**DISK USERS:** Insert disk and run. **DISK CASSETTE TAPE USERS:** Rewind tape. Zero the tape counter. Fast Forward to desired program's tape counter number and enter "LOAD" or "UNLOAD". If while loading or running a program, you get a FC, CM, or SN error, you probably have to enter the PMODE and PCLEAR values from the keyboard. We try to put as many duplicates of the programs on tape as possible. If the first copy does not load, try the second copy, or if it has one, the third. If you cannot get the tape or disk to load the programs properly, then send it back for a prompt replacement.

Welcome to our 110th issue of T&D Subscription software. We have a great selection of software this month and we hope you enjoy these quality programs for the color computer. Thank you again for your continuous support of the Coco.

1. **WEDDING PLANNER** - This program is intended for anyone who is planning to have a wedding. It will do all the planning from catering of the reception to printouts of the guest list. You can also use this program to tell which parents are going to pay for what. Your first step in running this program is to add all the wedding data (flowers, church rental, candles, etc.). Next, simply start entering the item followed by the price, followed by a B or G depending on the Bride or Groom.

2. **PALADIN LEGEND** - Here we have a lengthy text adventure that pits you against the Arch Devil Glory in a fight for revenge. This adventure uses two word commands such as get chair or throw demon. If you ever need the list of verbs available just type in the command "VERB". Just keep fighting and bring a happy end to this world of fiction.

3. **TO-DO LIST** - Use this program to create a to-do list for any day of the year. This program features user-friendly prompts and menu commands to select the To-Do Display so you can see what events are planned on which day you choose. You can also save the information to tape or disk. Line 100 will allow you to change the starting date. The month is preset for September and the date is preset for 10.

4. **5 PRINTER GRAPHICS** - Here are five printer graphic programs for the Coco 3. The five programs are self running. Simply load and run any for the five programs. They are **HELLO, DIAMOND, ROSE, COLOROSE, and BUTTRFLY.**

5. **OLD-TIME PENNY SCALE** - Have you ever gone to a fair and paid a penny scale to give your weight and predict your future? Now the great fair classic is on your Color computer. Step on the scale and give it a try.

6. **MULTIPLY FRACTIONS** - This is an educational program that will help speed up your multiplying by fraction skills and in the process, teach a shortcut or two. This is a great program for a beginner or an adult that may need a little touching up on their math skills. You are first taken through step by step through the first problem.

7. **SIEGE ON SIRIUS 3** - The Sirian solar system is under attack! The aliens want to move in and take over. Your job is to defend the Sirian solar system from the aggressive on-comers. One or two players may play in this Coco 3 only graphic game. Use the left joystick to control the crosshairs & fire the multiple warhead torpedoes. The right joystick represents you. Use the right button to fire your lasers. In order to defeat the aliens they must be hit five times per level to blast through their shield.

8. **DISKBASE 3** - Here we have a Coco 3 version of an earlier program produced by us. This program requires two disk drives and a Coco 3. There is an instructional program called **DBINS** which precedes the main program.

9. **BIORHYTHMIC THEORY 3** - The biorhythmic theory implies that after you are born, you go through three repeating cycles dealing with your physical, emotional and intellectual aptitudes. This Coco 3 only program will tell you your state of mind after you give the program your birthday and today's date. Note: You must give the date information in the following format - Day, Month, Year. Try to find out how you should be feeling with this exciting program.

10. **MAZEY** - This Pacman/Ladybug clone with a twist is one of the most addictive games we have played in quite some time. The object is to rescue four moths from a maze of moving walls and escape fierce fighting monsters. Try to survive to make it to the exit. The most overwhelming quality of the program is that the maze is constantly changing. You can have a whole different maze from the time you start to the time you finish. Use the fire button to blast through walls or monsters in your travel.

We have included NFL 91 predictions for the 1990 season on this issue. The first program, **NFLINS**, will give you instructions on how to run **NFL91**. If you have any programs which are not copyrighted, please send them in. We would like to see them.

Until next month.....
