CYB INS	Cyborg Ins.	4	4	132 & 260 & 380
CYBORG	Cyborg	3	4	147 & 271 & 390

If, while loading or running a program, you get a FC, OM, or SN error, you probably have to enter the PMODE and PCLEAR values for the program from the keyboard. The label on the tape also contains the PMODE and PCLEAR values. Locations for the programs are set for the Radio Shack CTR-80. Your locations may vary slightly. We try to put as many duplicates of the programs on tape as possible. If the first copy does not load, try the second copy, or if it has one, the third. If all three do not load, then send it back for prompt replacement.

Hello everyone! Welcome to a new year and the seventh month of T & D Software. We want to welcome all the new subscribers. We hope that you will be satisfied with our programs. Notice that the tape must be rewound before being played. This is to allow the tape to adjust to the recorder.

1. NEW YEAR'S COVER - This month's cover program shows our Coco Robot trying to fulfill his new years' resolution. See what he uses his secret weapon to accomplish.

2. LLIST - How would you like a utility that will make your program listings easier to read? This program will highlight line numbers, separate multiple statements, and skip over the perforations, to give you a much more readable listing.

3. **SUPER PRECISION DIVISION** - This program will allow you to do divisions with up to 1000 decimal places. Normally the computer rounds it to the ninth digit.

4. **DIFFUSE** - By using a drill and wire cutter you must locate and diffuse bombs. Be careful not to cut the wrong wire or you will blow up.

5. **SPACE STATION** - By using the laser sights and joystick you defend your space station from hostile ships.

   NOTE: The next three programs are machine language programs.
   You must enter "cloadm" instead of enter and "exec" instead of run.

6. **MACHINE LANGUAGE TUTORIAL PT. 2** - The second part of our machine language tutorial explains the binary and hexadecimal number systems used frequently in machine language programming.

7. **SHOOT OUT** - You and your opponent are turned into gunfighters meeting in the desert. Your only protection is the cacti which can be shot away.

8. **FIND UTILITY** -This utility will allow you to find a string in a basic program. To use this utility you must first 'CLOADM' this machine language program, load a basic program, and then type 'EXEC'.
   NOTE: There are two versions of this program. The first one is for 16K and the second one for 32K.

9. **CYBORG INSTRUCTIONS** - 'CYBORG' took too much memory for proper instructions. See what kind of faces you can draw.

10. **CYBORG** - This program allows you to create various faces on your computer by selecting different features and colors. This program is great for kids.

     If you have problems loading the programs try changing the volume on your tape recorder. We have tested many tapes and all have come thru with flying colors. If you have any questions, problems, solutions or ideas please write to us. If you have any uncopyrighted programs that you want to show us, we will be glad to see them. Send them in and if we like them, we will make you an offer.

Until next month.............
