SUPER-SQ	Super-Squeeze	0	1	175-323	114-271
DATAFALL	Data Fall	3	4	193-335	129-289

If, while loading or running a program, you get a FC, GM, or SN error, you probably have to enter the PMODE and PCLEAR values for the program from the keyboard. The label on the tape also contains the PMODE and PCLEAR values. Locations for the programs are set for the Radio Shack CTR80. Your locations may vary slightly. We try to put as many duplicates of the programs on tape as possible. If the first copy does not load, try the second copy, or if it has one, the third. If all three do not load, then send it back for prompt replacement.

Spring is finally here! Just think of those poor soles walking the crowded streets at the Tulip Time Festival of Holland. And your lucky enough to be in the privacy of your home with your computer and ten brand new programs! This native Hollander would rather be at home. Remember, 16k users must enter PCLEAR! :PMODE0 before loading the first program.

1. MONEY SAVERS 1 & 2 - Money problems? These two programs may help by providing you with over fifty tips and ideas on how to cut down and save money. These tips and ideas help with energy saving, cutting kitchen and food costs, cutting auto expense, and much more!
2. STOCKS OR BONDS - Up to five players can win a fortune in this simulation of the stock market. Players are allowed to buy and sell up to twenty different stocks. Dividends, net worth, and totals are accumulated at the end of each round.
3. WALL AROUND - You and your computer battle it out in this fast moving game. After you design the play field, you must control your white racing dot as you attempt to outwit and trap the computers red dot.

4. COCO TECHNICAL LOOK PT.1 - This is the first part of a series to cover the color computer in a technical manner. This part deals with the 6809 CPU.

5. NUCLEAR WAR INSTRUCTIONS - These instructions will help you in running the next game. Note: 16k users might get an ?OM error when running the last part of the instructions - just ignore it and enter 'CLOAD' to load the next program.

6. THERMONUCLEAR WAR - Can you out last your opponent and win the war? The object of this strategic simulation game is to destroy your opponents control base before he destroys yours. First, you take turns plotting your Satellites, Control Bases, Missile Bases, ABM bases, Communication Centers and Computer Centers. Then the battle begins!

Note: We recommend that you turn the computer off and on before loading and running the next program.

7. CIRCUIT DRAWER - Now with the use of this Computer-aided-Design program, you can design electronic circuits on your computer. The high resolution graphics are needed as you create various schematics. Once the circuits are created, they can be edited, saved, reloaded, and displayed.

8. MOUSE RACES - Choose your mouse, make your bet, and their off. This graphic game is for the younger players.

Note: The next two programs are machine language programs. You must enter 'CLOADM' instead of 'CLOAD' and 'EXEC' instead of 'RUN'.

9. SUPER-SQUEEZE - This game is somewhat similar to the Atari video game called 'Turmoil'. Objects are approaching you from the sides. Can you fire and maneuver your way around? To save this program, enter (C)SAVEM "SUPER-SQ",7000,15000,7000.

10. DATA FALL - By using your right joystick, you must catch all the objects with your paddles. As you progress, the objects fall faster and faster but bonus paddles can be achieved. To start the game, hit any key. To start each round, hit the joystick button. To save this program, enter (C)SAVEM "DATAFALL",7070,12000,9083.

If you have any problems loading the programs try changing the volume on your tape recorder. If you have any questions, problems, solutions or Chatter, please write to us. If you have any uncopyrighted programs that you want to show us, we will be glad to see them. Send them in and if we like them, we will make you an offer.

Until next month.....
