# Graphics Designs

## GRAPHICS PROGRAM #14

Since we decided to make this month of TRS-80 Computing a graphics issue, I've written two graphics programs called DESIGN1 and DESIGN2. Each one draws a neat image that appears to spin on the PMODE 3 screen. For more graphics and animation, see the Programmer section.

### THE PROGRAM: DESIGN1

```
0 ' GRAPHICS DESIGN # 1
1 ' BY JOE AHERN
2 ' ECB REQUIRED
3 ' *****
5 PMODE 3,1
8 PCLS
10 SCREEN 1,0
41 FOR Z=1 TO 2

40 NEXT Y
```

## EDITOR'S NOTE...

Summer is almost over (unfortunately). August, being one of the hottest months in the summer, has really showed it this year (at least in Canton, MA. it has!). Another thing about the summer is everything starts to wind down - there is less CoCo activity because everyone has gone away on vacation or is at the beach. But once September is here we are back in full force and getting ready to put out the October (halloween) issue.

Another thing, is we haven't been getting submissions as much as we used to. What we are really lacking is programs. Our editorial staff are fresh out of ideas and that's why we depend on the CoCo Community for their BASIC programs. So your help will be greatly appreciated (Submission info found on last page). Also, try and spread the word to your friends and computer penpals about TRS-80 Computing. We are always looking for new subscribers.

Last but not least, you may have noticed on the front cover that this is our "anything" issue. We have decided to dedicate this issue to anything we want. This year we happen to make it our graphics issue and again depend highly on the CoCo Community to enter in some of their artwork. We enjoy making this magazine for the benefit of everyone. Thank you.

Oh by the way, notice something about this issue - no more purple ink! (ha ha!!)

### *Computer Penpals*

**the following people are proud owners of Color Computers and would like to have penpals to talk about their CoCo and exchange ideas. NO PIRACY!**

# THE SMILING CAT

4K  
CB  
GRAPHICS

Here's another graphics program for you graphics lovers. This one draws a picture of a smiling kitty that resembles a famous cat. It uses the simple SET graphics. So for those of you that donot have Extended Color BASIC, you can use this also.

THE PROGRAM: SMILECAT

## SPECIALS (REPORTS, PROGRAMS, ETC...)

In past issues of TRS-80 Computing you may have seen this section once in a great while. That's because it was an optional section and was put in when we had something to take up space. Starting this month, we decided to make this section come out every consecutive month. This will also take place of the "What's On Sale" section.

### THIS MONTH: TEXT DESIGNS

You can have your Color Computer print patterns on the text screen by using asterisks (\*), and also have messages go in different directions on the screen by using TAB commands. Try the programs below:

```
5 FOR H=1 TO 100
10 PRINT "COCO";
15 NEXT H
- Fills up the screen
  with "COCO"
```

```
5 FOR H=1 TO 25
10 PRINT TAB(15); "COCO"
15 NEXT H
- Prints "COCO" in one big
  column down the screen
```

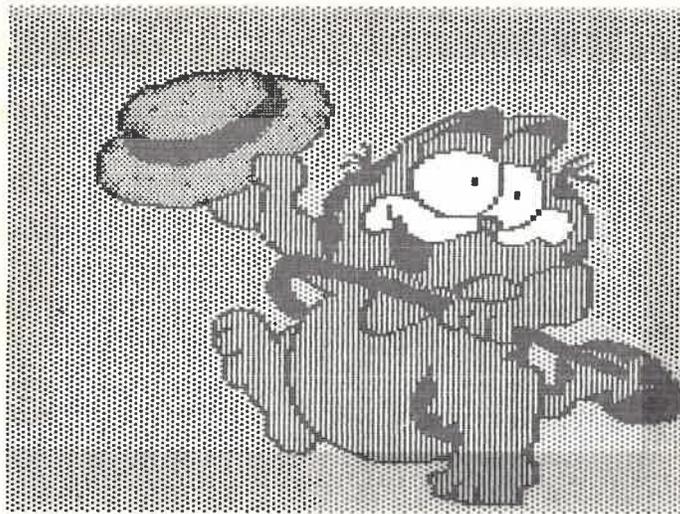

```
5 FOR H=25 TO 1 STEP -1
10 PRINT TAB(H); "COCO"
15 NEXT H
- Starts at the top right
  and descends down to
  the bottom left with
  our favorite computer
```

```
5 CLS
8 A=15
10 PRINT TAB(A); "*"
12 FOR H=1 TO 9
15 PRINT TAB(A-H); "*";
20 PRINT TAB(A+H); "*"
25 NEXT H
```

