter your desired location (e.g., A1: horizontal letter, vertical number), and your marker will be transported to the specified chamber. Three indicators, representing the three moving characters, will then be graphically displayed at the bottom of the screen and will designate whose turn it is. At this point the invader will be allowed to take a move.

When it is your turn, press any key to go to the control screen. The control screen lists the number of moves made in the current round and in the entire game, the name of the current invader and the defenses the invader has acquired.

The following options are available from the control screen:

- | | |
|---------|--|
| A. View | Allows you to study the cavern. |
| B. Wait | Leaves marker in its present location. |
| C. Help | Lists the traps and their control locations. |
| D. Move | Prompts you in the directions in which you can move. |
| E. Quit | Exits the game. |
| F. Trap | Activates traps. |

From here, select the Help option and a text screen will display the various control locations in which your marker must be placed in order to open trap doors, drop boulders and release beasts to destroy the invader.

For example: In order to drop the boulder located in Chamber B2, your marker must be placed in Chamber B1. However, the invader must occupy Chamber B2 or dropping the boulder will have no effect.

After planning your strategy, press any key to return to the control screen. Select the Move option and the available directions will be displayed (N, NE, E, SE, S, SW, W or NW). A direction may then be selected and your marker will move one chamber in the specified direction. The serpent and invader will then be allowed to make their moves.

The round will continue until you or the serpent defeat the invader or the invader reaches the disk. If you defeat the invader, you will then be sent back to select another invader and play will continue. If any of the invaders are able to obtain the goal, you will lose the game.

Keep in mind, each invader has his own particular course of action, with just enough variations to keep you off balance. The serpent and the invader are not necessarily restricted to one move per turn. This is a random function and is not predictable. As you play, you will learn more about the natural laws of the cavern.

The Professional

Program by Franklin Marrs

W

orking the rough end of town as a private investigator has not exactly made you wealthy. Nor has it gotten your name, Joseph Benjamin Gunn, etched in any city plaques commemorating heroics. But for the past 15 years, it's been a living — although sometimes just by the skin of your teeth. Oh well, you'd probably get bored in a job that didn't threaten your existence every once in a while. Besides, you're so good at what you do, you like to consider yourself not only a professional, but *The Professional*.

Nevertheless, even *The Professional* has his slow days, and today's been one of them. There was one call from someone at the high school requesting that you give a presentation on criminology sometime next week. Otherwise, the majority of the day was indulged in the office easy chair playing computer games and watching your pocket television. However, no sooner than you decide to call it a day, the phone rings.

You pick up the receiver, but before you are

able to say anything, the office door creaks open and a rather attractive young lady enters the doorway.

You are stunned when you realize she's Claudine Huntsdale, the well-to-do model living on Richman Avenue. It's not too often someone of her notoriety requests your assistance, and never anyone even half as good looking.

Earlier today, Ms. Huntsdale discovered that her million-dollar jade necklace was missing. Her assumption is that it must have been stolen since she always secures it in her wall safe every night before going to bed, and did so last night as well. She doesn't have a clue as to who could be responsible, but wants to hire you to recover the priceless piece at 1,000 bucks a day, plus expenses.

Uncertain of *why you* were chosen, your apprehension is quickly forgotten when she sweetens the deal by promising a \$20,000 bonus for its safe and expedient return. How can you refuse?

Anxious to put things into perspective, you begin by digging up a little more information on Claudine Huntsdale. Since she is a nationally known model who has always received a lot of publicity, the researching is all the easier. It doesn't take long to gather enough background information on her to give you a few possible leads.

Apparently, Ms. Huntsdale made her fortune adorning the creations of Italian designer Antonio Sarducci. Although the two never married, it was common knowledge that they maintained much more than just a working relationship. But when the press uncovered and exposed his affiliation with the mob, both of their reputations were so seriously damaged that their illustrious careers were all but destroyed. And, shortly after that, Claudine poured salt on Sarducci's wounds by ending their relationship.

Ms. Huntsdale was gradually able to restore her reputation and resume her success. But Sarducci never did much to improve his tarnished image. He opened an inn on the harbor, but it's supposedly under investigation for a number of illegal activities. And he's recently been connected with George Helming, suspected operator of the largest fencing operation in the state.

Well now, that ought to give you something to go on, so don't waste any more time. The only way you are going to find that necklace and earn the bonus is to get out in the streets and start asking a few questions.

The Professional is comprised of two BASIC program listings and is set up to run on a cassette based system. To allow the program to be automatically loaded and executed from disk, change the CLOAD "PROFESNL" in Line 430 of TITLPAGE to RUN "PROFESNL".

Upon running the first program, TITLPAGE, a colored screen will appear. If it is red, press ENTER, else press reset and run the program again until the screen is red. After pressing ENTER, a graphics title screen appears accompanied by music and followed by the scenario and instructions for playing the Adventure.

After the instructions are read and understood, press N when prompted with NEED INSTRUCTIONS AGAIN? and the second program, PROFESNL, will automatically be loaded into the computer. When the OK prompt appears, type RUN and the Adventure begins.

The Professional is a random text Adventure; therefore, the stolen jade necklace could be hidden in any one of five different locations each time the game is played.

