				266:450	210:450

DISK USERS: Insert disk and run DIR. CASSETTE TAPE USERS: Rewind tape. Zero the tape counter.

Fast Forward to desired program's tape counter number and enter 'LOAD' or 'LOADM'.

If while loading or running a program, you get a PC, CM, or SN error, you probably have to enter the

P MODE and P CLEAR values from the keyboard. We try to put as many

copies of the programs on tape as possible. If the first copy does not

load, try the second copy, or if it has one, the third. If you cannot get the

tape or disk to load the programs properly, then send it back for a prompt

replacement.

Welcome to our 91st issue of subscription software. We are looking for new program ideas. If you have a business/home application program idea or utility that we have not published yet, we would like to hear about it. Please write to us with your ideas. Include all the details. We hope that you enjoy this month's selection.

1. TRENCH FIGHTER - As you fly over the 3-D trench, alien ships will be coming in. Their lasers are of short range but once you are in their firing range, all it takes is one shot. Before they fire, you will be forewarned. Actual fighting takes place in section 3. You must defend sections 3 thru section 10 to win the game. At first the aliens are slow, but they get faster each section. Since this program requires a PCLEARB, you need a 32K machine or more to run.

2. COCOVERT3 - Cocovort3 is a Coco3 only basic program with machine language imbedded in its listing. The program was designed to show users how to operate the machine language code in the program. The machine code will transfer PMODE4 graphics to the four color HSCREEN Mode of the Coco 3's hires graphics. From the basic program you can load your PMODE 4 graphics from disk or tape, convert them to HSCREEN4 and then save the HSCREEN4 graphics to disk or tape. It also includes a short instruction mode which tells the user how to save the machine code and a listing as how to reload the HSCREEN4 graphics after they have been saved.

3. SPEED GAMES - Speed Games is a 32K program which includes 7 action games in one. They are as follows: 1. Missile Smasher, 2. Maneuver, 3. Ghost Catcher, 4. Jewel Snatching, 5. Ball Saver, 6. Bar fire, and 7. Frogger. If you want instructions for any of these programs, simply enter 1 for instructions.

4. BUSINESS STARTER - Getting a loan to start a business is hard. You must convince the bank that your idea will work. This program will give you some advice as well as helping you in creating a business plan. It includes 14 parts of information that many banks look for. The information you create can be edited, printed, or saved/loaded from tape/disk.

5. CAVERN QUEST3 PT 2 - This Cocom3 only game is similar to the popular 'PITFALL' game. As Jumpin' Joe Davis you must search for the lost treasure of the Baldana Civilization. There is an instructional program which precedes this called 'QUESTINS'.

6. BUILDERS HELPER - This program provides an easy to use calculator which allows the user to add, subtract, or multiply fractions. To multiply 1' 2 1/4" by 3 do the following. Press 1 <ENTER>, 2 <ENTER>, 1 <ENTER>, 4 <ENTER>, then * for multiply and then <ENTER>, 3, <ENTER>, <ENTER>, <ENTER>. The total inches will be displayed on the top left.

7. TARZAR IV - The goal in this 32K adventure is to locate and destroy both Farzar and Kyzer. Both are hiding somewhere in Greater Iklog. This fourth part in the series contains a new twist. It uses full sentence decode. You can still use verb-noun combinations and 'N', 'S', 'W', and 'E' but you may also type in full sentences. Example: Throw the hard round ball. This program will automatically load a graphic screen file called TARZAR4.BIN. To save this ML file, enter (C)SAVEM "TARZAR",1024,1536,1024.

8. ADDRESS IT - This program provides a tutorial which gives the correct form of address for various public officials. This very handy tool provides you with eight pages of addresses including 107 different officials.

9. ANIMAL GRAPHICS - This educational program for younger children uses 4 picture files containing over twenty different pictures of animals. Since it requires loading the picture files randomly and more than once, it requires a disk drive. There are two games provided: 1. Easy Pick - You will be shown a picture. Then you will be shown 4 more pictures. You must pick out the one of the four which correctly identifies the first picture. 2. Name it - simply identify which animal is viewed. To save any of the picture files, enter SAVEM "P1-4",3584,9728,3584.

10. SKYWAY - Here is another Tom Mix favorite. Use the right joystick to maneuver your sky craft along the skyway, but be careful to avoid running into other objects or off the edge. You can pull back on the joystick to jump over holes and barriers in your path. Press the fire button to destroy enemy craft, mines, and sky bugs. There are three sectors to travel thru. Once you travel through three sectors, you advance to the next level and restart at sector one. You have 5 sky craft when the game begins. An additional sky craft is awarded every 10,000 points. Pressing 'P' will pause the game. To load this machine language game enter CLOADM if you are using a tape system or use the Dir program if you are using a disk system. To save this program, enter (C)SAVEM "SKYWAY",12864,21220,12864.

Until next month.....