- Prints an up arrow  
using asterisks

```
5 CLS
8 A=15
12 FOR H=9 TO 1 STEP -1
15 PRINT TAB(A-H); "*";
20 PRINT TAB(A+H); "*"
25 NEXT H
30 PRINT TAB(A); "*"
- Prints a down arrow
  using asterisks
```

# THE PROGRAMMER

A U G U S T

THIS MONTH'S PROGRAM

THE FLYING BIRD

THE FLYING BIRD  
BY DAVID MCNALLY

16K  
GRAPHICS  
ANIMATION

REQUIREMENTS: NONE

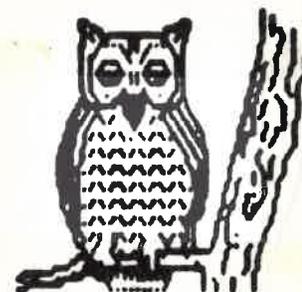

The one thing people look for the most in graphics is animation. Since this month is a graphics issue, I decided to work on some simple animation using CHR\$ codes and PRINT@ commands. As you can see by running the program, 16K animation works quite well. After keying in the listing (being especially careful when entering the CHR\$ codes; as for one little mistake could mess up the whole program), enter all four birds colors. The colors go like so:

1-yellow           5-cyan  
2-blue             6-magenta  
3-red              7-orange  
4-buff

Then sit back, and watch the bird take off.

ATLANTA

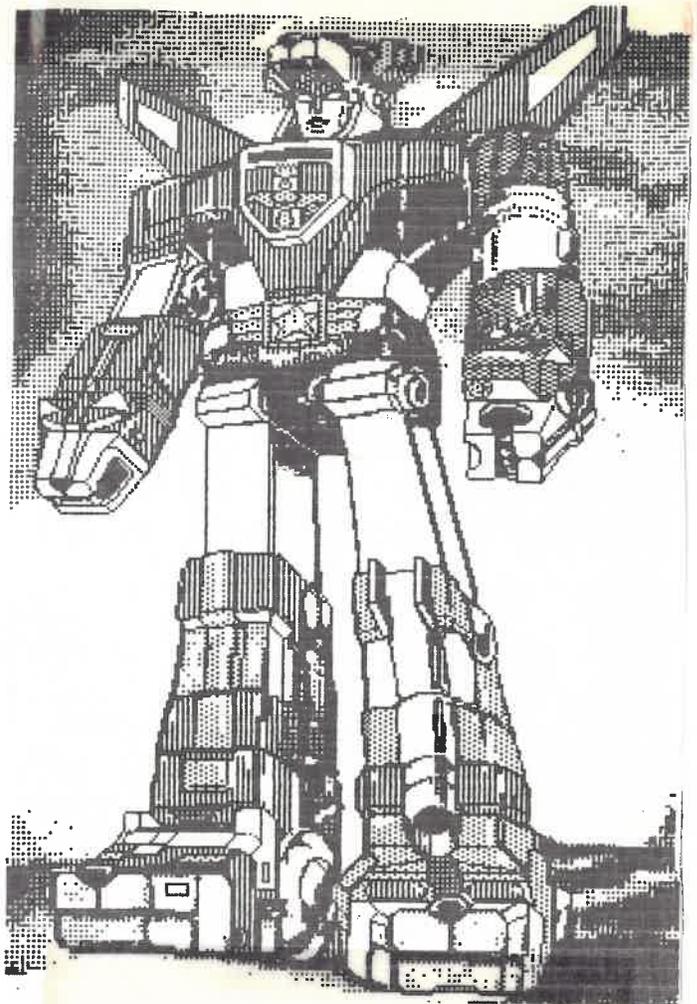

# GRAPHICS CONTEST

WINNER FOR AUGUST  
GRAPHICS CONTEST IS:

\*\* ALBERT NOAK \*\*

ALBERT USED COCOMAK II  
AND HIS COCO 2 TO CREATE  
THIS REALISTIC PICTURE OF  
VOLTRON.