Single-key directional commands of N (North), S (South), E (East), W (West), U (Up) and D (Down) are available. The standard two-word commands (a verb followed by a noun) are used and the following verbs are accepted:

ASK	HIT	OPEN
BREAK	INSERT	PULL
DROP	INVENTORY	PUSH
EAT	KICK	READ
EXAMINE	KILL	SHOOT
GET	LOAD	UNLOCK
GIVE	LOOK	WHERE
HELP	MOVE	WHO

Be sure to use the ASK command as often as possible. It will be most beneficial in obtaining clues from the people you encounter in the Adventure. To do so, type ASK, followed by the person to whom you are talking (e.g., type ASK MAC and press ENTER). Then proceed with the question command. For example, type WHERE MONEY to ask, "Where is the money?"

Franklin Marrs is a self-taught programmer and an aspiring writer. The Professional was adapted from one of his works by the same name. Questions or comments may be addressed to Franklin at 2601 Andy Drive, Columbia, MO 65202. Please include an SASE when requesting a reply.

TIME TRAVELERS

Program by Ann B. Mayeux

Y

our first semester as a college freshman (Class of 1992) has not exactly been a bowl of cherries: 100 miles away from home with no wheels, up late studying every night and taking harassment from the upperclassmen. Sometimes you wish you could just get away for a while, to a different place in time. But for now, you are content just to go home for the semester break and enjoy Christmas with family and friends.

Back home, in your old room, the tension of classwork is finally released. Except for the fact that everything is neat and straight, the place looks pretty much the same. The CoCo has accumulated a little dust, but that can be attended to later. For now, you just want to lay back on the bed and check out the stack of mail that has accumulated on your desk.

Let's see . . . a couple of nice Christmas cards, a letter from your buddy, Steve, reminding you of the annual New Year's snow-skiing weekend and . . . Wait! What's this? Why, it's a letter from just about the strangest character

you have ever met — the old German scientist, Dr. Tempus. He urgently requests your presence.

You met old man Tempus at the last RAINBOWfest in Chicago. An extremely likable and well-respected guy, he could talk about his fantastic ideas all day, and usually did. While chatting over lunch one afternoon, he confided in you that he was on the verge of a miraculous invention — a machine capable of transporting people into the past or the future. Your initial inclination was to laugh, but the seriousness of his expression warned you against it. He swore you to secrecy and promised that you would be the first to know when the machine was completed. That was the last you heard from him — until now.

You'd like to stay home and relax until dinnertime, but the good doctor's request is irresistible. He seems a little weird for a 93-year-old; however, he does mean well. And, who knows, he may have really stumbled onto something, although you seriously doubt it.

Once at Dr. T's front door, you are greeted by a 4-foot-tall robot. You are asked to state your business, and after doing so, the beeping and buzzing little metal creature directs you to the laboratory. Inside, you see your old friend steadily at work. The robot alerts him of a visitor.

Dr. Tempus looks up and quickly moves toward you. "Comb in, comb in, mein little freund. How haf you bean?" Without receiving a reply, he continues, "I haf bean verdy onxious to refeal mein latest und greatest infention to you." He walks over to a large tarpaulin-covered object. With one quick flick of a hanging rope suspended overhead, the draping is removed and a machine is revealed.

"Here it is — der time machine," he announces, "das only von in de world."

Looking at the steel and glass object, you are amazed at its obvious complexities. You can't help but wonder how the contraption could actually work.

It looks like a two-man space capsule, with a long glass tube coming from the top and extending out of the roof of the laboratory. Through the glass-domed windshield, the lighted control panel of buttons, dials and monitors are clearly visible. And, in front of the two seats, which very closely resemble old-time barber's chairs, is the doctor's favorite, a Color Computer.

Anxious to demonstrate his wondrous invention, the doctor climbs in, assuring you that he will return in no more than 15 minutes. Slightly baffled, you watch as the steel door shuts securely behind him. Peering through the windshield, the old man can be seen, strapping himself into the driver's seat

and frantically pressing the buttons surrounding him. Then, in a whirling cloud of bellowing smoke, he disappears.

You wonder if some kind of illusion has been created. But for some inexplicable reason, you trust the doctor and patiently wait for his return.

And, just as Dr. T indicated, within 15 minutes the familiar whooshing sound returns. In merely an instant, the entire scene created when the doctor left is reenacted as though it is a film running in reverse. To your amazement, the door slides open and Tempus appears holding an extremely large egg. "It is not verdy easy getting ein egg away from de mutter dinosaura" he insists, "but I hope das vill convinz you."

Indeed it does, but you question why he has requested your assistance. He explains, "Years ago, I may haf made de journeys alone. But now I am zu old. I need ein young man zu accompany me. And, you mein trusted freund, vill be perfect. Just dink of all de treasures ve can bring back. Ve vill be rich!"

The Adventure, *Time Travelers*, begins in Dr. Tempus' time machine, known as TM throughout the game. From there, you will be instructed to choose the first time zone you wish to travel:

- D The age of the dinosaurs
- A King Arthur's Camelot
- E El Dorado
- R Ancient Rome
- S Sherlock Holmes' England
- T The Roaring '20s
- F The future

To start the Adventure, type the letter of your choice.

