

Speech Systems

38 W. 255 DEERPATH ROAD BATAVIA, ILLINOIS 60510
(312) 879-6880

COCO 3 Compatibility

Through good software and hardware engineering, and a little luck, all Speech Systems products are compatible without modification with the new Tandy COCO 3 except as noted below.

EARS (Disk System)

1. Turn computer on.
2. EXEC &HE010
3. EXEC &H8002

EARS (Tape System)

1. Turn computer on.
2. EXEC &H8C2E

now continue as indicated in the manual, for example LOADM "EARS"

COCO MIDI II, Casio Librarian, & DX Librarian

The following steps are necessary only if you use a Radio Shack MULTI-PAK. Skip these if you use a "Y" cable.

1. Your disk controller must be in slot 4.
2. COCO MIDI must be in slot 3.
3. Turn on the computer.
4. POKE 65407,51 : EXEC 57360 (This must be on 1 line)
now continue as indicated in the manual
5. LOADM "COCOMIDI" or one of the librarians
6. etc.

SUPER VOICE

The SUPER VOICE requires both a hardware and software modification to work with the COCO 3. If you purchased your unit before February 1987 you have a COCO 1 & 2 version only. The COCO 3 version is indicated by a RED label on both the disk and the ROM PAK box.

Those wishing to upgrade, may return their SUPER VOICE hardware cartridge with \$20 plus P&H \$3 after the end of February. The price includes hardware modification and new software.