## \*\*\* COMPUTER TRIVIA! \*\*\*

1. American Standard Code for Information Interchange stands for what?
2. What is a symbol used to represent information, such as numerals, letters, etc... ?
3. What is the exchange of information through transmission and reception between two locations?

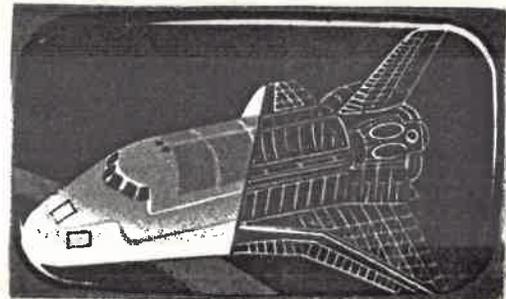

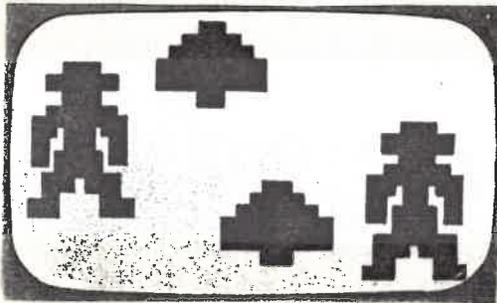

...ANSWERS FOR COMPUTER TRIVIA WILL BE FOUND ON THE LAST PAGE OF THIS ISSUE...

**ATTENTION OS-9 ENTHUSIASTS** - IN A FUTURE ISSUE OF TRS-80 COMPUTING WE WILL BE HAVING A SERIES OF ARTICLES ON OS-9. WE WANT TO KNOW FROM YOU, THE READERS, ON WHAT TYPE OF ARTICLES YOU WOULD LIKE (PROGRAMMING, INTRODUCTION, ETC...). DROP US A LINE AND LET US KNOW WHAT YOU WOULD LIKE TO LEARN MORE ABOUT ON OS-9.

## High Resolution Graphics Tutorial

By Joe Ahern

Computer graphics is one of the most exciting features of any computer. There are different resolutions of graphics such as low, medium, and high resolution. The more resolution your picture has the more memory it takes up on your computer. For example, if you had a picture with very low resolution (63x43 pixels) you would only need 1K of memory. But, if you had a picture with very high resolution (512x512 pixels) you would need a computer with at least 128K of memory (See examples below).

Animation is another breakthrough in computer graphics. The effect of this is say for example you had an owl flying down to the ground. You would take four versions of the character and store them in different positions. You would then display the different versions as the owl descends (See figure 1).

Although the big thing of computer graphics is how the "commands" differ from computer to computer. For the next couple of months, I am going to have a tutorial on how to create your own pictures in BASIC on your Tandy Color Computer.

Last month, David McNally concluded his beginner's tutorial by talking about low resolution graphics on a non-extended Color Computer. Now I am going to take over by explaining to you on how to go about drawing pictures on a CoCo with Extended Color BASIC.

First of all, when drawing high resolution graphics on your CoCo you have to kind of prepare or "initialize" by using three (3) main commands: PMODE, PCLS, and SCREEN.

### PMODE

PMODE sets the graphics resolution and starting page for a high-res picture. There are four graphics modes (levels of resolution) and eight starting pages. The syntax of PMODE is:

PMODE mode, startpage

If you donot specify a PMODE command the default would be mode 2, startpage 1 (PMODE 2,1).

An example of PMODE would be: PMODE 3,1. This sets the graphics mode to 3 (medium resolution) and the startpage to 1 (See figure 2 for PMODE settings).

## PCLS

PCLS is one of the simplest graphics commands in Extended Color BASIC. It simply clears the current graphics screen to a specified color. If you omit the color it clears it to the background color, which is just like CLS (clears the screen), only PCLS clears the graphics screen. The syntax for PCLS is: PCLS color. For example PCLS 4 clears the graphics screen to red. Figure 3 shows a table of all the proper codes for various PMODES, color sets, and PCLS colors.