To travel within the time zones, type GO, followed by the first letter of the direction: N (North), S (South), E (East) or W (West) (e.g., GO N).

The program accepts the standard two-word commands. The following verbs may be used and abbreviated by typing only the first three letters:

- | | | | |
|-------|-----------|-------|---------|
| DRINK | GET | KNOCK | SHOW |
| DROP | GO | OPEN | SING |
| EAT | INVENTORY | QUIT | UNLOCK |
| FIGHT | LOOK | RUN | WHISPER |

The verbs must be followed by a noun, which may also be abbreviated by typing only the first three letters. For example: The command DRINK WATER may be abbreviated by typing only DRI WAT.

Each time zone has its own rewards and dangers. When you have accumulated as many treasures as you want, you may conclude the game by typing P, for return to the present, but only from within the time machine. The computer will then list the number of moves made, the number of time periods visited, and the treasures found and their monetary worth. The success of your treasure hunting in time will determine your standard of living when you return to the present.

If your findings are worth only a minimal amount, you will be awarded a mere New York city tenement. Moderate success will get you a country cottage in Prospect, Kentucky. Finding treasures worth over a million will afford you a beach front condo in Miami, Florida. Only by achieving the highest success level will you receive a palatial splendor in southern California.

Note: It may be necessary to RUN the Adventure twice since a PCLEAR is used, and may cause an SN Error.

Ann Mayeux takes time from the computer to care for a husband and two small sons. She has a degree in psychology and taught herself programming from the CoCo manual and THE RAINBOW. Questions or comments may be addressed to Ann at 874 Maine Road, Key West, FL 33040. Please enclose an SASE when requesting a reply.

The Evil Crypt

Program by Curtis Keisler

Y

ou are Willie the Wizard, dashing, recklessly brave and deeply committed to the welfare of the people of Seleria, a happy kingdom untouched by evil. In Seleria, everyone lives in harmony and no one is poor. However, high atop the mountain, living directly above the happy kingdom, lives the evil lord, a patient, but persistent force anxiously awaiting the opportunity to rule the valley.

Nevertheless, Selerians always felt most assured that their serene way of life would remain unchanged, thanks to you. Since you possess not only a variety of magic potions and charms, but a sword and spellbook capable of destroying all evil, the people had no fear of the evil lord. They knew he could do them no harm with the power of your book and sword behind them.

However, one day the evil lord somehow discovered a magical spell that allowed him to obtain your most powerful securities. Unfortunately, the sword and spellbook are now in his custody and he has hidden them throughout

his evil crypt. The crypt's tortuous maze tunnels below the evil lord's tower, piercing the heart of the mountain.

Confident of his eternal power since becoming the owner of your defenses, the evil lord has granted you one unlikely opportunity for revenge. You will be permitted to explore the three levels of his evil crypt. Scattered deep within the doldrums, catacombs and dungeons are the powers you once possessed.

Of course, defenseless, it will be all but impossible to survive. You will encounter large bugs that can bite through steel and snakes with poison deadly enough to kill a herd of elephants. There will be intergalactic creatures who will attack you with their advanced technology and spirits from other dimensions to steal from your life force.

To further hinder your escape, many deadly traps are placed throughout his cryptic maze. Fires that will fry the flesh off your bones, graves that kill on contact and bottomless pits will make some areas virtually impassible. You'll find fences that will keep you out or something else in. Even the rocks and trees are laced with hidden dangers.

Nevertheless, you must remain positive and concentrate on locating your powers. Remember, each finding will increase your odds of survival. The magic potion will allow you to float over bottomless pits. The enchanted arrow can be used to destroy any nonhuman threat; however, the bow must also be found to shoot the arrow. The chest contains the mystical spellbook which is needed to escape, along with the hidden key that unlocks the main door.

Needless to say, if you make it that far, you'll want to make sure you've found the sword. Its possession will secure a victory over the evil lord.

Admittedly, your odds of survival don't look very good, but don't despair. Have confidence and your power should once again prevail.

Evil Crypt is a graphics Adventure game that includes three underground levels of a cryptic maze: Doldrums, Catacombs and Dungeons. Upon running the program, the title screen will appear. Press ENTER and you will be asked, DO YOU NEED INSTRUCTIONS? Input Y (yes) and a graphics instruction screen will display characters, each representing an item that may be seen or found within the Adventure.

After you have studied the instruction screen and familiarized yourself with the different rewards and dangers, you are ready to play the Adventure. Press ENTER and the playing screen will appear.

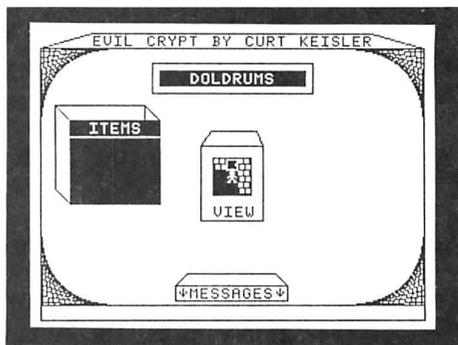

The playing screen contains four boxes, each representing different aspects of the Adventure. The box in the upper-middle portion of the screen, labeled Doldrums, is the level indicator. It will always contain the name of the level that is currently being explored.

