If, while loading or running a program, you get a FC, OM, or SN error, you probably have to enter the PMODE and PCLEAR values for the program from the keyboard. The label on the tape also contains the PMODE and PCLEAR values. Locations for the programs are set for the Radio Shack CTR80. Your locations may vary slightly. We try to put as many duplicates of the programs on tape as possible. If the first copy does not load, try the second copy, or if it has one, the third. If all three do not load, then send it back for prompt replacement.

Hi everybody! Welcome to another month of T & D Subscription Software. We want to welcome all the new subscribers. We hope that you will be satisfied with our programs. Notice that the tape must be rewound before being played. This is to allow the tape to adjust to the recorder. Note: If you do have problems loading a tape, make sure that the faulty part is not your recorder!

1. CATALOG COVER - This month's cover program uses high resolution graphics to show a catalog of our first five issues. Each of the 47 programs is printed in one of three colors:

Key - Green=Game Blue=Business or Education Red=Other

*** 16K owners should enter PMODE 1:PCLEAR2 before loading the next program. ***

2. BOWLING - Welcome to Tropical Lanes. This bowling game allows for both lefthand bowlers and righthand bowlers. You can roll a straight ball, or by moving the joystick up or down, you can roll a curve. Once you start a curve you cannot stop it. Once the screen switches to a closeup shot of pin action, you can no longer start a curve. Warning: This program is addicting!

*** Before running the next program, enter PMODEO:PCLEAR1 ***

3. PROGRAM INVENTORY - Have you ever wasted your time searching through stacks of unlabeled tapes and disks looking for a program? If so, then put your COCO to work with this program. Organize your programs and find them instantly. With this program you can add, change, or delete records, and sort, print or browse the file. Note: This program will adjust for 16K or 32K. It will only work with a disk.
4. PROMISSORY-LOANS - This program will help you compute the amount of your payments for a promissory note or a loan.
5. CHECKBOOK BALANCER - Do you have problems balancing your check-book? Get a hold of your bank statement and let your Color Computer do the work.
6. TRIGONOMETRY TUTOR - This educational program covers the Sine, Cosine, and Tangent functions along with the Sine and Cosine laws. It also gives you problems and exercises at the end to find out what you have learned.
7. CONVOY - Get ready, aim, fire... The computer and you fight it out in this 'Battleship' type game. First you plot all twelve of your Aircraft Carriers, Submarines, Cruisers, Battleships, and PT Boats. Then the computer plots his. Then Battlestations!!
8. BAG-II - This game involves taking turns putting items into a bag and then trying to remember the contents. Up to six players can compete to see who can remember all the items. The computer will display the results at the end of the game.
9. SPECTRA SOUND - Just pop in your favorite music into your tape recorder, dim the lights, lower the brightness on your TV set and run Spectra Sound. It may look like the program just puts random dots on the screen but actually, different tones produce different colors in different locations.

Note: The next program is a Machine Language program. You must enter 'CLOADM' instead of enter. 'EXEC' instead of run.

10. CONVEYOR BELT - The object of this fast moving game is to get across moving belts as many times as possible. We found that the best way to play this game is to time yourself to see how fast you can get up and down the belts.

If you have problems loading the programs try changing the volume on your tape recorder. We have tested many tapes and all have come thru with flying colors. If you have any questions, problems, solutions or ideas please write to us. If you have any uncopyrighted programs that you want to show us, we will be glad to see them. Send them in and if we like them, we will make you an offer.

Until next month.....
