| CRLOAD    | CRASH                 | 3     | 4      | 185:369   | 121:345 |

**DISK USERS:** Insert disk and run 'DIR'. **CASSETTE TAPE USERS:** Rewind tape. Zero the tape counter. Fast Forward to desired program's tape counter number and enter 'LOAD' or 'CLDAM'.  
 \* While loading or writing a program, you get a PC, DM, or SN error, you probably have to enter the PMODE and PCLEAR values from the keyboard. We try to put as many duplicates of the programs on tape as possible. If the first copy does not load, try the second copy, or if it has one, the third. If you cannot get the tape or disk to load the programs properly, then send it back for a prompt replacement.

Welcome to our 102nd issue of subscription software. We hope that you enjoy this month's fine selection.

- 1. REAL ESTATE MARKET ANALYSIS** - This program can be used to help track the price movements in the real estate market. When running this program you should first run the (A) option for adding market data. You must then enter the date, the sales market data, a four line description, and a classification. The real power of this program lies in the report that can be generated. The report shows month by month price trends as well as breaking them down by classifications. This program can also keep track of how much real estate has been sold. The average consumer might use this program to predict when the market is right to buy.
- 2. COCO PAYROLL** - This business application program will help you compute and store information on payroll. It allows you to set up your own flexible tax tables as well as employee information. The first thing you should do is set up your tax tables. Example: Single, Married, 1 exemption, etc. You have up to eight to choose from. The next step should be adding the employees. Once this is done you can save the information or get a printed report. With this information you are ready to process.
- 3. DR. STRANGE ADVENTURE** - Can you find your way out of the wild house of Dr. Strange? Use N,S,E,W for north, south, east and west in this adventure. Use other verbs like look, get, drop, read, take, put, unlock, etc as you roam around the house.

2490 MILES STANDISH DR - HOLLAND MI 49424 - (616)399-9648

4. TANNING SALON - If you own a tanning salon, then this disk only program will help you. This program performs a wide variety of functions. It will help you manage inventory, build a customer base, calculate sales, as well as total your employee's commissions. The first step in running this program involves adding all your inventory and services. Next, you should add all your employees and get a printed report of both lists. If you desire, you can also add some of your previous customers to the customer list.

When customers come in the store, simply select Sales. You can then enter (1) for the inventory item(s) as well as entering there name and address. The sale will be printed on your printer as well as the inventory will be properly adjusted.

5. TREASURE HUNT 3 - This Coco 3 only program involves hunting for gold in the ocean. Players take turns trying to locate the gold from above. Once they are sure they can find the gold, they dive in search for the treasure(s). The first player to find 1/4 million dollars wins! There are additional instructions located in the program itself.

6. RIVERBOAT BLACKJACK - This game of blackjack is for the Coco 3 only. The rules tend to put the game in your favor, although we had a tough time winning. When the program asks you to place a bet, make sure you enter a number followed by the <ENTER> key. Also, the program responds to the F1 and F2 keys as yes and no. Good luck!

7. TURTLE RACE 3 - This is a simple but fun turtle race program for up to nine players for the Coco 3 only. Each player can select a different turtle and watch as the pokey turtles cross the finish line.

8. SUPER SCREEN DUMP 3 - This Coco3 utility will dump any of the hi-resolution color graphic screens to a Radio Shack printer. All baud rates are supported as well as small or large printouts of PMODE 3/4, HSCREEN1/2. All that is required to print a screen is to have it in memory when the program is run.

9. KEYBOARD REMAP - This utility will allow you to re-define the Coco keyboard. Once run, the Basic program REMAP will automatically load up a ML file called REMAP.BIN. For instance, if you wanted to re-define the alphabet on the keyboard, you would press 3 first. Then you could edit 65 and switch the character A with something else. To save REMAP, enter (C)SAVEM "REMAP",1600,16049,1600.

10. CRASH - Crash is a high resolution Machine Language program with outstanding arcade graphics from Tom Mix. To load and run the ML part you must first load and run the program CRLoad. Enter EXEC if the program comes back with the OK prompt. The game consists of 4 screens. Screen #1 - Press the button to draw the rope. Hold it to move the man from one side to another. You must climb to the top right corner of the screen. You must stop on the cliffs, by releasing the button, to pick up the rope you need for the next passage. Climb the ladder and press the button to draw the next rope. Screen #2 - You must get to the bottom of the screen. You can make your man jump by pressing the button and moving the joystick. Screen #3 - Press the button while moving. This will make the man jump in the air. Press another time to open the parachute. If you open the parachute too soon, you will stay hung up on the first branch and if you don't open it fast enough, you will crash in the boat. You must jump before the bird catches you and the longer you wait to open the parachute the higher the points will be. Screen #4 - You must climb up to reach the plain while avoiding monkeys and spiders. You can jump over the monkeys and the spiders by pressing the button. If you pass the fourth screen you will return to screen #1 but at level 2. To save CRASH, enter (C)SAVEM "CRASH",12805,32767,12805.

Until next month.....
