Now, RAINBOW ON DISK!

In addition to this popular RAINBOW ON TAPE service, the October 1986 issue marked the availability of RAINBOW ON DISK. Not only do you get all the programs that come with the tape service, but you also get OS-9 programs, which cannot be loaded from tape.

For more details and individual copy and subscription prices for RAINBOW ON DISK, check the latest issue of RAINBOW Magazine.

* Indicates a machine language program.

Editor's Note: In order to make KEYSBIN *contiguous for* RAINBOW ON TAPE *use, the file has been saved starting at $7D00. Simply* CLOADM *the file and enter* EXEC.

Check the accompanying articles in RAINBOW magazine for instructions on loading and using these programs. (The corresponding page number is noted for your convenience.)

Since RAINBOW ON TAPE programs run the gamut from 4K to 512K, from Color BASIC to Disk Extended Color BASIC, cassette-based or requiring disk drives, not all programs may work on your own system. Please refer to the corresponding magazine article for system requirements.

Tape counter numbers for the CTR-80, CCR-81 and CCR-82 recorders are noted for your reference. However, counters vary from machine to machine and heavy usage will cause variance on a given cassette due to stretching of the tape. Use our table as an approximate position only. Note: You must cue the tape to the blank spot right before a given program to avoid getting an I/O Error.

Special Note: To exit from the MENU, press the up-arrow key. You may have to press it several times until the screen clears. After using any machine language program (including some BASIC programs), turn your computer off and back on or type POKE 113,0:EXEC 40999 to clear it before loading another program.