## SCREEN

The SCREEN command is used for displaying the current graphics or text screen. The syntax for SCREEN is:

SCREEN type, colorset

Where "type" can be 0 for a text screen and 1 for a graphics screen, and "colorset" would be 0 or 1.

What SCREEN is really doing is telling the computer to display a screen image on your TV. You then go about by telling it to use the TV screen for text or graphics, and then what colorset to use (0 or 1).

An example of SCREEN is: SCREEN 1,0. This tells the computer to use a graphics screen (1) and colorset 0. The variety of colors in colorset 0 and 1 are shown below:

```
COLORSET 0 GREEN/YELLOW/BLUE/RED
COLOR SET 1 BUFF/CYAN/MAGNETA/ORANGE
```

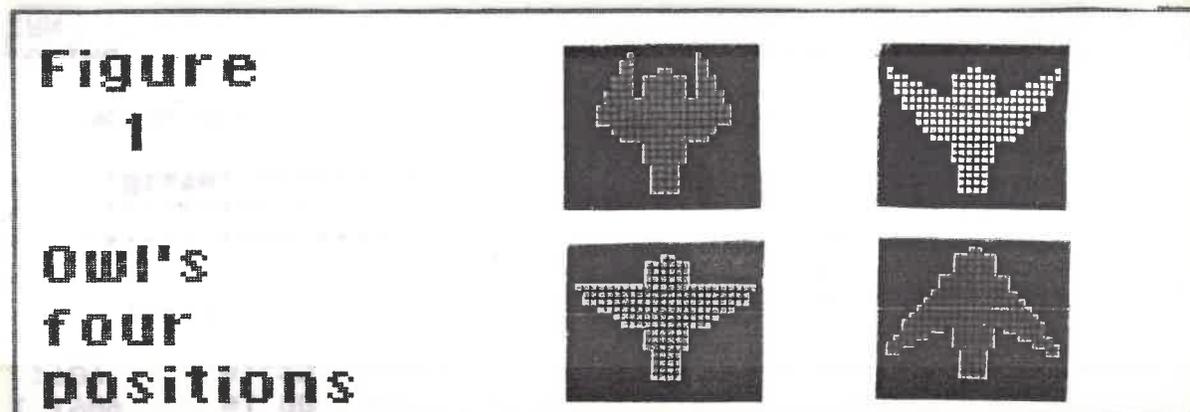

Actually colorset 0 is: CLS(1)-CLS(4) and colorset 1 is: CLS(5)-CLS(8).

By putting everything together on the 3 commands you just learned you should have a program started somewhat like this:

```
1 PMODE 3,1
2 PCLS
3 SCREEN 1,0
```

This "initializes" the computer and prepares it to display high-resolution graphics.

Next month we will discuss the ECB graphics commands in order to plot points on the screen using: PSET, PRESET, PPOINT, and LINE.

**FIGURE 2 - PMODE SETTINGS**

	RESOLUTION	COLORS	SCREENS
PMODE 4	HIGH	2	2
PMODE 3	MEDIUM	4	2
PMODE 2	MEDIUM	2	4
PMODE 1	LOW	4	4
PMODE 0	LOW	2	8

**FIGURE 3 - PMODES & THEIR COLORS**

PMODE	COLOR SET	PCLS COLORS
4	0	BLACK/GREEN
	1	BLACK/BUFF
3	0	GREEN/YELLOW/BLUE/RED
	1	BUFF/CYAN/MAGNETA/ORANGE
2	0	BLACK/GREEN
	1	BLACK/BUFF
1	0	GREEN/YELLOW/BLUE/RED
	1	BUFF/CYAN/MAGNETA/ORANGE
0	0	BLACK/GREEN
	1	BLACK/BUFF

TRS-80 COMPUTING ORDER FORM

I WANT:

- .... 3 ISSUES FOR \$7.33
- .... 6 ISSUES FOR \$10.66
- .... 12 ISSUES FOR \$15.99
- .... 1 ISSUE TO TRY IT \$1.25

I WILL PAY BY:

- .... CASH
- .... CHECK

NAME.....

