DEK USERS: Insert disk and run DIR. CASSETTE TAPE USERS: Rewind tape. Zero the tape counter. Fast Forward to desired program's tape counter number and enter CLOAD or CLOADM.

If while loading or running a program, you get a FC, GM, or SN error, you probably have to enter the PMODE and PCLEAR values from the keyboard. We try to put as many duplicates of the programs on tape as possible. If the first copy does not load, try the second copy, or if it has one, the third. If you cannot get the tape or disk to load the programs properly, then send it back for a prompt replacement.

Welcome to our 75th issue of subscription software. We hope you enjoy this month's selection.

- DRACULA HUNT ADVENTURE - Vampires are nasty, especially this one! Your mission: Terminate the dreaded Dracula. Watch out for Reindfield and the Werewolf. Hint: Find the coffin first and watch out for the other pitfalls.
- HELP TRIO PROGRAM - This program is actually 3 programs in one. The first two programs are for young children. You must select which letter is correct. The third program, programming teacher, teaches you how to program. A 14 line program is displayed. You are then instructed line by line on how it works. It is a very simple 14 line program, great for beginners.
- SHOWDOWN DICE - This high resolution game involves winning money from the computer. You must bet at least \$1 and no more than the total amount in the pot. You win your bet if both dice are higher than the point. You win the entire pot if both dice equal the point. You win 1/4 your bet if one die is equal to the point and the other is higher than the point. Good luck!
- TARZAR 1 ADVENTURE - This graphic adventure requires 32K. Coco 3 users should enter a 3 when it asks for a high speed poke. In every scene you face

north. To find out the verbs you may use, type 'VERB'. To get a silver key, enter GET SILVER, not GET SILVER KEY. There are three rings left for you to use in killing Tarzar. Tarzar has also left one ring that will not help you. When you get a ring, look up its name in the dictionary and 'ENCHANT' to something similar. Example: If you have a Dwarf ring, you may try 'ENCHANT SMALL'. If you are in severe need of help, type 'HELP'. The help you receive may seem meaningless at the time, but it may prove to be an important statement later. There is a title screen which is automatically loaded called TARZAR. To save TARZAR, enter (C)SAVEM'TARZAR' ,1024,1536,1024.

5. ARAKON - Two basic programs are used to make up this game. The first one is used to set up the levels and will automatically load the second one, ARAKON. Use your joystick to bounce the ball back at the obstacles. Try to catch the '?' falling down. It will give you laser power or extra men or a completed level. This program has very many levels and requires a 32k system. The program gives you the option of continuing the previous level or starting over after each game.

6. CASHFLOW REPORTING - This 32K program will help you keep track of money going in and money going out. You first can customize up to 14 income categories and 26 expense categories. You do this first by entering 'A' or 'B', changing Income/Expense headings. Then you can add Income/Expense transactions. These transactions can be printed to the printer. Also, the data can be graphed, saved and reloaded.

7. GRAPHIC LETTER - This 32K program will allow you to design and print various greeting cards, notes, etc. First, you should load and run the instruction program, 'GRAFINST'. The instructions can be printed on a printer. The instructions will automatically load the main program, 'GRAPFSIGN'. When run, the screen should be blank. Typing 'B' will give you a choice of 16 borders. Typing 'G' will give you a choice of 12 little graphic pictures. Typing 'T' will allow you to type on the screen. Other instructions are included in the instructional program. GRAPFSIGN loads up a file called 'GOML' and another file called 'GRAPX'. To save GOML, enter (C)SAVEM'GOML' ,12000,18681,12000. To save GRAPX, enter (C)SAVEM'GRAPX' ,14000,18448,14000.

8. GRAPHIC EDITOR - This utility will allow you to edit the graphic borders, clip art, and test font. To edit the graphics file, you must first load the 'GRAPX' file. We put this file on twice for tape users so they do not have to rewind the tape. You can only have 16 different borders. You can have up to 32 clip arts. We created 12 for you.

9. ADDRESS BOOK - Note: Do not run this program on your T&D disk. Put this on a blank formatted disk. This program requires 64K and a disk drive. It is a very powerful address book program. It has a lot of features. You can find names through address, city, state, zip, phone, and name. You can edit addresses, delete addresses, print addresses with the same city or state, etc. You can save, load and merge files. You can even custom the printout.

10. SQUARES - This machine language game involves using the arrow keys to move blocks in a grid of 16 by 11 blocks, to form a continuous line of any 16 of the same block. These must be in a straight horizontal line. The bottom line of the screen shows the time you used and the total number of moves it took you to complete the task. The 'C' key alternates the colors. The BREAK key can be used to exit play before the end. There is a basic loader program called SQUALOUD which will load and run the machine language. To save this program, enter (C)SAVEM'SQUARES' ,23900,26623,23900.

We have included NFL 88 predictions for the 1988 season. The first program, NFLINS, will give you instructions on how to run NFL88.

Until next month