After the sound of 24 short tones, the box labeled View will display a bird's-eye view of the immediate area surrounding you. You will always be located in the middle of this box.

The box labeled Messages is used to direct your attention to the area directly below where short messages will appear informing you of your status throughout the game.

The last box, labeled Items, will display any objects as they are picked up in the game.

As you move through the maze, the graphics objects from the instruction screen may be picked up or avoided as they appear in the View box. To pick up an item simply move over it. A short tone will sound each time an object is obtained. The following is a list of the items that must be found in the maze and a description of how each is used to win the Adventure:

Potion

This is a special item that is used to levitate over pits. It will not appear in the Items box because it is consumed. When you get the potion, a rectangular box will be displayed just right of the View box. Inside, it will read "levitate time," and a white bar will be located beneath it. To start the levitation process, press the L key. Each time the command is used the white bar will decrease in size. When the bar is gone, the box will disappear, and you will no longer be able to levitate, so use it sparingly.

Chest	The chest contains your spellbook. You will need it to escape.
Sword	The sword is the only thing that can kill the evil lord, but it will not work on anything else. To use the sword, press the S key. However, the evil lord must be directly above, below, left or right of you in order to defeat him. You must kill the evil lord to escape the maze.
Key	It will open the main door. You do, of course, need it to escape.
Bow	You will need it to fire an arrow.
Arrow	The arrow will kill anything except the evil lord. To fire an arrow, press the A key to put you in the fire mode. Then press the appropriate arrow key in the direction that you want to fire. Be decisive, however, since a long pause here will return you to the direction mode.

Note: Due to memory limitations the program will not run with the disk controller plugged in unless it is broken up into two parts: the game (EVILCRPT) and the instruction screen (INST1). To do so, first load "EVILCRPT", and then enter the following commands and program lines in order.

```

DEL 136-155
135 A$=INKEY$: IFA$="N"THEN156ELS
E IFA$="Y"THENCLS0:POKE65494,0:RU
N"INST1"ELSE135
SAVE"EVILCRPT/DSK"
CLEAR:NEW
CLOAD"EVILCRPT" (the cassette version)
DEL-78
DEL81-82
DEL96-135
DEL156-
10 POKE65495,0:DIML$(26),C$(32),
AP$(4),W(18):GOSUB83:GOTO 136

```

```

156 SCREEN0,0:POKE65494,0:RUN"EV
ILCRPT.DSK"

SAVE"INST1"

```

Note the high speed pokes (POKE65495,0 and POKE65494,0). If they will not run on your system, simply delete them from the listings.

After the editing process is complete your disk should contain two BASIC files: EVILCRPT/DSK (the actual game) and INST1/BAS (the instruction screen). To run the program, simply LOAD and RUN"EVILCRPT/DSK, and if needed, the instruction screen will automatically load from the disk.

Note: It may be necessary to RUN the program twice since a PCLEAR is used, and may cause an SN error.

Curtis Keisler is 18 years old and will be attending U.S.C. in Aiken, South Carolina. There, he hopes to obtain master's degrees in both physics and computer engineering. Curtis' dream is to aid in making civilian space travel as common as watching TV. Questions or comments may be directed to Curtis at Route 2, Box 251 K, Williston, SC 29853. Please enclose an SASE when requesting a reply.

The Adventure of CLEOPATRA'S PYRAMID

Program by Philip Newton

Y

ou remember boasting how you, “took it single-handedly! Those 200 natives didn’t scare me a bit. I defeated their toughest warriors with my bare hands. The rest of ’em just backed off while I simply walked up and snatched the stolen diamond away from the old chief.”

You soon became quite a celebrity, retelling the story for anyone who would listen, while adding more suspense and danger each time. People everywhere believed you had barely escaped death by your sheer wits and brute strength alone. You were a respected hero for accomplishing the marvelous task.

Of course, nobody knows what really happened on your adventure to recover the rare and precious stone. Sure, according to reports, the diamond was stolen by a gruesome tribe of head-hunting cannibals. But, in reality, when you arrived on location in Africa, the diamond was quickly discovered in a rather small village, occupied by a peaceful, vegetarian tribe. And, it didn’t take you long to regain the treasure

which had been found and innocently taken by one of the village children. Of no use to the tribal members, it was easily exchanged for some food you carried in a pack. But why not steal a little glory for the rescue? After all, there was no one who could prove otherwise.

A few weeks later, while still enjoying your fame and recognition as a hero, you are approached by a short and stocky, gray-haired man in a local pub. With nervousness in his voice, he says, “I have heard of your courageous efforts in Africa and have come to make you an offer. I need an adventuresome explorer to travel to Egypt to complete a mission. Finding someone capable of navigating through the vast deserts has not been easy. But, I feel that you may be competent and daring enough to accomplish the task.”

