GO	GNOME QUEST 2	3	4	100:319	58:271
		3	4	130:359	81:336

DISK USERS: Insert disk and run TRF. **CASSETTE TAPE USERS:** Rewind tape. Zero the tape counter. Press Forward to desired program's 1620 counter number and enter: CLOARD or CLOARDM.
If while loading or running a program, you get a FC, OM, or SM error, you probably have to enter the P.MODE and PCLEAR values from the keyboard. We try to put as many duplicates of the programs on tape as possible. If the first copy does not load, try the second copy, or if it has one, the third. If you cannot get the tape or disk to load the programs properly, then send it back for a prompt replacement.

Your first new CoCo subscription software issue of the year is in! Issue #115 is one of the best we've put out in recent months, and we're sure you are bound to find at least one of are programs to keep you thrilled for hours. So, pop in the tape or disk and let's go!

1. **Flies** - In this graphics game, you are pitted against man's most annoying foe: The FLY. Just like real life, you are trying to squash the fly, but unlike real life, these flies have had enough. When they become angry, they change color and squash you if you're not careful. Try to exterminate as many of the little pests before they exterminate you. If you find yourself getting frustrated, try not to let it "bug" you.

2. **Speech Hints** - Do you have a Speech/Sound cartridge? Having a problem finding software to run it? Then you're sure to love this program. Just type RUN "SPEECH", and marvel as your machine almost seems to come alive. Kids really enjoy listening to this one.

3. **Mountain Wars** - War is tough, and so is trying to destroy your enemy in this two player graphics game. Unfortunately, every time you get your enemies coordinates and pick him off, he moves positions, and the mountain between you changes size. Is a warrior's job never done?

4. **Super Copy and Kill** - This disk only utility program will save you time and aspirins by making copying and erasing files quick and easy. By merely typing RUN "CK", your life will become immensely easier.

5. **Darn** - Make sure you have a lot of spare time when you start playing this highly addictive game. The object of the game is to place square blocks against a wall. If two blocks of the same color touch, you lose. Also, the white wall is considered a block, so don't let any white blocks fall directly against the wall. If you find yourself in a spot where there is no where to safely drop a block, keep it. You will lose a point, but you won't lose the game. The only control needed in this game is the up arrow key to drop the blocks.

6. **Maze** - Time is of the essence in this one or two player game. You have to find your way through the maze, locate the key that opens the door, and make your way to the exit. Sounds easy, huh? Well it isn't. Not only are you being time, but controlling your dot through the maze without becoming stuck on the walls is very difficult. This game is much more fun with two players.

7. **Disk DIRECTORY** - Here we have a great menu program for the CoCo. The program will automatically read the directory from the disk and print it on the screen. All you have to do is choose the program you wish to run by typing the number that appears next to it. The program you selected will be loaded for you, and all you have to do is run it. This program even works with machine language programs.

8. **Backup** - Here we have another ML utility program that will save time and, as we all know, time is money. The program will quickly format either 35 or 40 track disks. It will also copy entire disks with the same ease. It is great for people who hate waiting for their machines. To load this disk only ML program, enter LOADM "BACKUP". Enter EXEC to run. To save this program, enter SAVEM "BACKUP",4461,4715,4461.

9. **Roman Checkers** - This is a very well done Othello clone for the CoCo. Match wits with either the computer, or a human opponent. The object of the game is to trap your opponents pieces between two of yours, either diagonally, horizontally, or vertically. Any pieces you trap, become yours. The players then take turns trying to steal each others pieces while keeping their own. The person with the most pieces at the end of the game, wins. To run this program, enter LOADM"ROMAN" for disk or CLOADM"ROMAN" for tape. Enter EXEC to run. To save this program, enter (C)SAVEM "ROMAN", 20480,28671,20480.

10. **Gnome Quest 2** - It's in! The sequel to Gnome Quest is in! Gnome Quest was one of the best CoCo 3 disk only games we had seen for quite awhile, and the new version is even better. In the first game, you were told that an evil wizard had stole three powerful weapons from the gnomes. The second game takes place after you have succeed in retrieving the Spirit Sword from the wizard, and are now ready to go after the FireSpirit, second of the gnome's great weapons. Unlike the first game, you now have the power of the Spirit Sword on your side. For a complete description of the game and the instructions, RUN "Manual". To load the program, enter LOADM "GO". To run the program, enter EXEC. The ML file GO will automatically load and execute three additional files called 2.BIN, 3.BIN, and 4.BIN. Have fun!

Until next month.....
