PLAYING THE GAME

The object of CAVE FIGHTER is to score as many points as possible by flying through the cave system and destroying the enemy fuel dumps.

Bombing fuel dumps also helps to replenish your own fuel level, which is indicated by the line at the bottom of the screen.

As you fly in the caves you must shoot your way through the force walls and avoid the enemy missiles launched against you. As a reward for success, bonus ships are awarded every ten thousand points.

The right hand joystick controls the ship's flight and pressing the fire button shoots the laser, drops bombs, and is used to start further games.