While taking a piece of paper from his pocket, he continues the story. “About three months ago, as a result of many years of research, I found an approximate location of the pyramid which has eluded archeologists and scientists for centuries — the pyramid of Cleopatra. There, within its walls, are hidden the fabulous treasures of the great queen. However, to this day, no one has been able to conquer the obstacles of the desert surrounding it.”

The man unfolds a piece of paper appearing to be a map. “I think it is here,” he says, pointing to a spot on the paper. “I sent an archeologist named Dr. Jones to find the pyramid and return with its treasures. However, he radioed after about a week and said a medallion was found that was associated with the pyramid and he was certain of the tomb’s location.” The man pauses. “Unfortunately, I never heard from him again. Maybe he ran out of food or water, or was stung by a deadly desert scorpion. Of course, Jones might have foolishly tried to cross the treacherous Nile River.”

More than intrigued with the proposition, you request further details and the mysterious character continues. “I am in desperate need of the items inside that tomb. You see, I hastily promised a prominent museum I would deliver 25 artifacts from the pyramid before the fifteenth, which is only a week away. The museum paid me in advance and the money was used to repay researching debts, so now I can’t pay it back. I desperately need your help!”

Realizing that you may really have to prove yourself if you tackle the proposition, you are apprehensive about jeopardizing your credibility. But then, the man pulls a yellow envelope from his hip pocket and flashes a large stack of green bills in front of your nose. “All for you, if you can complete the quest Jones started, within the next five days,” he offers, making the deal irresistible.

Without thinking twice, you accept the challenge. How could anyone pass up the chance of earning that much money?

The man, eager to get you started, gives you the map. It pinpoints the location of the campsite from which you will start and the intricate trails of the expedition. He firmly concludes, "When you have collected 25 treasures, just press the red button on this radio, and I will come to pick you up. Oh, and one other thing! If it has been more than five days, don't bother calling!"

The Adventure of Cleopatra's Pyramid is a random Adventure requiring the full 64K of memory. Before loading, turn the computer off, unplug the disk controller (if you have one), and then turn the computer back on and type, POKE25,6:NEW. This process will assure that you have reached a cold start and will clear enough available memory.

The Adventure accepts standard verbs and a complete list may be obtained by typing VERB. Single letter entries are accepted for the commands Look, Inventory and all six of the possible directions: North, South, East, West, Up and Down. Verbs may be shortened by typing only the first three letters and nouns, by typing only the first four (i.e., DRD STAT is the same as DROP STATUE or DROP THE SMALL STATUE).

The Adventure also accepts multiple command input statements which allow up to three commands to be entered at the same time. This is done by linking commands together with commas. For example, you can type: GET FLASHLIGHT, GET CANTEEN, GO SOUTH and all commands will be executed simultaneously. And, if you get stuck, typing HELP might render some good advice.

A game save feature is also included. To save a game you are playing, type SAVE and the computer will prompt you to insert a blank tape into the cassette recorder. Then, press the record and play buttons on the cassette recorder. After doing so, press any key and the computer will prompt you to enter a filename. The game will be saved at the point you left off in the Adventure.

To load a previously saved game, simply type LOAD after loading and running the program, and the computer will prompt you to insert the game tape into the cassette recorder. Then, press the play button on the cassette recorder. After doing so, press any key. The computer will then prompt you to enter the filename previously saved on the game tape. The game will be loaded and in a few seconds you can begin playing the Adventure from the point you left off.

Philip Newton is a high school junior. His favorite hobbies are playing Adventures, designing graphics, telecommunicating and programming. Questions or comments may be addressed to Philip at Rt.#3, Box 104, Cleveland, TN 37311. Please enclose an SASE when requesting a reply.

PYRAMID 64K ECB

Caution — Packed Lines!

Some of the lines in this program are "packed" and may be too long to enter in a normal fashion. If the CoCo stops accepting characters, press ENTER, go into the EDIT mode (type EDIT followed by the line number), press 'X' (the EDIT command for extending the line), and then type in the few remaining characters. (We do not recommend using this technique in your own programs as serious problems could result.)

ICONIA

Program by Carlos Eduardo Rocha

I

It was nearly nine years ago that the famous astronaut and explorer, Vade Mowban, embarked on his final voyage. He departed Earth toward Jupiter in his spaceship, *Iconia*, in a gallant effort to observe and attempt to reveal the mystery of a huge black cube that was orbiting the planet. But once Mowban's ship reached its destination, strange things began to happen.

First, the *Iconia's* super computer, XAL, began to malfunction, refusing to execute commands. The machine seemed to take on a mind of its own and soon endangered Mowban's life. Fortunately, he was able to deactivate XAL and avoid immediate catastrophe, nevertheless, his efforts were deemed frivolous as the inexplicable happenings continued.

Illuminating globes began sprouting on the surface of the dark cube. Within minutes, the globes burst and a variety of horrendous-looking creatures began emerging from them.

Shortly after the sighting of the creatures, Mowban, for reasons still unknown, boarded

his space pod and ejected from the *Iconia* in the direction of the cube. And, even though he had the most sophisticated weaponry available on the *Iconia*, he took none with him aboard the tiny escape vessel.

Some experts speculate that he was drawn by the powerful force of the cube. Others, however, think he had simply lost his mind. The last radio transmission received from the great explorer was, "Oh my! It's full of boxes." The *Iconia* has been drifting aimlessly ever since.

