DISK USERS: Insert disk. Load and run 'MENU', CASSETTE TAPE USERS: Rewind the tape. Zero the tape counter. Fast Forward to desired program's tape counter number and enter 'LOAD'. Locations for the programs are set for the Commodore 1500 Cassette Unit. Your locations may vary slightly. If your tape or disk does not load properly, return it for a prompt replacement.

Welcome to the 118th issue of T&D software, we hope you enjoy this month's fine selection of software for the summer months. Thank you for your continuous support of the Color Computer.

1. **VOCAB TESTER** - This program will give any high school student great practice for the SAT or ACT tests for college. One hundred twenty five vocabulary words are selected at random for you to guess their definition. This program gives you a multiple choice answering system which is similar to the popular tests. At the end this test will estimate how many English words you know. I knew ninety-one thousand which is quite a bit for a two year college graduate.

2. **NOURISHED 3** - This is a linear maze game for the CoCo 3. The object is to travel over as much untraveled area as possible to gain nourishment. The player starts in the middle of the maze on the left side of the screen. An exit can be made at any time at an unbordered area of the maze. The level six closing screen gives you the option to try again or exit.

3. **EYE WITNESS 3** - Here is a cute one for the younger computer enthusiast. This memorization game for the CoCo 3 will test your skill at identifying faces. The object is to find the bad guy. After the bad guy is found you must press any key to move from face to face and press the enter key to select a face.

4. **TEMPERATURE CONVERSIONS** - This graphic program will teach the difference between Celsius and Fahrenheit. After a short demonstration of temperatures press the "C" or "F" key to set a sample of what the temp would be. This program also gives some simple formulas to use to calculate Celsius of Fahrenheit.

5. **GREEN HOUSE** - In this program you must try to regulate how much water and food each plant gets. Each plant is different and you will loose money for extra water and food not used. Although, you receive \$10 bonus for each plant that can be raised successfully.

6. **ADDITION TEST** - Make sure that you have your printer on line before you run this one. This teacher's aid will print twelve addition problems. The answers are then printed on a separate sheet of paper. Line #100 sets the printer for elongated font on Tandy printers. You can modify it to whatever font you need. This program will only work on a CoCo computer with extended color basic.

7. **DEMON FIRE** - The object of this game is to shoot down as many waves of aliens as you can. If an alien reaches the bottom of the screen, the game is over. You control your gun by moving the joystick and the fire button. How long can you keep earth from being attacked?

8. **UFO HUNTER** - You must protect your city from the invading UFOs! In 2 minutes how many UFOs can you shoot out of the sky? Your sights are controlled with the right joystick. Press the fire button to fire. Be careful, the UFOs will speed up as soon as you fire at them.

9. **SHADOW WORLD** - In this text adventure you must find out why all the animals you sent in a time travel experiment died. To move type the letter you want in the direction to move. Also, you can use verbs to do activities, for example: pull rope, open door. Good luck in finding the animals and watch your back at all times. Hint: The first part contains a stumper for some beginners. Make sure that you open the door, pull the rope and turn on the light to avoid the angry mob.

10. **SHOWDOWN IN THE SEWER 3** - The Teenage Mutant Ninja Turtles have hit the CoCo with this CoCo 3 game. The simple object of this graphic game is to defend yourself. When you see the crew of beasts that you have to face, you must prepare yourself for a challenge. To jump press the up arrow key. To attack, press the Right and Left arrow keys. To flip back, press the space bar. To load and run this machine language program, enter `LOADM"SHOW"` to load the program and enter `EXEC` to run. To save this program, enter `SAVEM "SHOW"`, 3584,20293,13185.

We are still having a shortage of good quality software submissions. If you have any, please send them in. Until next month.....