ADDRESS.....

CITY.....STATE.....ZIP CODE.....

- \* MAGAZINES ARE SENT FIRST CLASS, AND IN YELLOW MANILLA ENVELOPES FOR CUSTOMERS LIVING OUTSIDE OF THE NEW ENGLAND STATES.
- \* WE ARE NOT RESPONSIBLE FOR ISSUES YOU DON'T RECEIVE AFTER WE SEND IT, BUT WE DO CHECK AFTER THE FIRST ISSUE TO SEE IF YOU GOT IT ALRIGHT.
- \* POSTAGE IS INCLUDED IN ALL PRICES.
- \* PLEASE PAY EXACT CHANGE.
- \* A RECEIPT WILL BE GIVEN WITH THE FIRST ISSUE YOU RECEIVE.

TOTAL PRICE INCLUDES:

- \* \$1.25 FOR EACH ISSUE.
- \* POSTAGE COST TO SEND MAGAZINE.  
(APP. \$.93)

THANK-YOU

SIGNED *Joe Ahern* AND *David McHally*

# COMPUTER WORD SEARCH PUZZLE

In the word search puzzle below, there are 20 words relating to computers and our magazine. The first person who can find all 20 words by September 1st, 1989, will receive their next single issue free or a bonus issue on their long-term subscription. The entry with the most recent postmark will be accepted. If not all the words are found, then the next person with the most recent postmark wins. The winner of the contest will receive a prompt notice. Good Luck! (HINT: SOME OF THE WORDS ARE BACKWARDS)

DELUXE MUSIC  
MACHINE

When I first received Deluxe Music Machine I wasn't exactly jumping for joy. The reason being, I'm not very good with working with music. Fortunatley all that has changed.

Deluxe Music Machine comes with two pages of instructions and runs on a cassette or disk based CoCo, please specify when ordering.

The program doesn't really need any instructions at all, it is menu driven and I had no problems running it. I always run a program before I even pick up a manual, and I'll be the first to say that it passed this test with no problems at all.

Of course Deluxe Music Machine has a SAVE and LOAD option so that you can store all the works of art that you're bound to come up with. Being a programmer myself, I really like the way the music data is saved. Why?, you may ask. Very simple. It is very easy, and I mean VERY, to implement the music in a basic program that you have written. First you must convert the Data File into a BASIC File using the utility CONVERT that is included with the program. Then simply renumber the program and MERGE it into your BASIC program.

I've added music to a couple of programs that I have written, using music created with Deluxe Music Machine of course, and it really seemed to add a certain depth to them that wasn't there before.

You can set the TEMPO (length) of any note, you can also pause between notes (you decide how long), you can delete a note that you don't want (only in record mode), you can clear the memory after you have saved a piece you are working on or if your song isn't going to well you can use this to start over, and you can also print out a hardcopy.

Now to tell about PRACTICE and RECORD mode. This is the part of the program that I really enjoy. As I said at the beginning, I'm not very good with music, but with the practice and record mode I turned out a pretty decent copy of the Star Wars theme.

In Practice mode you can try out different notes until you find something you like. Then you can hit your Right-Arrow key to go into the Record mode and repeat the notes, flip back to Practice, find something you like, go back into Record mode, repeat the notes, and pretty soon you have a song to be proud of. \*NOTE\* Anything you play in the Practice mode WILL NOT be saved in the computer's memory. You have to be in Reccord mode to do that.\*

You can also play back your song at any time by choosing the playback option.

I would like to try something that may seem a little new here. Anyone who has purchased a copy of Deluxe Music Machine and has created a song with it can send the song on tape or disk to TRS-80 Computing - C/O Albert Noah. I will in turn pick the best three songs received and send the person(s) who created it a Utility, Game (Arcade), Adventure (Text), and Mailing Label program from Noah Game Co. (A \$6.00 value).

I will also return any tapes or disks received (Please send two .25 cent stamps to defray postage costs).

I will also announce the winners and runner ups in a future issue.

To order Deluxe Music Machine please send \$4.95 + \$2.00 shipping and handling to:
