PURGEUTL	Purge Utility	0	1	143 256 349	88 190 307

If, while loading or running a program, you get a FC, GM, or SN error, you probably have to enter the PMODE and PCLEAR values for the program from the keyboard. The label on the tape also contains the PMODE and PCLEAR values. Locations for the programs are set for the Radio

Shack CTR80. Your locations may vary slightly. We try to put as many duplicates of the programs on tape as possible. If the first copy does not load, try the second copy, or if it has one, the third. If all three do not load, then send it back for prompt replacement.

Mistakes, Mistakes! The instructions for last month's programs 'Text Screen Print' and 'High Resolution Text' were switched around. We hope that this did not cause too many problems. We hope that you are satisfied with our programs.

1. MYSTERY COVER PT. 2 - We hope that this month's cover program is more ledgable than last month's cover program. We are using PMODE 4 instead of PMODE 3. Watch as the private investigator investigates the crime.
2. GOLD VALUES - This program will take todays value of an ounce of gold as your input and give you the value of any unit of gold in any standard weight catagory such as metric, apothecary, troy etc. and also gives the gold value of common U.S. gold coins.

3. TREK INSTRUCTIONS - The following instructions will help you in playing the game 'Trek'. To warp to different quadrants enter 'W' followed by quadrant numbers. To move from sector to sector enter 'I' followed by the appropriate sector numbers. To fire the phasers type 'P' followed by sector numbers. To fire photon torpedoes type 'T' followed by the appropriate sector numbers. To apply energy to the shields, type 'S' followed by the amount of energy desired.

4. TREK - Gallop through the galaxy in pursuit of the Klingon fleet. Fire your phasers and photon torpedoes but don't forget to use your shield. This is enjoyment at warp speed without leaving your home.

5. HIGH TEXT MODIFICATION - With this utility you can easily alter 'high text' to print your own graphic characters. Once high text and this program are loaded, you can modify each of the standard characters, letters etc. to look like anything you want (rockets, ships, robots etc.). For example, you can modify the character 'X' to look like a UFO, so every time you print a 'X' a UFO will appear instead. Once all the characters that you want changed are finished, your new version of High Text can be saved.

6. ASTRO DODGE - Use the keyboard to maneuver your space dodger through the asteroids. Press the 'A' key to abort the game. Press the (enter) key to warp into hyperspace. Press the (clear) key to stop the action and the spacebar to resume.

7. Dr. COCO - Perform various medical and health measurements with this home applications type program.

8. PEG JUMP - Try to solve this graphics puzzle and only leave one peg left on the board. You must jump from one peg over another into the destination hole. Your first jump might be B4:D4.

9. MORSE CODE - If you ever wanted to learn morse code, this one's for you. You will be able to review letters, sounds and symbols along with various exercises.

10. PURGE UTILITY - With this utility you will be able to kill many files from a diskette with the touch of only a few keys. This will eliminate the need to type a long list of basic kill statements.

If you have problems loading the programs try changing the volume on your tape recorder. If you have any questions, problems, solutions or ideas please write to us. If you have any uncopyrighted programs that you want to show us, we will be glad to see them. Send them in and if we like them, we will make you an offer.

Until next month.....
