DRAW	Draw	3	4	192-388	128-371

If, while loading or running a program, you get a PC, OM, or SN error, you probably have to enter the PMODE and PCLEAR values for the program from the keyboard. The label on the tape also contains the PMODE and PCLEAR values. Locations for the programs are set for the Radio Shack CTR-80. Your locations may vary slightly. We try to put as many duplicates of the programs on tape as possible. If the first copy does not load, try the second copy, or if it has one, the third. If all three do not load, then send it back for prompt replacement.

WOW! The programs on this month's tape are so long that we could barely put two copies of each on the tape.... Last month our documentation sheet said that program number 9 was a machine language program. It should have said that program 10 'Life Generations' is a machine language program. We are sorry for any inconveniences we might have caused.

1. THANKSGIVING COVER - This program tells the story of the first Thanksgiving. We are sorry but we could not fit the entire story in 16K of memory. A minimum of 32K is required. The entire program takes over 10 minutes to run and is written in simple language for children. Note: If the pause is too slow, you can push the up arrow to advance from page to page.

2. 3-D TIC TAC TOE - There are 49 ways to win in this strategy game for 2-3 players. Red will go first for the first game, but then on the winner of the previous game will go first. To the right of the board is the number of games left to play.

3. INDY 500 - The object of this racing game is to get to the finish line before the time runs out. Before running this program you should delete line 15 if your computer cannot handle the high speed poke. When using the high speed poke, you should remember to reset the computer before trying to load or save a program.
4. MEMORY GAME - Uncover pairs of shapes in this concentration type game. Three levels of play allow you to challenge your memory.
5. COLLEGE ADVENTURE - Run around the college campus in search of your goal. Make sure that you don't get caught by the Resident Assistant, a gang, or in the girls hall. A summary of the commands are I, N, S, E, EXA, REA, NOV, GET, DRD, EAT, DRI, and USE.
6. DUNGEON MASTER - Fight off skeletons, dragons, evil wizards, dwarfs, rattle snakes, and other terrors in this dungeon adventure game. Try to uncover as much treasure that you can and then get out of the dungeon alive with it!
7. WEATHER FORECASTER - Now you can have your computer give you a forecast of the weather. Note: Most of the time you will receive a forecast of 'Clearing and Colder'.
8. GRID FACTOR INSTRUCTIONS - This program gives you the instructions for the next program.
9. GRID FACTOR - Free the grid of all the aliens. Make sure you watch your energy level when you are battling the aliens.
10. DRAW - Now you can easily draw on the screen and save your pictures to tape or disk. The commands are as follows: Right Joystick-Moves cursor, Spacebar-Erases, Clear-Clears the screen, P-Paint, S-Save routine, L-Load routine, C-Circle, J-Jump over, E-Exits, I-Full instructions. Note: For your entertainment, we have included five previously drawn characters of the popular Garfield comic strip. They are called 'Garfield', 'Pooky', 'Jon', 'Odie', and 'Lynan'. The easiest way to view these characters is to do the following: 1. Run the program. 2. When your in the High Resolution Screen, type 'L' for load. 3. Hit enter when it asks for a file name. 4. Type 'C' to load from cassette. 5. Go back to step 2. Note: Make sure that the play button is on and the right joystick is centered.

If you have problems loading the programs try changing the volume on your tape recorder. If you have any questions, problems, solutions or ideas please write to us. If you have any uncopy-righted programs that you want to show us, we will be glad to see them. Send them in and if we like them, we will make you an offer.

Until next month.....
