If, while loading or running a program, you get a FC, OM, or SN error, you probably have to enter the PMODE and PCLEAR values for the program from the keyboard. The label on the tape also contains the PMODE and PCLEAR values. Locations for the programs are set for the Radio

Shack CTR-80. Your locations may vary slightly. We try to put as many duplicates of the programs on tape as possible. If the first copy does not load, try the second copy, or if it has one, the third. If all three do not load, then send it back for prompt replacement.

Hello, my name is Tom Dykena and this is T&D Software. Thank you for showing interest in Subscription Software. We hope that you will be satisfied with our programs. Notice that the tape must be rewound before being played. This is to allow the tape to adjust to the recorder.

- FIRST COVER - Every month the first program will be a cover program that contains our disclaimer and some animation or design. This cover shows the "Coco-robot" receiving his first Coco-cassette. Note his excitement of its arrival.
- RACETRACK - If horse racing is for you, then select your horse, place your bet and you're off. To avoid confusion, you may only bet on one horse and it cannot be the same horse as someone else. The player number you are assigned to represents you. Try to break the track or better yet, beat your opponents!
- HANGMAN - If you are good at guessing games, then you will love hangman. This program has 90 words to guess from in three different levels, with ten different word lengths. NOTE: You can only make 7 incorrect guesses before you are hanged.

*** Before running the next program, it would be best to turn the computer off and on, and then enter PMODE 0 : PCLEAR 1. ***

4. MUSIC ALBUM - Play six of America's old favorite songs just by hitting a number, or better yet, make your own song. Making your own song lets you play sixty different notes using five different octaves. It also allows you to pause and to delete notes. By using the song playback feature, you can play your song using four different tempos. Check out the superfast!! NOTE: String space allows you around seventy-five notes.

5. LIFE EXPECTANCY - Did you ever wonder how long you are going to live? Life expectancy might give you an idea. It also gives weight charts for both men and women. This program also rates your lifecore according to the Holmes scale. NOTE: This program requires too much memory to finish if you have your disk unit hooked up.

6. WORD TESTS - Word tests gives you six different quizzes and then graphs your results. Most of the tests ask you around ten questions.

8. KILLER MANSION - This adventure game involves running around, looking for clues, moving things, picking things up, and using things. You must not only kill the escaped, deranged man but find his treasure also. Most people that play it get terminated once or twice before they win. Three clues: Feed the Dog, use the pick, and knife the man.

8. BARTENDER - Bartender allows you to access 37 of the most common drinks which include 58 different ingredients. One of the programs features is that the computer will search for all the drinks with your ingredient in it. So, if you have something left over from your last celebration, you can find all the drinks that contain it. NOTE: Before running the next program, enter PCLEAR 2 : PMODE 1.

9. CALENDAR - Did you ever wonder what day you were born on? Was it a Monday? Was it a Tuesday? This program will produce a calendar for any month of any year between 1 A.D. and 9 Million A.D. Calendar will help you plan those special events in the future and look back at the special events of the past. Calendar also takes into account leap years.

10. ROBOT WAR - This program is something like the arcade game Berzerk except that robots do not shoot at you, but as you move along they increase in number - up to 15. Your ship can shoot in 8 directions but you must hurry before you're pursued by a ball that stops for nothing. Once you have successfully extinguished all the robots, you must escape through the opening in the wall.

If you have problems loading the programs, try changing the volume on your tape recorder. We have tested many tapes and all have come through with flying colors. If you have any questions, problems, solutions, or ideas please write to us. If you have any uncopyrighted programs that you want to show us, we will be glad to see them, and if we use them, we will pay you for them.

Until next month.....
