EARTHQUAKE!

You have just been appointed EARTHQUAKE CONTROL OFFICER (ECO-1) for HOMETOWN. You started the job only a week ago so that you are only just becoming familiar with all the aspects of the work.

Suddenly you receive reports from your outstations that indicate an EARTHQUAKE will shortly hit HOMETOWN!

You must take immediate action to discover data about the EARTHQUAKE. Triangulate an accurate prediction of the location of the epicentre and the expected magnitude by using your high technology LASER DRILL UNITS and the recently invented GRAVOMETER PROBES.

Remember that you will need to control the evacuation of the population of HOMETOWN in the event of a quake so you will need to know all about the various kinds of transport available to move people out of the danger zone.

You will need to calculate how many you can evacuate by ROAD, RAIL, FOOT, PLANE or BOAT.

Only when you possess all the hard facts about the threatened EARTHQUAKE and the EVACUATION of HOMETOWN will you be able to deal with the emergency and save the lives of the population including your own!

Are you up to the job?

Has HOMETOWN made a big mistake in appointing you?

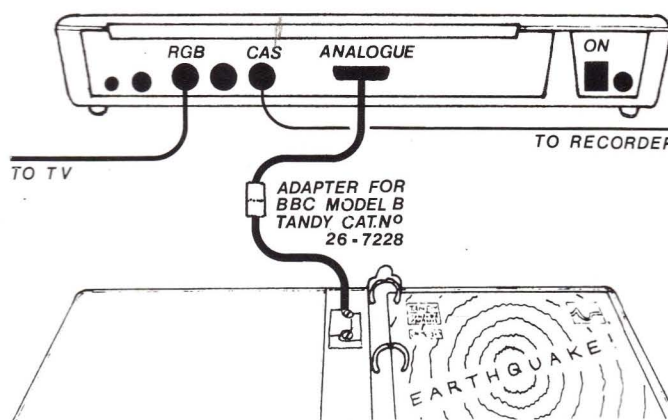

How To Connect

Tandy 16K Extended BASIC Colour Computer

To load the program type CLOAD"" & press ENTER on the keyboard. Press PLAY on the recorder. When loading is complete type RUN and press ENTER. Keep the PLAY button depressed until titles appear and then press STOP.

Acom BBC Model B

To load the program type CHAIN"" and press RETURN on the keyboard. Depress PLAY on the recorder.

How To Begin Press BIG 'E' On Page 1

Comet Blamed

DR. O. L. MOORE today blamed the return of Halley's Comet for the earthquake that woke Britain early.

He added that all the recent tremors felt across Europe could be linked to the coming of the comet.

Dr. Moore predicted that the world can expect drought and floods to bring a series of disaster
