| MIND BOG | Mind Boggler | 0 | 1 | 107·238·350 | 64·175·316 |
| CT ADVEN | Coco Terrestial Adv. | 1 | 2 | 117·248·363 | 71·185·331 |
| CALCOUNT | Calorie Counter | 0 | 1 | 143·268·375 | 90·208·357 |
| JACKOLAN | Jack-O-Lantern | 4 | 4 | 157·278·385 | 101·221·376 |

*If, while loading in a program, you get a PC,OM, or SN error, you probably have to enter the PMODE and PCLEAR values for the program from the keyboard. The label on the tape also contains the PMODE and PCLEAR values. Locations for the programs are set for the Radio Shack CTR-80. Your particular computer may vary slightly. We try to put as many duplicates of the programs on tape as possible. If the first copy does not load, try the second copy, or if it has one, the third. If all three do not load, then send it back for prompt replacement.*

Welcome to T&D Software's fourth month of subscription soft-
ware.  We want to welcome all the new subscribers.  We hope that
you will be satisfied with our programs.  Notice that the tape
must be rewound before being played.  This is to allow the tape to
adjust to the recorder.

    *** Before loading the first program, enter PCLEAR 2. ***

1.  UFO RESCUE COVER-Like last month, this month's cover program
uses 'audio on' and 'motor on' to simulate someone talking.  Make
sure that you leave the tape player in the play position after you
load the program.  This program can run nonstop but is only designed
to run once.  See our Hero outwit the invaders.

    NOTE:  The next two programs give your computer the option
    of running at a faster speed by poking a 0 into 65495.  Not
    all computers can handle this.  After using high speed it
    is best to turn the computer off and on before loading the
    next program.

2. TANK-The object of this game is to destroy your opponent's tanks before he destroys yours. Tanks can only move in four directions but can fire in 24. Tanks cannot move forward when there is an object in the way(most of the time). This game requires the use of the keyboard and the joysticks. When a tank turns to its left or right, it is capable of making objects disappear.

3. DRIVEWAY-This program uses the right joystick to let the driver steal through a 25 land obstacle course. You move your car from right to left to avoid cars and walls. You have five variations to choose from including an inviso car and different speeds.

4. SOUNDS-This program requires you to repeat the same sound and color which is randomized by the computer. It gets harder as you go along. There are three skill levels.

5. BALLOON DROP-You are standing on a bridge watching vehicles go by under you. The object of the game is to hit passing vehicles with water balloons. The trick of the game is to fire at the right time and at the right objects-police cars. High scores are saved each game to make it more of a challenge.

6. MIND BOGGLE-The computer creates a code of four colors. You have got ten tries to break the code. The computer gives you hints as to how many colors you guessed correctly but in the wrong place and how many colors you guessed correctly and in the right place.

7. COCO TERRESTRIAL ADVENTURE-This adventure game requires the player to move around looking for his lost friend. You escape each section through exits in the walls. Some objects that you hit will give you a clue. But beware; most of them will put you back to start. Watch out for chomp monsters, fools gold, crocodiles, etc...

*** Before running the next program, enter PMODE 0; PCLEAR 1. ***

8. CALORIE COUNTER-Everyone wants to lose weight, right? This program will help you count calories or tell you the different calorie values of over 155 different items.

9. JACK-O-LANTERN-Is a perfect game for Halloween. Set your TV screen by a window. Hook up an outside speaker and plug in a microphone. The mouth of the pumpkin will open and close through peeking into the input/output memory contents. You can also make Jack disappear and reappear or make him switch colors.

If you have problems loading the programs, try changing the volume on your tape recorder. We have tested many tapes and all have come through with flying colors. If you have any questions, problems, solutions, or ideas please write to us. If you have any uncopyrighted programs that you want to show us, we will be glad to see them, and if we use them, we will pay you for them.
