RAM TEST	Super Ram Checker	0	1	171-341	110-296
HORSRACE	Horse Race	4	4	178-348	116-306

DISK USERS: Insert disk and run DIR. CASSETTE TAPE USERS: Rewind tape. Zero the tape counter. Fast Forward to desired program's tape counter number and enter 'LOAD' or 'LOADM'.

If while loading or running a program, you get a FC, CM, or SM error, you probably have to enter the

PMODE and PCLEAR values from the keyboard. We try to put as many duplicates of the programs on tape as possible. If the first copy does not load, try the second copy, or if it has one, the third. If you cannot get the tape or disk to load the programs properly, then send it back for a prompt replacement.

Welcome to our August 1985 issue. We apologize for falling behind during the summer. We hope to catch up with our issues this coming winter. We want to thank all of you who took part in our renewal special last month. We appreciated the terrific response.

1. GOLF PAR 3 - Take a break from shooting down aliens from outer space for a nice challenging game of golf. This game features 3 different modes of play. We recommend that you try the driving range first. It is tough to par this game.

2. WIZARD ADVENTURE - This adventure game will put you right into the magical kingdom of Oz. Meet up with the likes of the Lion, Strawman, Tinman, and the Wicked Witch. Can you get back to your home town of Kansas?

3. KITE DESIGN SPECS - This applications program will give the proper dimensions for a kite given only the height or width. The ratios are based on the "Perfect Kite". A kite based on this ratio flew a mile high on national TV. This program will also give the proper bridle hook-up and tail length.

4. ROBOTS - This game is different from usual: You have no weapons and must use your wits to survive. The idea is to get the robots to shoot each other or to walk into the mines shown on the screen. Also, you can teleport once per round.

5. GOMOKU - Play a thinking game against your Color Computer. You must connect five markers in a row, horizontally, vertically, or diagonally before the computer does. You can decide who will go first.

6. AMULET OF POWER - In this adventure game you have been chosen to seek out and recover the Crystal Amulet of Power. You must go to the place of the Rock Demon. Be warned, the Amulet is heavily guarded!

7. LINE COPY UTILITY - This machine language routine will let you copy individual lines of basic from one line to another. This utility can help save you lots of repetitious typing. To use, you must simply CLOADM or LOADM "LINECOPY" and enter EXEC when needed. You can load the basic program before the machine language utility is loaded or afterwards. To save this program to tape or disk, enter (C)SAVEM "LINECOPY",3584,3899,3700.

8. DISK PLUMBER - Plumber is designed to get rid of errors on a bad disk. Basically, the program will either try to rewrite bad sectors, or cancel them out at the file allocation table or both. To use, simply (C)LOADM "PLUMBER", and enter EXEC. To save this program, enter (C)SAVEM "PLUMBER",7537,16189,8192.

9. SUPER RAM CHECKER - Ram Test will perform a complete three pass test on the RAM in your CoCo. The test will work with all memory sizes. The "garbage" you see on the screen during this test is normal and there is no need for concern. To use, simply (C)LOADM "RAM TEST" and enter EXEC. To save this program, enter (C)SAVEM "RAMTEST",3584,5786,3584.

10. HORSE RACE - This race track is similar to race tracks you will find in the United States. Odds are in the favor of the track. You can place up to five different kinds of bets. All pay offs are based on the final odds which are constantly changing between each race. A separate machine language module "TRKML" is automatically loaded when "HORSRACE" is loaded and run. If a disk drive is detected, it will be used, otherwise the tape drive will be used to load "TRKML". To save "TRKML" to tape or disk, enter (C)SAVEM "TRKML",22500,32632,31329. This program is a 32K program. Horse Race is written in basic.

If you have problems loading the programs try changing the volume on your tape recorder. If you have any questions, problems, solutions or Chatter, please write to us. If you have any uncopyrighted programs that you want to show us, we will be glad to see them. Send them in and if we like them, we will make you an offer.

Until next month.....