Chosen from a cast of the world's most proficient astronauts, your assignment is to return the *Iconia* to Earth. After weeks of space travel, you reach your destination and must complete the operation, remembering that if the mission is not 100 percent successful, the chances of returning alive are exceedingly slim.

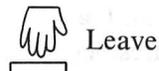

Ejection from the mother ship in your egg-like space pod is executed to perfection. The memory of a theme park joy ride fills your mind — but only briefly, for the wondrous *Iconia* quickly engulfs your entire visual spectrum. The ghost-like spaceship seems bound for its destiny as it glides unmanned in orbit between you and Jupiter.

Checking your controls, you see that only 1,000 feet lie between you and the legend of the *Iconia*. As your pod reaches the vessel and you cross through the emergency gate, you recall the seemingly simple instructions of the mission:

- Reactivate the spaceship
- Reactivate the ship's computer
- Program the ship's return to Earth
- Leave the spaceship

Iconia is a randomized Adventure requiring a joystick. Graphics represent the *Iconia* spaceship, which is divided into two main compartments: the body and the carrousel. To pass from the body to the carrousel or vice versa, you must first be in a room with a ladder. Use of the ladder is activated by pressing the 'V' key. The four arrow keys are used to move through the spaceship.

In the lower part of the screen, eight icons are graphically displayed representing the verb and noun selections available in the Adventure. They are as follows:

To activate an icon, use the right joystick to place the small dot directly under the desired symbol and press the 'I' key. If the icon represents both a verb and a noun, such as "Open Door," the command will be executed immediately. However, if an icon representing only a verb is selected, the computer will wait for a noun to be typed in and entered from the keyboard. For example: To activate the command GET FRUIT:

Use the joystick to place the dot here

and press 'I'. Then, type in FRUIT from the keyboard and press ENTER.

What could possibly await you inside the *Iconia*? Only time will tell.

Carlos Eduardo Rocha is a business administration student at Puc-Minas Gerais in Brazil. He wrote his first program in 1984 and, since then, has developed a great interest in Adventure writing. One of Carlos' games has been published in Micro Sistemas, a Brazilian magazine. Questions or comments may be addressed to him at R. Caraca, 235/601, Belo Horizonte — MG Brazil 30210. Please enclose an SASE when requesting a reply.

The Escape of Embroidment

Program by Jon Blow

I

f you've been successful suppressing the aggressive hostilities of the abundant variety of pesty critters in the previous Adventures, you probably feel you're ready to face the ultimate challenge. If so, let's hope your intuition serves you well because you may have finally met your match.

Enter the funhouse called Embroidment where your survival skills will be put to an exorbitant test of endurance. Since the unusual old building was abandoned years ago, its initial appearance may not be aesthetically overwhelming. But the funhouse's exterior is not the characteristic that is intended to captivate your interest. On the other hand, a startling sensation is stimulated as you walk through the front door and into its first room.

Your primary objective, besides surviving, of course, is to find your way from one end to the other and escape by finding the one and only exit. However, doing so will require extensive exploration since, like most funhouses, the place

has a wide assortment of distinguishably unique locations.

You're certain to approach insanity as you fumble through the rooms of mirrors, and revolving rooms will have your head spinning to find a way out. Outrageous danger lurks inside some quarters while others will relieve a little of the tension by providing some fun and games. But the amusement is only temporary, as it's back to traveling the narrow passages and spooky staircases, uncertain of what awaits you around the corner. But don't hesitate. Your journey must encompass each and every room if you are ever to depart the funhouse.

Of course, the excitement really starts to mount as Embroilment's ghosts begin to appear. There are many lurking in the old funhouse, each bearing a personality and characteristics all its own. You will encounter ghosts that will steal and hide your most valuable possessions. On the other hand, some appear to be rather generous and will leave you presents. But beware of such gifts since deceit is a common characteristic among them all. To overcome the threat of the exhausting spirits, you will have to learn their true colors and only experience can assist you.

Perhaps the most annoying trait of all the ghouls is their ability to slime you. This is not at all a pleasant experience and the constant threat of it will soon have you afraid to turn the next corner. Obviously, the termination of every one of these horrid fiends is essential, if you are ever to depart the funhouse.

So, not to leave you defenseless in your mission, you have been equipped with an official Super Ammo Ghostblaster, the deluxe five-setting model, which includes a setting for every type of ghost in existence. A power disk, power orb and power pack — all beneficial ammunition — are also at your disposal.

If you are lucky enough to survive the treacherous funhouse and escape alive, your success will be determined by the score you are able to accumulate. Points will be received for eliminating the ghosts that dwell within. Needless to say, without this accomplishment you are destined to remain within the confines of Embroilment indefinitely.

Additional points can be racked up in the Comterm Six gameroom. If able to locate it, you'll find three video games: Ralfo Chess, Shark Attack and Global Thermonuclear War that will all be prepared to match your wits.

To play Thermonuclear War, use the four arrow keys to blow holes in the force field and destroy the enemy outposts (\$). You have five missiles, which start at the bottom of the screen and accelerate on the way up.

