

## Guarantee

J. Morrison (Micros) guarantees, that in the unlikely event of any tape not loading, to replace it immediately with one of the same title. This guarantee extends to accidental damage by the user as long as the cassette is returned to us in its original packaging to the address below. We will replace it by return of post - **Please note** that it will only be replaced by **a cassette of the same title.**

**N.B.** Where it is stated that games do not require joysticks, these should be removed before loading the tape.

## RIVER OF FIRE - A GRAPHICS ADVENTURE FOR THE DRAGON

A clinic uses the waters of a dormant volcanic island - Disaster looms - Can you take on mother Earth and save the day?.

To load the game, enter CLOADM and play the cassette.

To play, press any key and the title page will be replaced by a split screen showing pictures, text and input space. The cursor back-space does not erase so you can go back to over-type mistakes. When your entry is to your liking press ENTER and new text and pictures will appear when appropriate.

Previous text will scroll up, and the start of the new text is marked. Certain commands can be given as a single letter:-

N,E,S,W serve for GO NORTH etc

L means "look", ie repeat location description.

I means "inventory", ie shows what you got.

Other abbreviations can be used, provided that each abbreviated word ends with a full stop. The game will accept it as meaning the first word it knows beginning with those letters. The more you give, the less chance of error, it's part of the game to see what you can get away with!.

Movement in confined "mazes" is achieved with the arrow keys with the SHIFT held DOWN. Use LEFT and RIGHT to point yourself and UP to proceed, without ENTER. The normal word entry is still available, unshifted LEFT and RIGHT moving the cursor as before.

To SAVE game, think of a "filename" of up to 8 letters, get out of any maze and type "SAVE filename", set the cassette to record and press ENTER. Your game will be saved as a short "machine code program" with the name.

To use it, ~~load RIVER OF FIRE as normal~~ and follow the PREVIOUS GAME options.

RIVER OF FIRE is designed to be friendly to play, but can you win?.

### PREVIOUS GAME

To restore a previous game, CLOADM the savegame file first. Then CLOADM the game.
