DESK USERS: Insert disk and run DIR. CASSETTE TAPE USERS: Rewind tape. Zero the tape counter. Fast Forward to desired program's tape counter number and enter **CLAND** or **CLANDR**. If while loading or running a program, you get a FC, GM, or SN error, you probably have to enter the PMODE and PCLEAR values from the keyboard. We try to put as many duplicates of the programs on tape as possible. If the first copy does not load, try the second copy, or if it has one, the third. If you cannot get the tape or disk to load the programs properly, then send it back for a prompt replacement.

Welcome to our 103rd issue of subscription software. We hope you enjoy this month's selection of fine software. We thank you for your continuing support of the color computer.

- FAMOUS PEOPLE** - This program contains the names and birthdays of 623 famous people. You can search this data file by name or month. To search by name enter all or part of the name you wish to search. To search by month enter 1-12. To update the program from year to year, you will need to edit YY=1991 in line 10. To enter your own lists of names and birthdays, use the following data format: YYYY for year, 01 for January, (space), 1 for first day, name.
- LABRYNTH 3** - Guide your snake through the Labyrinth in this Coco 3 only game. The game is keyboard controlled, using the keys L and ; for left and right and A and Z for up and down directions. There is an instructional program called LABINST^R which contains detailed instructions on playing the game.
- DATA ANALYSIS** - This program will allow you to graph four different groups of numbers and view all four graphs at once. Once run, simply select A for adding new data. You can plot numbers in any of the four groups. When it asks for data, simply enter in all your numbers. You can later on edit the numbers as well as save the data to disk or tape. Pressing P at the main menu will allow you to view the graph.

4. **MEDICAL FILE** - This program will do a great job of keeping track of medical information on all the members of the family. It allows you to keep track of your last appointment as well as your next appointment. It even allows you to keep a diary on each family member. When running you should first enter in all the Doctors your family sees as well as all the family members. From there you can enter in the appointments as well as any information on past visits in the diary section of the program. The data can be saved to tape or disk and the diary can be printed on the printer.

5. **WORD GENERATOR 3** - This Coco 3 only program allows you to enter, save, and create any word-search type puzzle. The program WORDGEN allows you to create the puzzles. The program WORDS allows you to load and solve them. There are additional instructions in an instructional program called GENDOC.

6. **PRIVATE EYE ADVENTURE** - As a private detective you've been hired to solve a mysterious haunting in an old cemetery. By entering WORDS at the prompt, you will get a list of all the action verbs which are available with this game. Good luck!

7. **HEARTS 3** - This Coco 3 only game involves trying not to get the most points (hearts). You must follow suit as your three computer opponents try to slide you the hearts and the dreadful queen of spades. There are additional instructions in the beginning of the program.

8. **COCO JOKESTER** - This program will turn your Coco into a rambling nonsense machine. To install it, simply LOADM "JOKESTER" for disk or CLOADM "JOKESTER" for tape. Then enter EXEC. Try typing something on your computer and see what happens. It might be a nice trick to try on some unsuspecting user. ... To save this machine language program, enter (C)SAVEM "JOKESTER",31000,31127,31000.

9. **TETRAPAK 3** - Tetrapak 3 is a machine language Tetra clone for the Coco 3 only. Simply Loadm the game and enter EXEC to run. When the music "Midnight in Moscow" is playing the J & L change the starting level. S will start play and Q will quit. The game plays much like the original, especially at the higher levels. It uses the keys J K L for Left, Rotate, and Right. The space bar is used to drop a shape and the Z key to pause. To save this program to tape or disk, enter (C)SAVEM "TETRAPAK",26624,30955,26624.

10. **ELECTRON** - Electron is another Tom Mix favorite machine language game. To load the game enter LOADM "TRON" for disk or CLOADM "TRON" for tape. Enter EXEC to run. Electron is composed of four subgames. In order to move to the next level of play you must successfully complete all four subgames. Beam Buggy subgame - Pressing the joystick button gives you more speed as you try not to run into a wall before the computer does. Prachnid subgame - Prachnids surround you and will occasionally split in two. You must enter your transporter in the center of the screen. Forcefield subgame - Shoot a hole in the forcefield and reach safely above it. Maze subgame - You control the tank in the upper center of the screen. You must hit each of your opponents tanks three times before they hit you. To save this machine language game, enter (C)SAVEM "TRON",5632,16129,6400.

Ernie Di Zazzo from Quebec Canada sent us a very nice T&D salute which we have included on this month's issue. It is a very nice Coco 3 only program showing off some of the great graphics of the Coco 3. Simply load and run the first of three programs called T&D.

Until next month.....