In Shark Attack, you are the tenderheart (t) in a pool of sharks (s). Use the four arrow keys to ram the sharks into the buoys (*). Beware — the pace gets

faster as the game progresses.

Sorry, but you'll have to figure out how to defeat Ralfo Chess on your own.

Now don't say you weren't warned about Embroilment, but I hope you haven't been chased away either. Go ahead, take the challenge. You'll find that the excitement will eventually outweigh the risks.

The *Escape of Embroilment* consists of 34 different locations and includes a vocabulary of approximately 64 words. A word parser is used for added speed and versatility during game play.

Travel is executed using the single-key directional commands of N (North), S (South), E (East), W (West), U (Up) and D (Down). The standard two-word commands (a verb followed by a noun) are accepted and may be abbreviated by typing only the first four letters of the verb and noun (e.g., SHOO GHOS may be used instead of SHOOT GHOST), which allows clever commands to be invented, such as DROPE (DROP ROPE). An available list of verbs may be displayed at any time by typing VERB.

Multiple commands may also be input. Commas or colons must be used to separate commands (e.g., DROPROPE ,S:LOOK). Spaces may be used, but are not required.

To play *The Escape of Embroilment*, load and run ESC BOOT. After the accompanying music is played, ESC MAIN will automatically be loaded from cassette. At the OK prompt, type RUN and the Adventure will begin.

Due to memory limitations, the program will not run with the disk controller plugged in during game play.

Note: In some instances the room descriptions may scroll off the screen too fast to read. If this occurs, type L, for LOOK at room description, and immediately press the SHIFT and @ keys simultaneously. By doing so, the text will pause until ENTER is pressed, which will then display the remainder of the text.

Jon Blow has been using computers for six years and has written several other Adventure games. Questions or comments may be addressed to him at 14925 Satanas Street, San Diego, CA 92129. Please enclose an SASE when requesting a reply.

Save yourself from Adventure nightmares with . . .

THE THIRD RAINBOW ADVENTURES TAPE OR DISK

Sure, typing in listings can be instructional, but you don't want to spend your valuable computing time on an Adventure of a different kind — debugging your typing. No one needs that headache. So give yourself a break and get the **Third Rainbow Adventures Tape or Disk Set**. They include all 19 Adventures in the book; just pop them in and you're ready for action! No fuss, no worry, and no lost weekends spent typing, typing, typing.

The Third Rainbow Adventures Tape is only \$9.95, Two-Disk Set \$14.95

You can use your VISA, MasterCard or American Express to order the tape or disk by telephone at (800) 847-0309 or you can enclose payment and mail your order to:

Third Rainbow Adventures
The Falsoft Building
P.O. Box 385
Prospect, KY 40059

Yes! Send me The Third Rainbow Adventures: **Tape for \$9.95***
 Two-Disk Set for \$14.95*

*Non-U.S. orders add \$2 (U.S. currency only) to cover additional postage. Kentucky residents add 5% sales tax. In order to hold down costs, we do not bill. (Please note: The tape and disk are not stand-alone products. You need to purchase the book for loading and operating instructions.)

Fill out your CoCo library with these selections

The Complete Rainbow Guide to OS-9

Authors Dale Puckett and Peter Dibble show how to take advantage of OS-9's multitasking and multiuser features. An easy-to-read, step-by-step guide packed with hints, tips, tutorials and free software in the form of program listings.

Book \$19.95

Disk Package \$31 (2 disks, book not included)

The Rainbow Introductory Guide to Statistics

Dr. Michael Plog and Dr. Norman Stenzel give a solid introduction to the realm of statistical processes and thinking for both the beginner and the professional.

Book \$6.95, Tape or Disk \$5.95, Package \$11.95

The First Rainbow Book of Adventures

Contains 14 winning programs from our first Adventure contest. Includes *Sir Randolph of the Moors*, *Horror House*, *One Room, Dr. Avaloe* and more. Plus hints, tips on solving Adventures.

Book \$3.50, Tape \$3.50

The Second Rainbow Book of Adventures

Featuring 24 of the most challenging Adventure games ever compiled. Meet the Beatles and battle the Blue Meanies, find a hidden fortune, or win the heart of a mysterious princess. *Ring Quest*, *Secret Agent Man*, *Dark Castle*, *Curse of Karos* and more!

Book \$13.95, Tape \$13.95

The Third Rainbow Book of Adventures

The excitement continues with 19 new Adventures. Discover backstage intrigue at the London Theatre, attempt a daring space rescue, or defeat evil in the year 2091 as a genetic android. *Evil Crypt*, *Spymaster*, *Time Machine*, *The Amulet*, and that's only the beginning!

Book \$11.95, Tape \$9.95, Two-Disk Set \$14.95

The Rainbow Book of Simulations

20 award-winning entries from THE RAINBOW's first Simulations contest. You are a Civil War Commander, an air traffic controller, a civil defense coordinator, or a scientist on Mars . . . your wits are on the line.

