We would like to welcome you to our 113th issue. We have another set of ten program s for your CoCo and a star spangled banner bonus. We hope you enjoy it and the rest of our programs.

1. GRADE BOOK - This program will keep track of your grades on tape or disk. They can then be reviewed or even printed out. Just think, no more waiting until report cards to find out if you have to run away.

2. BINGO CHECKER - Bingo! We've found it. The perfect program for all you bingo enthusiasts out there. You can now keep track of 12 different cards. Just enter the numbers as they're called and let the machine do the rest. When you get close to bingo on any card, a bell will sound. There are additional instructions built into the program.

3. CAVERNS OF OH NO - Oh, no! You're lost in a cavern. Can you find your way out? In this text adventure you must make you way out of the cavern using the common commands for text adventures. Just type "words" to get a complete list of the commands.

4. **BEAUTY PAGEANT** - Finding it difficult to figure out who's winning the pageant? Well, this program will keep track of the scores for up to twelve contestants. If nothing less, it's a great excuse to watch the swimsuit competitions.

5. **TELESALE** - This program is a great utility for small or home business. It will allow you to keep track of your current, future, or prospective clients. The data fields are separated into a variety of fields including address, phone number, contact, and salesman. This data can then be printed to a printer or onto printer labels.

6. **CRYPTOQUIP** - This is a great puzzle game. With the program is a data file with fifteen quotes, in code. It is your task to figure out what the message is. For instance, A could equal S. So where ever you see an A, you could substitute an S. You can make up your own scrambled words and input them into the machine for your friends by running CODER. Use these promises to be hours of fun.

7. **CRIONAUNT WARRIOR 3** - In this Coco 3 only graphics game, you are trapped in a building with 468 rooms. Unfortunately, there are some killer robots trapped with you. Can you exit the building before they kill you or the timer runs out? Use your arrow keys to control your journey through the building and the space key for firing.

8. **PICTURE 3** - This program will allow you to view and print binary pictures. It will give a directory of your drive from which you can choose the program you wish to view. If you like, it can then be printed to a printer. Even the printers baud rate is select able. The printers to choose from are the DMP-106 and the DMP-105.

9. **SOLITAIRE PUZZLE** - This program provides you with a highly addictive puzzle game. You begin with a row of red pegs on the right and a row of blue pegs on the left. The object of the game is to move the red pegs to the left, and the blue pegs to the right by moving the pegs only 1 or 2 holes at a time. Good luck and don't get frustrated.

10. **FROGGY** - Here we have a very good Frogger clone. In this machine language program you must try to make your way across the highway and the river to the safety of your Lilly pad. But be careful! It's rush hour, and the roads are full of traffic. Not to mention the alligators in the river, or the fristy turtles that submerge while you are on their backs. Remember to look both ways before crossing the street. To save this ML program to tape or disk, enter (C)SAVEM "FROGGY", 7168, 15839, 15802.

Bonus: Star Spangled Banner - Just type Loadm "Star" and then "EXEC" and get ready for a surprise!

Until next month.....................
