DISK USERS: Insert disk and run `DIR`. CASSETTE TAPE USERS: Rewind tape. Zero the tape counter. Fast Forward to desired program's tape counter number and enter `CLOAD` or `CLDADR`. If while loading or running a program, you get a `PC`, `CR` or `SM` error, you probably have to enter the `PMODE` and `PCLEAR` values from the keyboard. We try to put as many duplicates of the programs on tape as possible. If the first copy does not load, try the second copy, or if it has one, the third. If you cannot get the tape or disk to load the programs properly, then send it back for a prompt replacement.

Welcome to our 82nd issue of subscription software. We hope that you enjoy this month's selection.

- DUNGEON MAZE** - You are pledging to a university frat house. In the last part of the initiation, the fraternity brothers have blindfolded you and dropped you off in a dungeon. You must find your way out. This adventure is somewhat 3 dimensional. Go through doors and move forward. Can you reach the exit in this two level dungeon?
- DISK TRANSFER** - This program will allow you to transfer an entire Coco disk over the phone using your phone modems. Most terminal programs allow you to transfer only 1 program at a time, but this program will do the entire disk. It works on either 300, 1200, 2400, or 9600 baud. This program loads up a machine language file called `SERIAL`. To save `SERIAL`, enter `(C)SAVE"SERIAL", 16000,16127,16000`.
- MAIL MERGE** - We have added a powerful feature to our Mail List program (from issue #13). With this feature, you can write personal identical letters to different people. In other words, if you want to write the same letter to 1000 people but make each letter personal, then this program will do it. You must first use a word processor to write the form letter. We've included our best word processor (Double Editor) on this issue. The instructions for Double Editor appear on issue #69. Note: Double Editor uses a machine language file called `DESMOD`. When you write the letter, you can use the following tokenized characters: `\NAM` - Inserts the name. `\A01`

- Address #1. \AD2 - Address #2. \CITY - City. \STA - State. \ZIP - Zipcode. \KEY - Key Code. \DAT - Date. The maillist program allows you to store 2500 names and addresses per disk. Put this program on a separate blank formatted disk and the run option 1 when you are ready to add names/addresses. Run option 6 to print mailing labels and option 8 when you are ready to print the form letter.

4. SUPER SPREADSHEET - This spreadsheet is more powerful than any we have written before. With this program you can also print out all the information. Pressing a 7 will get you the instructions. They are as follows: Arrow keys will allow you to move around the 26X30 spreadsheet. Typing a 'T' makes the cell a Text cell. Typing a 'N' makes the cell a number cell. F - Makes the cell a formula cell. L - Loads a spreadsheet. S - Saves the spreadsheet. G - Go to a specific cell. P - Print the Spreadsheet. Q - Quit the program. C - Forces the Spreadsheet to re-calculate formulas. There are also further instructions included to explain how the spreadsheet works.

5. BLASTER - Use your right joystick to fire at the small scout ships that the mother ship lets out. You get bonus men for certain scores as you shoot down the aliens. You must maneuver your ship to fit in between the broken laser field that the mother ship emits. You can also shoot at the mothership.

6. TILER TWO - Use your right joystick to control the action in this game sequel. You must first get a broom from the lighter blinking helper and then clean up the floor. Next, you must touch the darker blinking helper in order to lay down the tiles. You can switch from the broom to the tile layer by touching them. Try to collect the diamonds as you avoid the moving security light. You have three lives in which you must sweep and tile 16 rooms.

7. DREAM TUNNEL - Use your right joystick to maneuver your spaceship as you fly thru the perilous tunnel. You can fire your laser by pressing the joystick button. You can also move up, down, forwards and backwards with the joystick.

8. DISK UTILITY 3 - This Coco3 only program will allow you to do the following: (A) Alphabetize the directory. (B) Backup the directory. (C) Copy files. (D) Keep a database of disk directories. (I) Print detail listing of disk directories. (R) Kill files. (L) Create disk labels. (R) Rename disk files. (S) Determine source drive. (T) Determine the target drive. (V) Verify.

9. EDUCATIONAL TRIO - This Trio of educational programs includes the following: (1) Contraction Helper - This Coco3 only program will assist you in learning contractions. (2) Word Order - This Coco 2,3 program will quiz you on the correct word order of various sentences. (3) Spell it - This Coco3 only program will help you learn the hard to spell words.

10. LUNCHTIME - Here is another Tom Mix program for you... To load with tape: Enter CLOADM"LUNCH" to load and then enter EXBC to run. Disk users must enter LOADM"LUNCH". The object of this game is to score more points than your opponent while building hamburgers. Avoid dangerous hot dogs, pickles, and eggs. Points are scored for dropping ingredients and squashing nasties. Maximum point value is received for giving these foes a ride on a falling bun, patty, tomato or lettuce leaf. You start out with 4 pinches of pepper. You can earn extra pinches of pepper by gobbling ice cream, coffee, ketchup or french fries. You control the chef with your joystick. Move your chef across a bun and it drops a level giving you points. You get an extra chef every 10,000 points. Drop the ingredients on top of the nasties for more points. Pepper may be used to temporarily stun nasties if you are trapped. You can only throw pepper in the direction you are moving. To enter a high score, you must use the joystick. To start the game, press 1 for 1 player or 2 for a two player game.

Happy birthday to us! Seven years ago this month we started this business. To celebrate, we have a birthday party program. Simply load and run the program BIRTHDAY. A music file called BIRTHDAY will automatically load and play.

Until next month.....
