SAIL INS	SAILORMAN	3	4	184:375	127:358

DISK USERS: Insert disk and run SHT. CASSETTE TAPE USERS: Rewind tape. Zero the tape counter and Fast Forward to desired program's tape counter number and enter CLOAD' or CLOADM. If while loading or running a program, you get a FC, OM, or SN error, you probably have to enter the PMODE and PCLEAR values from the keyboard. We try to put as many duplicates of the programs on tape as possible. If the first copy does not load, try the second copy, or if it has one, the third. If you cannot get the tape or disk to load the programs properly, then send it back for a prompt replacement.

Welcome to our 76th issue of subscription software. We hope you enjoy this month's selection.

1. **SUPER BLITZ 3** - This Coco 3 only program is a conversion of the Blitz plane games for other computers. It is done in 16 color graphics. To play the game, merely press the spacebar to drop bombs. Only one bomb may be dropped at a time. With each pass, the airplane gets lower. The object of the game is to destroy the buildings before you hit them. The down arrow key controls the air foils. By pressing it, your plane will automatically drop a level.

2. **CHAMBERS** - Use the right joystick to control the man at the right. You must go through four doors before you can move. The long range view at the left shows where you are. Can you make it to the exit room? Use keys to open doors and find potions to heal yourself.

3. **TRIO RACE** - Three races make up this game. The first one involves avoiding the potholes either in the left lane or in the right. In the second level you only have a certain amount of time to jump the waves. In level three you are clinging to the vine. Good luck!

4. **EARTH TROOPER** - You must destroy the robots. Use your right joystick to maneuver your gun. Do not shoot when the moving shields are directly above you. In the tape version, the robots are moving. Because the routine used to maneuver the robots inferferes with the disk operation, the robots do not move in the disk version.

5. **STARGATE** - Here is one for all you Star Trek fans. A menu provides 7 options for dealing with the series. The first four options will list the shows. The next two options give you star dates and authors. The last option will list the shows.

6. **BOWLING SECRETARY** - This program will help your bowling secretary keep track of scores. It will handle up to 32 teams and up to seven players on each team. After each week of play you can get a hard copy of the following: Team standings including total pins. First, second and third team high series. First, second and third high individual series. First, second and third high team game. First, second and third high individual games. Also included is a complete listing of every player including his/her average.

7. **DISK TUTORIAL** - This program is very helpful for the beginner who just purchased a disk drive. Sometimes when you purchase a disk drive, a manual is not included. This program has the option of being able to print all the information out on your printer.

8. **JOYSTICK TO KEYBOARD** - This utility will help you so you don't have a joystick. There is an instructional program called "J2K INS" which precedes the main program. It will show you how to load the utility. Note: This program and the next will not always work with all machine language programs. Sometimes machine language programs are not written to conform to standards. These two utilities will only work with machine language programs that do conform to standards.

9. **KEYBOARD TO JOYSTICK** - This utility will convert your programs that use the arrow keys to now work on the joystick. There is a separate instructional program called "K2J INS" which will show you how to load the utility.

Most of you have heard of a software company called Tom Mix. They have been selling excellent software for the Coco for over 6 years. They are located only 50 miles away from us. We have purchased the right to publish some of their software. We will be including one program each month for a while. We hope we do not offend anyone who has already purchased most of their software.

10. **SAILORMAN** - This machine language graphic game requires a 64K machine to run. An instructional program precedes the main program and will explain all the levels and options. Before you save your scores to disk, we recommend that you make a backup copy of your disk.

If you have any questions, problems, or solutions, please write us. If you have any uncopyrighted programs that you want to show us, we will be glad to see them. Send them in and if we like them, we will make you an offer.

Until next month...........................