Book \$9.95, Tape \$9.95

The Second Rainbow Book of Simulations

The 16 winners from our second Simulations contest. Fly through dense African jungle, bull your way down Wall Street, lead a bomb squad, or try your hand at Olympic events. Test your skills and talents. Book \$9.95, Tape \$9.95, Disk \$10.95

Even if you buy the tape or disk, you will still need the appropriate book. OS-9® is a registered trademark of the Microware Systems Corporation.

Let your learning Adventure continue with . . .

The RAINBOW

THE COLOR COMPUTER MONTHLY MAGAZINE

THE RAINBOW is the most comprehensive publication a happy CoCo ever had. It's the #1 authority for detailed information on the Color Computer.

A monthly issue contains more than 200 pages and up to two dozen programs, 14 regular columns and as many as 20 product reviews. And advertisements: **THE RAINBOW** is known as *the* medium for advertisers — which means every month it has a wealth of information unavailable anywhere else about new products! Hundreds of programs are advertised in its pages each month.

Every single issue of **THE RAINBOW** covers the wide spectrum of interests in the Tandy Color Computer — from beginners' tutorials and arcade games to telecommunications and business and finance programs. Helpful utilities and do-it-yourself hardware projects make it easy and fun to expand your CoCo's capabilities. And, monthly reviews by independent reader reviewers take the guesswork out of buying new software and hardware products.

Join the tens of thousands who have found **THE RAINBOW** to be an absolute necessity for their CoCo.

Program Index

The Third Rainbow Adventures Disk Set

Escape — Escape the four-room mansion and a mind-twisting challenge.

The Amulet — Find the five mystical stones to expand your life 100 years.

Spymaster — As Agent 27, deprogram the nuclear missiles and avoid international catastrophe.

Ghost Town — There's gold in them thar hills!

Aandark — Map areas of the new world for colonization. But dangerous territory awaits on the new planet.

The Adventures of Johnny Zero — Save the International President from enemy agents as a genetic android in 2091.

The Sword and the Sorcerer — Preserve the people of Ling Shai from enslavement by the evil and immortal Sorcerer. (A four-part Adventure.)

An Actor's Nightmare — Backstage intrigue at the London theatre.

The Time Machine — Time is of the essence to save the universe.

Balm — Soothing revenge as *you become the Adventure*, determined to terminate anyone brave enough to enter your cavern.

The Professional — Hot on the trail of international jewel thieves.

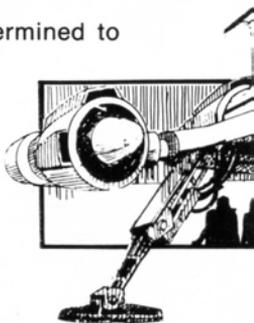

Time Travelers — Gather treasures of the ages with Dr. Tempus' time machine.

Evil Crypt — Explore the underground maze to obtain your powers while avoiding bottomless pits, graves that kill and flesh-frying fires.

The Adventure of Cleopatra's Pyramid — Peril on the banks of the treacherous Nile.

Iconia — Attempt a daring space rescue.

The Escape of Embroilment — Don't dare go in without the Super Ammo Ghostblaster.

NOTE: While this disk is provided for convenience, several programs featured in the book *will not run with the disk drive plugged in*. It will be necessary to transfer these programs to tape before using. In addition, special merge instructions are included for combining *Cleopatra's Pyramid* files for use on tape.

The disks contain the programs that are featured in *The Third Rainbow Book of Adventures*, published by Falsoft, Inc. They are not stand-alone products, but are intended and sold as companions to the book. Information in the book is needed for proper loading and operation of these programs.

- Spymaser** — As Agent ZT, deprogram the nuclear missile and avert international catastrophe.
- Ghost Town** — There's gold in them thar hills.
- Aardark** — Map areas of the new world for colonization. But dangerous territory awaits on the new planet.
- The Adventures of Johnny Zero** — Save the international President from enemy agents as a genetic android in 2091.
- The Sword and the Sorcerer** — Preserve the people of Ling (the first enslavement) by the evil and immortal Sorcerer. (A four-part Adventure.)
- An Actor's Nightmares** — Backstage intrigue at the London theater.
- The Time Machine** — Time is of the essence to save the universe.
- Seln** — Soothing revenge as you become the Adventure, determined to terminate anyone brave enough to enter your cavern.
- The Professional** — Hit on the trail of international jewel thieves.
- Time Travelers** — Garner treasures of the ages with Dr. Temporal time machine.
- Exit Crypt** — Explore the underground maze to obtain your powers while avoiding bottomless pits, graves that kill and flesh-eating flies.
- The Adventure of Cleopatra's Pyramid** — Peril on the banks of the treacherous Nile.
- Iconic** — Attempt a daring space rescue.
- The Escape of Embroidment** — Don't dare go it without the Super Ammo Ghostblaster.

NOTE: While this disk is provided for convenience, several programs featured in the book will not run with the disk drive plugged in. It will be necessary to transfer these programs to tape before using. In addition, special merge instructions are included for combining Cleopatra's Pyramid files for use on tape.

The disks contain the programs that are featured in The Third Rainbow Book of Adventures published by Falstaff, Inc. These are not merchandise products, but are released and sold as commodities in the book. Information on the disks instructs the proper loading and operation of these programs.
