

# BALLDOZER

**KOUGA**  
SOFTWARE

Surely the best version of 'Break Out' available on the Dragon to date. All the fun and addictiveness of the Arcade 'Arcanoid', with a few devious new problems to face.

## **BALLDOZER**

Surely the best version of Break Out on the Dragon to date. It received 4 Dragons from Mike Stott in 'Dragon User'. Not only do you get the addictiveness, but an up to date bonus scheme aswell. Floating down from the Bricks that you hit are Add-Ons such as Lasers, Powerballs, Catchers, Extra Speed for your Bat and Slowing Down the Ball. These are just a few of the great features used in the very popular Arcade Coin-Op 'Arkanoid' which was a great success when converted to other 8 Bit and 16 Bit computers.

There are 30 screens full of deviously placed Bricks, each one requiring a different method to complete. Then after all that you are sent to the final confrontation on Level 31. Little is known about this screen, but it is said to be the best by those who have seen it.

The game comes complete with its very silly story line incorporated in to a scrolling loading message. It has the best possible graphics that can be used in a Brick shape, and fabulous sound effects adding to even more to the atmosphere of this great game. Yet another challenging game from KOUGA.
